## I. WELCOME

Thank you for purchasing our theme. We hope to guide you through all the aspects of the theme installation and the theme setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

## II. SERVER REQUIREMENTS

PHP configuration:

- "memory\_limit" need to be at least "64M"
- "upload\_max\_filesize" need to be at least "16M"
- "allow\_url\_fopen" need to be set to "on"
- "register global" should be set to "off"
- "safe\_mode" should be set to "off"

Extensions required:

- GD

- cURL
- SimpleXML
- SOAP

File permissions:

- All files need to be "664"
- All folders need to be "755"

### III. INSTALLATION

Before installing the theme, you need to install a Prestashop 1.7.x website on your server. For more information of how to install Prestashop, you can check [here](#).

#### **NOTE:**

- Since the install package is larger than 2MB, therefore you should increase the "**Maximum size for attached files**" value of your site ("**Configure**" > "**Advanced Parameters**" > "**Administration**" page). We recommend the minimum value of 30 MB.
- After successfully uploading the install package, you can change this parameter back to the initial value.
- You can also contact the host manager to increase the "max\_upload\_filesize" value of your server to be able to upload larger file.

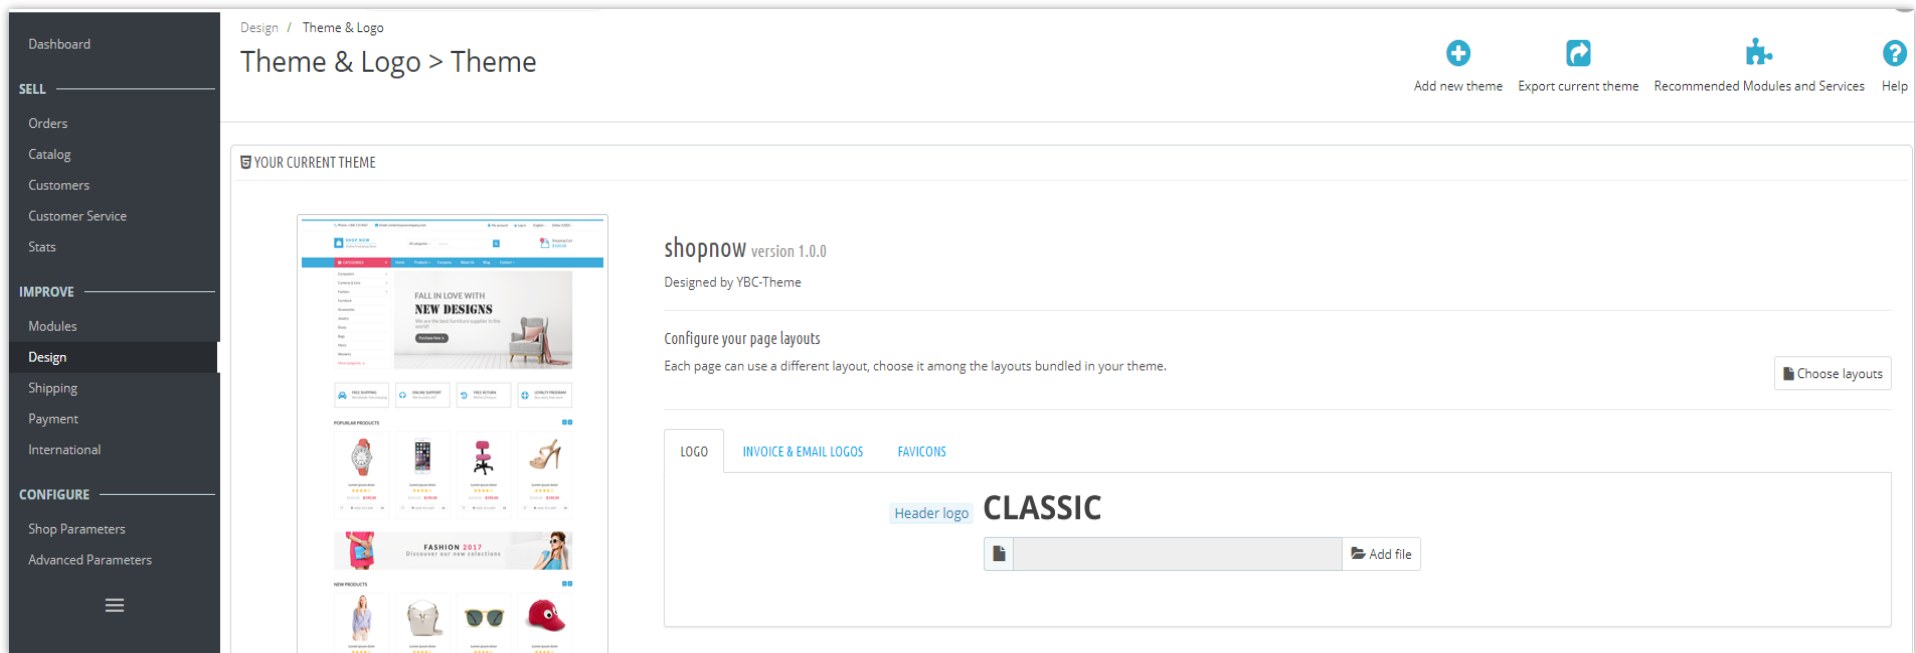

The screenshot shows the PrestaShop Administration interface. The top navigation bar includes the PrestaShop logo, version 1.7.7.2, a search bar, and utility links like 'Debug mode', 'View my shop', and 'Help'. The left sidebar contains a menu with categories: SELL (Orders, Catalog, Customers, Customer Service, Stats), IMPROVE (Modules, Design, Shipping, Payment, International), and CONFIGURE (Shop Parameters, Advanced Parameters, Information, Performance, Administration, E-mail, Import, Team, Database). The 'Administration' menu item is highlighted with a red box. The main content area is titled 'Administration' and contains two sections: 'General' and 'Upload quota'. The 'General' section has four settings: 'Automatically check for module updates' (radio buttons for NO and YES, with YES selected), 'Check the cookie's IP address' (radio buttons for NO and YES, with YES selected), 'Lifetime of front office cookies' (text input field with value 480), and 'Lifetime of back office cookies' (text input field with value 480). The 'Upload quota' section has three settings: 'Maximum size for attached files' (text input field with value 30 and a dropdown menu set to 'megabytes'), 'Maximum size for a downloadable product' (text input field with value 2 and a dropdown menu set to 'megabytes'), and 'Maximum size for a product's image' (text input field with value 2 and a dropdown menu set to 'megabytes'). A red box highlights the 'Maximum size for attached files' setting. Both sections have a 'Save' button at the bottom right.

## ❖ Upload theme

Follow these steps to install our theme manually:

- Login to your back office and navigate to **Design > Theme & logo** and click on "Add new theme".

- From "IMPORT FROM YOUR COMPUTER" section, choose your theme file (**shopnow.zip**) from the "theme" folder in the download file and click "Save".
- Choose the theme you uploaded and click "Use this theme".
- Upload logo Navigate to "Theme & Logo / Theme", select and upload your website logo

## ❖ Image

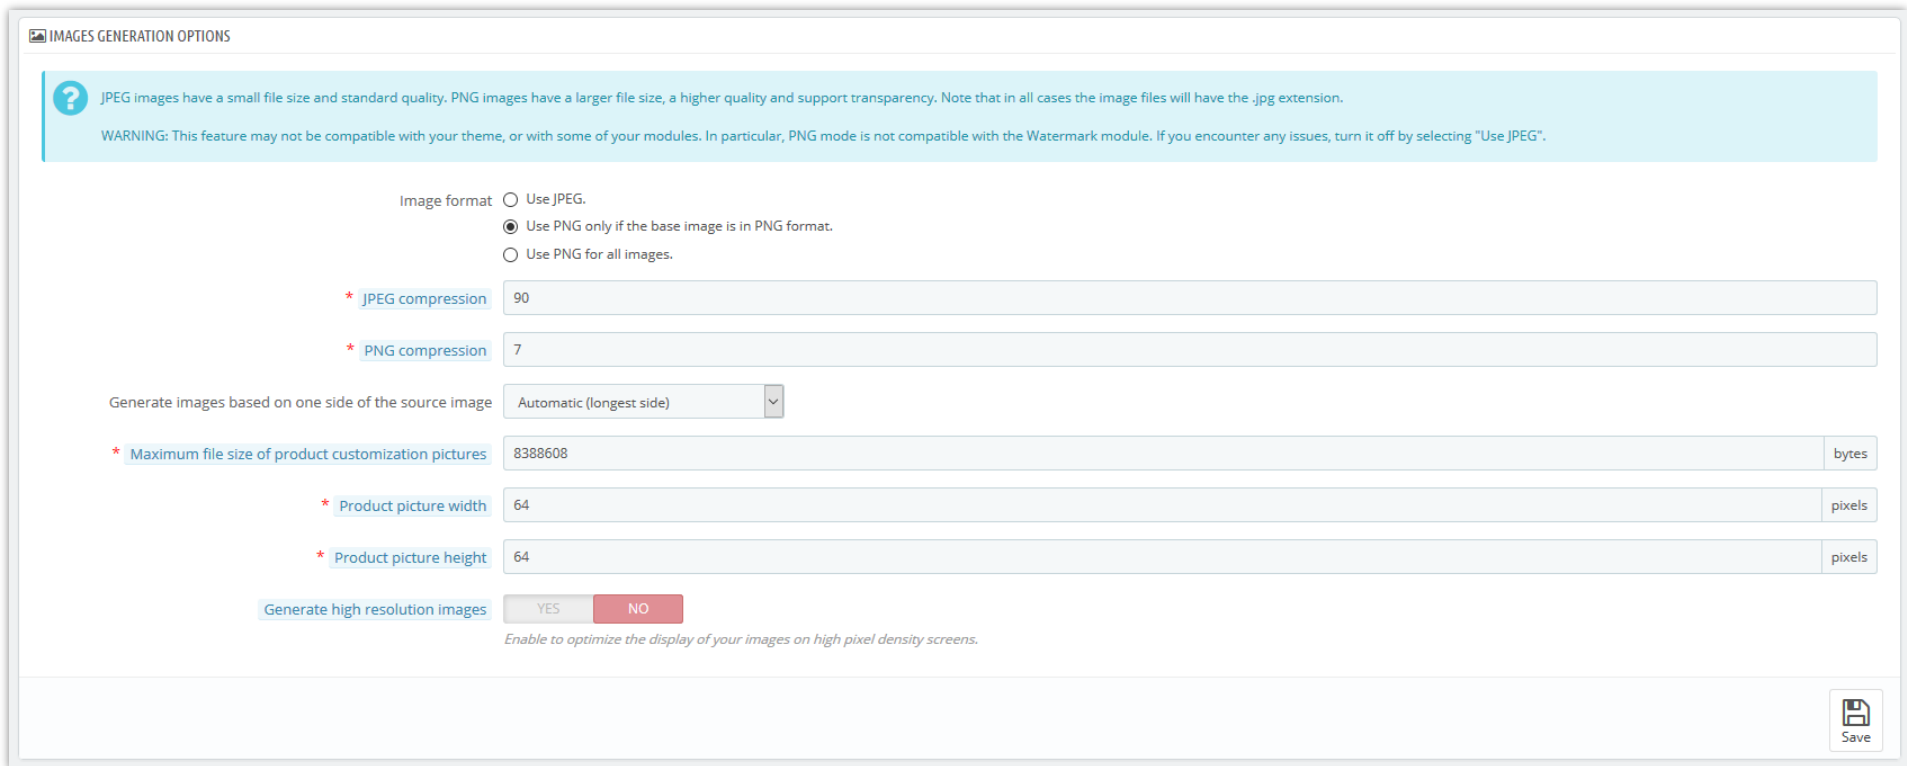

Navigate to "**Design / Image settings**". Make sure your image sizes are configured as below:

IMAGE SETTINGS 7

ID	Name	Width	Height	Products	Categories	Brands	Suppliers	Stores		
--	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

Bulk actions ▾

Set up image quality that you prefer to use on your website.

The image shows a settings panel titled "IMAGES GENERATION OPTIONS". At the top, there is a light blue banner with a question mark icon and text explaining that JPEG images have a smaller file size and standard quality, while PNG images have a larger file size, higher quality, and support transparency. A warning below states that the feature may not be compatible with certain themes or modules, specifically mentioning that PNG mode is incompatible with the Watermark module. The main settings area includes: "Image format" with three radio button options: "Use JPEG", "Use PNG only if the base image is in PNG format" (which is selected), and "Use PNG for all images"; "JPEG compression" set to 90; "PNG compression" set to 7; "Generate images based on one side of the source image" set to "Automatic (longest side)"; "Maximum file size of product customization pictures" set to 8388608 bytes; "Product picture width" set to 64 pixels; "Product picture height" set to 64 pixels; and "Generate high resolution images" with "YES" and "NO" buttons, where "NO" is selected. A note below this option says "Enable to optimize the display of your images on high pixel density screens." A "Save" button with a floppy disk icon is located in the bottom right corner.

**IMAGES GENERATION OPTIONS**

? JPEG images have a small file size and standard quality. PNG images have a larger file size, a higher quality and support transparency. Note that in all cases the image files will have the .jpg extension.

WARNING: This feature may not be compatible with your theme, or with some of your modules. In particular, PNG mode is not compatible with the Watermark module. If you encounter any issues, turn it off by selecting "Use JPEG".

Image format  Use JPEG.  
 Use PNG only if the base image is in PNG format.  
 Use PNG for all images.

\* JPEG compression 90

\* PNG compression 7

Generate images based on one side of the source image Automatic (longest side) ▾

\* Maximum file size of product customization pictures 8388608 bytes

\* Product picture width 64 pixels

\* Product picture height 64 pixels

Generate high resolution images  YES  NO

*Enable to optimize the display of your images on high pixel density screens.*

Save

Regenerate image thumbnails:

 REGENERATE THUMBNAI

 Regenerates thumbnails for all existing images  
Please be patient. This can take several minutes.  
Be careful! Manually uploaded thumbnails will be erased and replaced by automatically generated thumbnails.

Select an image

Erase previous images

*Select "No" only if your server timed out and you need to resume the regeneration.*

  Regenerate thumbnails

## IV. IMPORT SAMPLE DATA

You can quickly import our sample data to your Prestashop website to make it the same as our demo website.

Go to "**Modules & services / Installed modules**", click on "Configure" of "Theme options" module.

The screenshot displays the PrestaShop administration interface for managing installed modules. The main heading is "Manage installed modules" under the "Modules" section. The page is divided into three tabs: "Selection", "Installed modules" (which is active), and "Notifications".

On the left sidebar, the "Modules & Services" menu item is highlighted with a red arrow. The main content area lists several installed modules:

- Category tree links** (v2.0.0 - by PrestaShop): Adds a block featuring product categories. ... [Read More](#). Configuration button: CONFIGURE.
- PRO blog - All in one package** (v1.0.1 - by YBC-Theme): PRO Blog - All in one package is the most powerful, flexible Prestashop blog module. Configuration button: CONFIGURE.
- Newsletter subscription** (v2.0.0 - by PrestaShop): Adds a form for newsletter subscription. [Read More](#). Configuration button: CONFIGURE.
- Theme options** (v1.0.1 - by YBC-Theme): Configure your theme. Configuration button: CONFIGURE. This row is highlighted with a red box, and a red arrow points to the CONFIGURE button.
- Dashboard Products** (v2.0.2 - by PrestaShop): Adds a block with a table of your latest orders and a ranking of your products ... [Read More](#). Configuration button: DISABLE.
- Best suppliers** (v2.0.0 - by PrestaShop): Adds a list of the best suppliers to the Stats dashboard. [Read More](#). Configuration button: DISABLE.
- Browsers and operating systems** (v2.0.0 - by PrestaShop): Adds a tab containing graphs about web browser and operating system usage to the Stats dashboard. Configuration button: DISABLE.

At the top right, there are buttons for "UPLOAD A MODULE" and "CONNECT TO ADDONS MARKETPLACE". The top right corner also shows "Shop now", a notification bell with a "10" badge, and a user profile icon with a "Help" link.

Open tab "**Import sample data**", choose type of data that you want to import.

Clear / disable cache after importing sample data. This feature will override your old data of the selected section(s) that you will import sample data

Reset Save

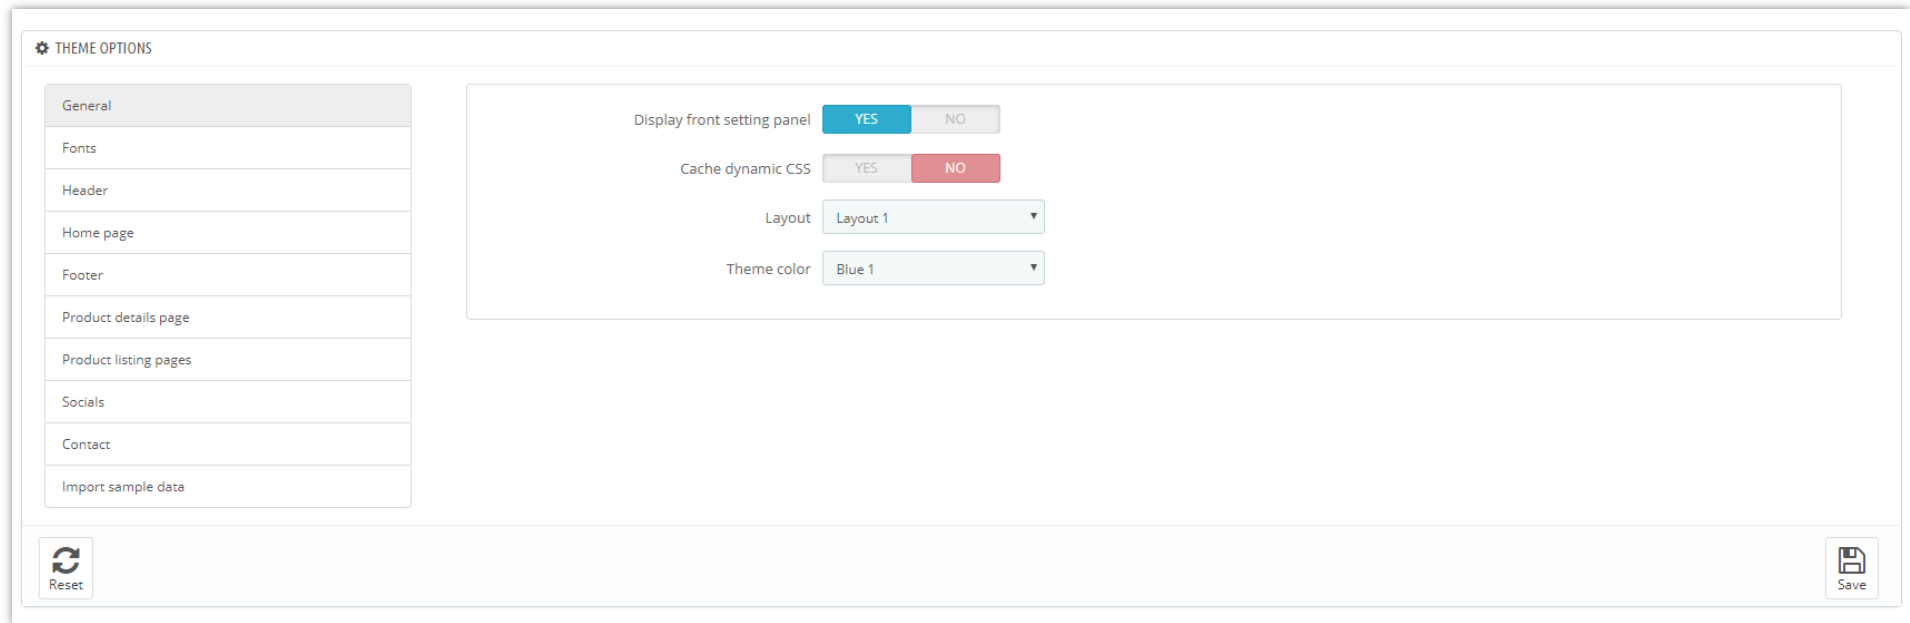

**Note:** This option is recommended when you install the theme on a fresh Prestashop website. Clear your website cache (or turn it off) after importing sample data.

The screenshot displays the 'Theme options' interface for a PrestaShop theme. It is divided into two main sections: 'SMARTY' and 'DEBUG MODE'.  
In the 'SMARTY' section, there are three radio button options for 'Template compilation':  
- 'Never recompile template files' (unselected)  
- 'Recompile templates if the files have been updated' (unselected)  
- 'Force compilation' (selected)  
Below these options is a 'Cache' label followed by 'YES' and 'NO' buttons. A red rectangular box highlights the 'Force compilation' radio button and the 'Cache' label and buttons.  
In the 'DEBUG MODE' section, there are two toggle switches:  
- 'Disable non PrestaShop modules' with 'YES' and 'NO' buttons.  
- 'Disable all overrides' with 'YES' and 'NO' buttons.  
Each section has a 'Save' button with a floppy disk icon in the bottom right corner.

## V. THEME OPTIONS

This is a powerful Prestashop theme, it offers many useful features that help you to manage the theme easily.

Navigate to **“Theme options”**:

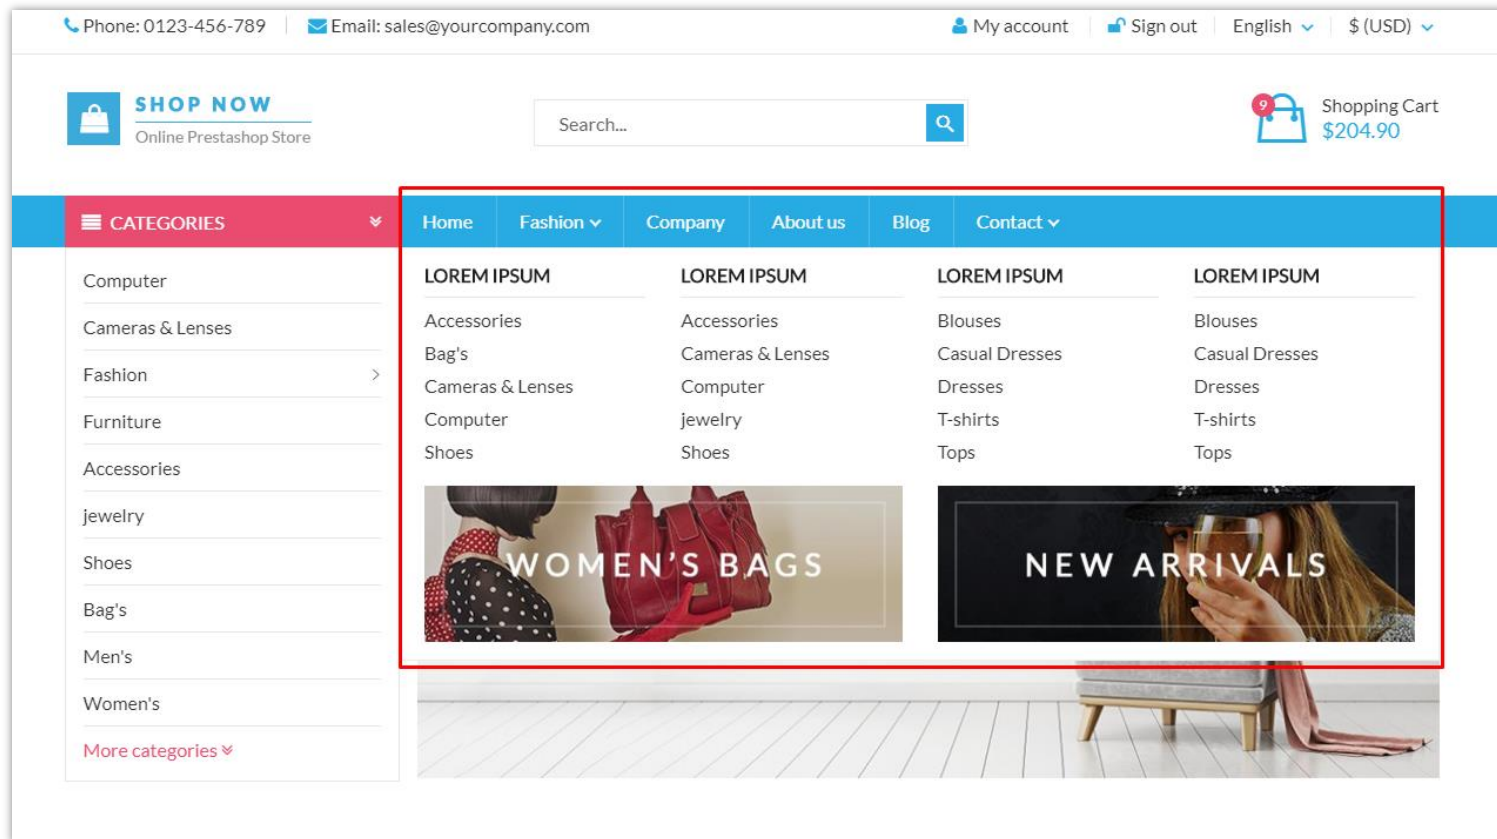

- ❖ After selecting a theme layout, you should reimport sample data to make your website like our live demos then start to replace the images/text by your real data (make sure your image sizes are the same as the sizes of our sample images)
- ❖ You can define your custom color set by selecting “Custom color” from “Theme color”
- ❖ Cache dynamic CSS should be enabled for live website
- ❖ This theme supports Google font, you can setup your custom font as below

General font name	<input type="text" value="Open Sans"/>
	<i>Leave blank to use default font</i>
General font data	<input type="text" value="https://fonts.googleapis.com/css?family=Open+Sans"/>
<hr/>	
Heading font name	<input type="text"/>
	<i>Leave blank to use default font</i>
Heading font data	<input type="text"/>
<hr/>	
Other font name	<input type="text"/>
	<i>Leave blank to use default font</i>
Other font data	<input type="text"/>

## VI. MEGA MENU MODULE

This theme come with 2 forms of mega menu (vertical and horizontal) depending on the home page layout you select in back office. Our mega menu is organized by 3 main elements: menus, columns and blocks which will give you easy and flexible ways to create different types of simple or complex structures for your top menu.

To manage your mega menu, go to **“Modules / Modules and services”** and select **“Mega menu PRO”** from the module list.

NEW ARRIVALS

**Note:** if you are transferring your site to new hosting service or domain, the "Enable cache" option (in "Settings" area) should be deactivated by selecting the "no" option and should be reactivated once the website is transferred, by selecting the "yes" option. "Enable cache" helps to load your site faster when you have a complex menu structure.

## VII. BLOG MODULE

With this theme you have one of the most powerful Prestashop blog modules in the market place! You have a separated menu to manage your blog in the backoffice. This menu helps you manage your blog posts, categories, comments, slider, gallery and settings.

**Note:** Set up your “**notification emails**” from the settings area in the backoffice to receive notification emails when someone comments on one of your blog posts or reports a comment as abused.

**\*Tip:** To have a link or a menu item to display your blog in the frontend of the website, copy the blog preview link from backoffice and add it to your top mega menu. Settings area gives you many different options for configuring your blog, take some time to check it out. Front page:

## VIII. HTML WIDGETS

First of all you need to understand what widgets are. Widgets are combinations of text and images placed on specific positions (hooks) of the website. With this theme you can create unlimited widgets and place them in different positions of your website.

Let's take a look at our frontend after the installation of the theme. These are the widgets that are available by default:

To configure this module, navigate to **"Modules / Modules and services / Installed module"** select **"Frequently purchased together PRO"** from the module list.

The screenshot shows the configuration interface for the 'Frequently purchased together' module. The title is set to 'Frequently purchased together'. Under 'Display options', three checkboxes are present: 'Exclude product in cart', 'Exclude current product', and 'Exclude out of stock product', all of which are currently unchecked. For 'Display type', two options are shown: 'Separated product image carousel slider' (unselected) and 'Product list with thumbnail images' (selected). Below these are several toggle switches, all set to 'YES': 'Require purchasing current product', 'Redirect to shopping cart page', 'Display product price', 'Display old price', 'Display discount', and 'Display product description'. The 'Display rating (if productcomments is enabled)' toggle is also set to 'YES'. At the bottom, there are two input fields: 'Maximum description length' set to 100 and 'Default quantity added to cart' set to 1. A dropdown menu for 'Hook to' is set to 'displayProductAdditionalInf'.

To set products bundle for each single product, open the product from backoffice then select tab "Modules" and choose "Frequently purchased together PRO".

## XIV. HOT DEALS

This theme has Hot deals module where you can configure to show your discounted products with countdown clock.

The screenshot displays a website layout with three product cards at the top, each featuring a heart icon, an 'ADD TO CART' button, and a search icon. Below these is a 'HOT DEALS' section, highlighted with a red border, which includes a product card for a 'PRINTED SUMMER DRESS'. The product card shows a -14% discount, a 5-star rating, a price reduction from \$30.50 to \$26.23, a description, and a countdown timer showing 2259 days, 6 hours, 27 minutes, and 19 seconds. To the right is a 'NEWS AND OFFERS' section with two images: one of a smartphone and notebook, and another of a coffee cup. At the bottom is a section titled 'OUR BRANDS'.

**HOT DEALS** ◀ ▶

- Countdown: 2259 days, 6 hrs, 27 mins, 19 secs

To manage this module, navigate to “**Modules / Modules and services / Installed module**” select “**Hot deals**” from the module list.

The screenshot shows the configuration page for the 'Hot deals' module in a Drupal environment. The breadcrumb trail at the top reads 'Modules / ybc\_specificprices / Configure'. The page title is 'Configure Hot deals'. In the top right corner, there are navigation icons for 'Back', 'Translate', 'Check update', and 'Manage hooks'. Below the title, there is a gear icon and the text 'HOT DEALS'. The main configuration area contains two fields: a 'Title' field with the value 'Hot deals' and a language dropdown menu set to 'en', and a 'Product IDs' field with the value '8,11,9,10'. A note below the Product IDs field states 'Separated a comma. Eg: 1,3,4'. A 'Save' button is located in the bottom right corner of the configuration area.

## XV. THANK YOU

Thank you again for downloading our theme and going through this documentation. We hope this document has provided to be helpful and useful in the complete set up of **Shop now** theme on your website.

If you do have any questions for which the answer is not available in this document, please feel free to contact us.
