I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

II. INTRODUCTION

PrestaShop only has a general product information tab, which often falls short to display all the information we want to show potential customers, and, often, it is crucial information.

"**Custom fields & tabs on product page**" is a module that extends PrestaShop to allow store owners to add custom extra tabs to products. The extra tabs are displayed on the product detail pages and to the right of the default "Product details" tab. Extra tabs can be easily added, deleted and rearranged.

** "**Custom fields & tabs on product page**" is compatible with PrestaShop 1.6.x, 1.7.x and 8.x*

III. INSTALLATION

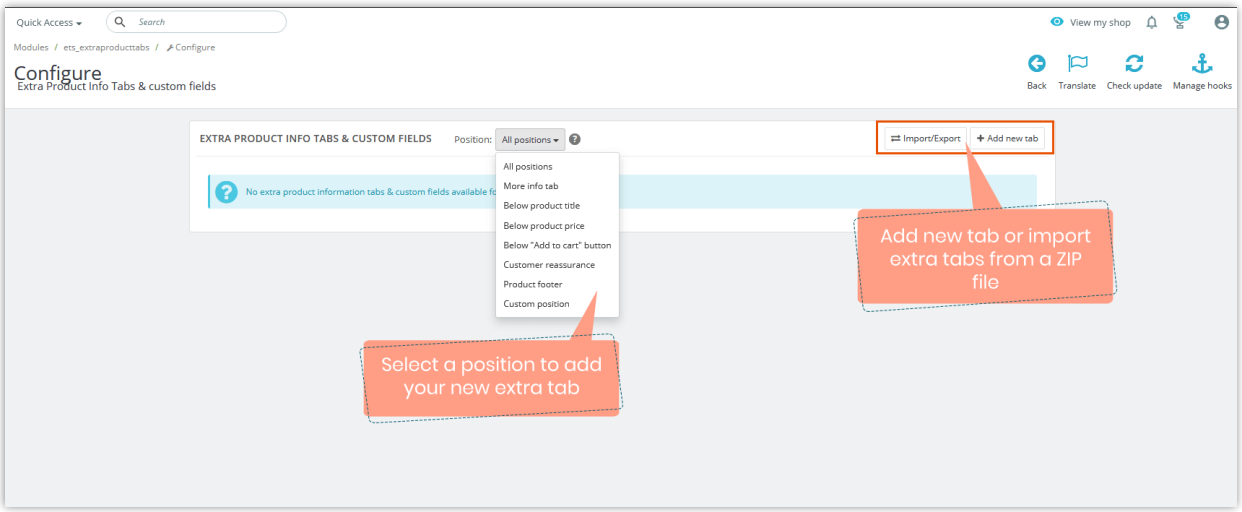
1. Navigate to **"Modules / Modules & Services",** click on **"Upload a module / Select file"**
2. Select the module file **"ets_extraproducttabs.zip"** from your computer then click on **"Open"** to install

- Click on **"Configure"** button of the module you just installed to open the module's configuration page.

IV. CONFIGURATION

From your installed module list (Located at **"Modules/Modules & services/Installed modules"**), find "**Custom fields & tabs on product page**" then click on the **"Configure"** button to open its configuration page.

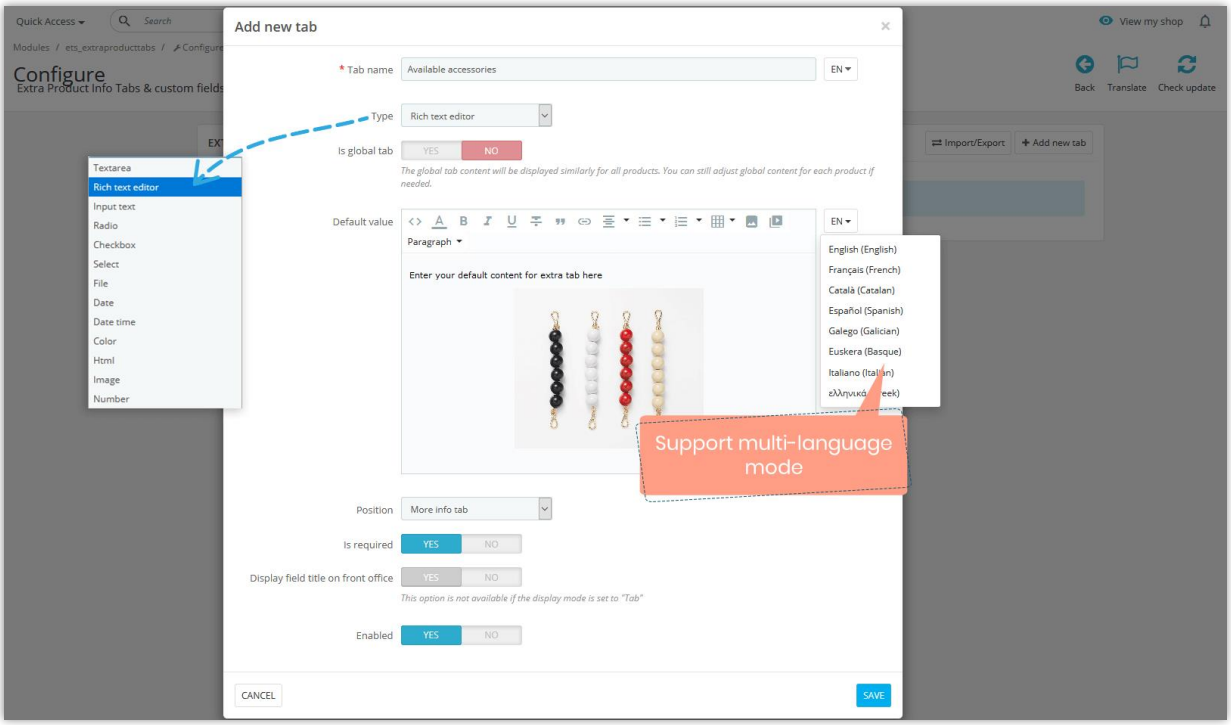
Click on "**Add new tab**" button to add a new extra tab.



Our module supports these following display positions on the product detail page:

- Default product info tabs,
- Below product title,
- Below product price,
- Below "Add to cart" button,
- On "Customer reassurance" block,
- Product footer,
- Custom position

On the "**Add new tab**" popup, configure your extra tab as you prefer.



- Enter the tab name. This module allows you to enter tab name for multi-language.

- Content type: select a content type for your extra tab. **Custom fields & tabs on product page** module supports these following content types: text (rich text area, text input field, rich text editor), radio, checkbox, select options, field, date, date time, color, HTML code, image, number, etc.

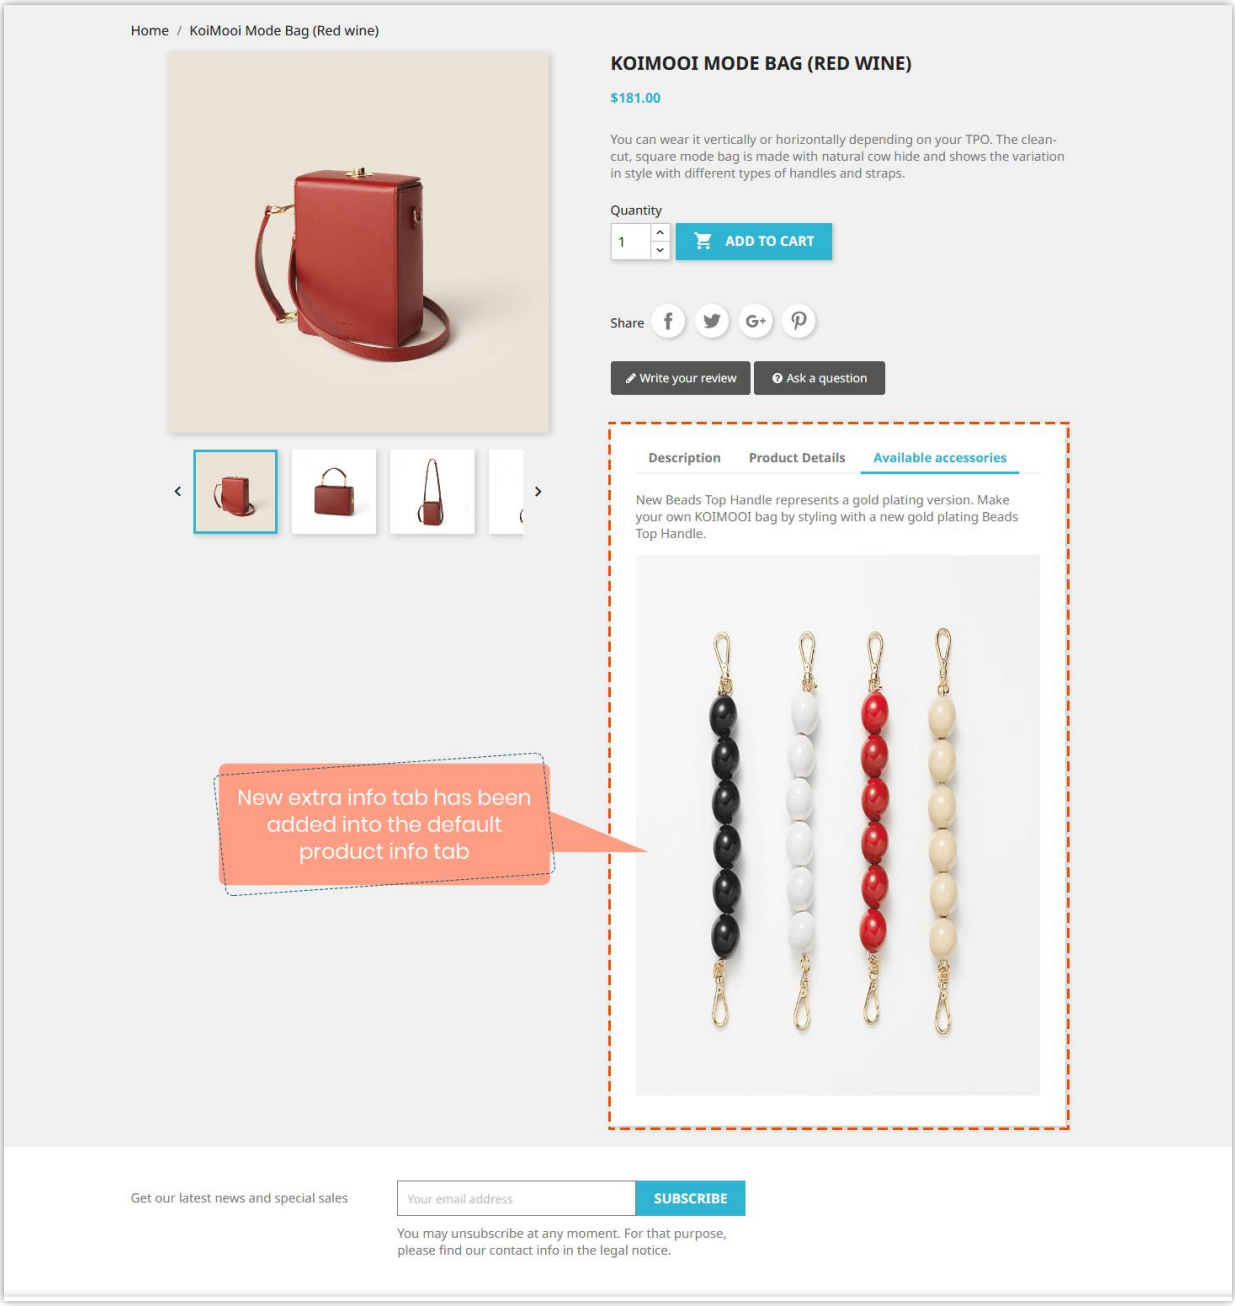
- **Global tab (global content)**: if you enable this option, the default value (default content) of this tab will apply to every product and you will not be able to customize tab content for a specific product.

- **Default value**: default content for your extra tab.

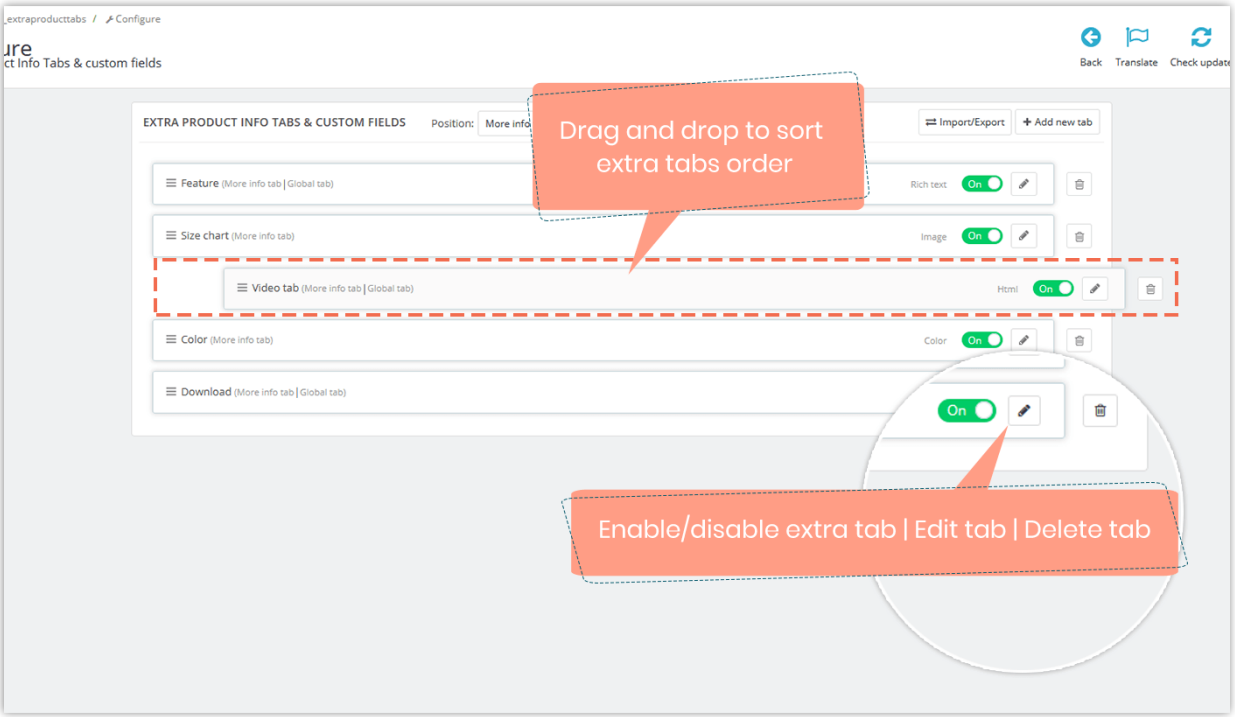
- **Is required**: set your extra tab as “required” element. When you add new product, you will need to add content for the extra tab.

- **Enable**: enable/disable this extra tab.

Click “Save” button to finish.



After adding extra tabs / custom fields, you can drag and drop to sort tabs order; edit tab content or delete a tab.



❖ ***Customize extra tab for a specific product***

This module allows you to customize extra tab content for each product.

- From **Catalog** > **Products** > open the product you want to customize extra tab.
- Navigate to "**Extra info**" tab of product edit page.
- Customize extra tab content as you want.
- For "**Global tab**", if you want to customize tab content, please turn off the "**Use global content**" switch and then enter your custom content.
- Click "Save" to finish.
