I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. If you have any questions that are beyond the scope of this documentation, please feel free to contact us.

II. INTRODUCTION

Free Translate & AI Content Generator module uses Google Translate automatic translation service to translate your PrestaShop online store with Google power and make it multilingual. With 103 available languages, your site will be available globally upon installation. Spend time on what's important: managing your orders and products, or communicating with your customers, in their preferred language.

Free Translate & AI Content Generator makes it easier to add translations to your PrestaShop store. Seamless integration with the familiar PrestaShop environment makes sure you remain inflow. Now, giving your customers a consistent language experience is straightforward and quick.

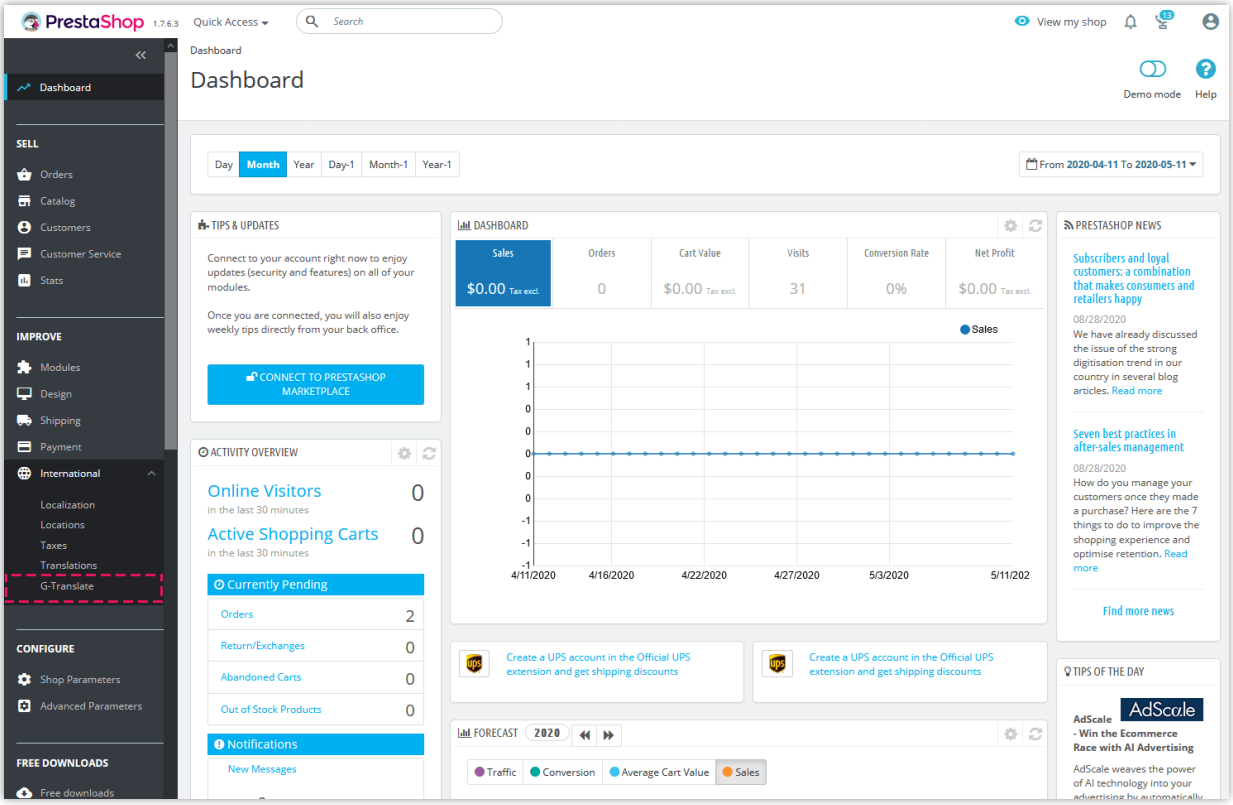

** "**Free Translate & AI Content Generator**" is compatible with PrestaShop 1.7.x and PrestaShop 8.x*

III. INSTALLATION

1. Navigate to **"Modules / Module manager",** click on **"Upload a module / Select file"**

2. Select the module file **“ets_translate.zip”** from your computer then click on **“Open”** to install
3. Click on “**Configure**” button of the module you just installed to open the module’s configuration page

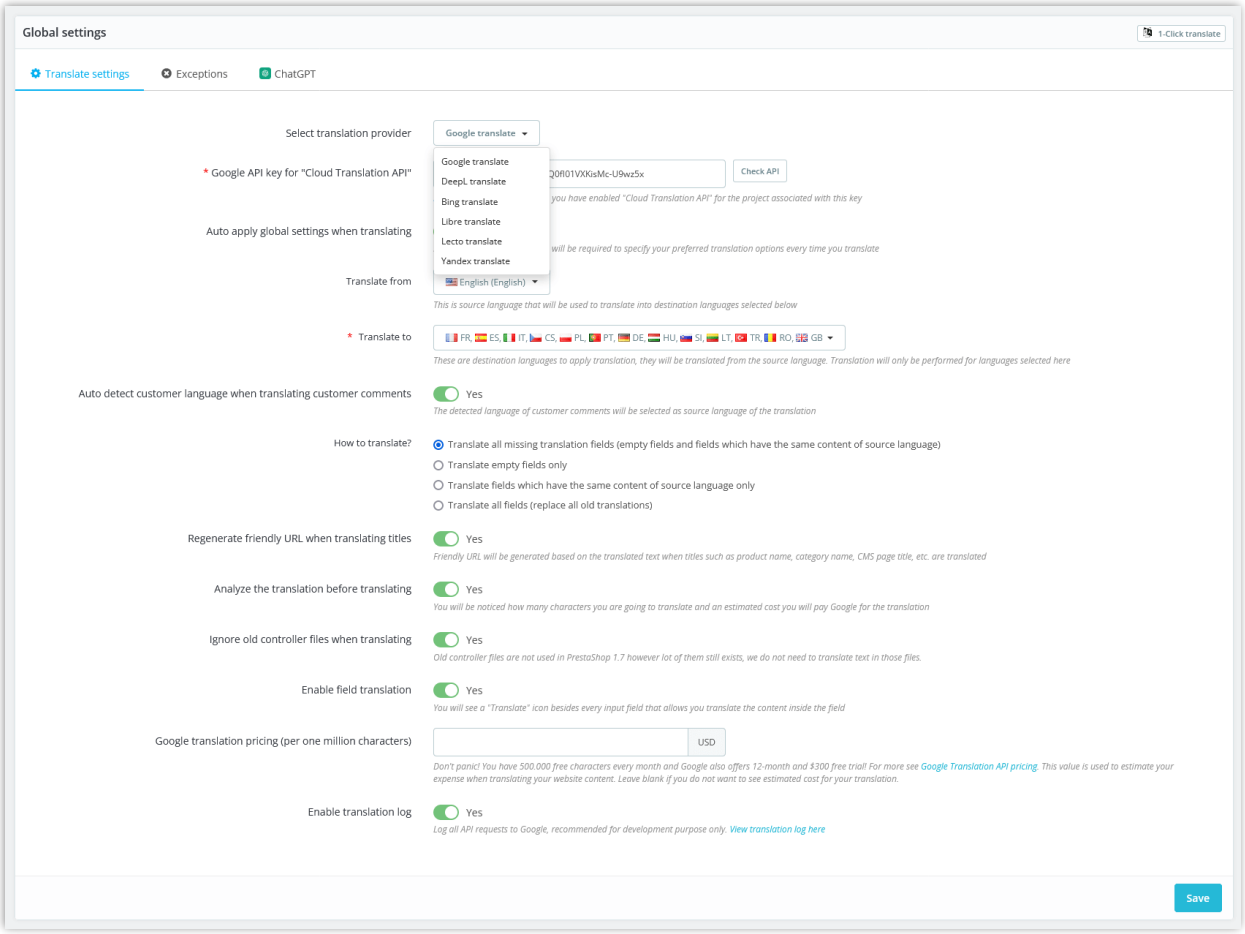

Quick access: You can also navigate to **Free Translate & AI Content Generator**’s configuration page through the quick access menu

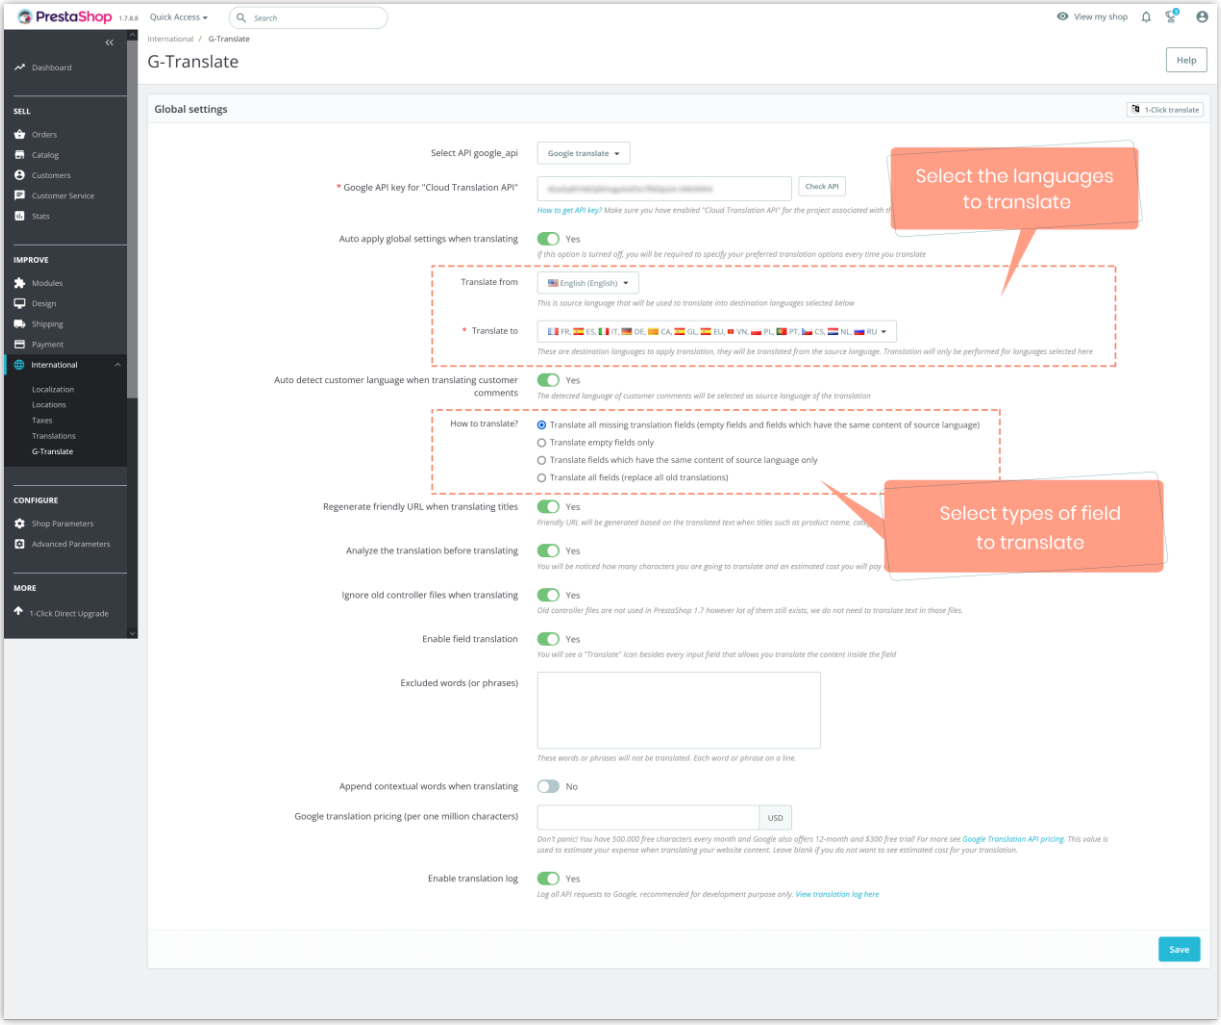

IV. GENERAL SETTINGS

1. Translate settings

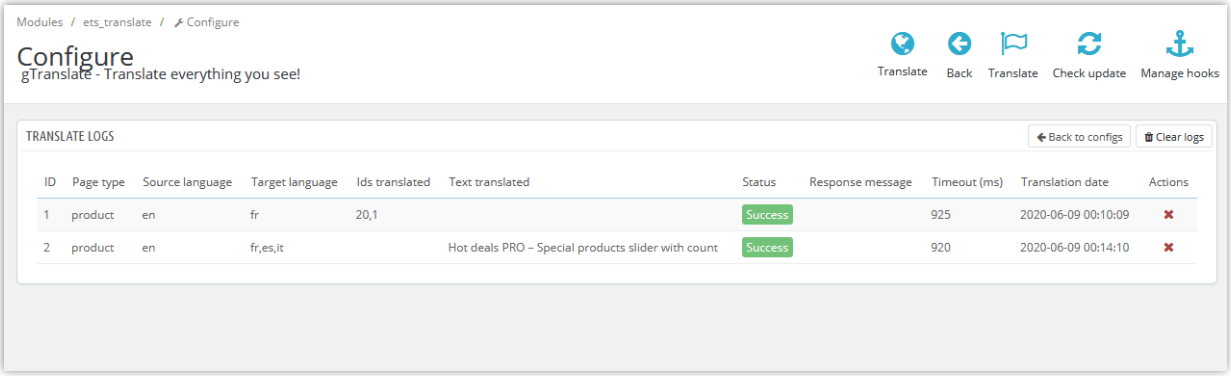

Firstly, we will need to select the translation API you want to use. **Free Translate & AI Content Generator** supports 6 types of API: Google Translate API, DeepL API, Bing Translation API, Libre API, Lecto API, and Yandex API.

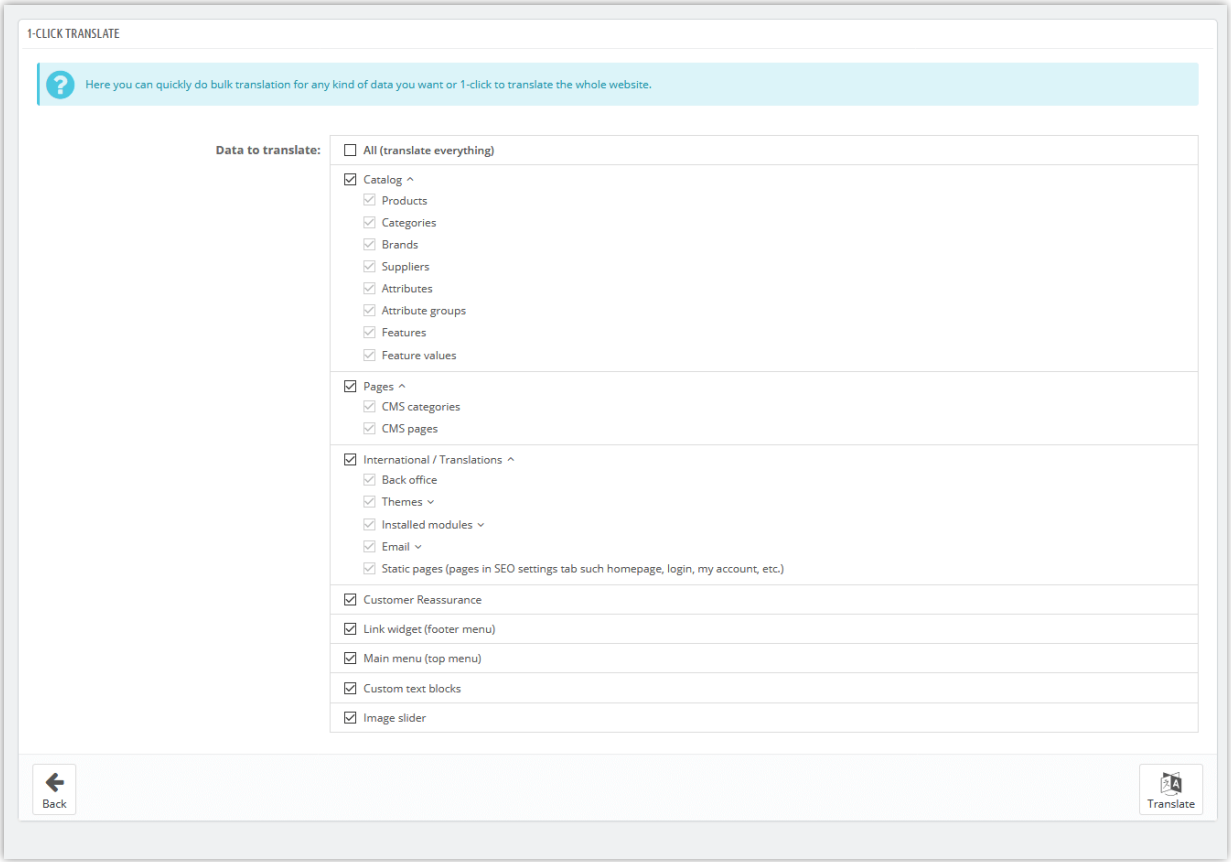

Click on "*How to get API key?*" link to learn how to create and get your translation API key. Enter your API key into **Free Translate & AI Content Generator**'s configuration page then click "Save". And we're ready to go!

- **Auto apply global settings when translating:** The translation settings defined on this page will be automatically applied to all types of translation: product translation, CMS page translation, etc.
- **Automatic language detection to translate comments**: **Free Translate & AI Content Generator** will automatically detect the language of the customer's comment and perform translation.
- **Enable translation log**: **Free Translate & AI Content Generator** provides a translation log feature to help you keep track of this module's performance. Click on "View translation log here" link to open the translation log page.

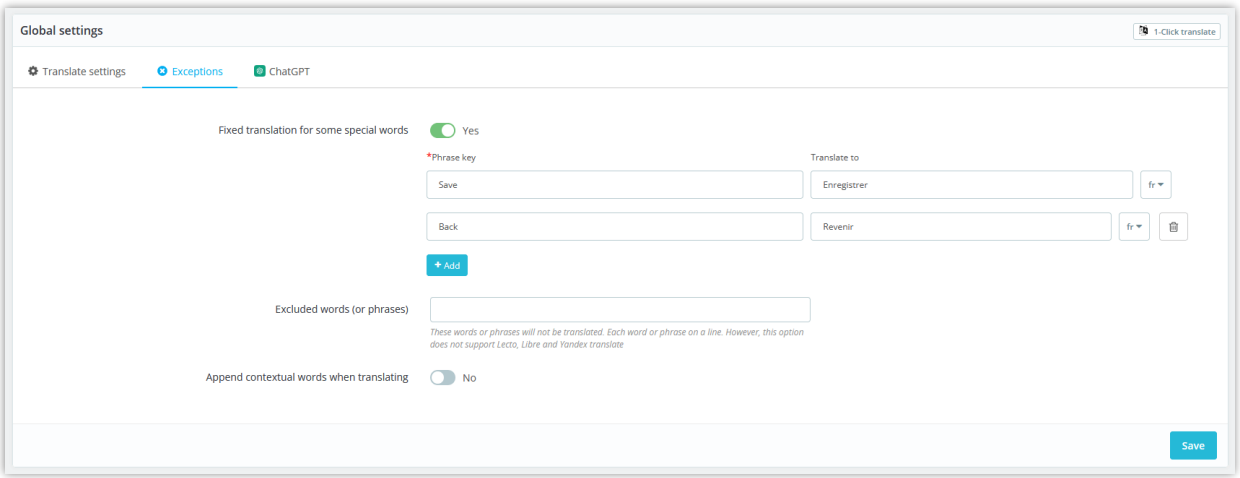

- **1-Click translate**: Translate entire website content in 1-click, fix missing translations.

2. Exceptions

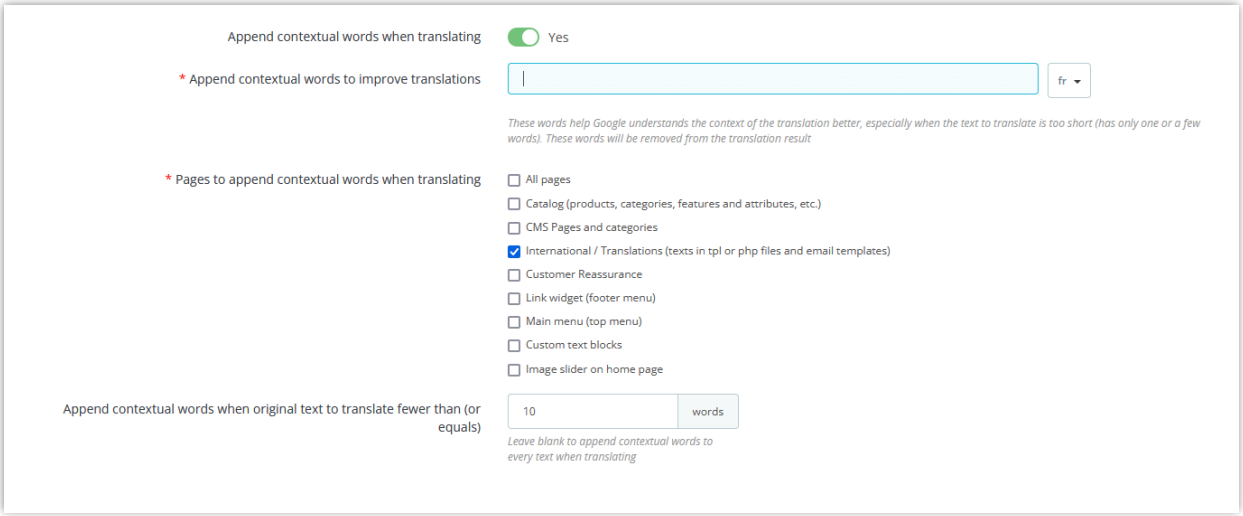

Due to the characteristics of each language when translating, there will be errors in certain words, especially when a word has many meanings and stands alone. So, the module supports the feature that allows you to add fixed translations for some special words.

For example, the English word "Save" has many meanings: it means both "Enregistrer" and "sauvegarder" in French. However, when using the translation tools, if you want to show that the word "Save" means "Enregistrer" (for example, save the configuration), you can turn on the "**Fixed translation for some special words"** option and add the words you want to translate with fixed meanings. At that time, when encountering the word "save", the module will automatically translate it to "Enregistrer".

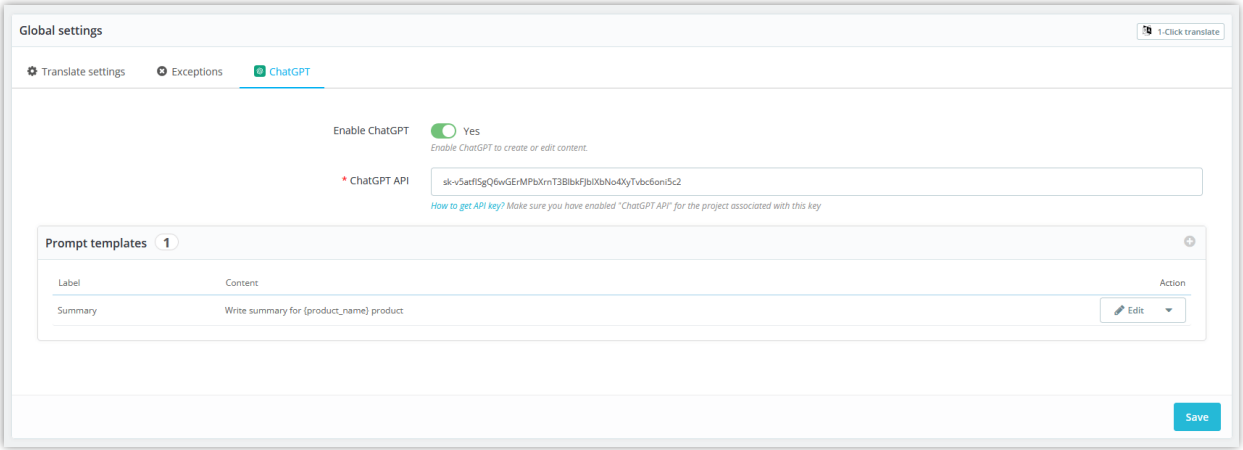

In addition, the module also supports the "**Append contextual words when translating**" feature.

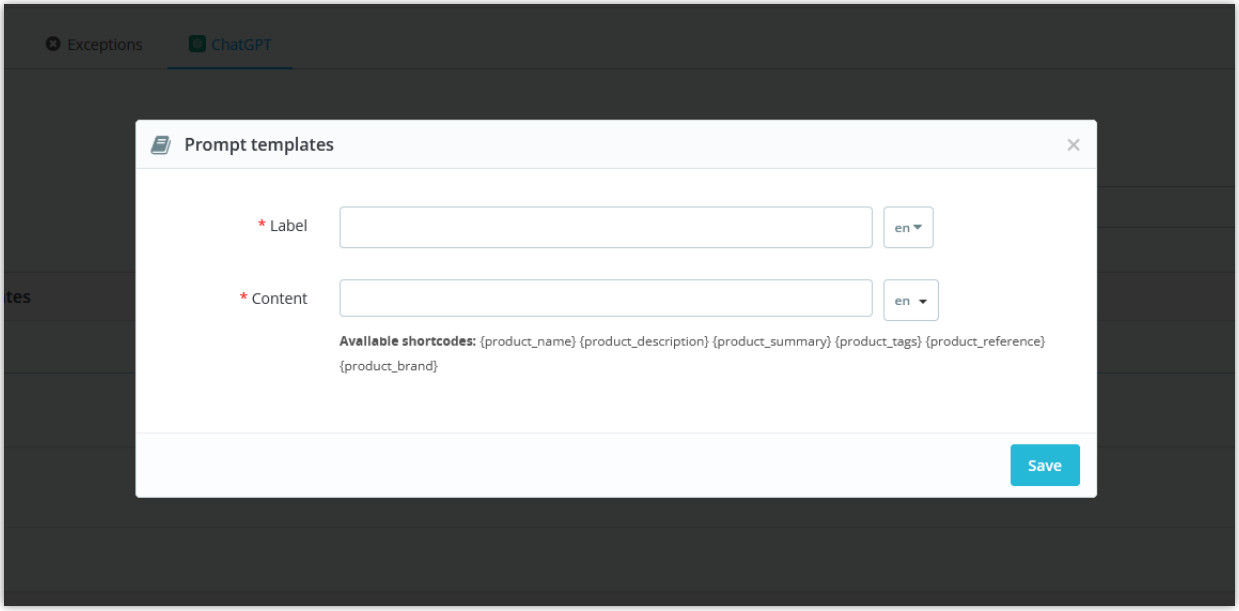

The contextual words you add will help Google understands the context of the translation better, especially when the text to translate is too short (has only one or a few words).

3. ChatGPT

Integrated with ChatGPT, the module will make it easier and more efficient to create and translate product content. In this tab, you can add and save prompts to use in generating product content that meets their specific requirements without the need for manual input every time.

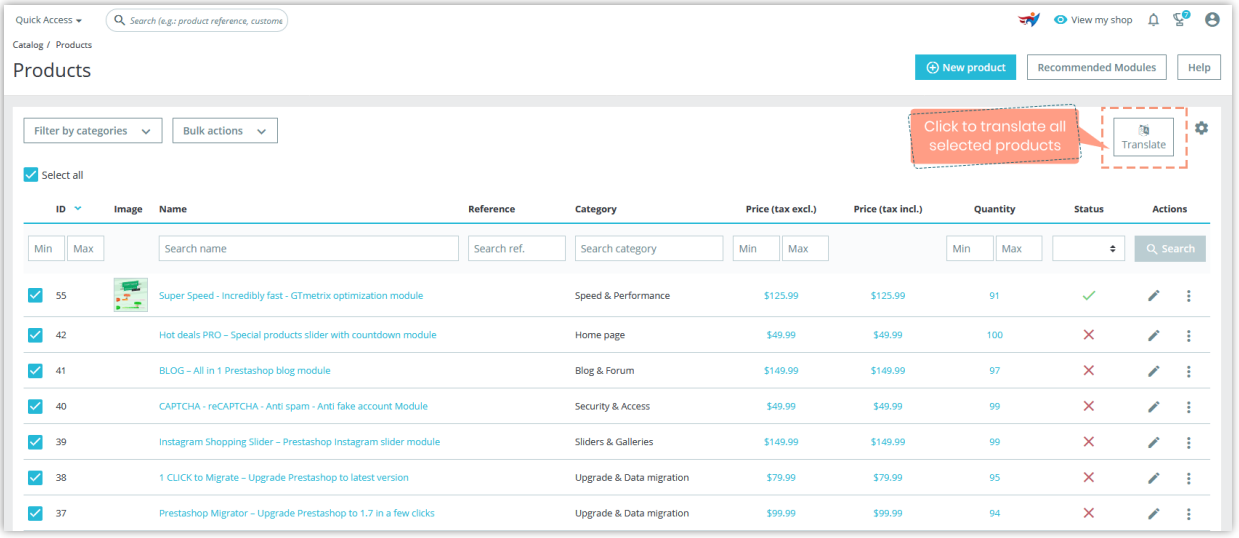

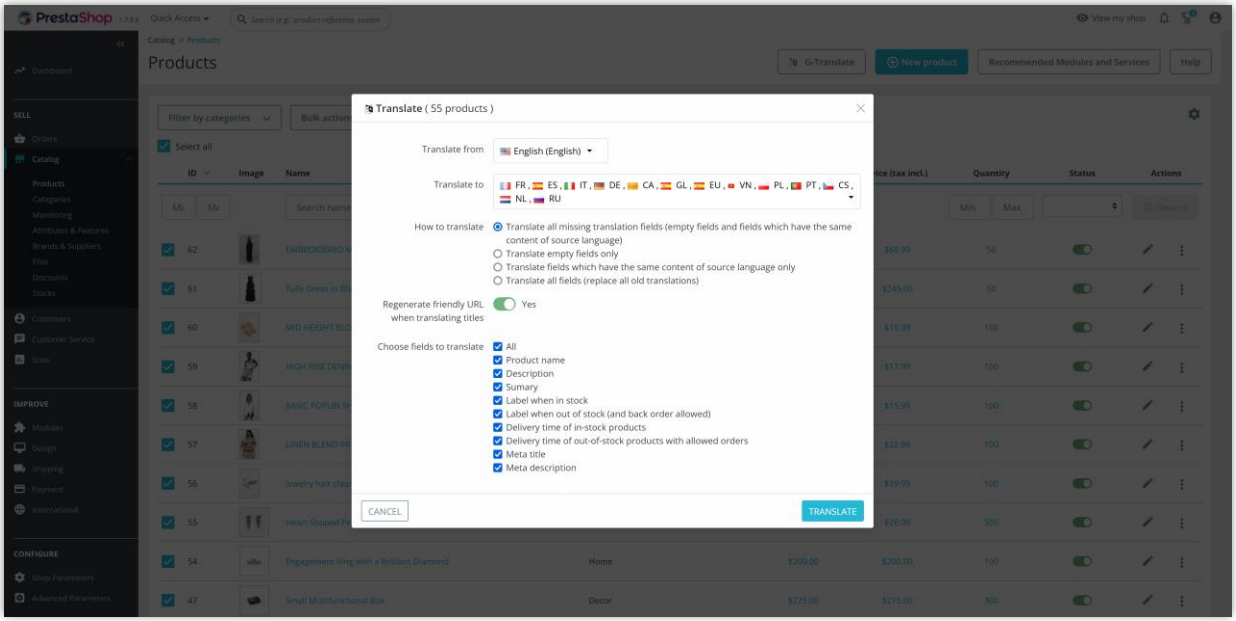

V. CATALOG TRANSLATION

1. Product translation

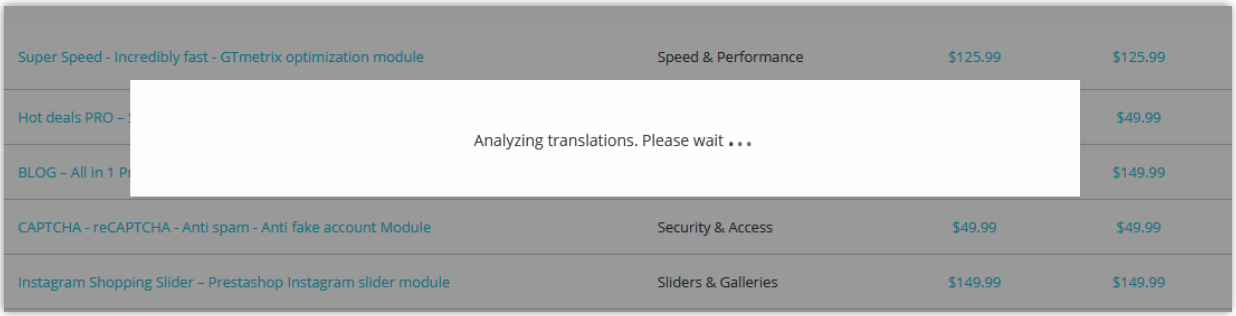

From **Products** listing page, you can run the quick product translation by selecting the products you want to translate then click on "**Translate**" button.

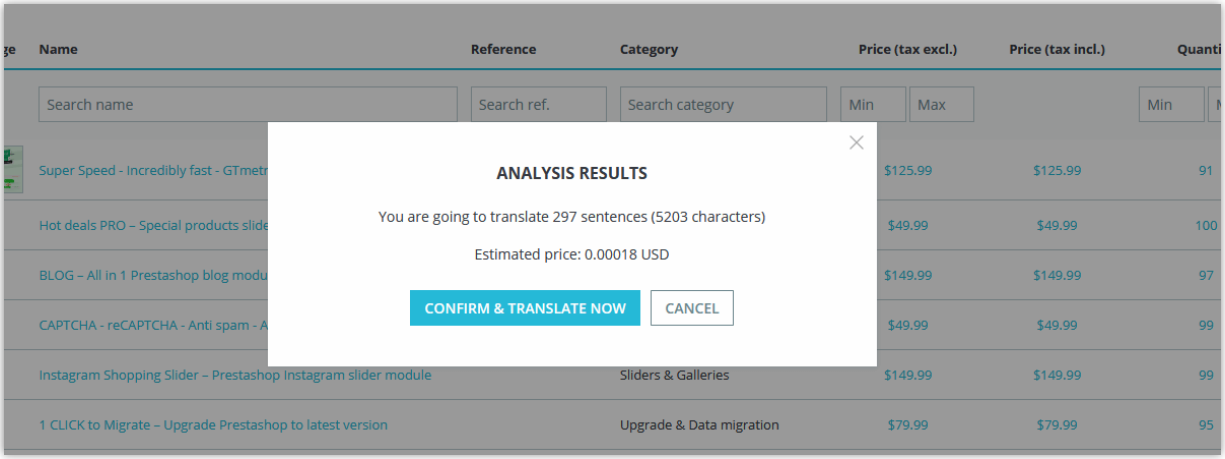

A popup will appear and display your defined translate configurations. You can edit the translate configurations before translating.

When you satisfy with your translate configurations, click on “Translate” button to start the analyzation process:

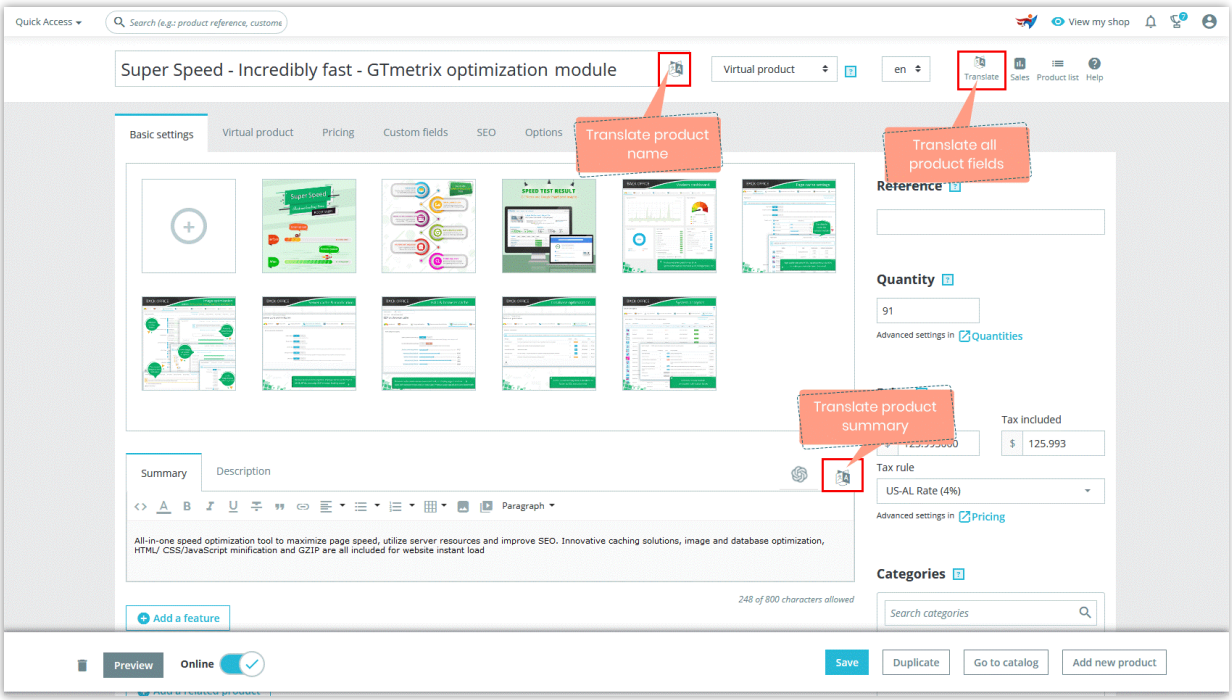

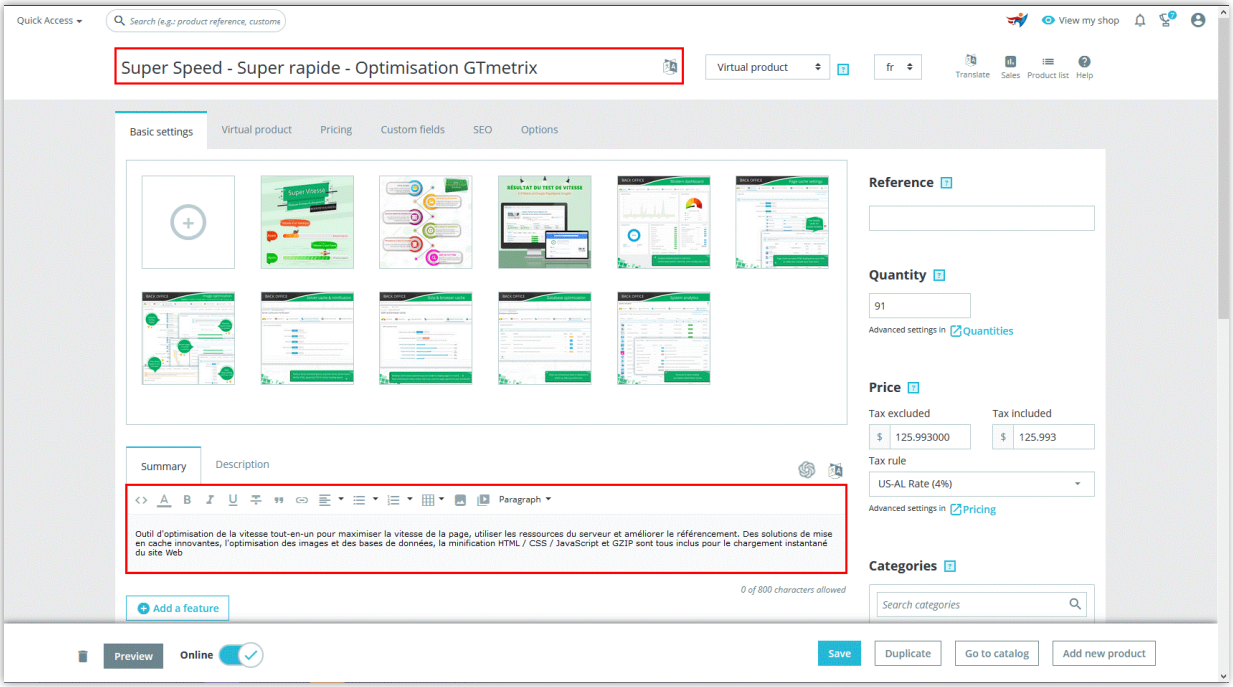

Click on "**Confirm and translate now**" button to start translating.

❖ Translate a specific product

Free Translate & AI Content Generator also enables you to translate a specific product. You simply need to open the product editing page and click on "Translate" icon where you want to translate its content.

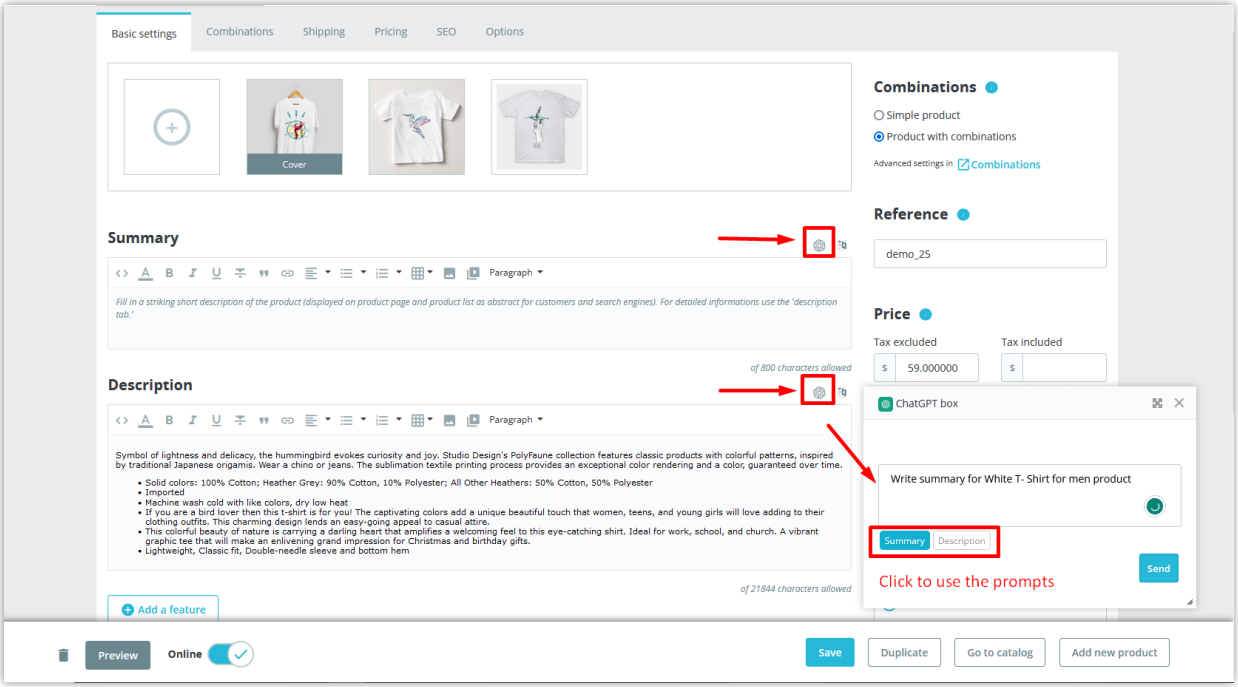

Below is an example of a product name and summary after being translated from English to French:

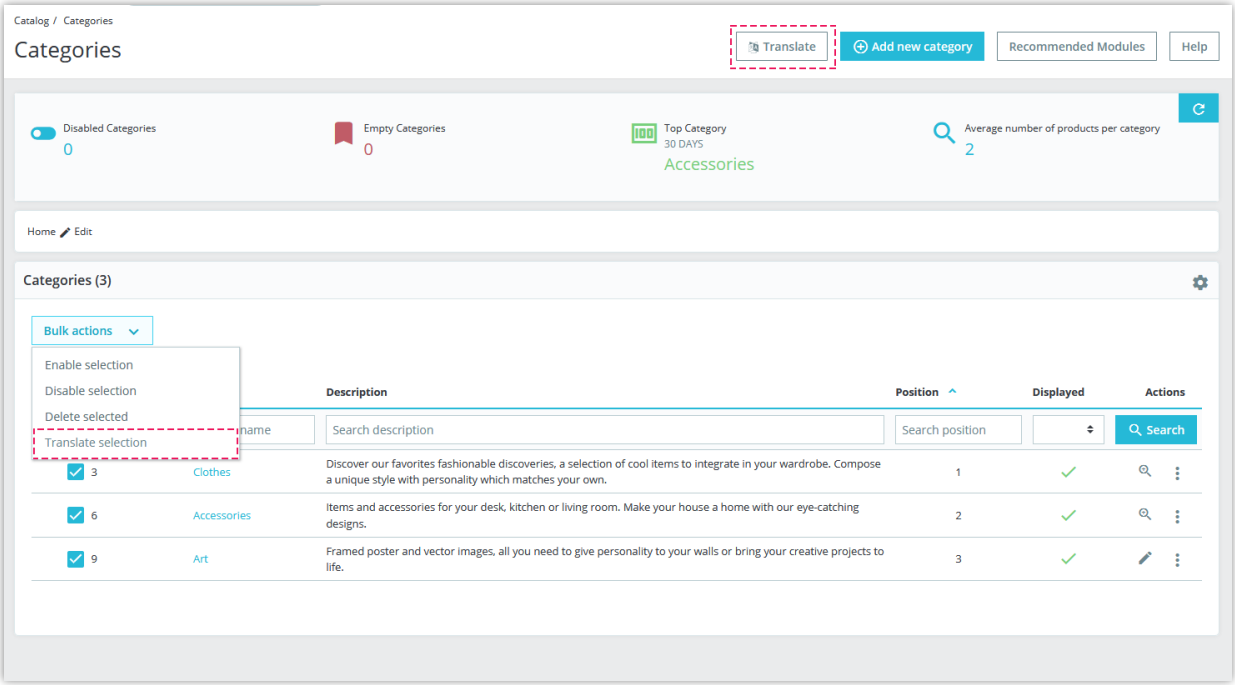

Besides, we also integrate ChatGPT into the module (on the summary and description section of the product page) to help store owners to create and translate product content easier.

Click on the ChatGPT icon in the product description or summary and start using it. Under the chat box with the labels of the prompts you have created, click on the label of the prompt you want to use to save time without having to manually retype the content you want.

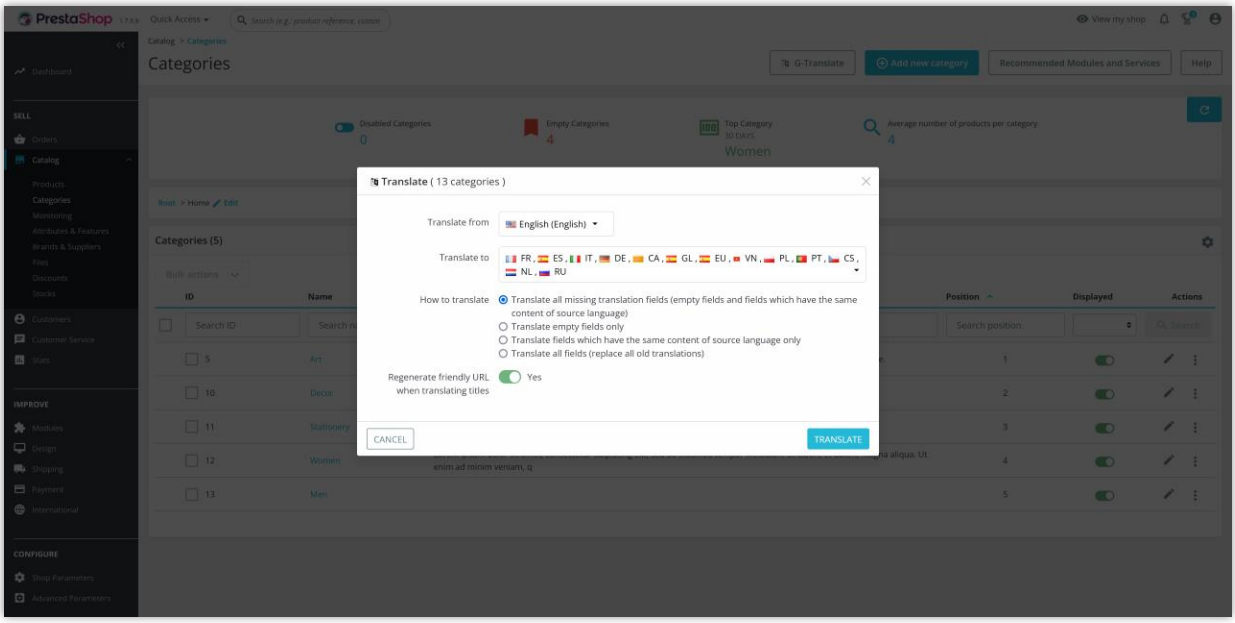

2. Product category translation

From **Categories** listing page, you can run the quick category translation by selecting the categories you want to translate then click on "**Translate**" button.

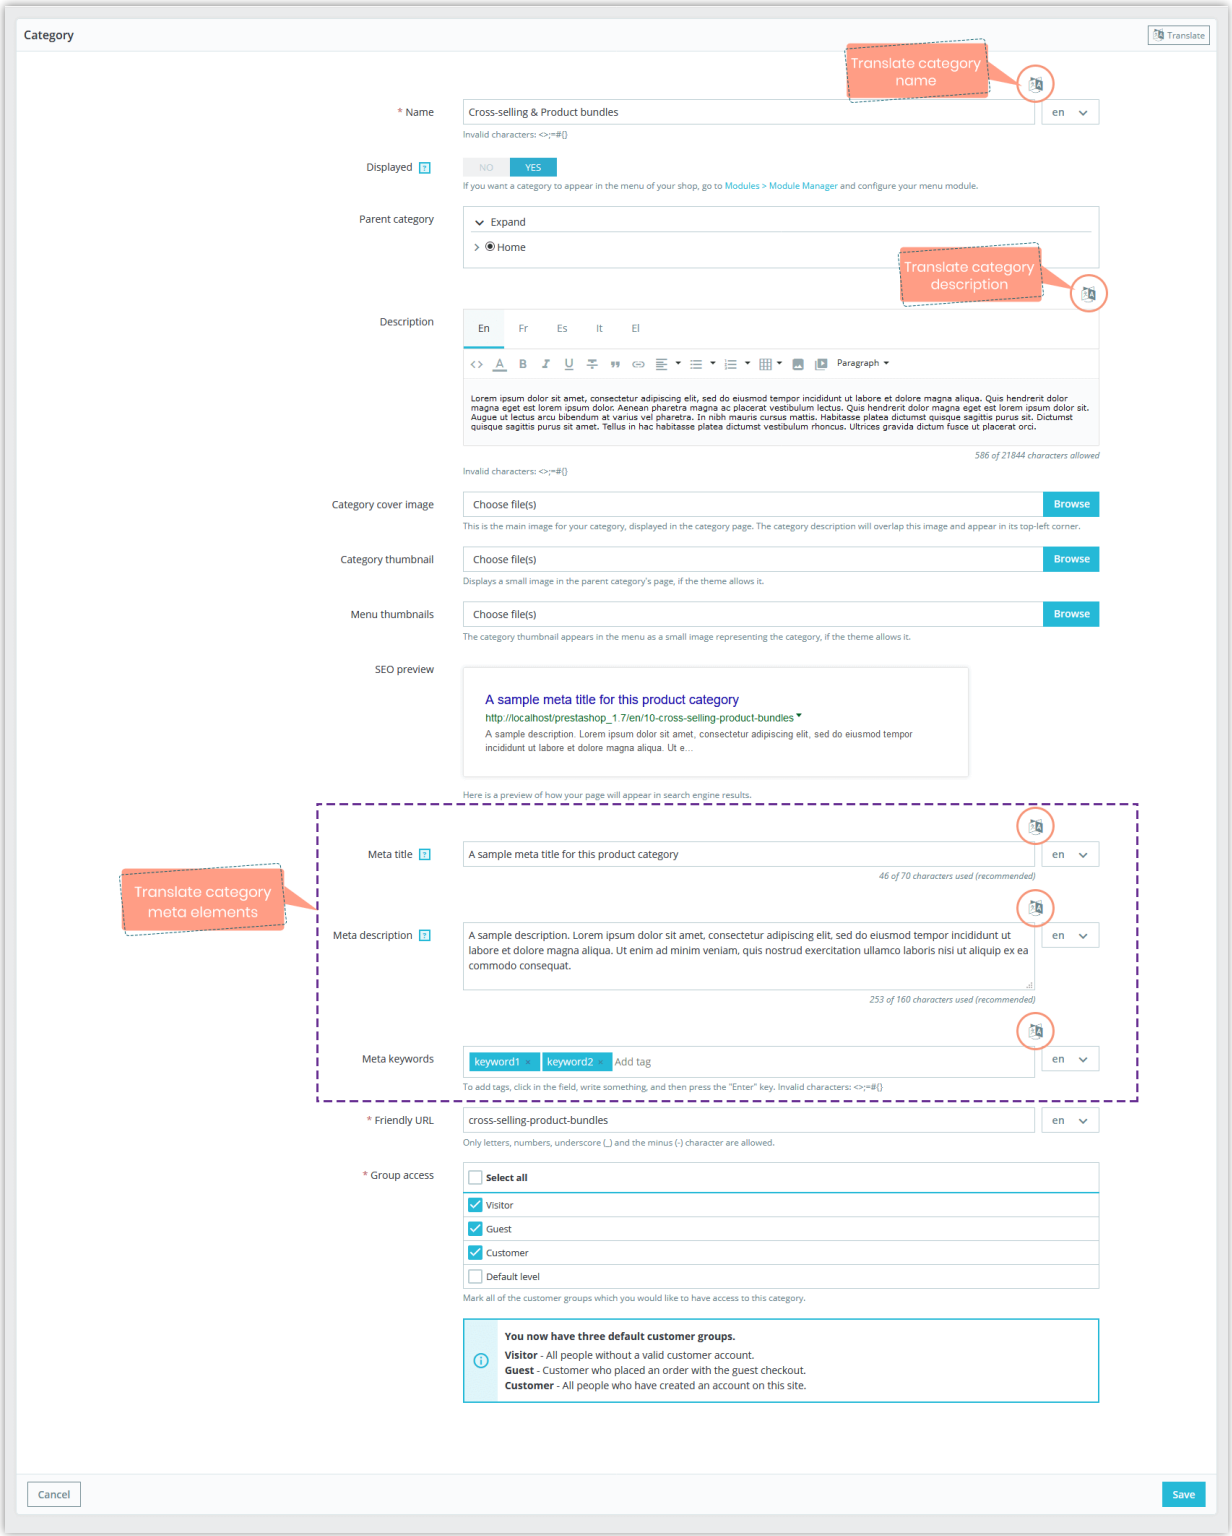

Similar to product translation, a popup will appear and display your defined translate configurations. You can modify translation settings before running translation process.

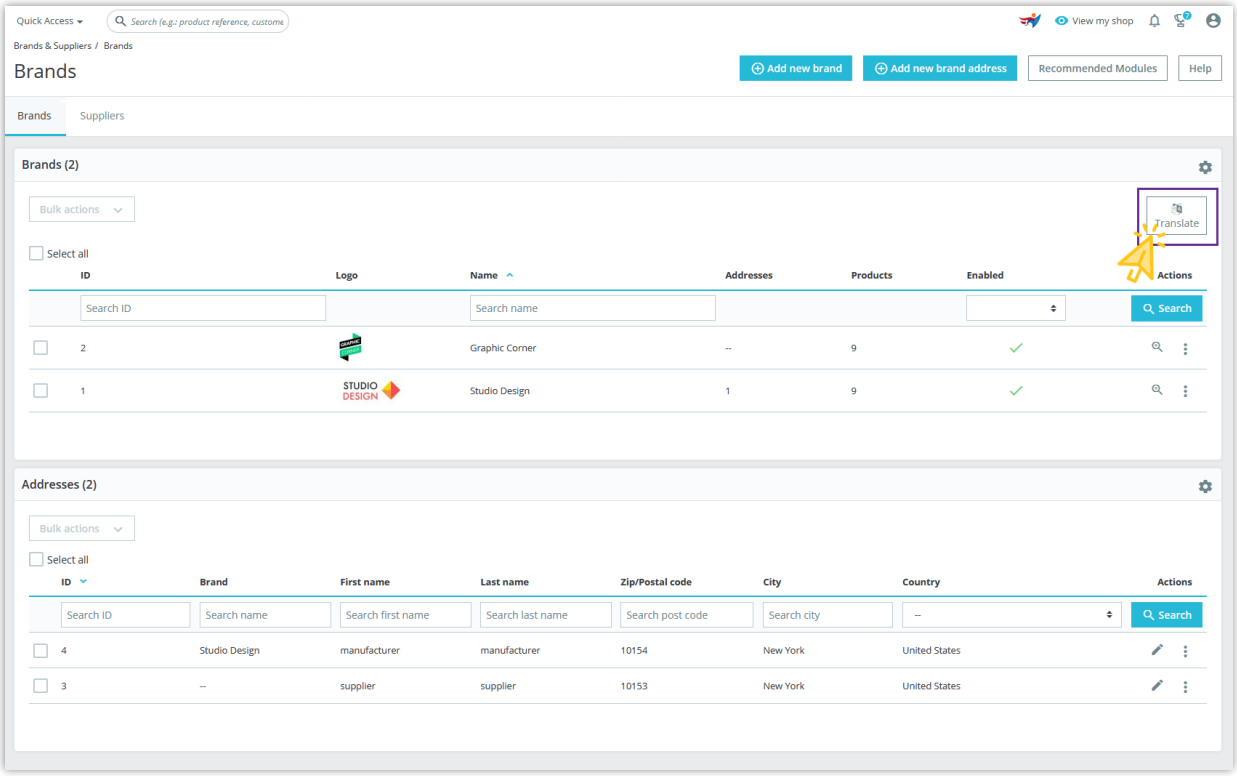

- **Translate a specific category**

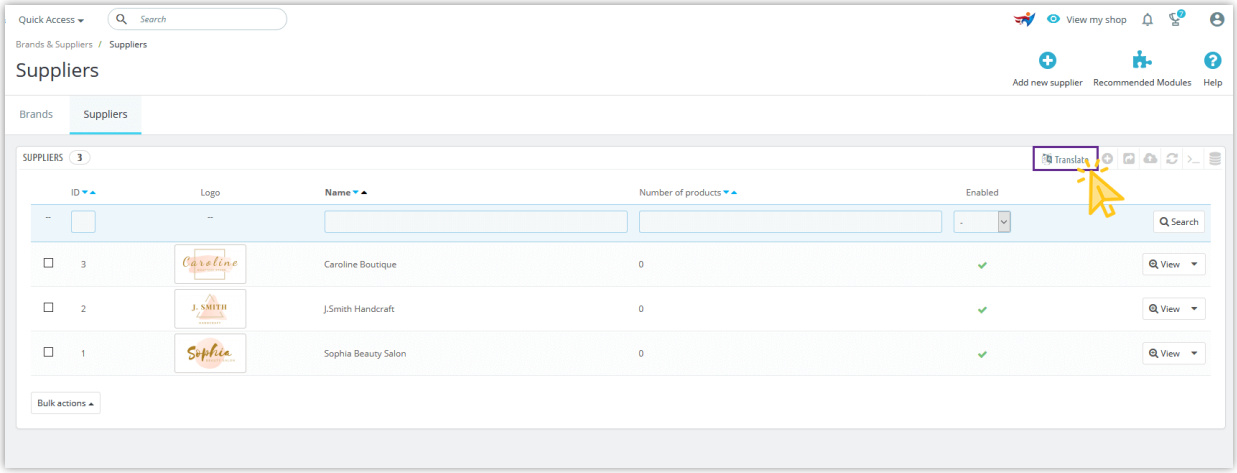

Free Translate & AI Content Generator also enables you to translate a specific category. You simply need to open the category editing page and click on “Translate” icon where you want to translate its content.

3. Brand and Supplier translation

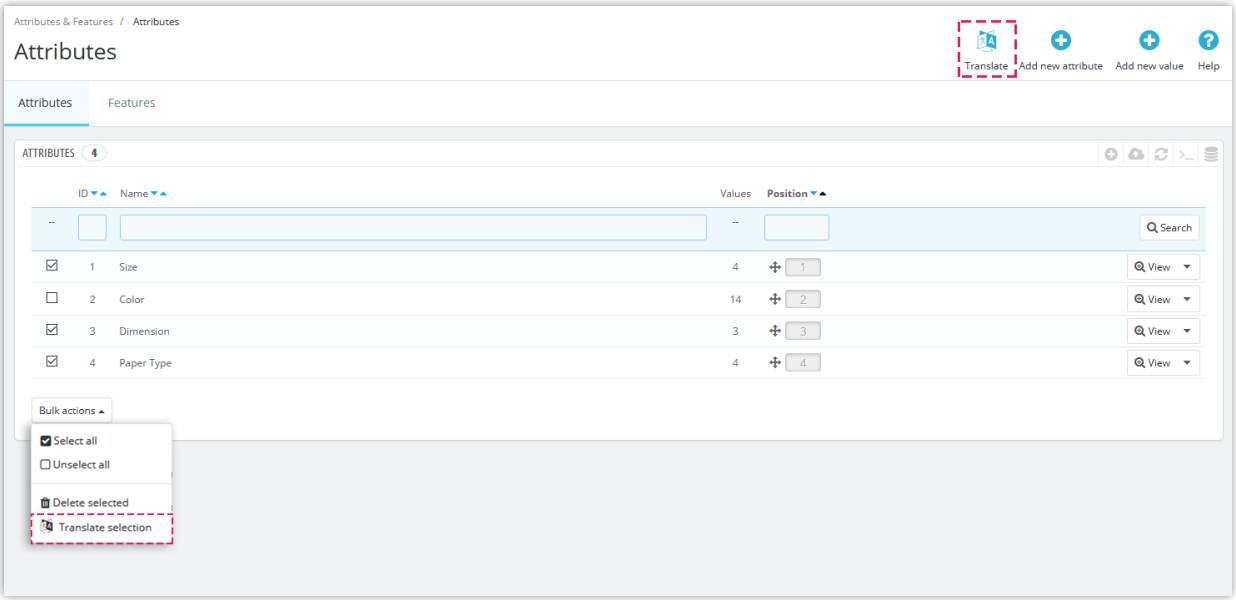

From **Brands** and **Suppliers** listing page, you can translate all available brands and suppliers by clicking on “Translate” button.

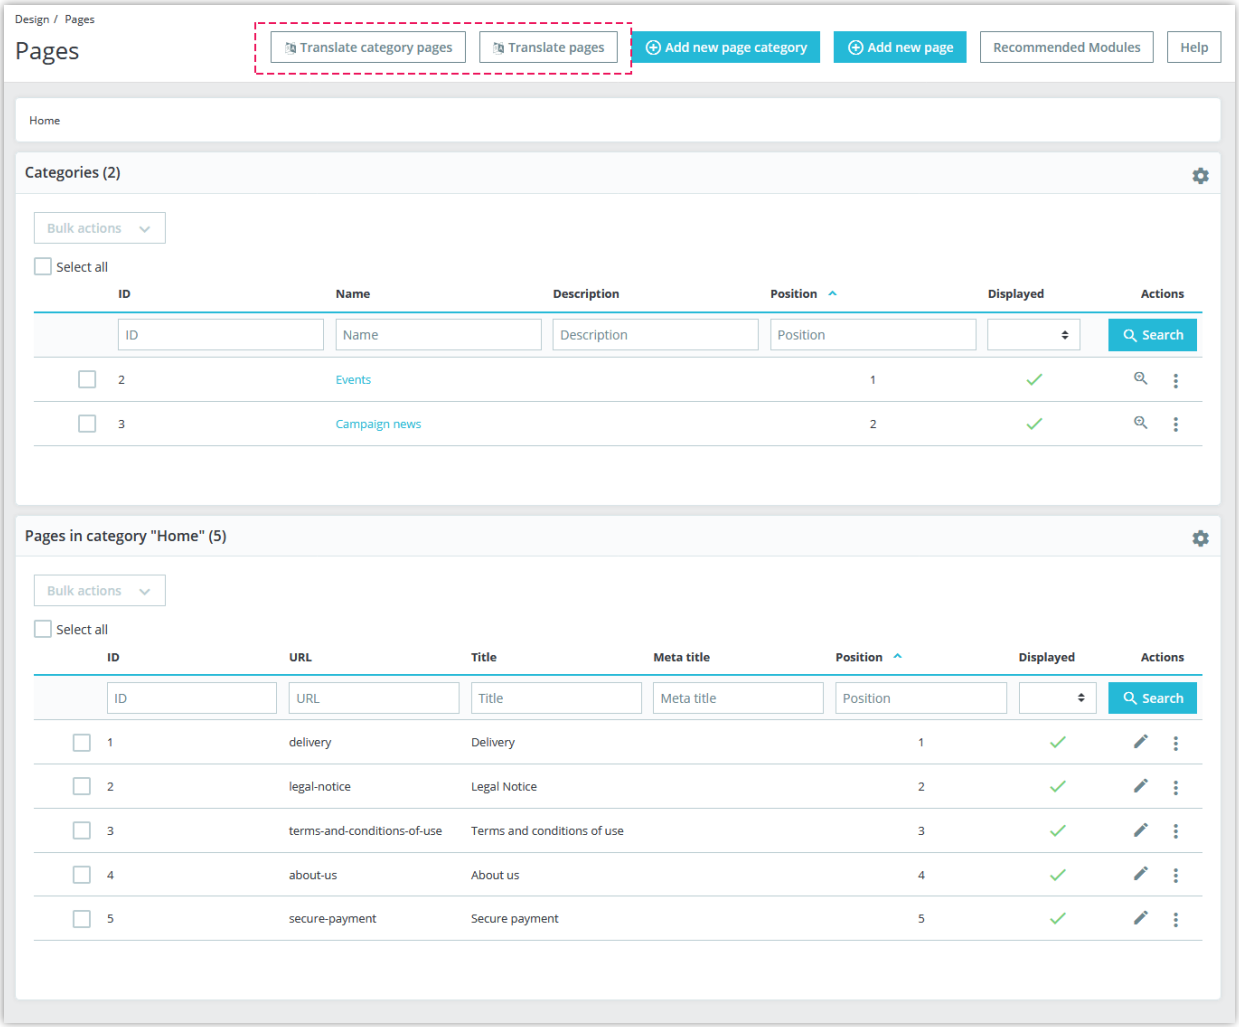

4. Attributes and Features translation

From **Attributes and Features** listing page, you can translate all available attributes and features by clicking on “Translate” button or translate each specific item.

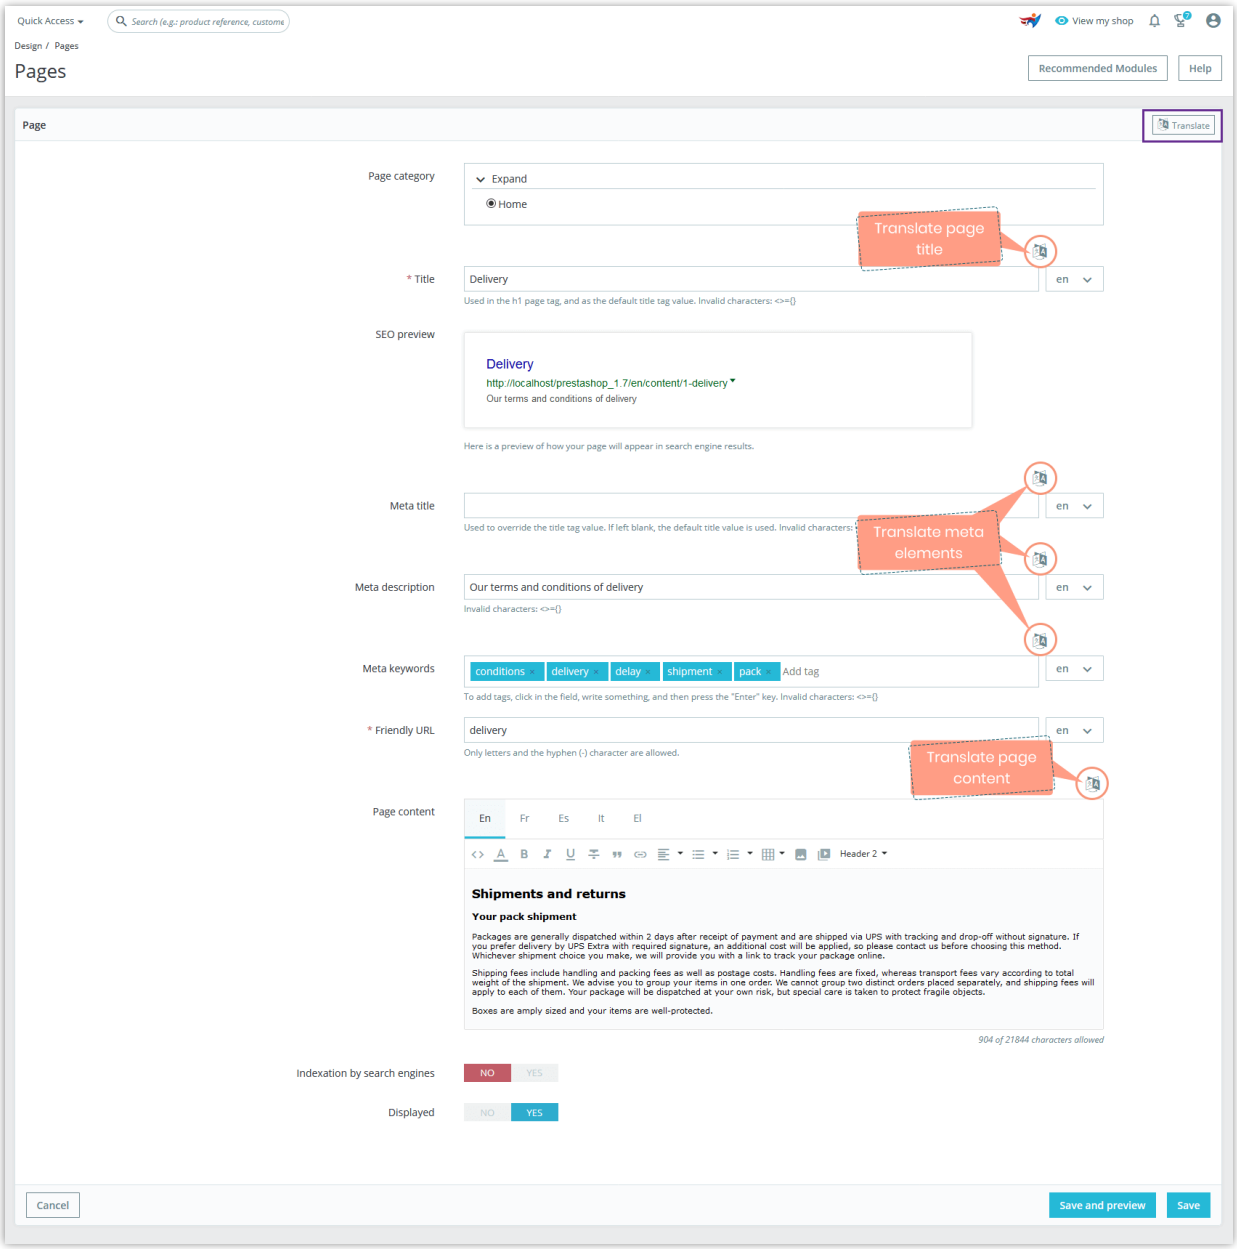

VI. PAGE TRANSLATION

Free Translate & AI Content Generator enables you to translate all CMS page categories and CMS page. Click on “Translate” button to start the translation process.

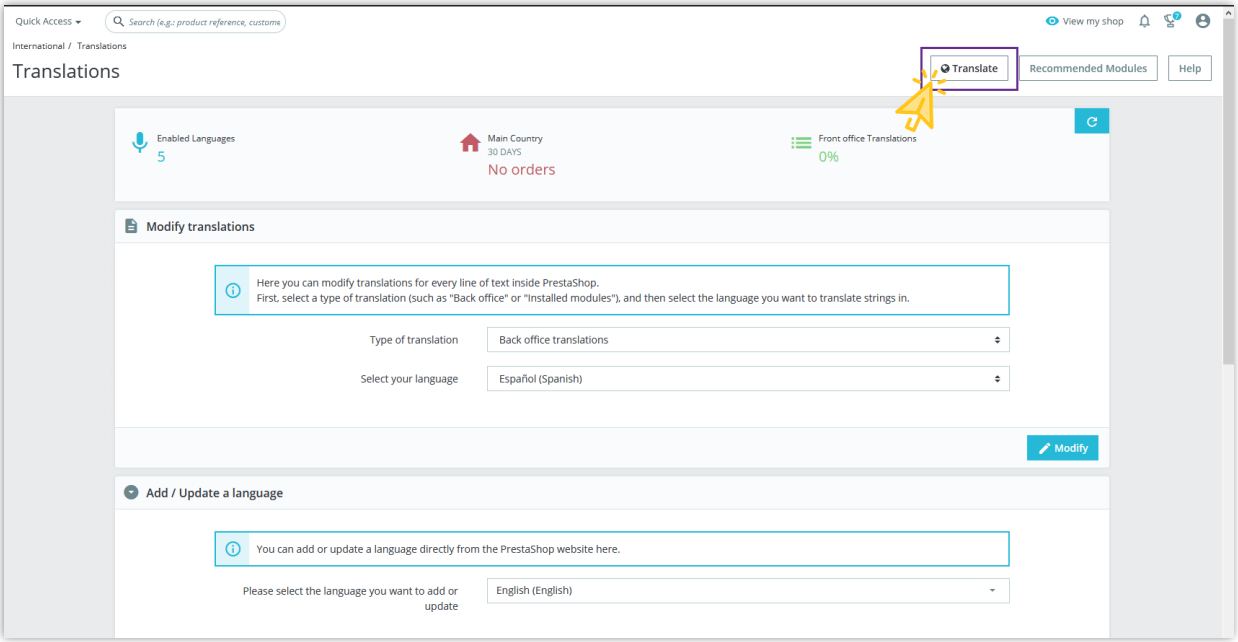

You can also translate a specific CMS page. Click “Edit” a page you want to translate then click on “Translate” icon where you want to translate its content.

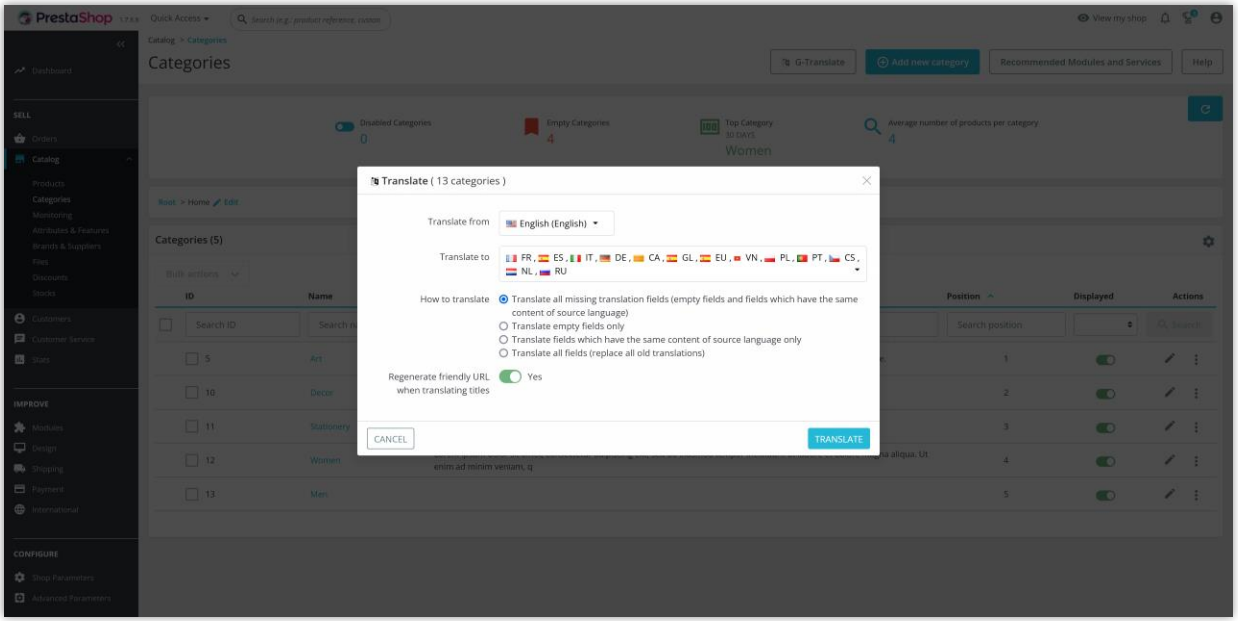

VII. INTERNATIONAL TRANSLATION

Free Translate & AI Content Generator offers you a comprehensive translate tool which allows you to translate your ***back office, themes, installed modules, emails*** and ***other items*** with Google translate API.

Navigate to **International** > **Translations** page. Click on “Translate” button at the top – right corner.

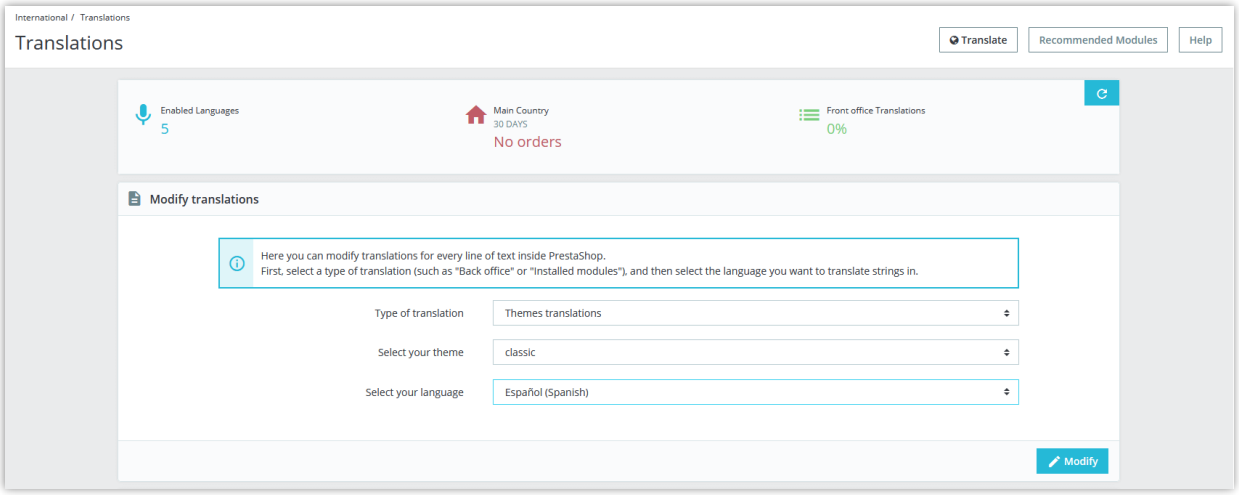

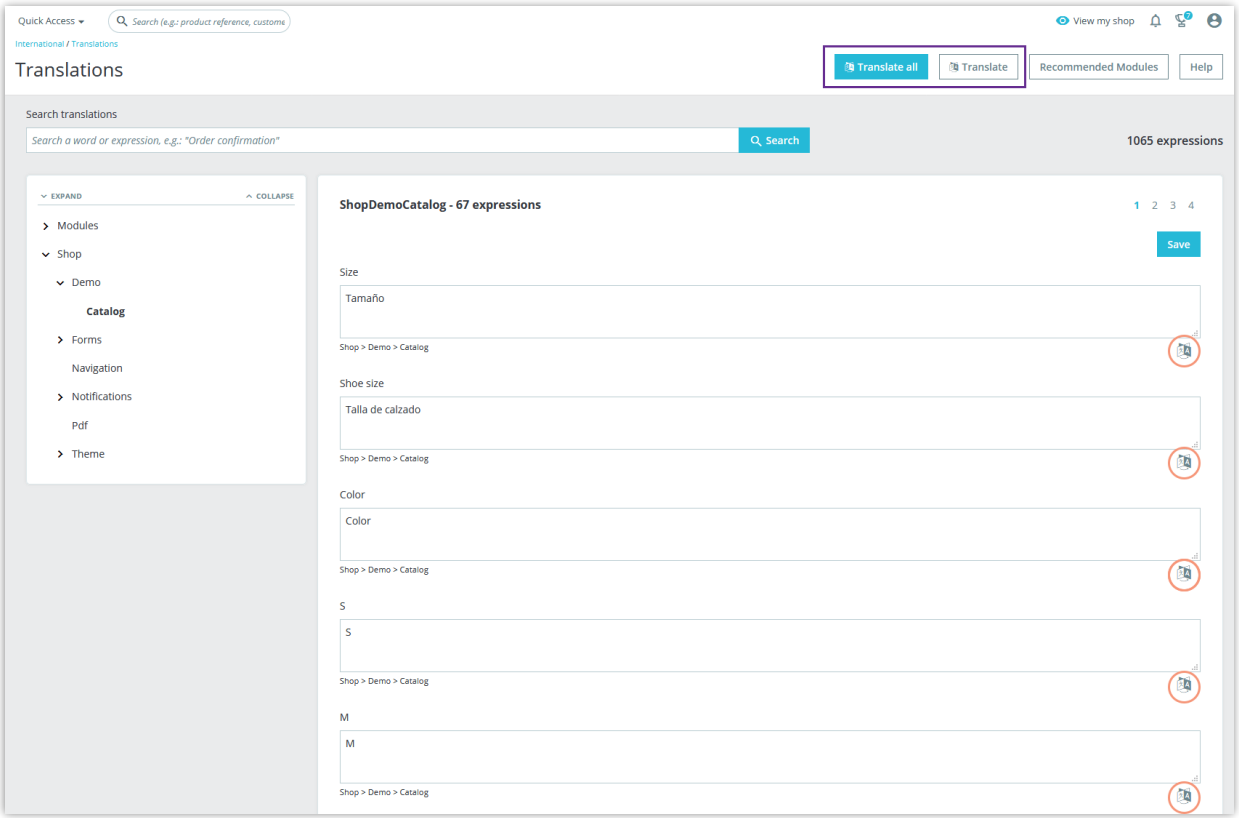

Select items you want to translate and modify the translation settings as you want, then click “Translate” to start translation process.

Or if you want to translate a specific item, **Free Translate & AI Content Generator** also supports you to translate each component or the whole item smoothly.

Below are example screenshots when we translate the “classic” theme of PrestaShop 1.7:

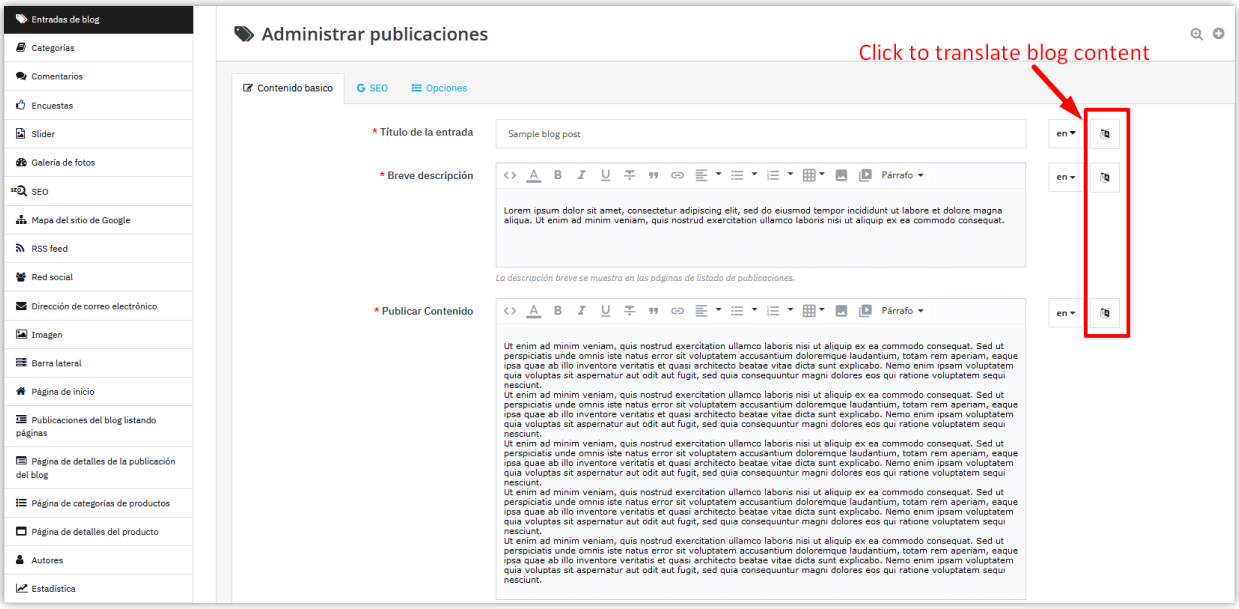

VIII. COMPATIBILITY WITH PRESTAHERO MODULES

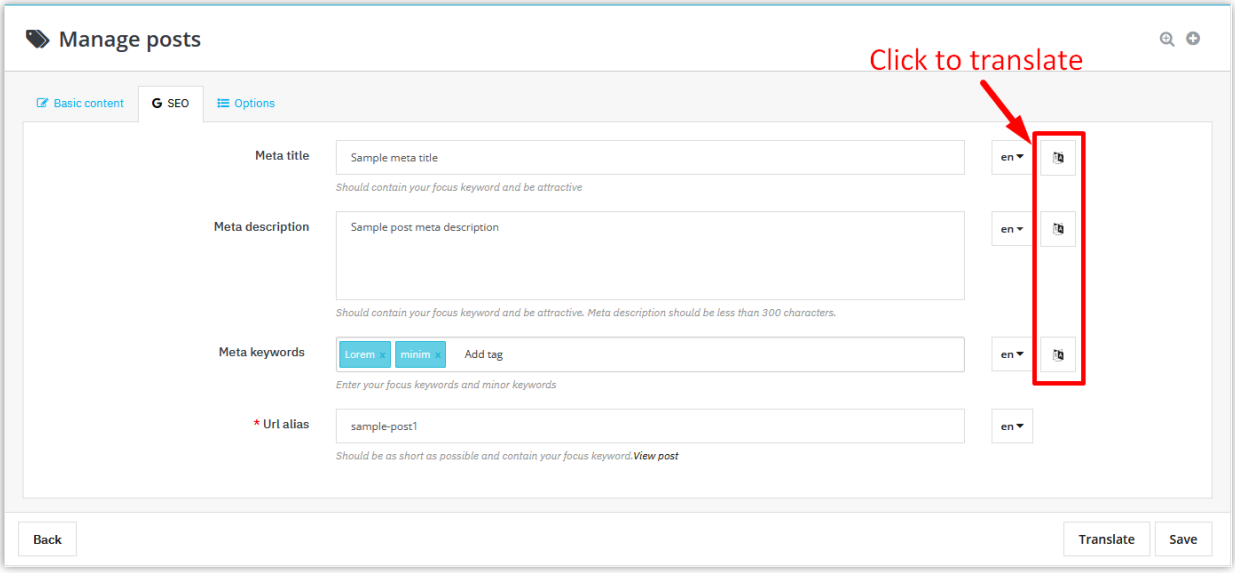

The Free Translate & AI Content Generator module is designed to be compatible with various PrestaHero modules, enhancing its functionality across different parts of your store. Below are the supported modules and how this integration works:

1. Compatibility with “Blog” module

Easily translate the content of your blog posts into over 110 languages. This allows you to share your store's news, updates, and articles with a global audience, all while maintaining the accuracy and readability of the original content.

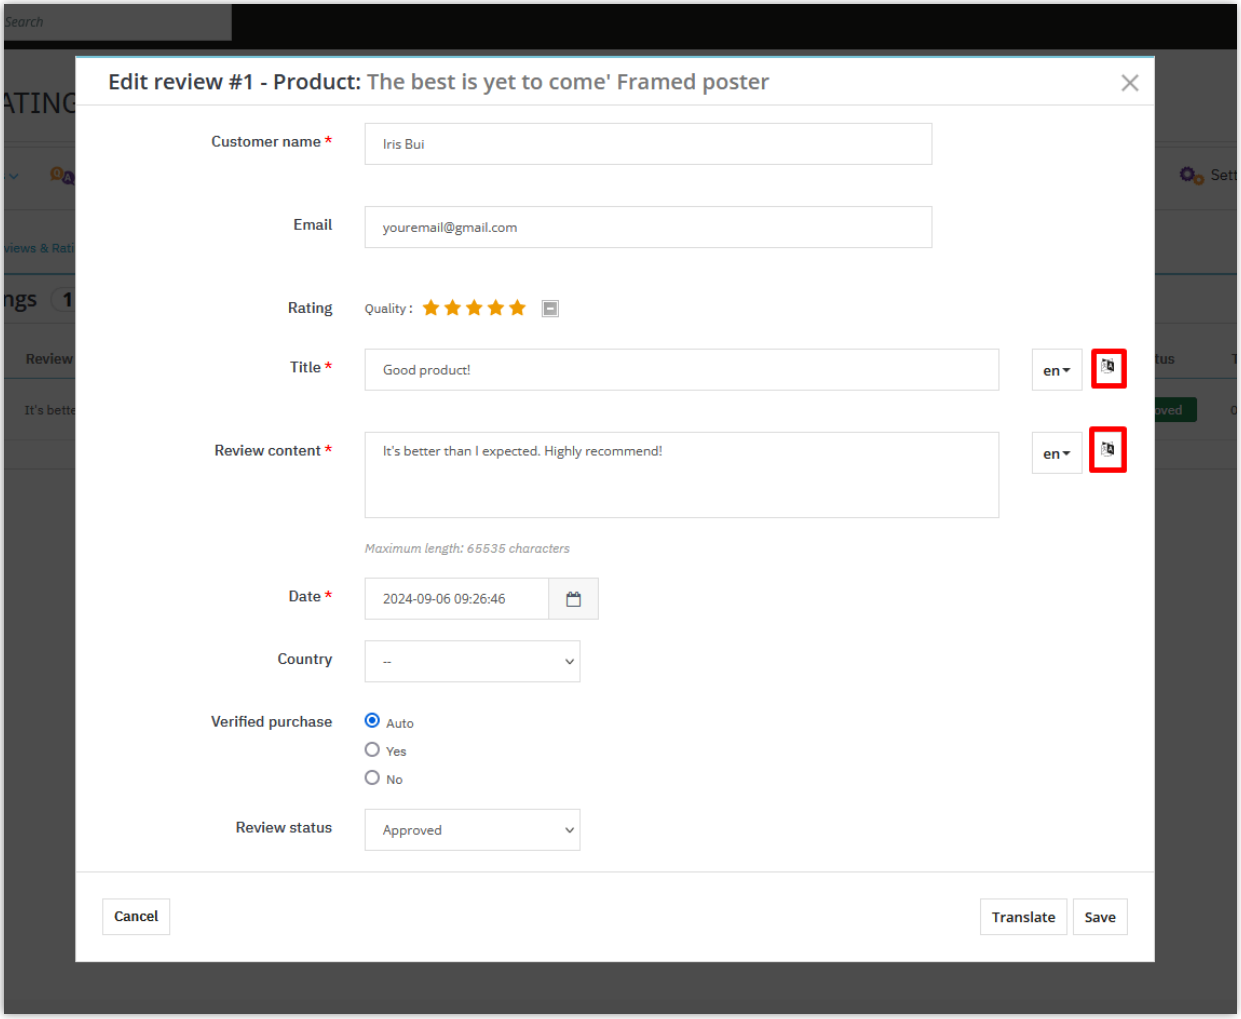

In addition to the post content, the module also allows for the translation of meta titles, meta descriptions, and meta keywords, ensuring that your blog is fully optimized for international SEO and accessible to a global audience.

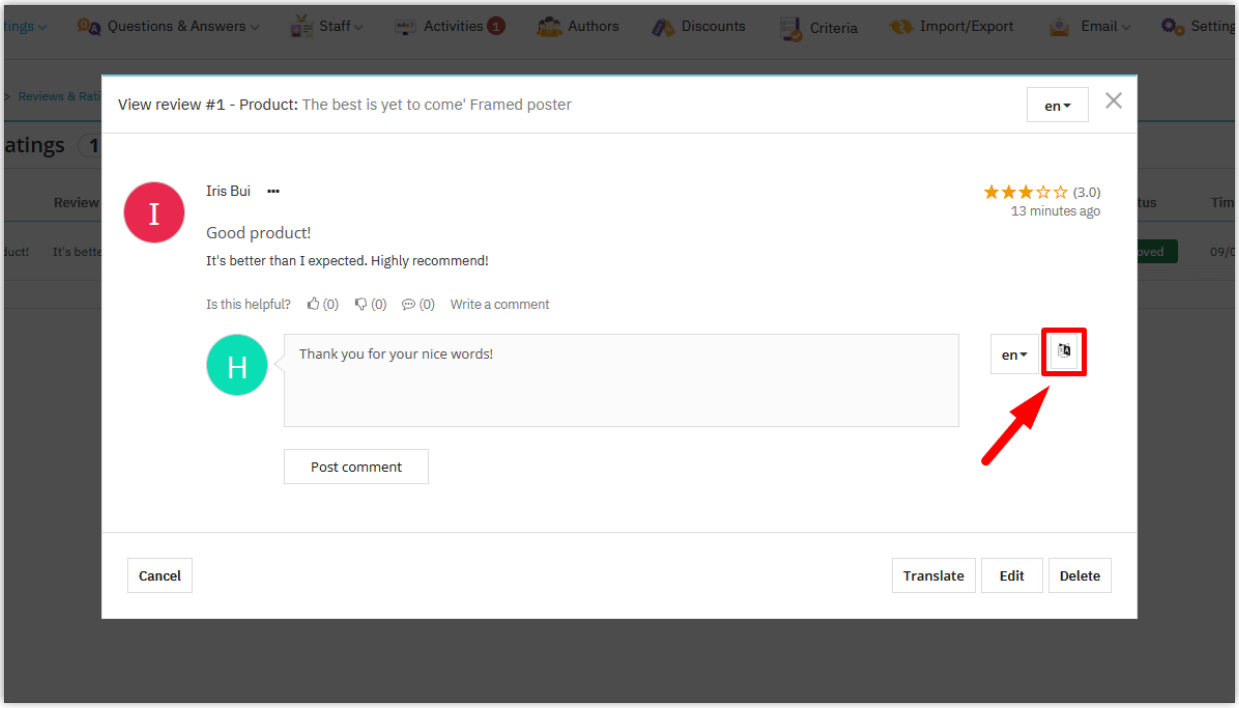

2. Compatibility with “Trusted Reviews” module

Automatically translate customer reviews on your store, making it easier for potential buyers from different regions to understand feedback from other customers. This improves transparency and helps boost customer trust in your store.

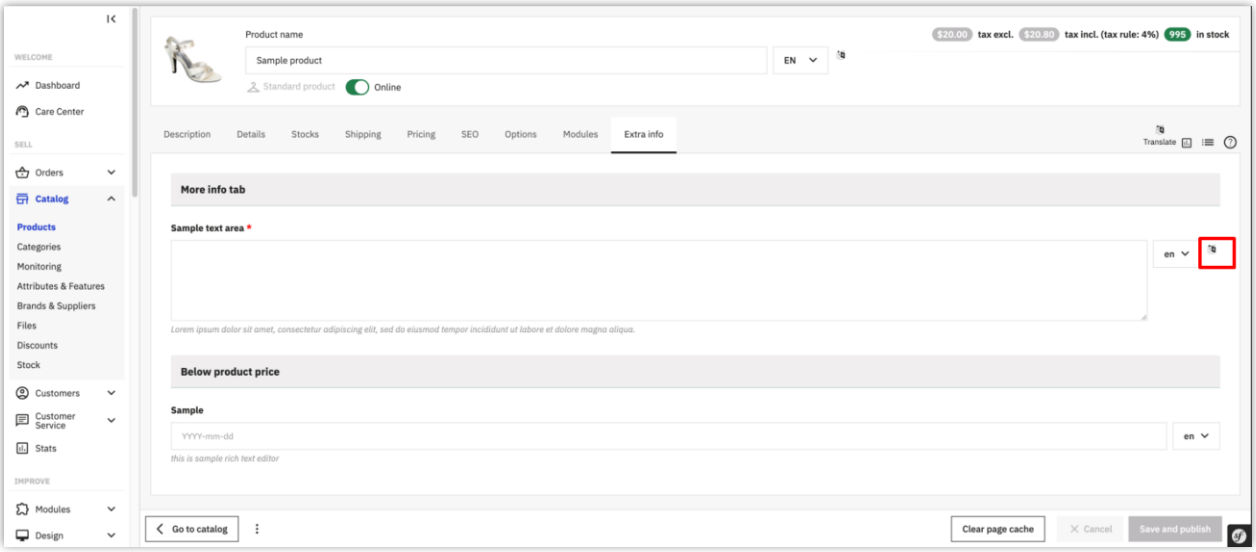

Additionally, the module supports translating your replies to customer reviews, comments, and questions, ensuring clear communication across all languages.

3. Compatibility with "Custom Fields and Tabs on Product Page" module

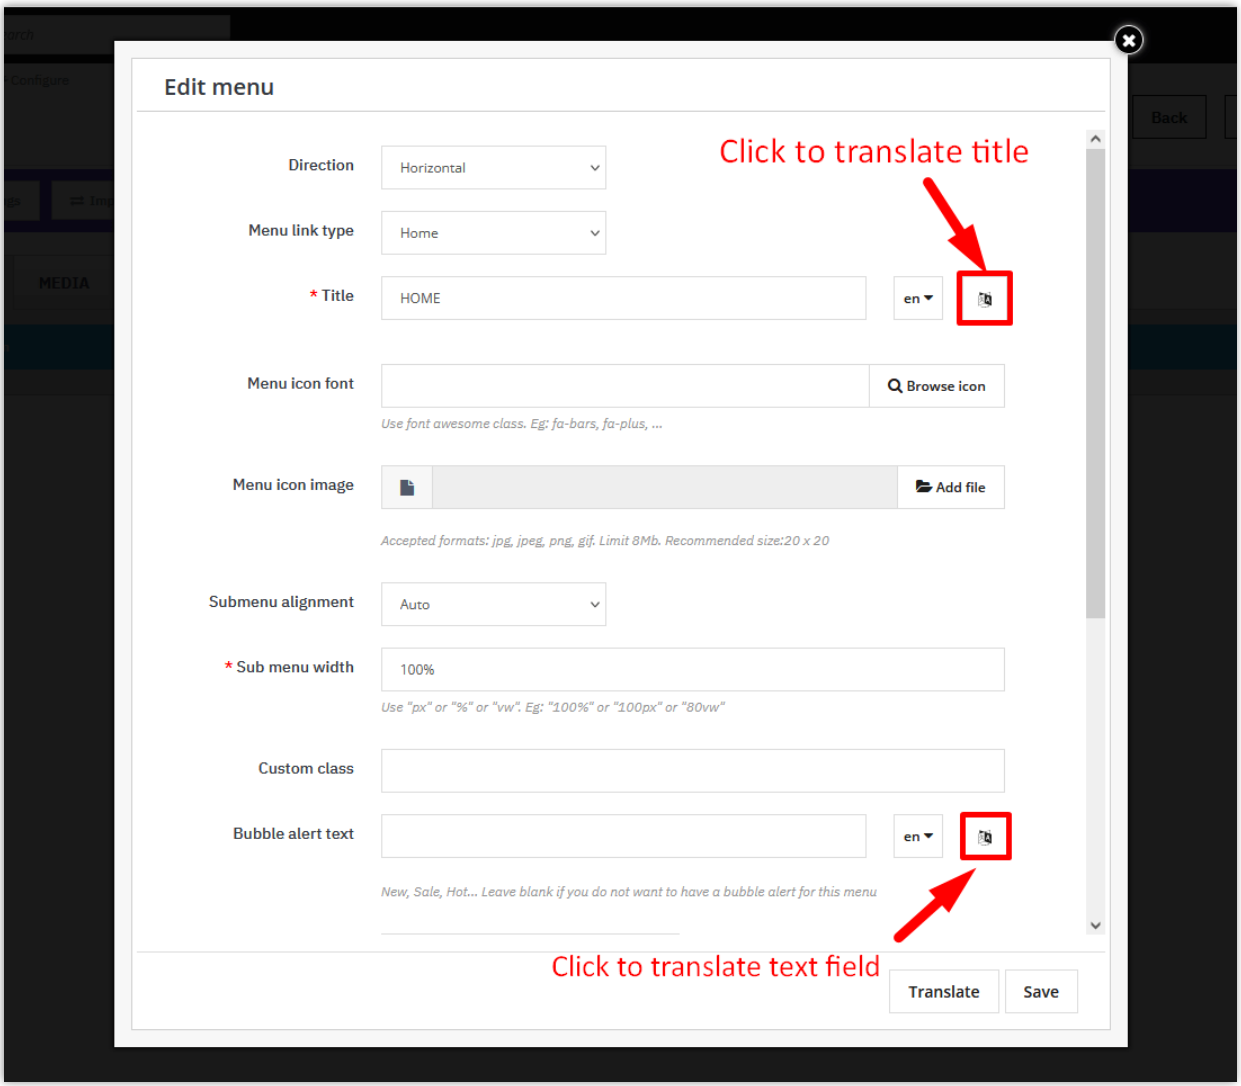

Free Translate supports translating text content in custom product tabs created with the "**Custom Fields and Tabs on Product Page**" module. This helps you provide additional product information in multiple languages for international customers.

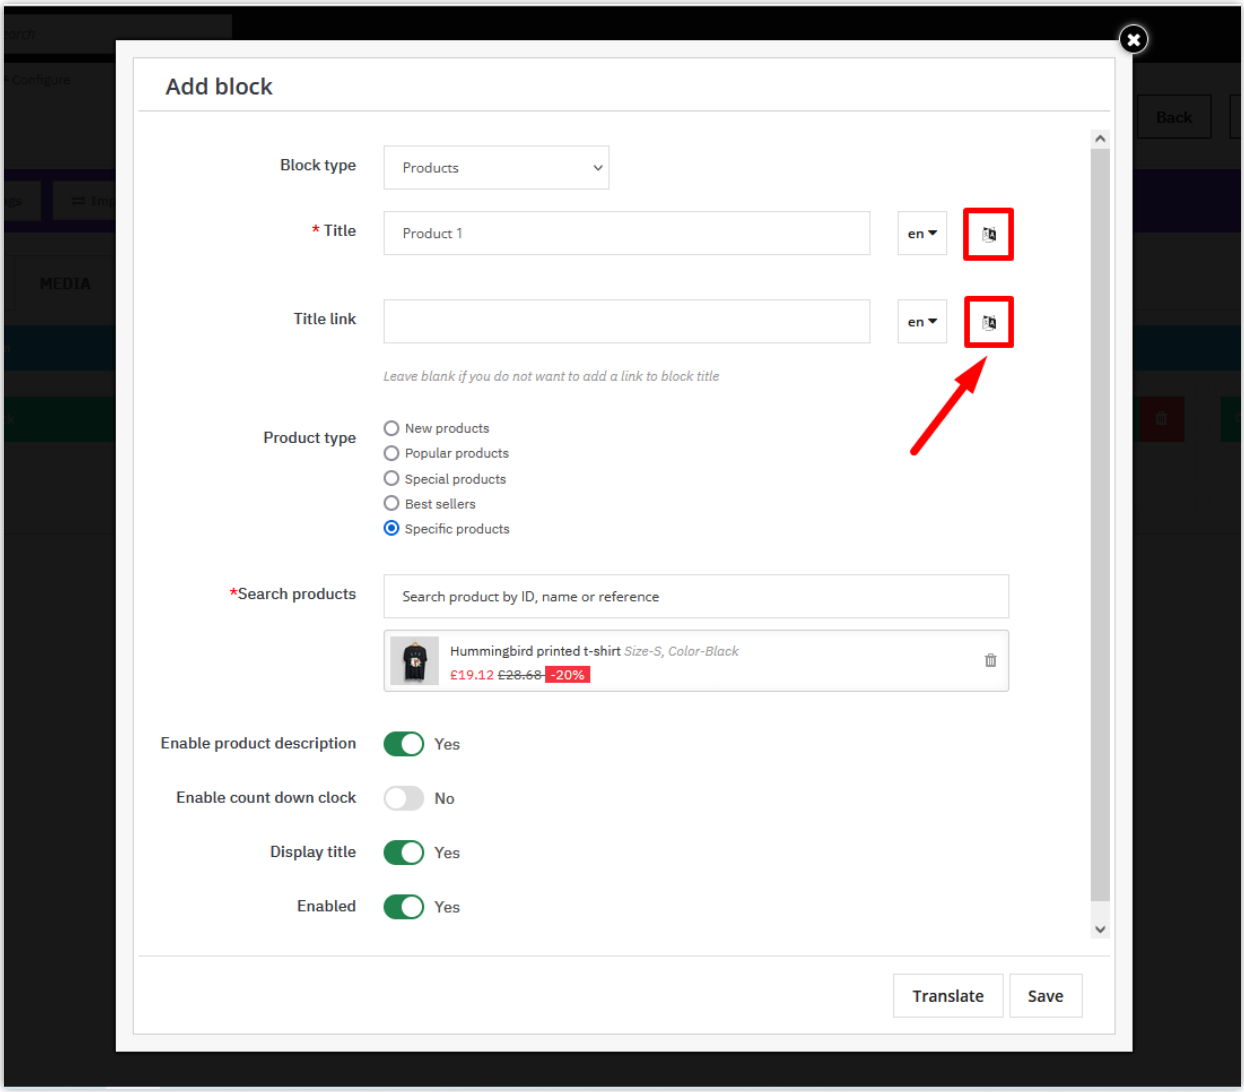

Please note that only text content can be translated. Images, uploaded files, and other non-text content are not supported.

4. Compatibility with “Mega Menu Pro” module

Translate the text content within your mega menu, including menu items, menu tabs, and any other textual elements. This ensures that customers from different regions can easily navigate your store in their preferred language.

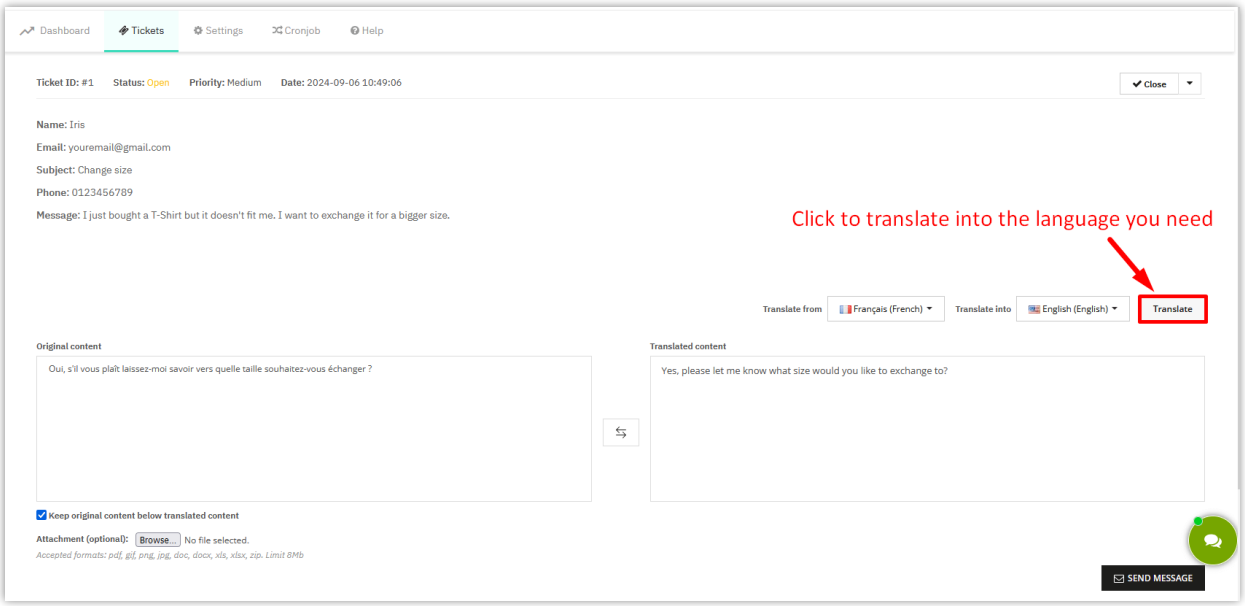

5. Compatibility with “Live Chat, Contact Form, and Ticketing System” module

Easily translate your replies to customer support tickets. When a customer submits a support ticket, administrators can write their response in their own language, then use the module to translate it.

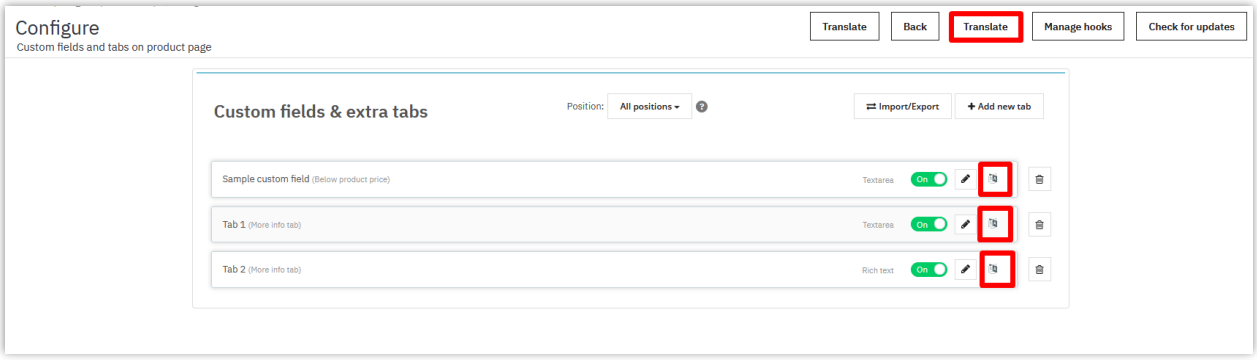

Simply select the source language (the language of the response) in the "**Translate from**" field, choose the target language (the customer’s language) in the "**Translate into**" field, and click the "**Translate**" button. The reply will be automatically translated, ensuring

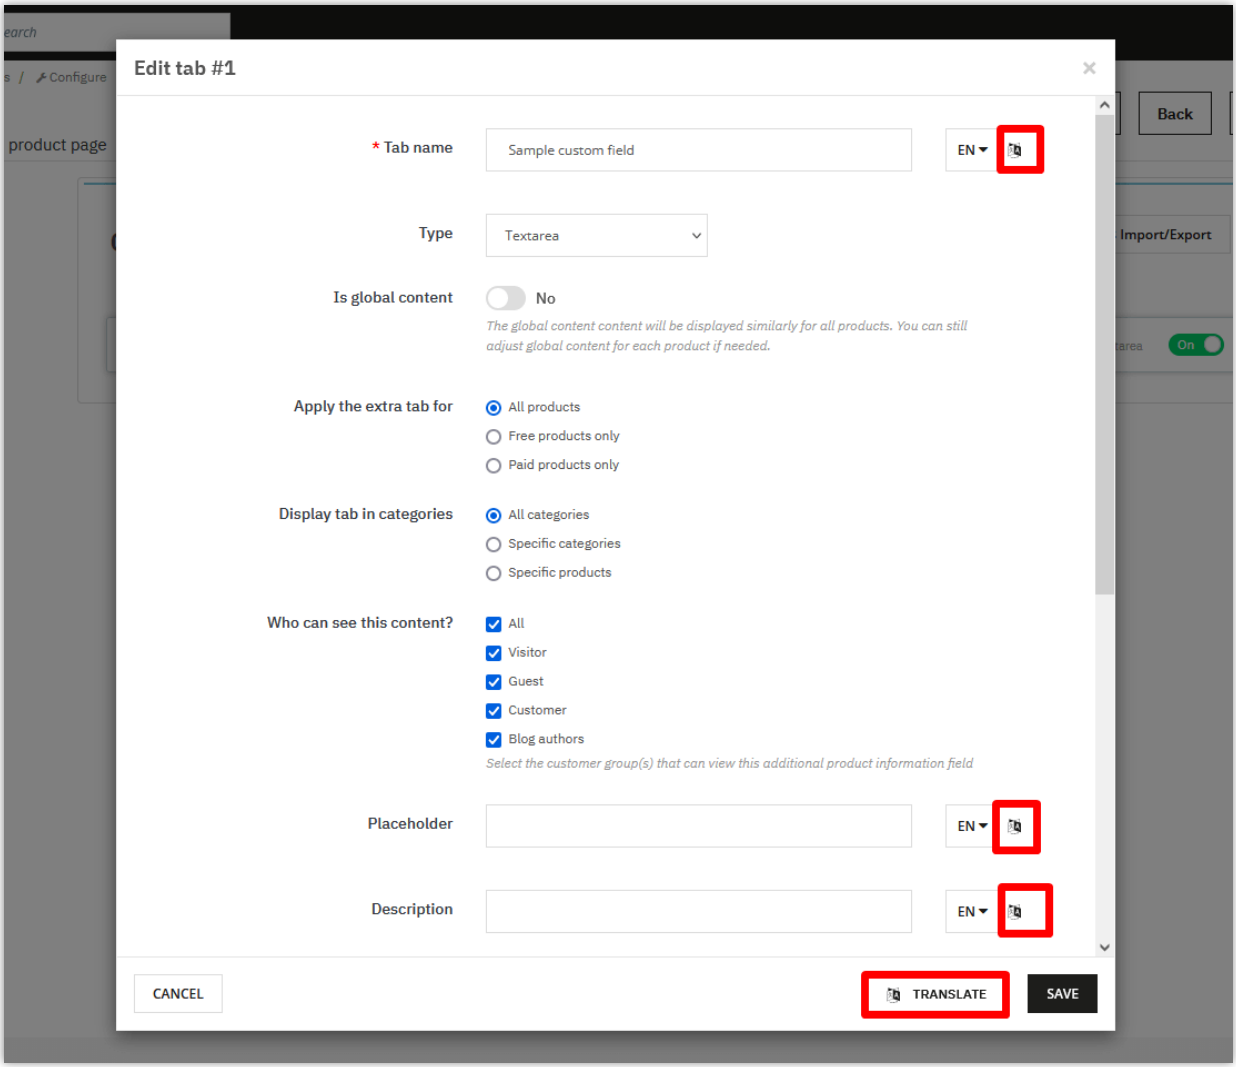

smooth and clear communication between your support team and customers no matter what language is being used.

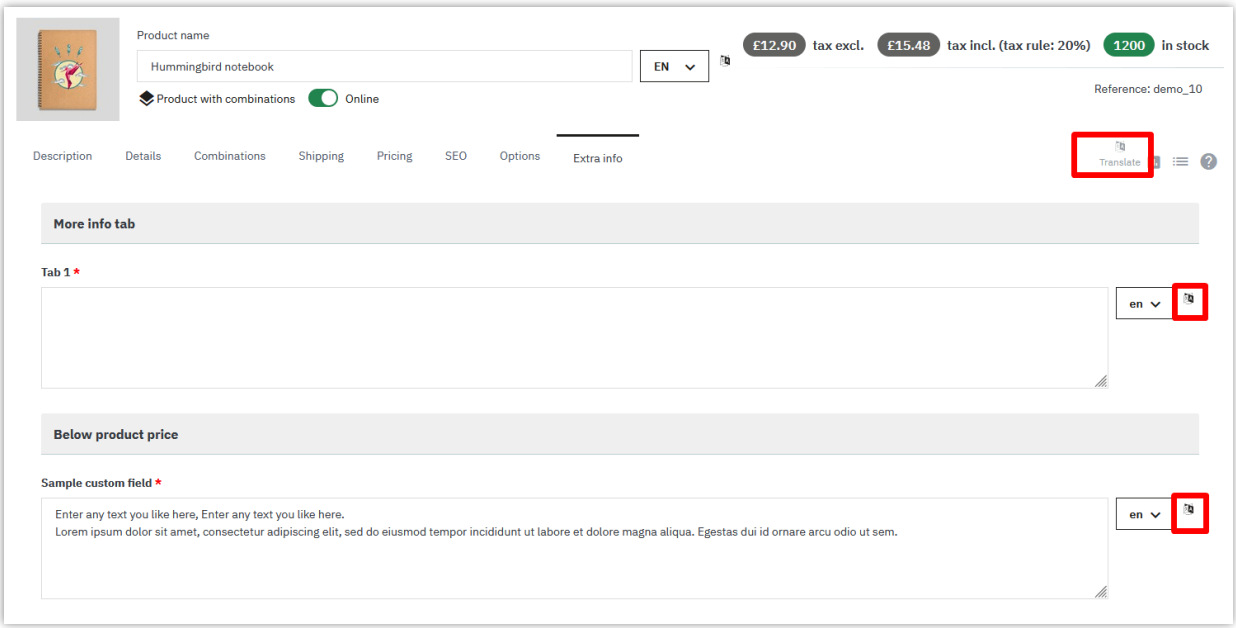

6. Compatibility with "Custom fields & tabs on product page" module

Support for translating the content of any custom product fields added by this module. This ensures that all additional product information you provide is accessible to customers in their preferred language.
