## I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. If you have any questions that are beyond the scope of this documentation, please feel free to contact us.

## II. INTRODUCTION

**G-Translate** module uses Google Translate automatic translation service to translate your PrestaShop online store with Google power and make it multilingual. With 103 available languages, your site will be available globally upon installation. Spend time on what's important: managing your orders and products, or communicating with your customers, in their preferred language.

**G-Translate** makes it easier to add translations to your PrestaShop store. Seamless integration with the familiar PrestaShop environment makes sure you remain inflow. Now, giving your customers a consistent language experience is straightforward and quick.

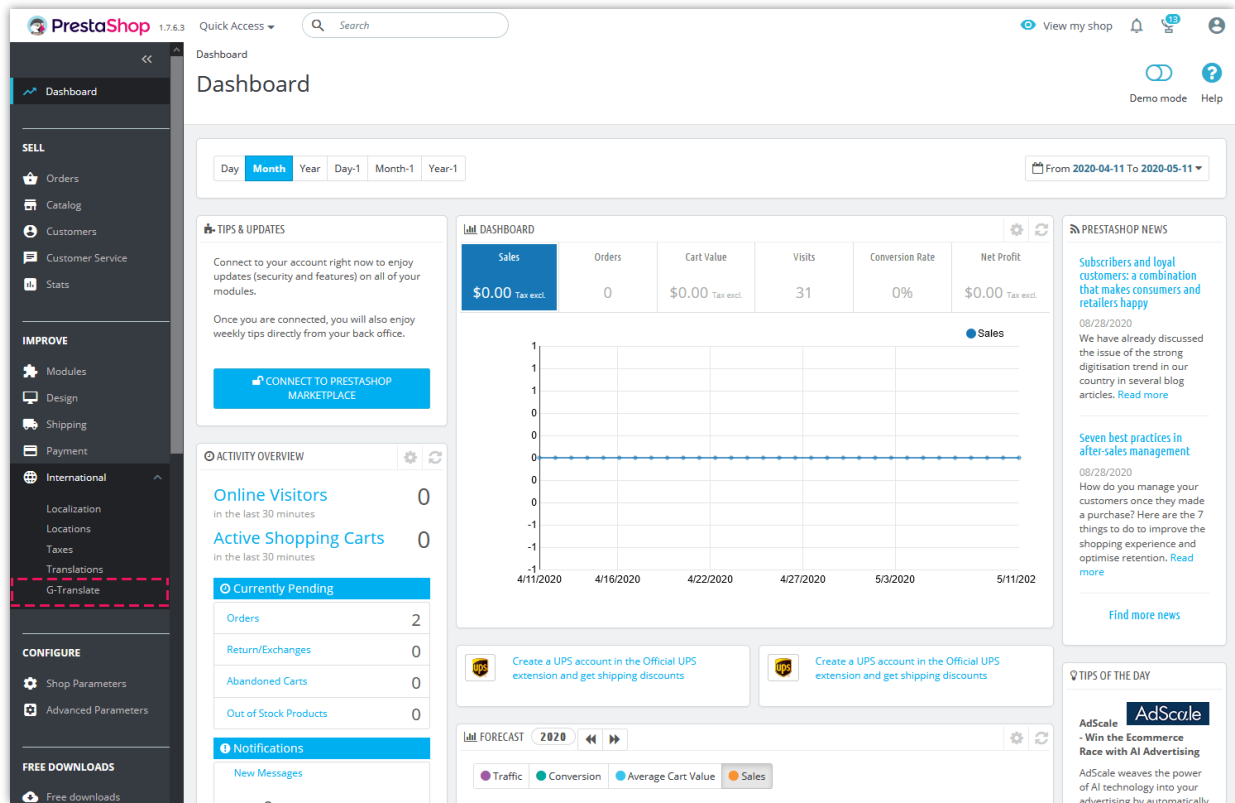

*\* **G-Translate** is compatible with PrestaShop 1.7.x and PrestaShop 8.x*

## III. INSTALLATION

1. Navigate to **"Modules / Module manager"**, click on **"Upload a module / Select file"**
2. Select the module file **"ets\_translate.zip"** from your computer then click on **"Open"** to install

3. Click on **“Configure”** button of the module you just installed to open the module’s configuration page

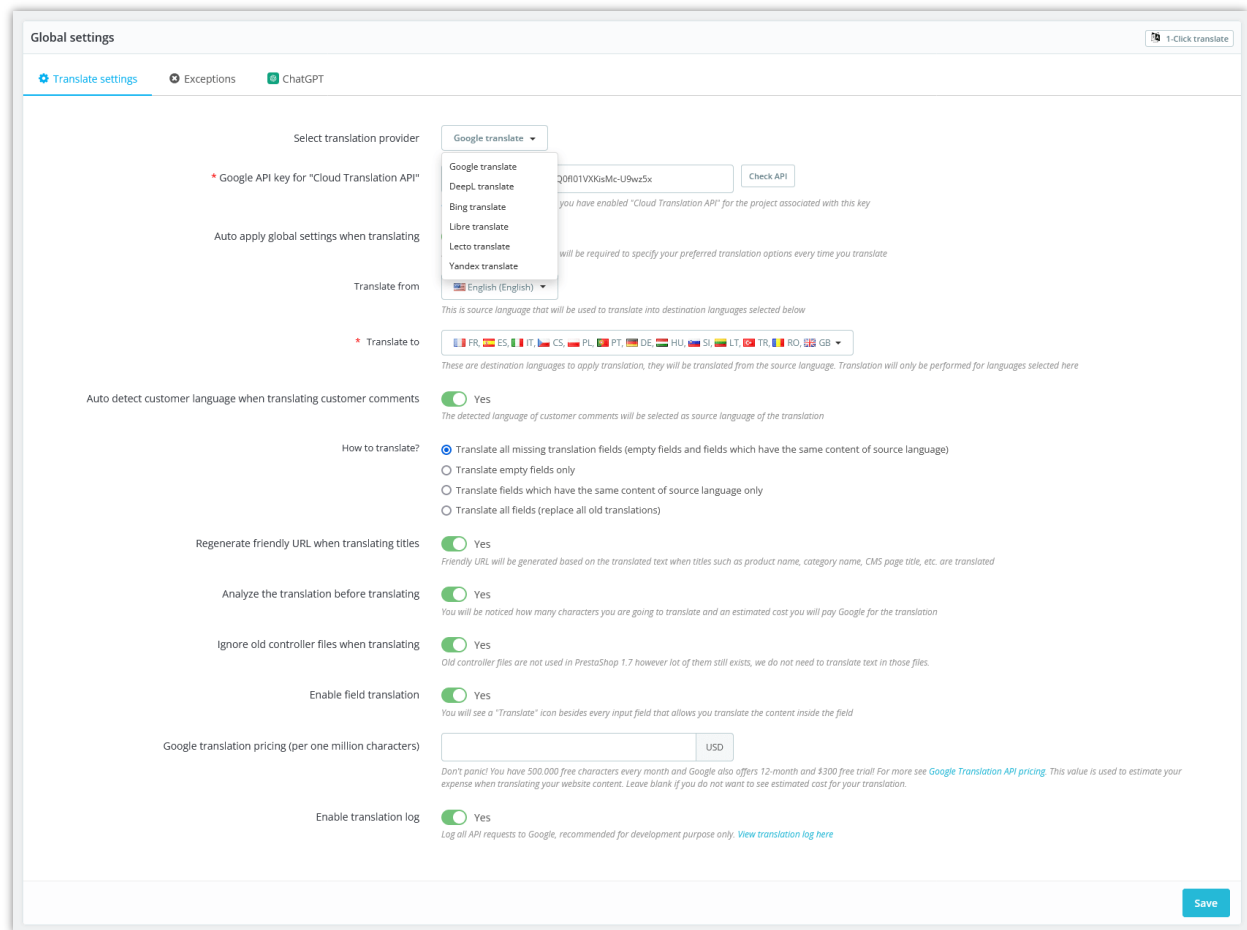

**Quick access:** You can also navigate to **G-Translate’s** configuration page through the quick access menu

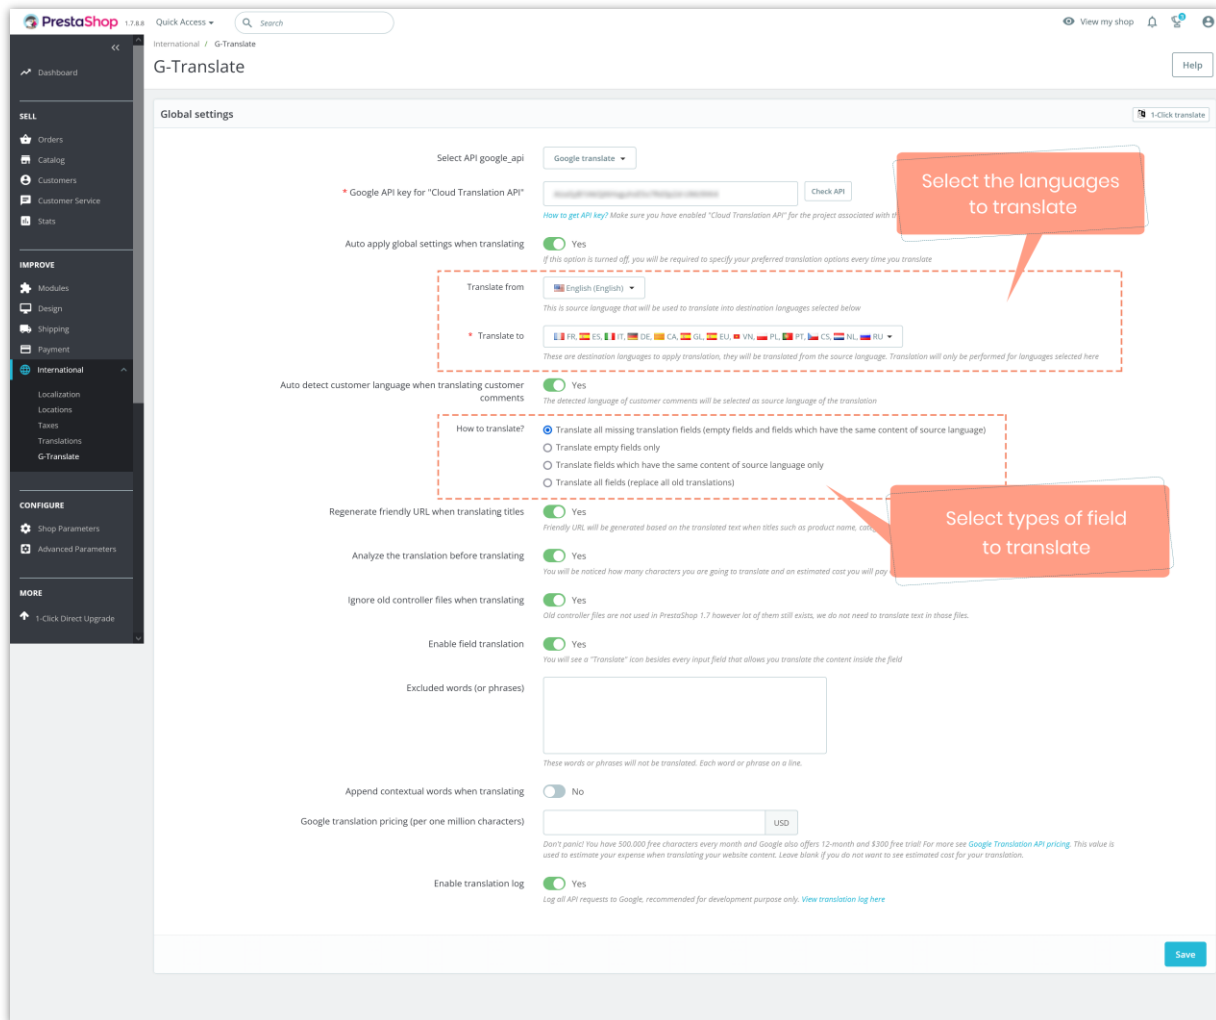

## IV. GENERAL SETTINGS

### 1. Translate settings

Firstly, we will need to select the translation API you want to use. **G-Translate** supports 6 types of API: Google Translate API, DeepL API, Bing Translation API, Libre API, Lecto API, and Yandex API.

Click on "How to get API key?" link to learn how to create and get your translation API key. Enter your API key into **G-Translate's** configuration page then click "Save". And we're ready to go!

- **Auto apply global settings when translating:** The translation settings defined on this page will be automatically applied to all types of translation: product translation, CMS page translation, etc.
- **Automatic language detection to translate comments:** **G-Translate** will automatically detect the language of the customer's comment and perform translation.
- **Enable translation log:** **G-Translate** provides a translation log feature to help you keep track of this module's performance. Click on "View translation log here" link to open the translation log page.

  - Static pages (pages in SEO settings tab such homepage, login, my account, etc.)
- Customer Reassurance
- Link widget (footer menu)
- Main menu (top menu)
- Custom text blocks
- Image slider

Back Translate

## 2. Exceptions

Due to the characteristics of each language when translating, there will be errors in certain words, especially when a word has many meanings and stands alone. So, the module supports the feature that allows you to add fixed translations for some special words.

For example, the English word "Save" has many meanings: it means both "Enregistrer" and "sauvegarder" in French. However, when using the translation tools, if you want to show that the word "Save" means "Enregistrer" (for example, save the configuration), you can turn on the "**Fixed translation for some special words**" option and add the words you want to translate with fixed meanings. At that time, when encountering the word "save", the module will automatically translate it to "Enregistrer".

In addition, the module also supports the "**Append contextual words when translating**" feature.

The contextual words you add will help Google understand the context of the translation better, especially when the text to translate is too short (has only one or a few words).

Append contextual words when translating  Yes

\* Append contextual words to improve translations  fr ▾

These words help Google understand the context of the translation better, especially when the text to translate is too short (has only one or a few words). These words will be removed from the translation result

\* Pages to append contextual words when translating

- All pages
- Catalog (products, categories, features and attributes, etc.)
- CMS Pages and categories
- International / Translations (texts in tpl or php files and email templates)
- Customer Reassurance
- Link widget (footer menu)
- Main menu (top menu)
- Custom text blocks
- Image slider on home page

Append contextual words when original text to translate fewer than (or equals)  words

Leave blank to append contextual words to every text when translating

### 3. ChatGPT

Integrated with ChatGPT, the module will make it easier and more efficient to create and translate product content. In this tab, you can add and save prompts to use in generating product content that meets their specific requirements without the need for manual input every time.

Global settings Click translate

Translate settings Exceptions **ChatGPT**

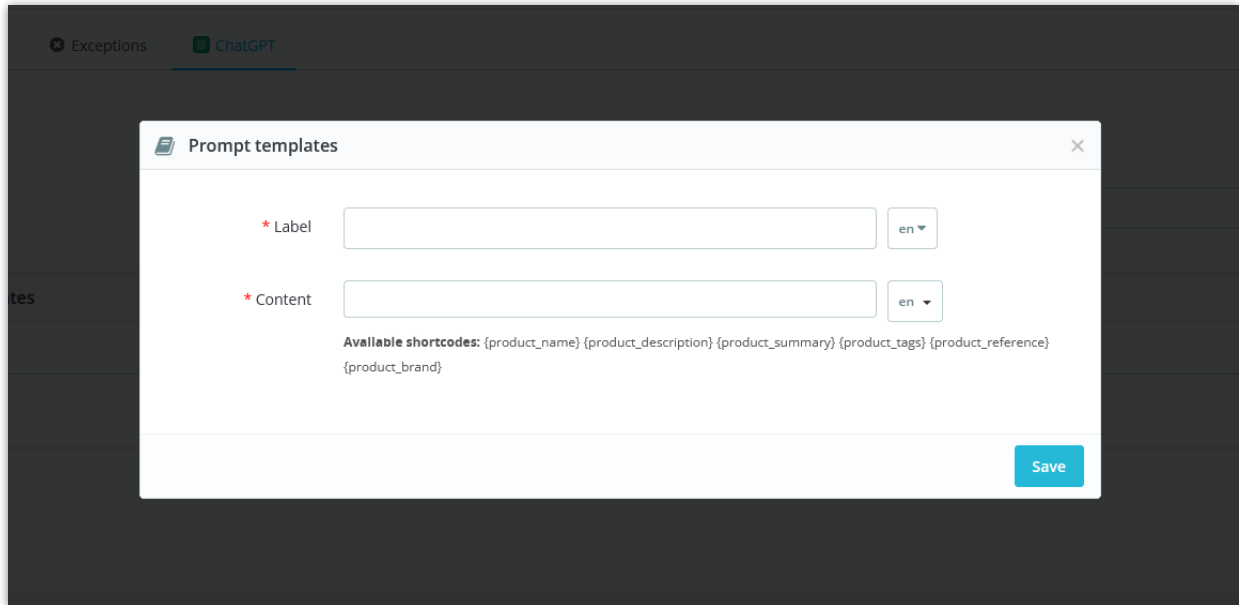

Enable ChatGPT  Yes  
Enable ChatGPT to create or edit content.

\* ChatGPT API   
[How to get API key?](#) Make sure you have enabled "ChatGPT API" for the project associated with this key

Prompt templates **1**

Label	Content	Action

## V. CATALOG TRANSLATION

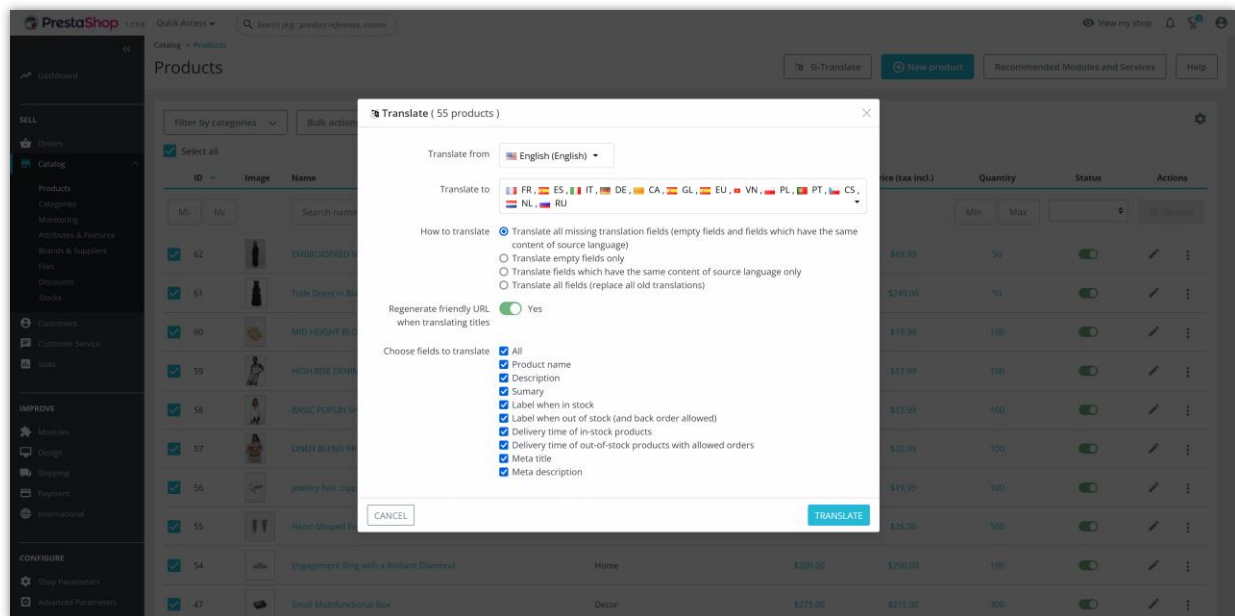

### 1. Product translation

---

From **Products** listing page, you can run the quick product translation by selecting the products you want to translate then click on **“Translate”** button.

A popup will appear and display your defined translate configurations. You can edit the translate configurations before translating.

When you satisfy with your translate configurations, click on "Translate" button to start the analyzation process:

Super Speed - Incredibly fast - GTmetrix optimization module	Speed & Performance	\$125.99	\$125.99
Hot deals PRO - Special products slider		\$49.99	\$49.99
BLOG - All in 1 Prestashop blog module		\$149.99	\$149.99
CAPTCHA - reCAPTCHA - Anti spam - Anti fake account Module	Security & Access	\$49.99	\$49.99
Instagram Shopping Slider - Prestashop Instagram slider module	Sliders & Galleries	\$149.99	\$149.99

**ANALYSIS RESULTS**

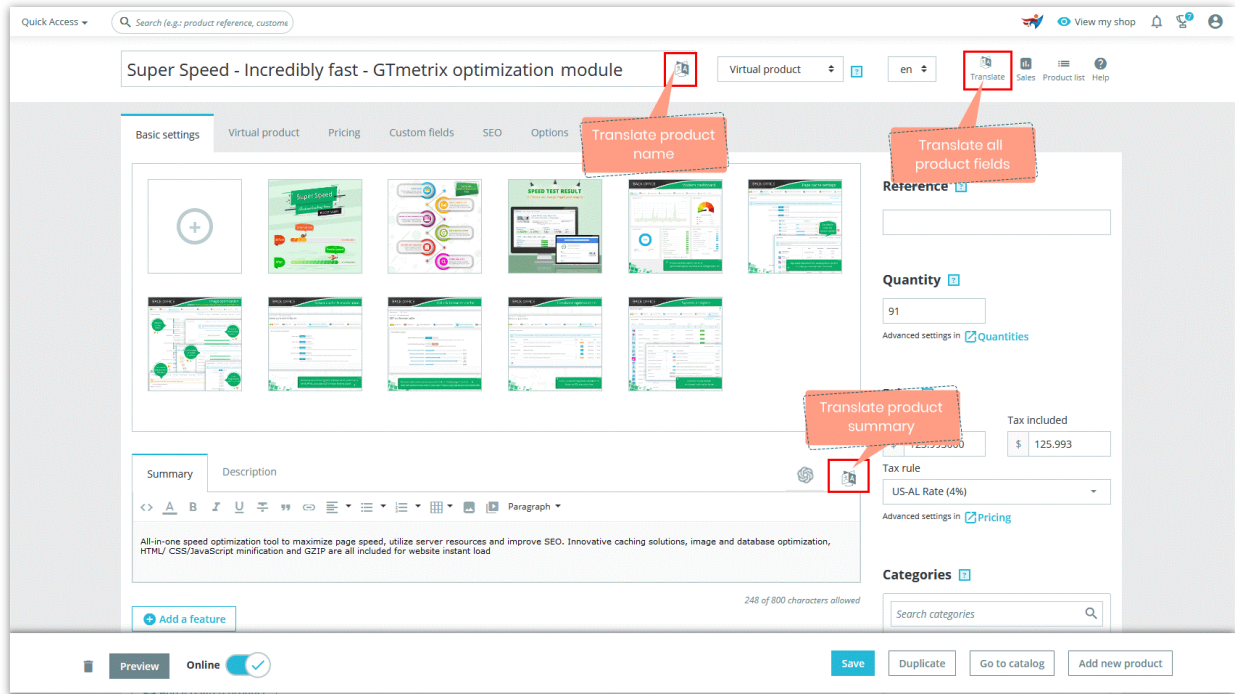

You are going to translate 297 sentences (5203 characters)

Estimated price: 0.00018 USD

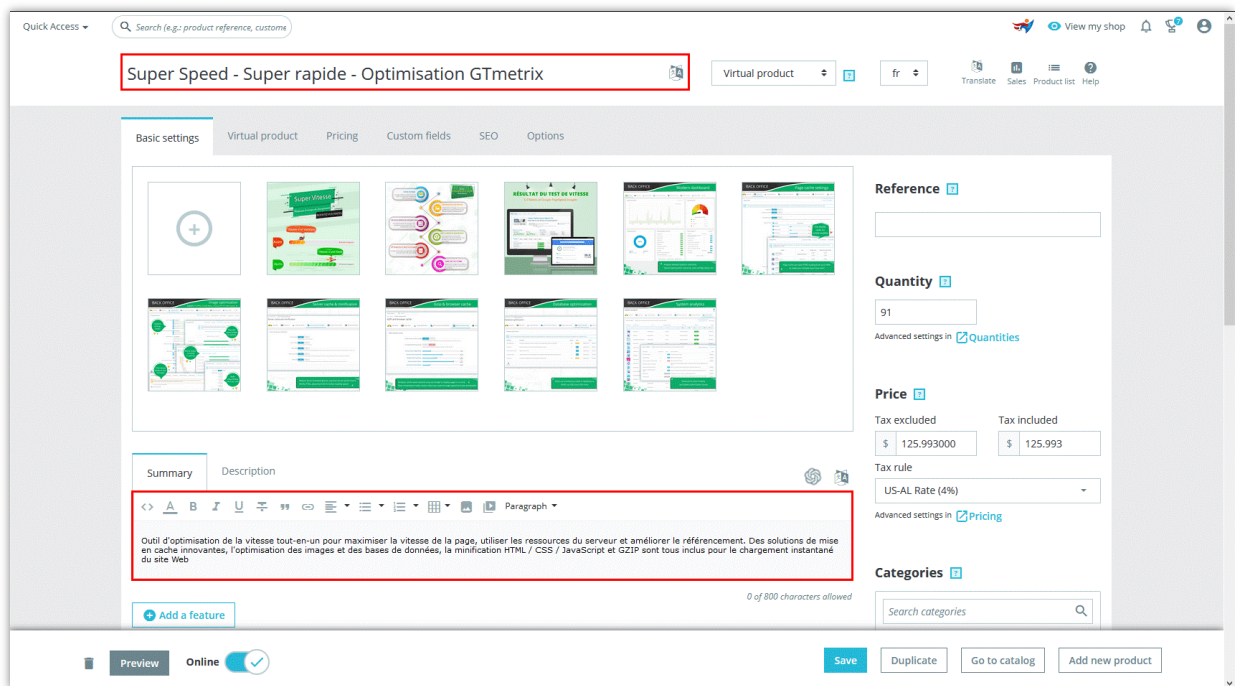

Click on **“Confirm and translate now”** button to start translating.

❖ **Translate a specific product**

**G-Translate** also enables you to translate a specific product. You simply need to open the product editing page and click on **“Translate”** icon where you want to translate its content.

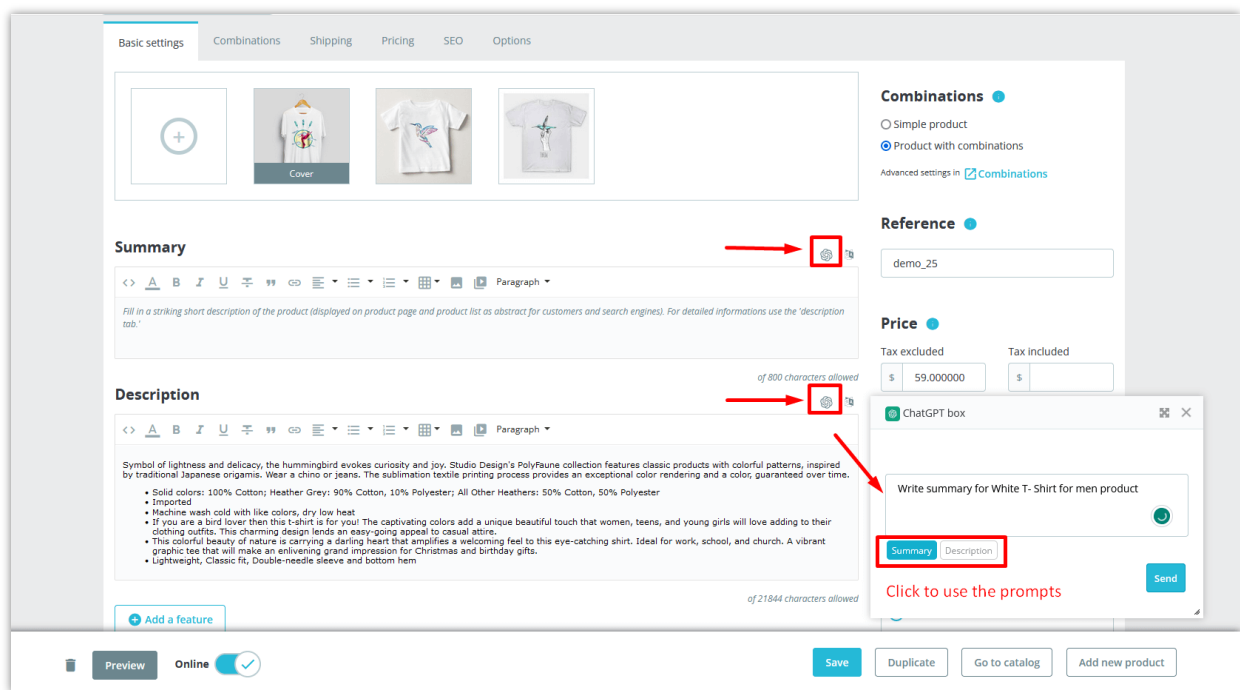

Below is an example of a product name and summary after being translated from English to French:

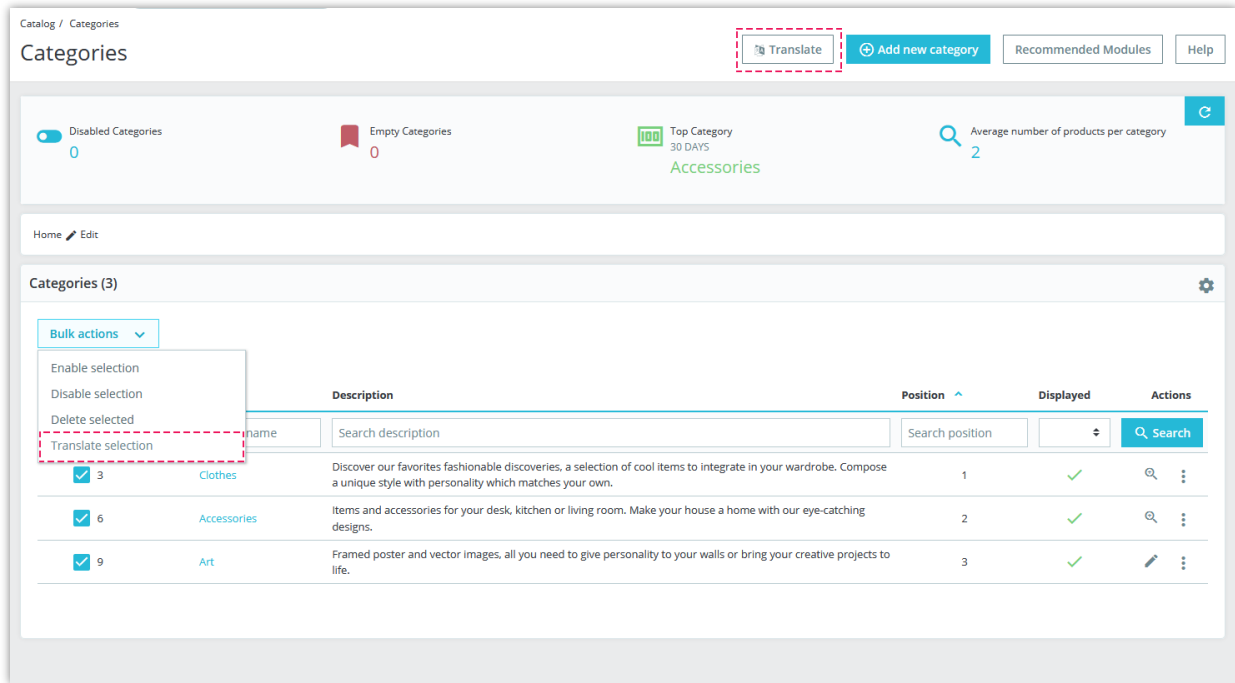

Besides, we also integrate ChatGPT into the module (on the summary and description section of the product page) to help store owners to create and translate product content easier.

Click on the ChatGPT icon in the product description or summary and start using it. Under the chat box with the labels of the prompts you have created, click on the label of the prompt you want to use to save time without having to manually retype the content you want.

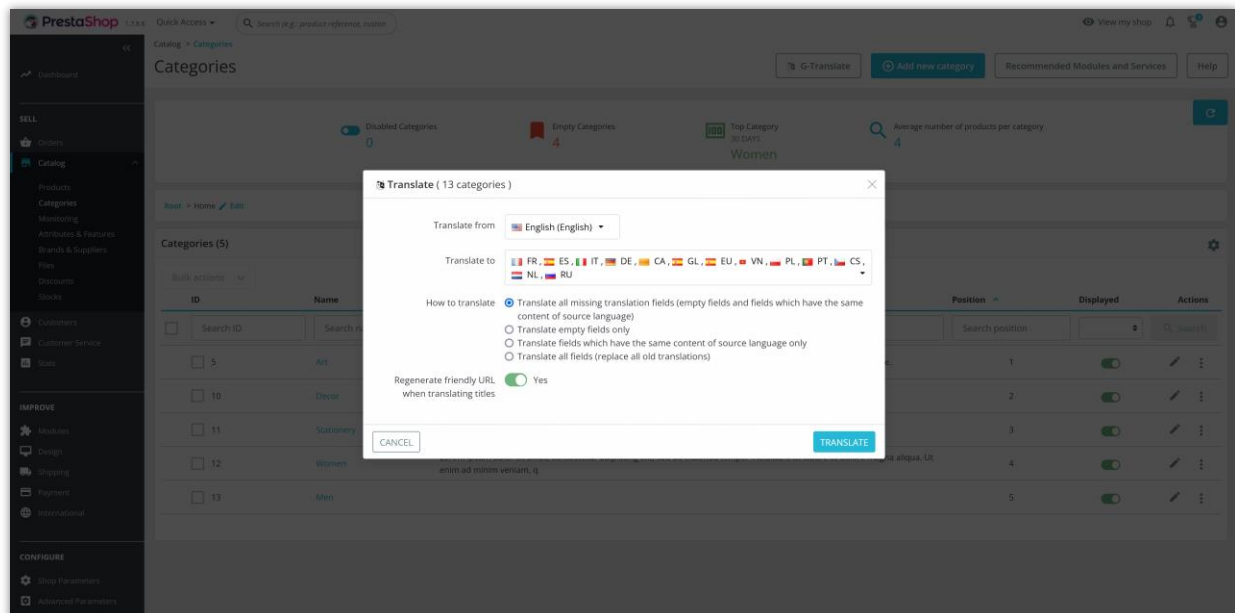

## 2. Product category translation

From **Categories** listing page, you can run the quick category translation by selecting the categories you want to translate then click on **“Translate”** button.

Similar to product translation, a popup will appear and display your defined translate configurations. You can modify translation settings before running translation process.

### ❖ Translate a specific category

**G-Translate** also enables you to translate a specific category. You simply need to open the category editing page and click on “Translate” icon where you want to translate its content.

The screenshot shows the Prestashop Category editing interface. At the top right, there is a "Translate" icon. Three callout boxes highlight specific features:

- Translate category name:** Points to the "en" language dropdown menu next to the "Name" field.
- Translate category description:** Points to the "en" language dropdown menu next to the "Description" field.
- Translate category meta elements:** A dashed purple box encloses the "Meta title", "Meta description", and "Meta keywords" fields, with a callout box pointing to the "en" language dropdown menu for each.

The page includes various form fields and sections:

- Name:** "Cross-selling & Product bundles" with a language dropdown set to "en".
- Displayed:** "NO" / "YES" buttons.
- Parent category:** "Expand" / "Home" dropdown.
- Description:** A rich text editor with a language dropdown set to "en".
- Category cover image, thumbnail, and menu thumbnails:** Each has a "Choose file(s)" button and a "Browse" button.
- SEO preview:** A preview box showing a sample meta title and description.
- Meta title, description, and keywords:** Fields for SEO optimization with character counts and language dropdowns.
- Friendly URL:** "cross-selling-product-bundles" with a language dropdown.
- Group access:** A list of customer groups with checkboxes: "Select all", "Visitor", "Guest", "Customer", and "Default level".

At the bottom, there are "Cancel" and "Save" buttons.

### 3. Brand and Supplier translation

From **Brands** and **Suppliers** listing page, you can translate all available brands and suppliers by clicking on “Translate” button.

Brands & Suppliers / Brands

Brands (2)

ID	Logo	Name	Addresses	Products	Enabled	Actions
2		Graphic Corner	--	9	✓	
1		Studio Design	1	9	✓	

Addresses (2)

ID	Brand	First name	Last name	Zip/Postal code	City	Country	Actions
4	Studio Design	manufacturer	manufacturer	10154	New York	United States	
3	--	supplier	supplier	10153	New York	United States	

Brands & Suppliers / Suppliers

SUPPLIERS (3)

ID	Logo	Name	Number of products	Enabled	Actions
3		Caroline Boutique	0	✓	
2		J. Smith Handcraft	0	✓	
1		Sophia Beauty Salon	0	✓	

## 4. Attributes and Features translation

From **Attributes and Features** listing page, you can translate all available attributes and features by clicking on “Translate” button or translate each specific item.

The screenshot displays the 'Attributes & Features / Attributes' page. The main content area shows a table of attributes with the following data:

ID	Name	Values	Position
1	Size	4	1
2	Color	14	2
3	Dimension	3	3
4	Paper Type	4	4

The 'Translate' button in the top right corner is highlighted with a red dashed box. The 'Bulk actions' dropdown menu is open, and the 'Translate selection' option is also highlighted with a red dashed box.

## VI. PAGE TRANSLATION

**G-Translate** enables you to translate all CMS page categories and CMS page. Click on “Translate” button to start the translation process.

<input type="checkbox"/> 5	secure-payment	Secure payment		5	✓	<input type="button" value="Edit"/> <input type="button" value="⋮"/>

You can also translate a specific CMS page. Click "Edit" a page you want to translate then click on "Translate" icon where you want to translate its content.

The screenshot shows the 'Pages' configuration page in PrestaShop. At the top right, there is a 'Translate' button. Below it, several fields have a 'Translate' icon (a document with a speech bubble) next to them. Red callout boxes point to these icons with the following labels:

- Translate page title:** Points to the 'Translate' icon next to the 'Title' field.
- Translate meta elements:** Points to the 'Translate' icons next to the 'Meta title', 'Meta description', and 'Meta keywords' fields.
- Translate page content:** Points to the 'Translate' icon next to the 'Page content' field.

The page configuration includes the following fields and options:

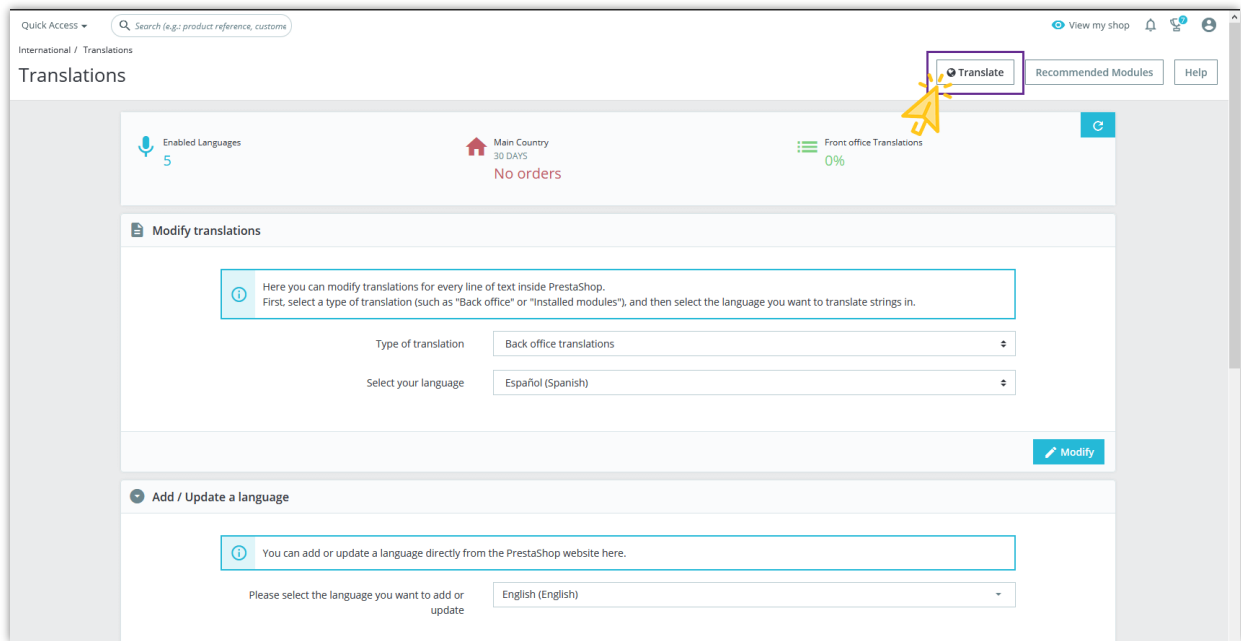

- Page category:** A dropdown menu with 'Expand' selected and 'Home' as a sub-option.
- Title:** A text field containing 'Delivery' and a language dropdown set to 'en'. Below it is a note: 'Used in the h1 page tag, and as the default title tag value. Invalid characters: <=>{}'.
- SEO preview:** A preview box showing 'Delivery' as a link, the URL 'http://localhost/prestashop\_1.7/en/content/1-delivery', and the text 'Our terms and conditions of delivery'. Below it is a note: 'Here is a preview of how your page will appear in search engine results.'
- Meta title:** An empty text field and a language dropdown set to 'en'. Below it is a note: 'Used to override the title tag value. If left blank, the default title value is used. Invalid characters: <=>{}'.
- Meta description:** A text field containing 'Our terms and conditions of delivery' and a language dropdown set to 'en'. Below it is a note: 'Invalid characters: <=>{}'.
- Meta keywords:** A text field containing 'conditions', 'delivery', 'delay', 'shipment', 'pack', and an 'Add tag' button. A language dropdown is set to 'en'. Below it is a note: 'To add tags, click in the field, write something, and then press the "Enter" key. Invalid characters: <=>{}'.
- Friendly URL:** A text field containing 'delivery' and a language dropdown set to 'en'. Below it is a note: 'Only letters and the hyphen (-) character are allowed.'
- Page content:** A rich text editor with a language dropdown set to 'En'. The content includes a heading 'Shipments and returns', a sub-heading 'Your pack shipment', and several paragraphs of text. A note at the bottom right says '904 of 21844 characters allowed'.
- Indexation by search engines:** A toggle switch with 'NO' selected and 'YES' as an option.
- Displayed:** A toggle switch with 'NO' selected and 'YES' as an option.

At the bottom of the page, there are three buttons: 'Cancel', 'Save and preview', and 'Save'.

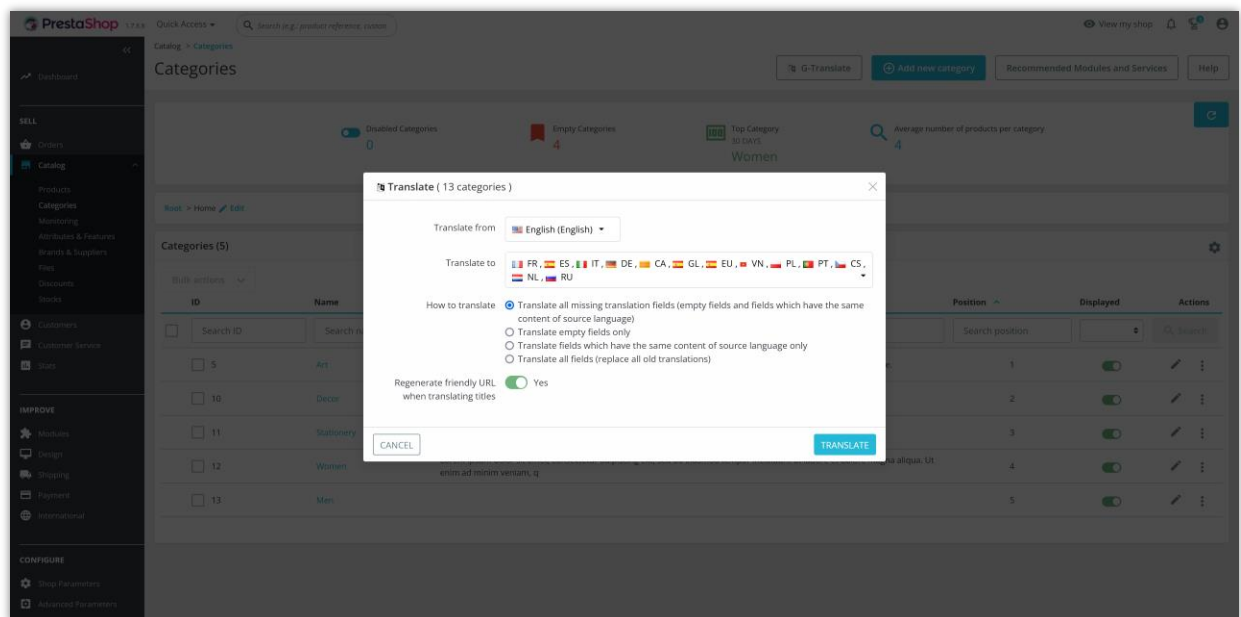

## VII. INTERNATIONAL TRANSLATION

**G-Translate** offers you a comprehensive translate tool which allows you to translate your *back office, themes, installed modules, emails* and *other items* with Google translate API.

Navigate to **International > Translations** page. Click on “Translate” button at the top – right corner.

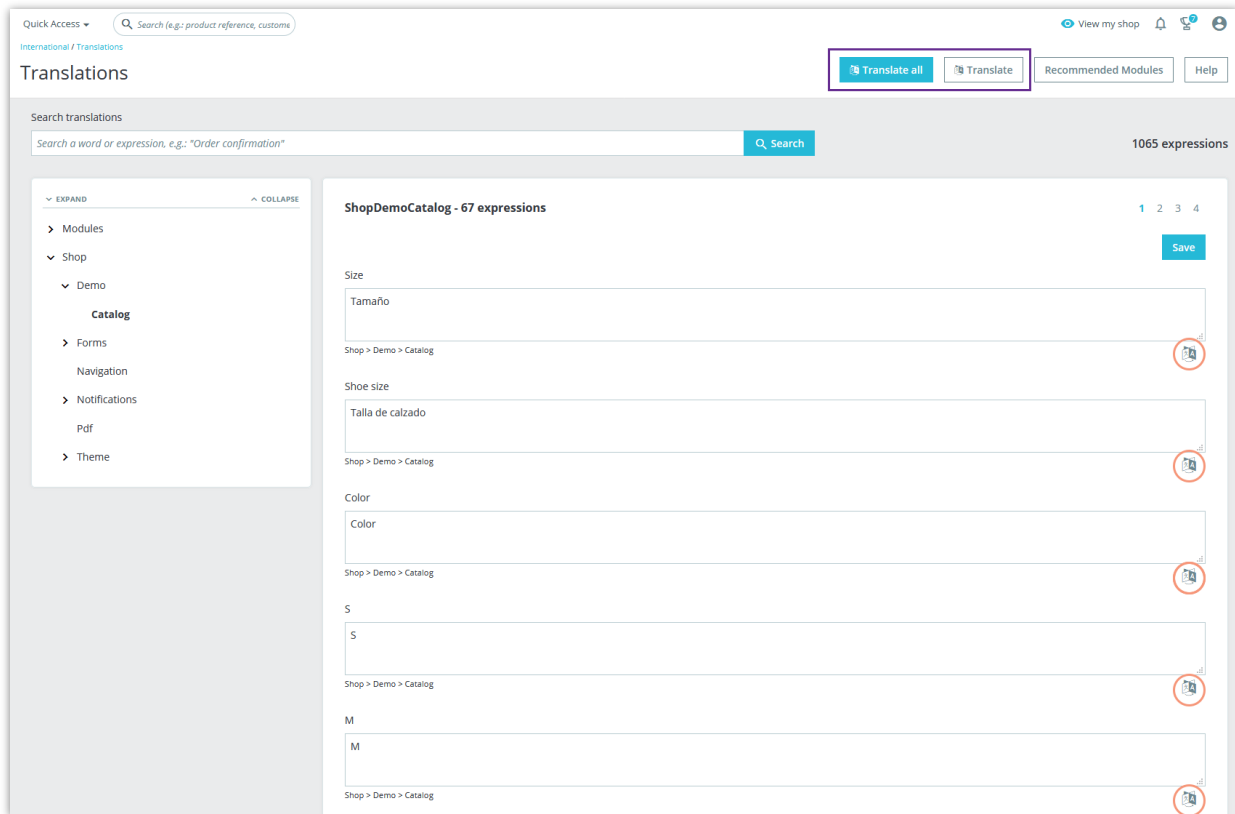

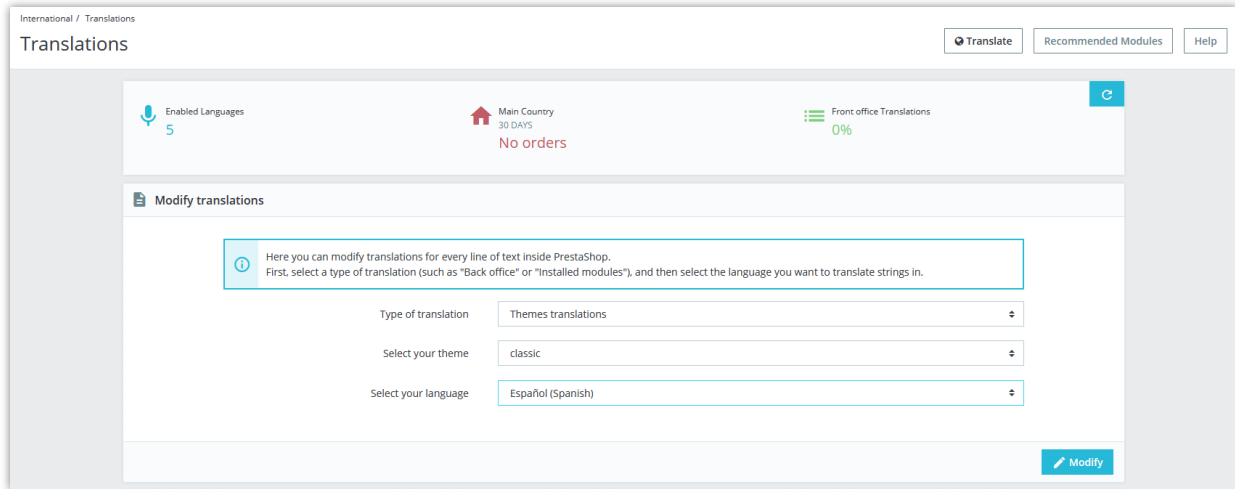

Select items you want to translate and modify the translation settings as you want, then click “Translate” to start translation process.

Or if you want to translate a specific item, **G-Translate** also supports you to translate each component or the whole item smoothly.

Below are example screenshots when we translate the “classic” theme of PrestaShop 1.7:

## VIII. THANK YOU

Thank you again for purchasing our product and going through this documentation. We hope this document is helpful and efficient in the installation and usage of **G-Translate** module. If you do have any questions for which the answer is not available in this document, please feel free to contact us.
