## I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. If you have any questions that are beyond the scope of this documentation, please feel free to contact us.

## II. INTRODUCTION

**Free Translate & AI Content Generator** module uses Google Translate automatic translation service to translate your PrestaShop online store with Google power and make it multilingual. With 103 available languages, your site will be available globally upon installation. Spend time on what's important: managing your orders and products, or communicating with your customers, in their preferred language.

**Free Translate & AI Content Generator** makes it easier to add translations to your PrestaShop store. Seamless integration with the familiar PrestaShop environment makes sure you remain inflow. Now, giving your customers a consistent language experience is straightforward and quick.

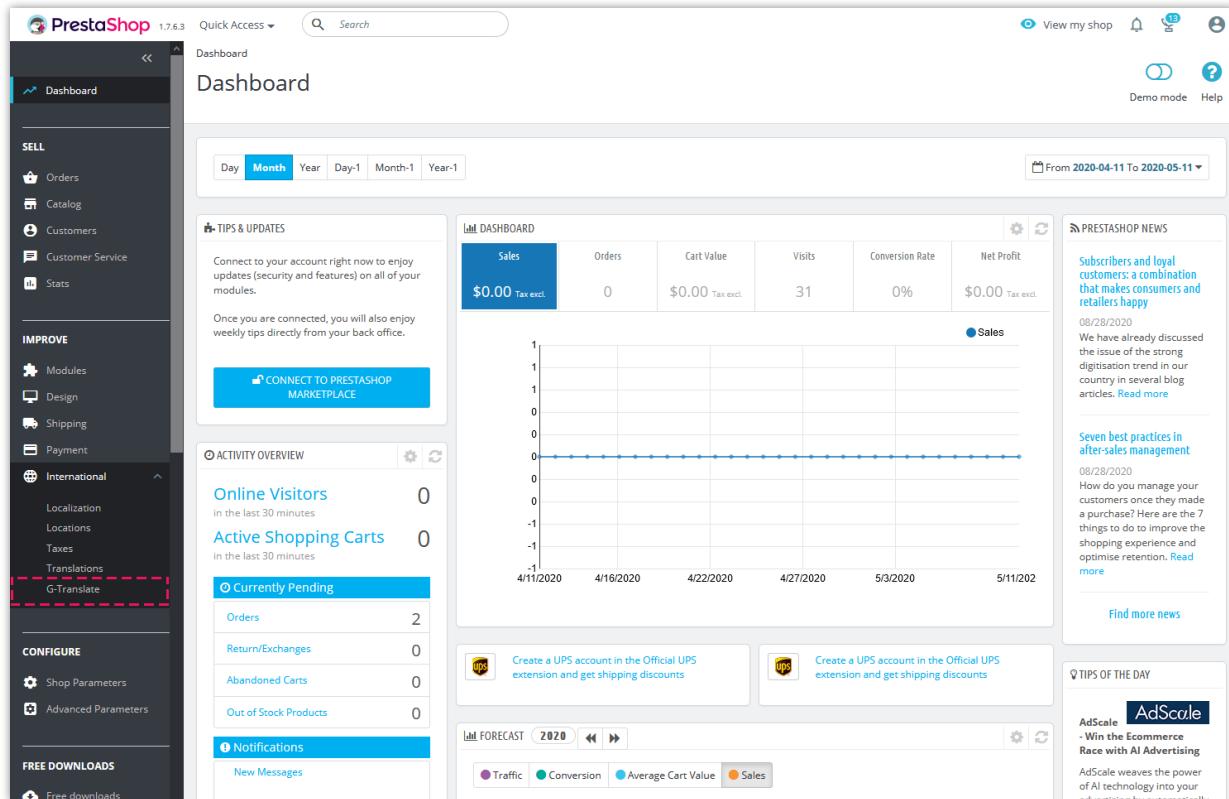

\* *"Free Translate & AI Content Generator" is compatible with PrestaShop 1.7.x and PrestaShop 9.x*

## III. INSTALLATION

1. Navigate to "**Modules / Module manager**", click on "**Upload a module / Select file**"
2. Select the module file "**ets\_translate.zip**" from your computer then click on "**Open**" to install

3. Click on “**Configure**” button of the module you just installed to open the module’s configuration page

**Quick access:** You can also navigate to **Free Translate & AI Content Generator**’s configuration page through the quick access menu

## IV. GENERAL SETTINGS

### 1. Translate settings

Firstly, we will need to select the translation API you want to use. **Free Translate & AI Content Generator** supports 6 types of API: Google Translate API, DeepL API, Bing Translation API, Libre API, Lecto API, and Yandex API.

Global settings

[Translate settings](#) [Exceptions](#) [ChatGPT](#)

1-Click translate

Select translation provider

\* Google API key for "Cloud Translation API"

Auto apply global settings when translating

Translate from English (English)

Translate to FR, ES, IT, CS, PL, PT, DE, HU, SK, LT, TR, RO, GB

Auto detect customer language when translating customer comments

How to translate?

- Translate all missing translation fields (empty fields and fields which have the same content of source language)
- Translate empty fields only
- Translate fields which have the same content of source language only
- Translate all fields (replace all old translations)

Regenerate friendly URL when translating titles

Analyze the translation before translating

Ignore old controller files when translating

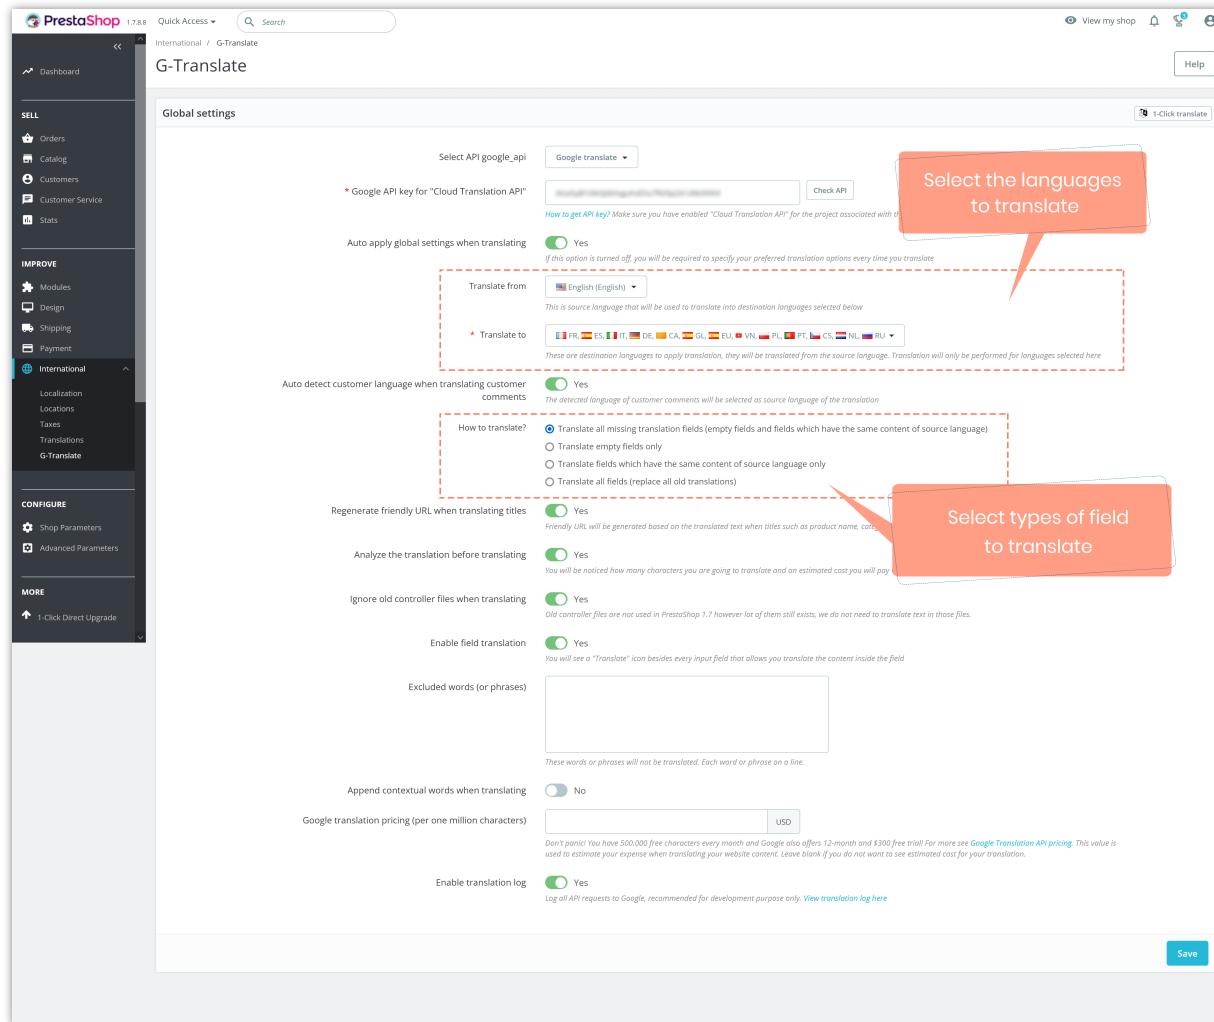

Enable field translation

Google translation pricing (per one million characters) USD

Enable translation log

Save

Click on "*How to get API key?*" link to learn how to create and get your translation API key. Enter your API key into **Free Translate & AI Content Generator**'s configuration page then click "Save". And we're ready to go!

- Auto apply global settings when translating:** The translation settings defined on this page will be automatically applied to all types of translation: product translation, CMS page translation, etc.
- Automatic language detection to translate comments: Free Translate & AI Content Generator** will automatically detect the language of the customer's comment and perform translation.
- Enable translation log: Free Translate & AI Content Generator** provides a translation log feature to help you keep track of this module's performance. Click on "View translation log here" link to open the translation log page.

The screenshot shows the 'Configure' section of the gTranslate module. At the top, there are links for 'Modules / ets\_translate / Configure'. Below this is a header with icons for 'Translate', 'Back', 'Translate', 'Check update', and 'Manage hooks'. The main area is titled 'TRANSLATE LOGS' and contains a table with two rows of data. The columns are: ID, Page type, Source language, Target language, Ids translated, Text translated, Status, Response message, Timeout (ms), Translation date, and Actions. Row 1: ID 1, product, en, fr, 20,1, Success, 925, 2020-06-09 00:10:09, with a red X icon. Row 2: ID 2, product, en, fr,es,it, Hot deals PRO - Special products slider with count, Success, 920, 2020-06-09 00:14:10, with a red X icon.

- 1-Click translate:** Translate entire website content in 1-click, fix missing translations.

The screenshot shows the '1-CLICK TRANSLATE' configuration page. At the top, there is a note: 'Here you can quickly do bulk translation for any kind of data you want or 1-click to translate the whole website.' Below this is a section titled 'Data to translate:' with a checkbox for 'All (translate everything)' which is unchecked. There are several expandable sections with checkboxes:
 

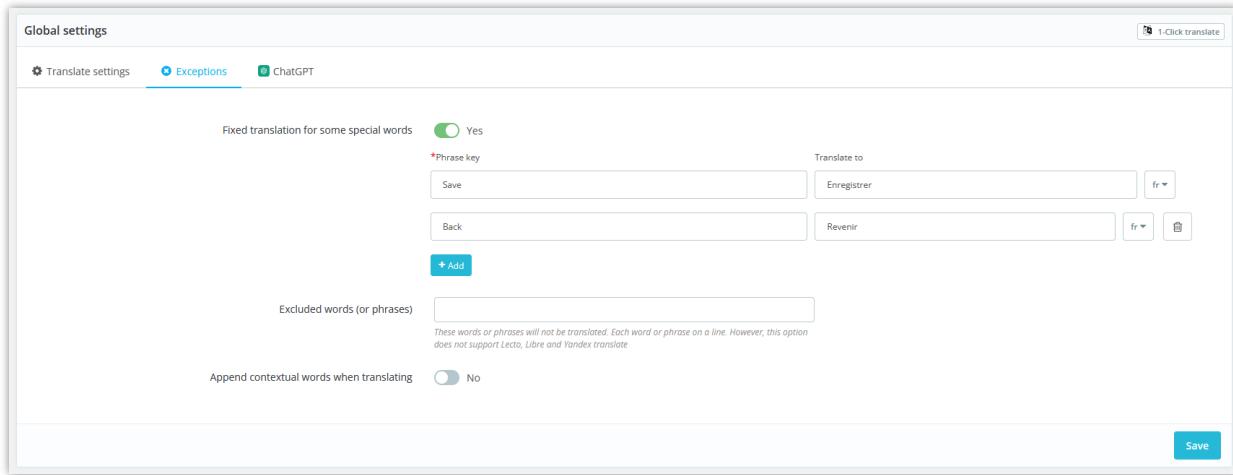

- Catalog** (checked):
  - Products
  - Categories
  - Brands
  - Suppliers
  - Attributes
  - Attribute groups
  - Features
  - Feature values
- Pages** (checked):
  - CMS categories
  - CMS pages
- International / Translations** (checked):
  - Back office
  - Themes
  - Installed modules
  - Email
  - Static pages (pages in SEO settings tab such homepage, login, my account, etc.)
- Customer Reassurance**
- Link widget (footer menu)**
- Main menu (top menu)**
- Custom text blocks**
- Image slider**

 At the bottom left is a 'Back' button with a left arrow icon, and at the bottom right is a 'Translate' button with a globe icon.

## 2. Exceptions

Due to the characteristics of each language when translating, there will be errors in certain words, especially when a word has many meanings and stands alone. So, the module supports the feature that allows you to add fixed translations for some special words.

For example, the English word "Save" has many meanings: it means both "Enregistrer" and "sauvegarder" in French. However, when using the translation tools, if you want to show that the word "Save" means "Enregistrer" (for example, save the configuration), you can turn on the "**Fixed translation for some special words**" option and add the words you want to translate with fixed meanings. At that time, when encountering the word "save", the module will automatically translate it to "Enregistrer".

In addition, the module also supports the "**Append contextual words when translating**" feature.

The contextual words you add will help Google understand the context of the translation better, especially when the text to translate is too short (has only one or a few words).

Append contextual words when translating  Yes

\* Append contextual words to improve translations  fr

These words help Google understands the context of the translation better, especially when the text to translate is too short (has only one or a few words). These words will be removed from the translation result.

\* Pages to append contextual words when translating

All pages  
 Catalog (products, categories, features and attributes, etc.)  
 CMS Pages and categories  
 International / Translations (texts in tpl or php files and email templates)  
 Customer Reassurance  
 Link widget (footer menu)  
 Main menu (top menu)  
 Custom text blocks  
 Image slider on home page

Append contextual words when original text to translate fewer than (or equals)  10 words

Leave blank to append contextual words to every text when translating

### 3. ChatGPT

---

In the latest version, the module integrates ChatGPT more deeply, allowing you to translate content and generate new text with greater flexibility.

To get started, enable ChatGPT in the module's configuration. Enter the API key provided by OpenAI and save it. The system will validate the key. Once the API key is saved successfully, a dropdown menu will appear, allowing you to select the ChatGPT model that best suits your needs in terms of speed, cost, and quality.

**Global settings**

Translate settings Exceptions ChatGPT

ChatGPT Pre Prompt ChatGPT Pre Prompt

Free Translate & AI Content Generator 5

Label	Content	Action
Write product description 1	I need an effective product description for our {product_name} that will convince customers it's the best choice...	Edit
Write product description 2	Write a 50-word product description for {product_name}. Write in an upbeat, informative tone.	Edit
Write product description 3	I must craft a compelling product description for our {product_name} highlighting its key features and benefits.	Edit
Translate product summary	Translate {product_summary} into {current_language}	Edit
Translate product description	What is the translation of {product_description} in {current_language}?	Edit

The module also supports customizing the Pre-Prompt. A Pre-Prompt is an instruction provided to ChatGPT before it processes text. You can use this feature to control tone, style, or specific requirements. For example, you may instruct ChatGPT to optimize content for SEO, write in a friendly style, or preserve HTML structure during translation.

**Global settings**

Translate settings Exceptions ChatGPT

Enable ChatGPT Yes

ChatGPT Model Gpt 4o

ChatGPT API ChatGPT API

ChatGPT Pre Prompt ChatGPT Pre Prompt

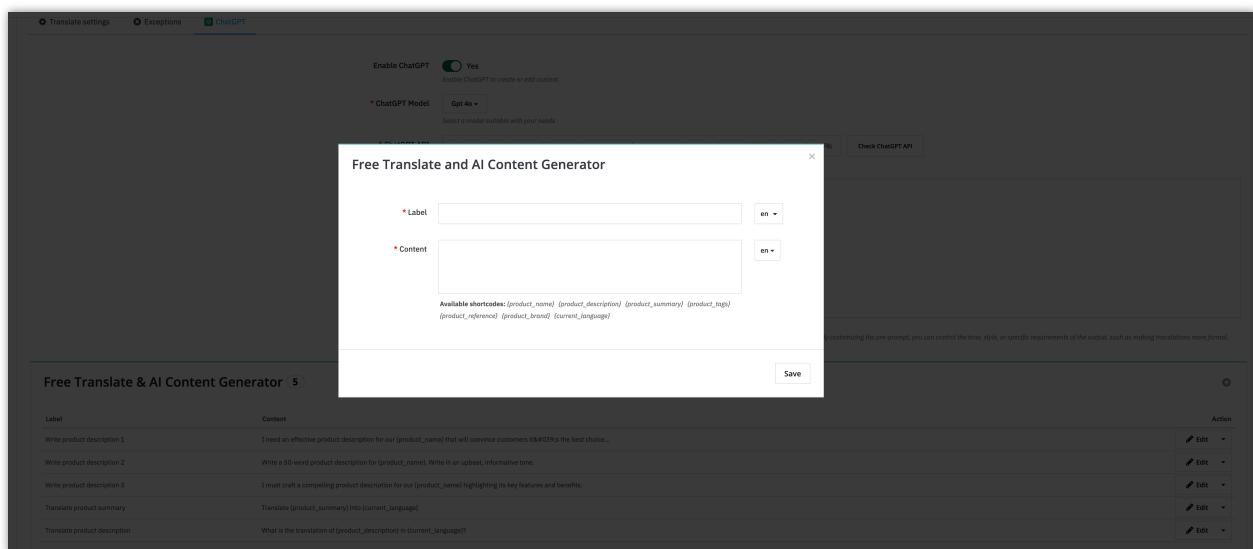

Free Translate & AI Content Generator 5

Label	Content	Action
Write product description 1	I need an effective product description for our {product_name} that will convince customers it's the best choice...	Edit

Translate product summary	Translate {product_summary} into {current_language}	Edit
Translate product description	What is the translation of {product_description} in {current_language}?	Edit

In addition, the module includes predefined prompts for content generation. These are ready-to-use instructions that can save time when creating product descriptions or translations. In the configuration section, you will find a list of prompts such as:

- Write a persuasive product description.
- Write a short (50-word) description in an upbeat tone.
- Create a product description highlighting key features and benefits.
- Translate the product description into the current language.

Each prompt includes a label and content. You can edit existing prompts or create new ones to match your requirements, such as writing SEO-focused descriptions or professional summaries. When editing or creating a product, select a prompt and ChatGPT will generate the corresponding text automatically.

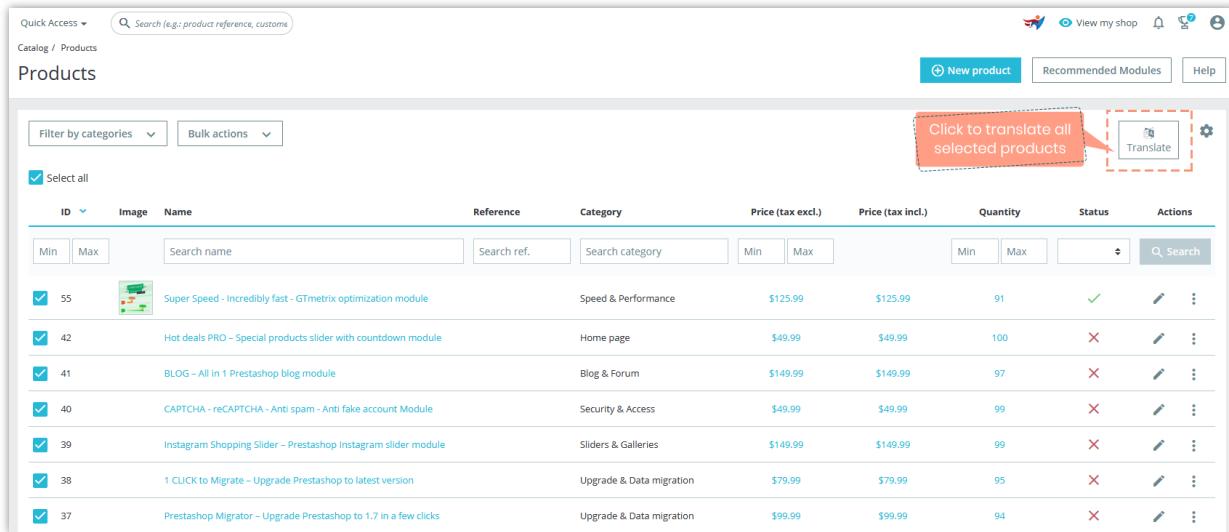

By combining model selection, Pre-Prompt customization, and predefined prompts, the module allows you to manage translations and content generation directly in PrestaShop with consistent output and reduced manual effort.

## V. CATALOG TRANSLATION

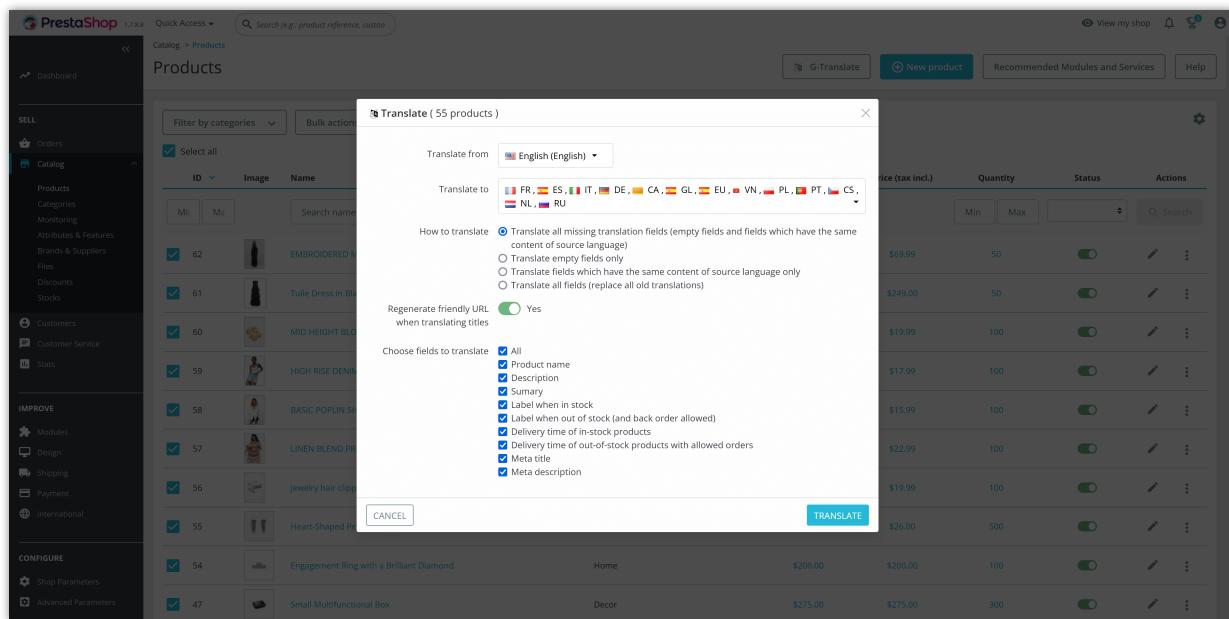

## 1. Product translation

From **Products** listing page, you can run the quick product translation by selecting the products you want to translate then click on “**Translate**” button.

The screenshot shows the Prestashop Admin interface under the 'Catalog > Products' section. A list of products is displayed with various filters and actions. On the right side, there is a 'Translate' button with a red dashed box around it and an arrow pointing to it from the text above. A callout bubble says 'Click to translate all selected products'.

A popup will appear and display your defined translate configurations. You can edit the translate configurations before translating.

The screenshot shows the 'Translate' modal window over the main products list. The modal has several sections: 'Translate from' set to English (English), 'Translate to' showing multiple language options (FR, ES, IT, DE, CA, GL, EU, VN, PL, PT, NL, RU), 'How to translate' with radio buttons for different translation methods, 'Regenerate friendly URL when translating titles' with a checkbox, and 'Choose fields to translate' with a large list of checkboxes for product fields like All, Product name, Description, Summary, Label when in stock, Label when out of stock, Delivery time of in-stock products, Delivery time of out-of-stock products with allowed orders, Meta title, and Meta description. At the bottom are 'CANCEL' and 'TRANSLATE' buttons.

When you satisfy with your translate configurations, click on “Translate” button to start the analysisation process:

Super Speed - Incredibly fast - GTmetrix optimization module	Speed & Performance	\$125.99	\$125.99
Hot deals PRO – Special products slider module	Analyzing translations. Please wait ...	\$49.99	\$49.99

**ANALYSIS RESULTS**

You are going to translate 297 sentences (5203 characters)

Estimated price: 0.00018 USD

**CONFIRM & TRANSLATE NOW**    **CANCEL**

Click on “**Confirm and translate now**” button to start translating.

### ❖ Translate a specific product

**Free Translate & AI Content Generator** also enables you to translate a specific product. You simply need to open the product editing page and click on “Translate” icon where you want to translate its content.

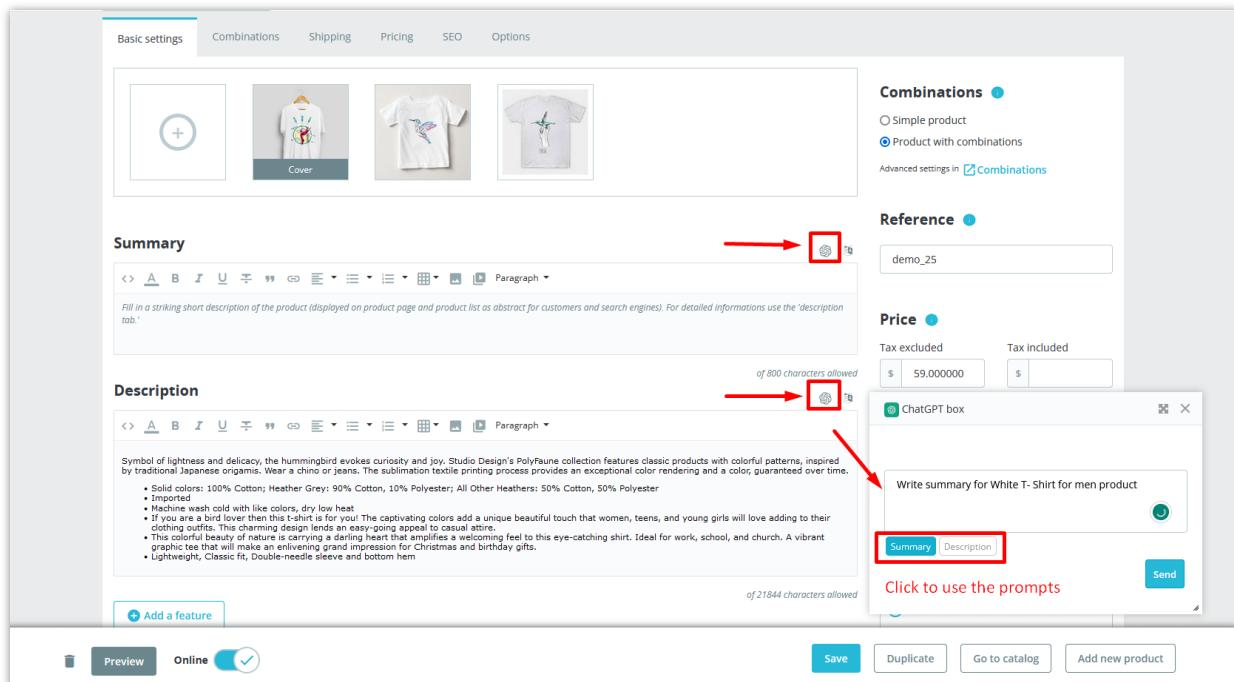

The screenshot shows the GTmetrix optimization module interface. At the top, there's a search bar and a language dropdown set to 'en'. A red box highlights the 'Translate' button in the top right corner. Below the header, there are tabs for 'Basic settings', 'Virtual product', 'Pricing', 'Custom fields', 'SEO', and 'Options'. A large section titled 'Super Speed - Incredibly fast - GTmetrix optimization module' contains several screenshots of the software's interface. Three specific areas are highlighted with red boxes and labeled: 'Translate product name', 'Translate all product fields', and 'Translate product summary'. On the right side, there are sections for 'Reference', 'Quantity' (set to 91), 'Tax included' (\$125.993), 'Tax rule' (US-AL Rate (4%)), and 'Categories'. At the bottom, there are buttons for 'Save', 'Duplicate', 'Go to catalog', and 'Add new product', along with 'Preview' and 'Online' status indicators.

Below is an example of a product name and summary after being translated from English to French:

This screenshot shows the same GTmetrix interface but with a different language setting. The 'fr' button in the top right is highlighted with a red box. The product name 'Super Speed - Super rapide - Optimisation GTmetrix' is also highlighted with a red box. The rest of the interface is identical to the first screenshot, showing the basic settings, virtual product options, and various software screenshots. The 'Summary' tab is selected in the product editor, and its content is also highlighted with a red box. The summary text is in French, describing the tool's features like caching, image optimization, and GZIP.

Besides, we also integrate ChatGPT into the module (on the summary and description section of the product page) to help store owners to create and translate product content easier.

Click on the ChatGPT icon in the product description or summary and start using it. Under the chat box with the labels of the prompts you have created, click on the label of the prompt you want to use to save time without having to manually retype the content you want.

## 2. Product category translation

From **Categories** listing page, you can run the quick category translation by selecting the categories you want to translate then click on “**Translate**” button.

The screenshot shows the PrestaShop 'Categories' page. At the top right, there is a 'Translate' button with a dashed red box around it. Below the header, there are several status indicators: 'Disabled Categories 0', 'Empty Categories 0', 'Top Category 30 DAYS Accessories', and 'Average number of products per category 2'. The main content area displays a table of categories with columns for 'Name', 'Description', 'Position', 'Displayed', and 'Actions'. A context menu is open over the first row, listing options: 'Enable selection', 'Disable selection', 'Delete selected', and 'Translate selection'. The 'Translate selection' option is highlighted with a dashed red box.

Similar to product translation, a popup will appear and display your defined translate configurations. You can modify translation settings before running translation process.

The screenshot shows the PrestaShop 'Categories' page with a 'Translate' modal window open. The modal title is 'Translate (13 categories)'. It includes fields for 'Translate from' (set to English (English)) and 'Translate to' (a dropdown menu showing various languages like FR, ES, IT, DE, CA, GL, EU, VN, PL, PT, CS, NL, RU). Below these are options for 'How to translate': 'Translate all missing translation fields (empty fields and fields which have the same content of source language)' (selected), 'Translate empty fields only', 'Translate fields which have the same content of source language only', and 'Translate all fields (replace all old translations)'. There is also a checkbox for 'Regenerate friendly URL when translating titles' (set to Yes). At the bottom of the modal are 'CANCEL' and 'TRANSLATE' buttons. In the background, the main categories list is visible, showing categories like Art, Decor, Stationery, Women, Men, and others.

## ❖ Translate a specific category

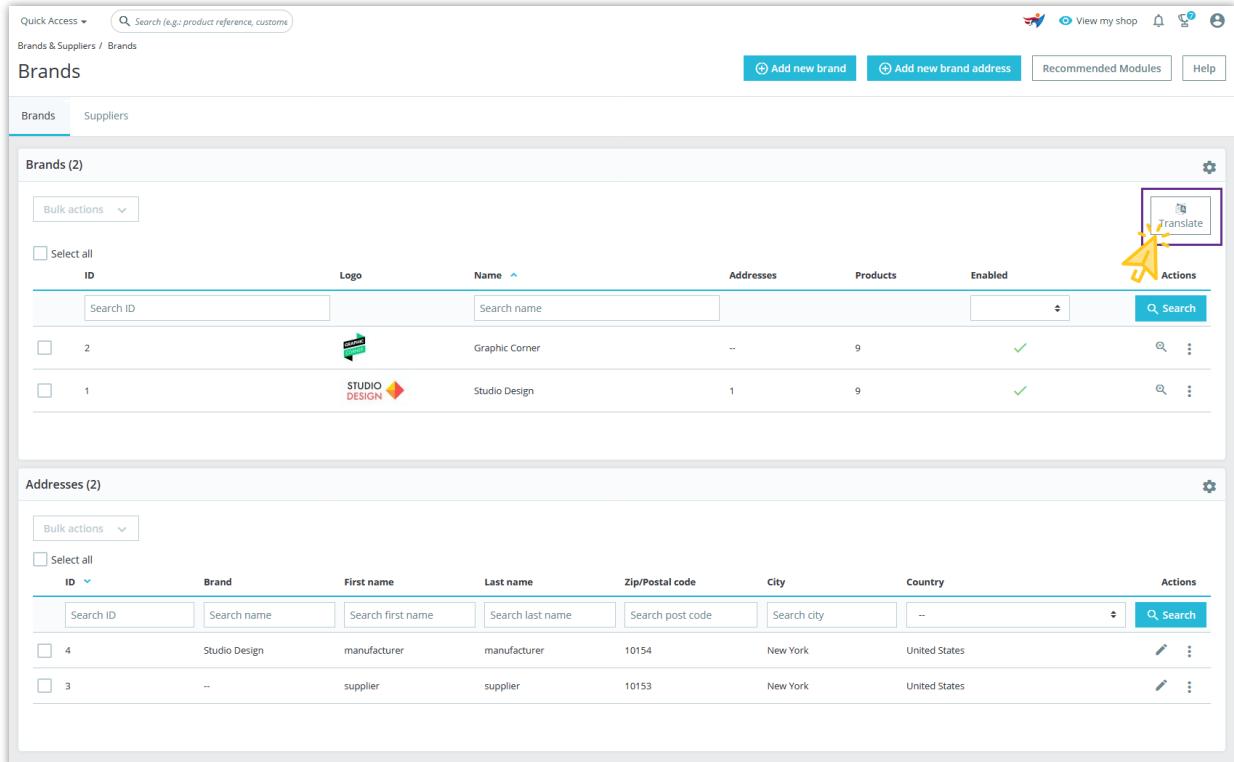

**Free Translate & AI Content Generator** also enables you to translate a specific category. You simply need to open the category editing page and click on “Translate” icon where you want to translate its content.

The screenshot shows the 'Category' editing page in Prestashop. Several fields are highlighted with red boxes and circled icons to indicate they support translation:

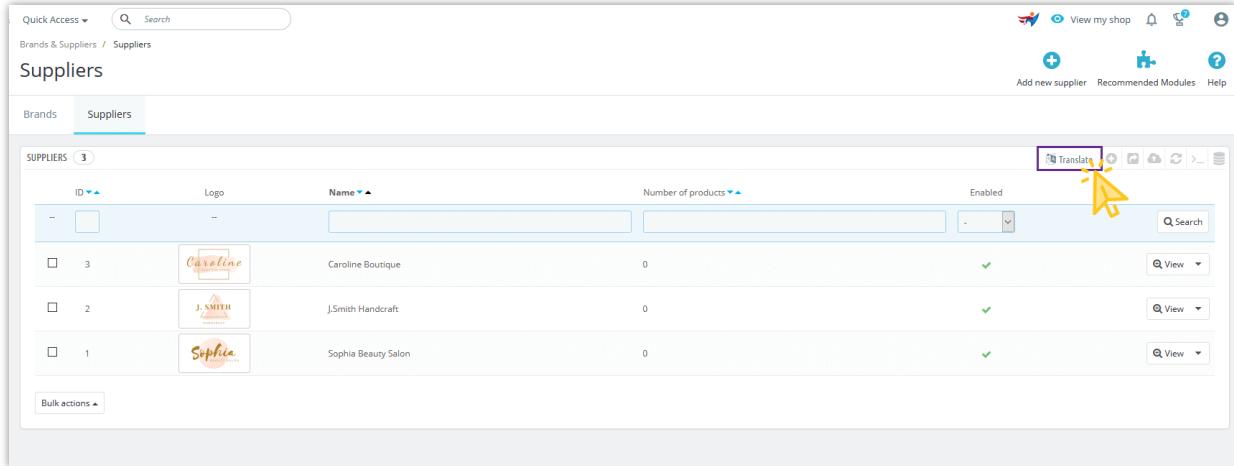

- Name:** A text input field containing "Cross-selling & Product bundles". A red box highlights the "en" dropdown, and a circled icon indicates it's a translatable field.
- Description:** A rich text editor with language tabs for En, Fr, Es, It, El. A red box highlights the "en" tab, and a circled icon indicates it's a translatable field.
- SEO preview:** A box showing a sample meta title and description. A red box highlights the "en" tab, and a circled icon indicates it's a translatable field.
- Meta title:** A text input field containing "A sample meta title for this product category". A red box highlights the "en" tab, and a circled icon indicates it's a translatable field.
- Meta description:** A text input field containing "A sample description. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut e...". A red box highlights the "en" tab, and a circled icon indicates it's a translatable field.
- Meta keywords:** A text input field containing "keyword1 keyword2 Add tag". A red box highlights the "en" tab, and a circled icon indicates it's a translatable field.
- Friendly URL:** A text input field containing "cross-selling-product-bundles". A red box highlights the "en" tab, and a circled icon indicates it's a translatable field.
- Group access:** A checkbox list for "Visitor", "Guest", and "Customer". A red box highlights the "Select all" checkbox, and a circled icon indicates it's a translatable field.
- Customer groups note:** A box stating "You now have three default customer groups." with sub-points for "Visitor", "Guest", and "Customer". A circled icon indicates this note is translatable.

### 3. Brand and Supplier translation

From **Brands** and **Suppliers** listing page, you can translate all available brands and suppliers by clicking on “Translate” button.

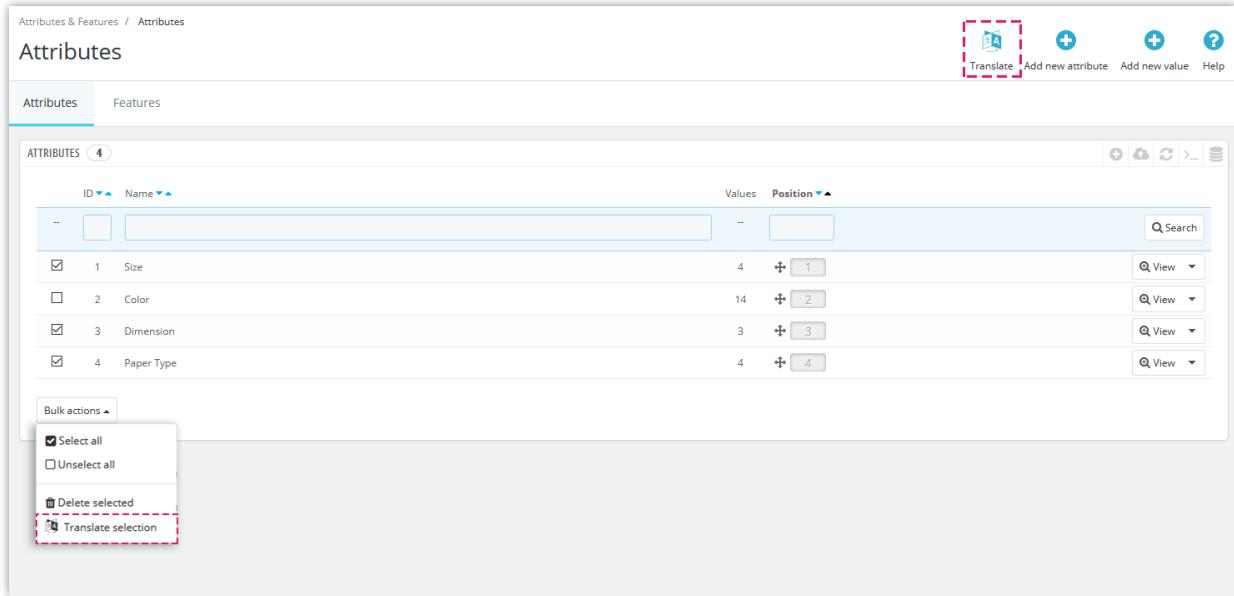

The screenshot shows the 'Brands' listing page. At the top, there is a search bar and several action buttons: 'Add new brand', 'Add new brand address', 'Recommended Modules', and 'Help'. Below the header, there are tabs for 'Brands' and 'Suppliers', with 'Brands' being selected. The main area displays a table titled 'Brands (2)' containing two rows. Each row includes columns for 'ID', 'Logo', 'Name', 'Addresses', 'Products', and 'Enabled'. The first row is for 'Graphic Corner' and the second for 'Studio Design'. At the bottom right of the table, there is a 'Actions' column with a 'Translate' button highlighted by a yellow arrow.

The screenshot shows the 'Suppliers' listing page. At the top, there is a search bar and several action buttons: 'Add new supplier', 'Recommended Modules', and 'Help'. Below the header, there are tabs for 'Brands' and 'Suppliers', with 'Suppliers' being selected. The main area displays a table titled 'SUPPLIERS (3)' containing three rows. Each row includes columns for 'ID', 'Logo', 'Name', 'Number of products', and 'Enabled'. The first row is for 'Caroline Boutique', the second for 'J.Smith Handcraft', and the third for 'Sophia Beauty Salon'. At the bottom right of the table, there is a 'Actions' column with a 'Translate' button highlighted by a yellow arrow.

#### 4. Attributes and Features translation

From **Attributes and Features** listing page, you can translate all available attributes and features by clicking on “Translate” button or translate each specific item.

The screenshot shows the 'Attributes' section of the 'Attributes & Features' listing page. At the top right, there is a toolbar with icons for 'Translate' (highlighted with a red dashed box), 'Add new attribute', 'Add new value', and 'Help'. Below the toolbar, there are tabs for 'Attributes' and 'Features', with 'Attributes' selected. A table lists four attributes: 'Size' (ID 1), 'Color' (ID 2), 'Dimension' (ID 3), and 'Paper Type' (ID 4). Each row includes a 'View' button and a 'Position' column with values 4, 14, 3, and 4 respectively. On the left, a 'Bulk actions' dropdown menu is open, showing options like 'Select all', 'Unselect all', 'Delete selected', and 'Translate selection' (highlighted with a red dashed box).

#### VI. PAGE TRANSLATION

**Free Translate & AI Content Generator** enables you to translate all CMS page categories and CMS page. Click on “Translate” button to start the translation process.

**Design / Pages**

**Pages**

**Categories (2)**

ID	Name	Description	Position	Displayed	Actions
2	Events		1	✓	
3	Campaign news		2	✓	

**Pages in category "Home" (5)**

ID	URL	Title	Meta title	Position	Displayed	Actions
1	delivery	Delivery		1	✓	
2	legal-notice	Legal Notice		2	✓	
3	terms-and-conditions-of-use	Terms and conditions of use		3	✓	
4	about-us	About us		4	✓	
5	secure-payment	Secure payment		5	✓	

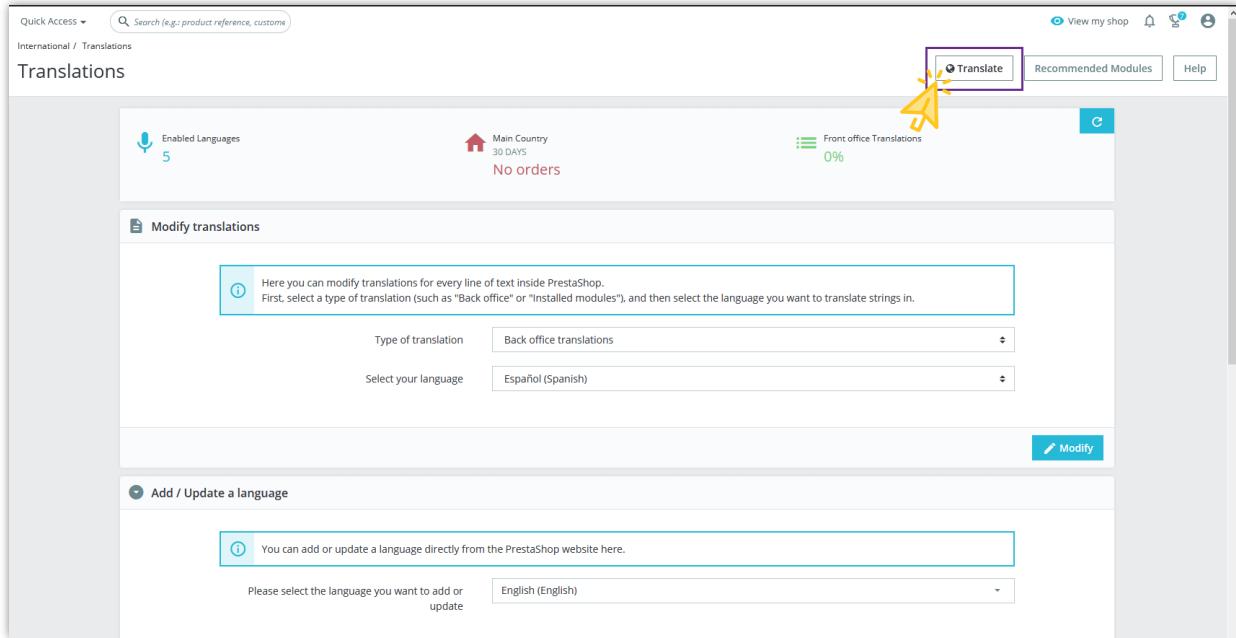

You can also translate a specific CMS page. Click “Edit” a page you want to translate then click on “Translate” icon where you want to translate its content.

The screenshot shows the PrestaShop back office interface for managing pages. A specific page titled 'Delivery' is being edited. The interface includes sections for 'Page category' (set to 'Home'), 'Title' ('Delivery'), 'SEO preview' (showing the URL and meta information), 'Meta title' ('Our terms and conditions of delivery'), 'Meta description' ('Our terms and conditions of delivery'), 'Meta keywords' (containing 'conditions', 'delivery', 'delay', 'shipment', 'pack'), 'Friendly URL' ('delivery'), and 'Page content' (containing a rich text editor with a heading 'Shipments and returns' and a paragraph about pack shipment). There are also settings for 'Indexation by search engines' (NO) and 'Displayed' (YES). On the right side of the page content, there are three orange callout boxes with arrows pointing to the 'Translate' icons for the 'Page title', 'Meta elements', and 'Page content'. The 'Page content' box also indicates '904 of 21844 characters allowed'. At the bottom, there are 'Cancel', 'Save and preview', and 'Save' buttons.

## VII. INTERNATIONAL TRANSLATION

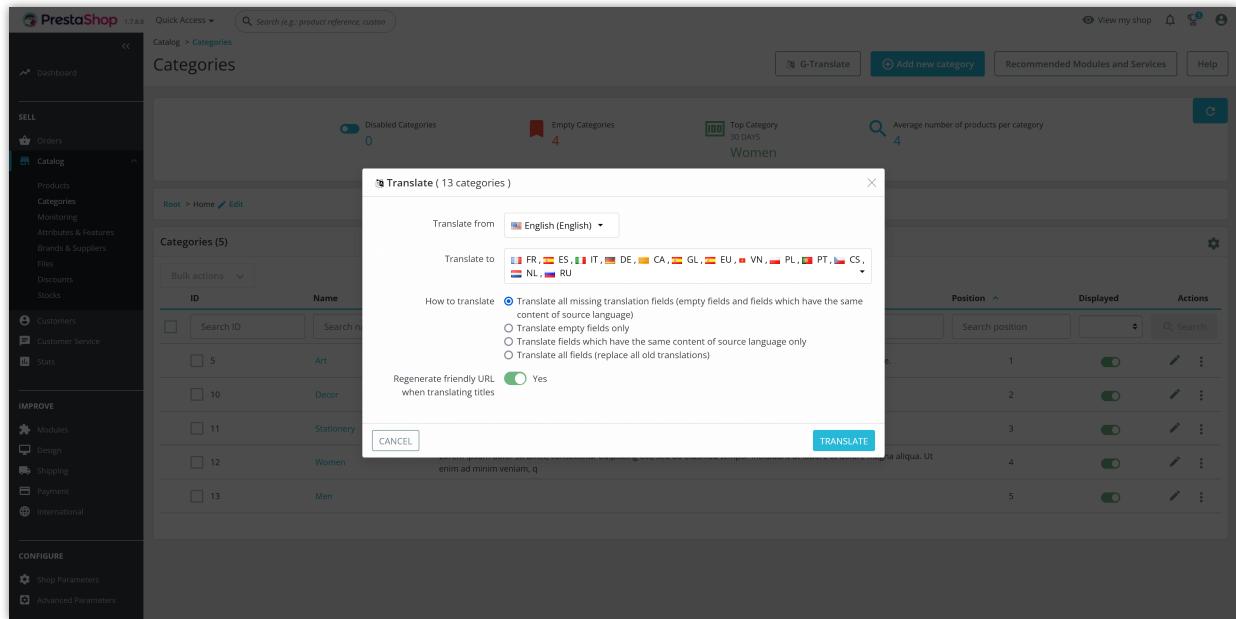

**Free Translate & AI Content Generator** offers you a comprehensive translate tool which allows you to translate your **back office, themes, installed modules, emails** and **other items** with Google translate API.

Navigate to **International > Translations** page. Click on “Translate” button at the top – right corner.

The screenshot shows the PrestaShop International > Translations interface. At the top, there's a search bar and several status indicators: 'Enabled Languages' (5), 'Main Country 30 DAYS' (No orders), and 'Front office Translations 0%'. Below this, there are two main sections: 'Modify translations' and 'Add / Update a language'. The 'Modify translations' section has a sub-section for 'Back office translations' set to 'Español (Spanish)'. The 'Add / Update a language' section has a dropdown menu set to 'English (English)'. A prominent yellow arrow points to the 'Translate' button in the top right corner of the main content area.

Select items you want to translate and modify the translation settings as you want, then click “Translate” to start translation process.

The screenshot shows the PrestaShop Catalog > Categories page. A modal window titled 'Translate (13 categories)' is open over the main content. Inside the modal, it says 'Translate from English (English)' and 'Translate to' with a dropdown showing multiple languages. Below that, there are options for 'How to translate': 'Translate all missing translation fields (empty fields and fields which have the same content of source language)', 'Translate empty fields only', 'Translate fields which have the same content of source language only', and 'Translate all fields (replace all old translations)'. There's also a checkbox for 'Regenerate friendly URL when translating titles' which is checked. At the bottom of the modal are 'CANCEL' and 'TRANSLATE' buttons, with 'TRANSLATE' being highlighted by a yellow arrow. The background shows a list of categories: Art, Decor, Stationery, Women, and Men.

Or if you want to translate a specific item, **Free Translate & AI Content Generator** also supports you to translate each component or the whole item smoothly.

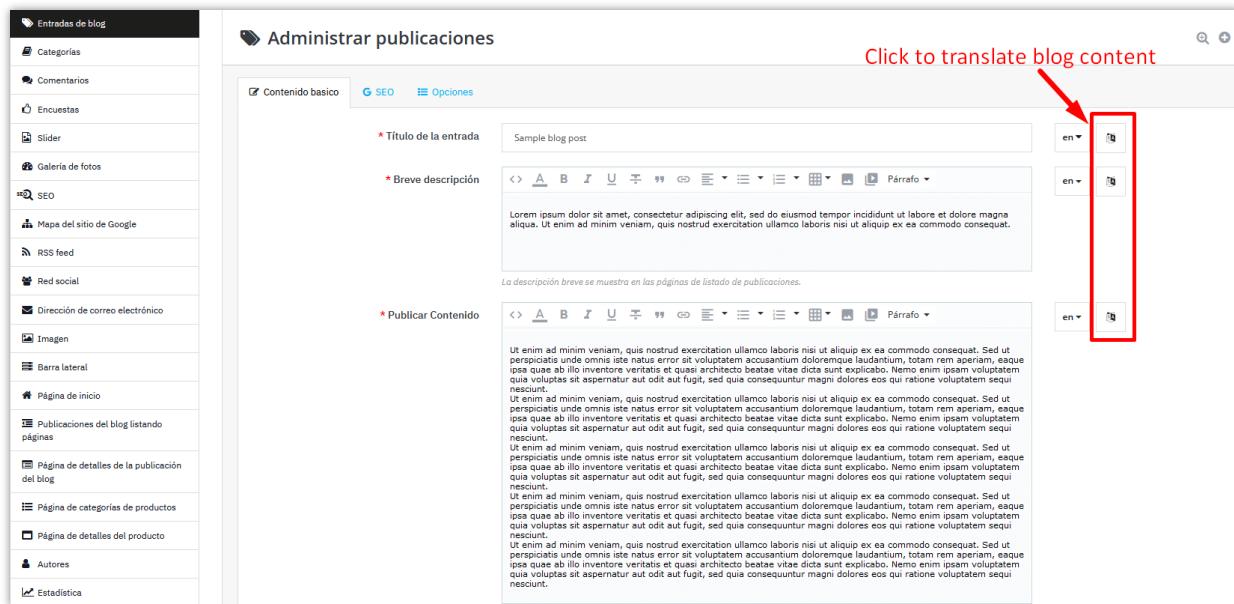

Below are example screenshots when we translate the “classic” theme of PrestaShop 1.7:

## VIII. COMPATIBILITY WITH PRESTAHERO MODULES

The Free Translate & AI Content Generator module is designed to be compatible with various PrestaHero modules, enhancing its functionality across different parts of your store. Below are the supported modules and how this integration works:

### 1. Compatibility with “Blog” module

Easily translate the content of your blog posts into over 110 languages. This allows you to share your store's news, updates, and articles with a global audience, all while maintaining the accuracy and readability of the original content.

In addition to the post content, the module also allows for the translation of meta titles, meta descriptions, and meta keywords, ensuring that your blog is fully optimized for international SEO and accessible to a global audience.

Manage posts

Basic content SEO Options

Meta title: Sample meta title  
Should contain your focus keyword and be attractive

Meta description: Sample post meta description  
Should contain your focus keyword and be attractive. Meta description should be less than 300 characters.

Meta keywords:   Add tag  
Enter your focus keywords and minor keywords

\* Url alias: sample-post1  
Should be as short as possible and contain your focus keyword. [View post](#)

en en en

Back Translate Save

## 2. Compatibility with “Trusted Reviews” module

---

Automatically translate customer reviews on your store, making it easier for potential buyers from different regions to understand feedback from other customers. This improves transparency and helps boost customer trust in your store.

Search

Additionally, the module supports translating your replies to customer reviews, comments, and questions, ensuring clear communication across all languages.

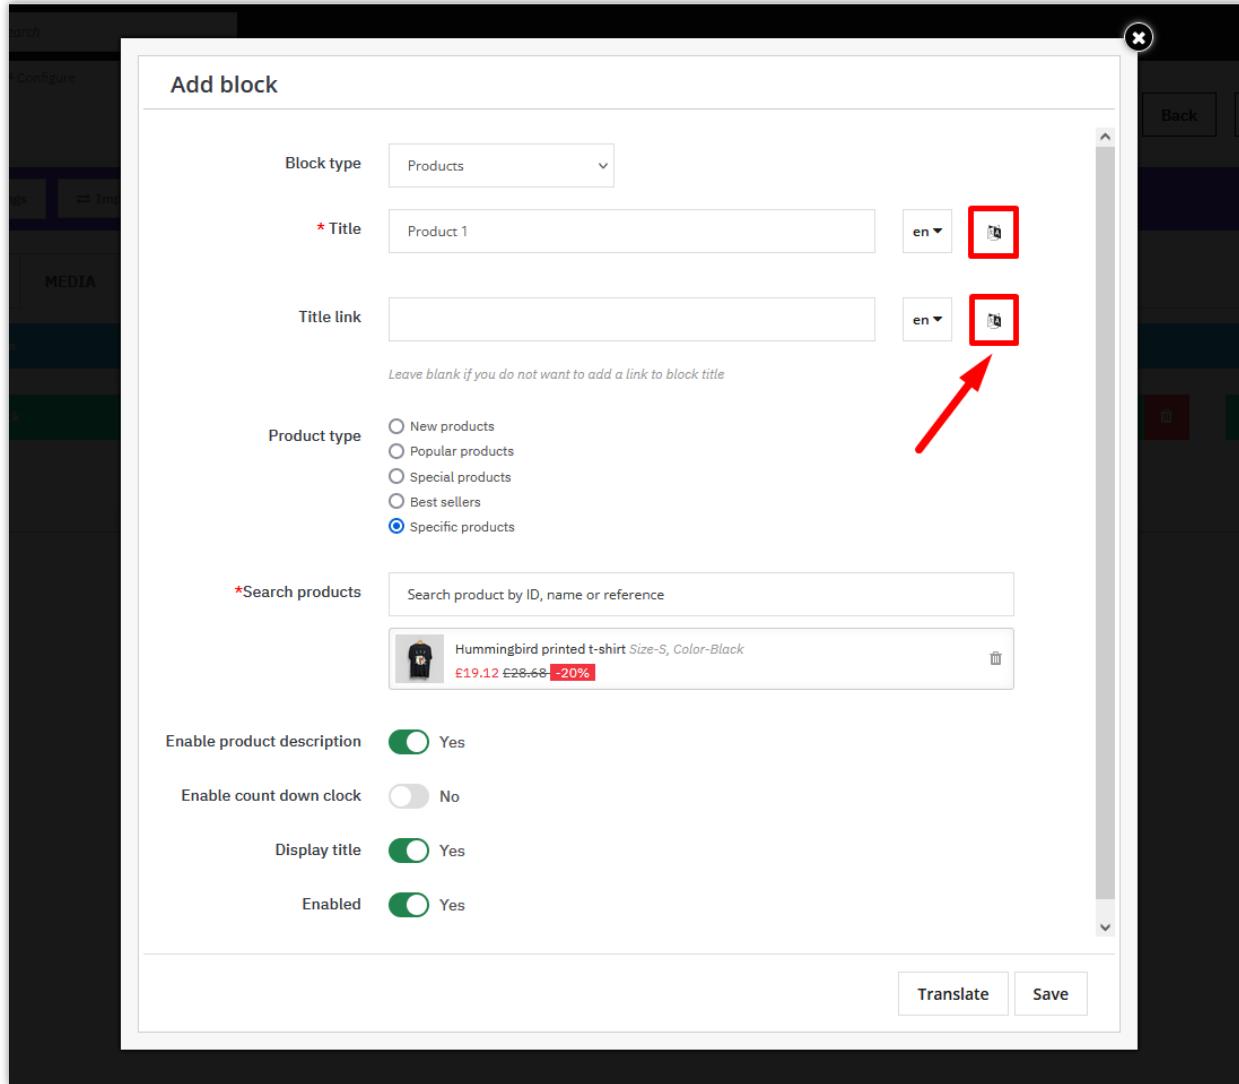

### 3. Compatibility with “Mega Menu Pro” module

---

Translate the text content within your mega menu, including menu items, menu tabs, and any other textual elements. This ensures that customers from different regions can easily navigate your store in their preferred language.

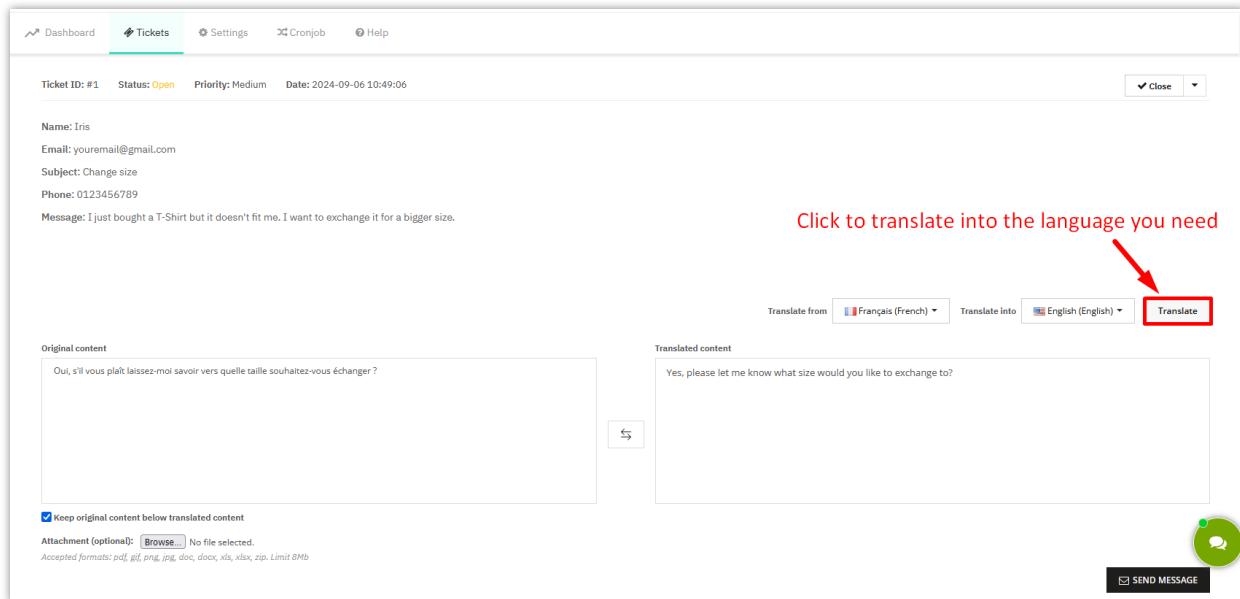

#### 4. Compatibility with "Live Chat, Contact Form, and Ticketing System" module

---

Easily translate your replies to customer support tickets. When a customer submits a support ticket, administrators can write their response in their own language, then use the module to translate it.

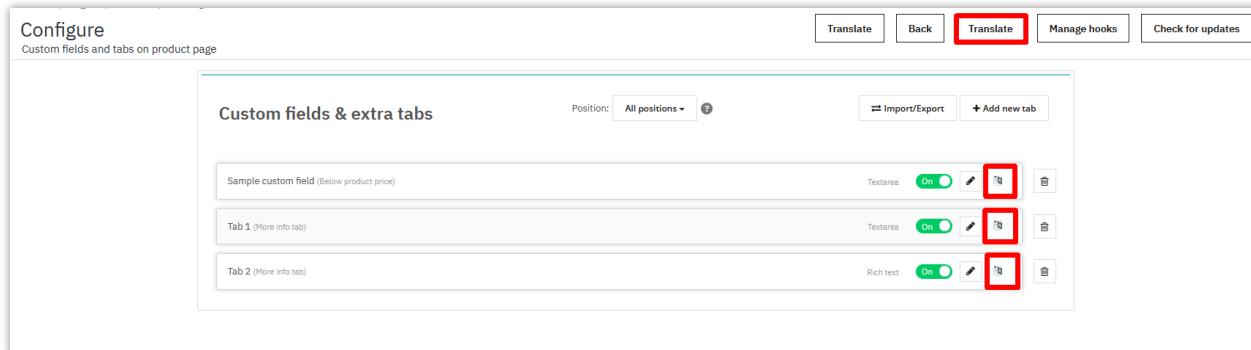

Simply select the source language (the language of the response) in the "**Translate from**" field, choose the target language (the customer's language) in the "**Translate into**" field, and click the "**Translate**" button. The reply will be automatically translated, ensuring

smooth and clear communication between your support team and customers no matter what language is being used.

## 5. Compatibility with “Custom fields & tabs on product page” module

Support for translating the content of any custom product fields added by this module. This ensures that all additional product information you provide is accessible to customers in their preferred language.
