Allow customers to search by products, categories, CMS pages, manufacturers and suppliers, etc. instantly with Ajax technology

A product of PrestaHero

Contents

I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. If you have any questions that are beyond the scope of this documentation, please feel free to contact us.

Note:

All instruction screenshots are taken from PrestaShop 1.7, but installing and configuring this module on PrestaShop 1.6 is similar.

II. INTRODUCTION

Searching is a critical element in creating any e-commerce website. It helps customers look for and learn about your products or contents quickly. The smooth and convenient searching experiences will keep them stay on your website longer, therefore reduce the bounce rate. With **Total Search Pro** – our powerful PrestaShop search module – you can allow customers to search for what they want quickly and easily.

* *"**Total Search Pro**" is compatible with PrestaShop 1.6.x, PrestaShop 1.7.x and PrestaShop 8.x*

III. INSTALLATION

1. Navigate to **"Modules / Modules & Services",** click on **"Upload a module / Select file"**

2. Select the module file **"ybc_blocksearch.zip"** from your computer then click on **"Open"** to install

3. Click on "**Configure**" button of the module you just installed to open the module's configuration page

<tr><td>IV.   CONFIGURATION</td></tr>
</table>

1. General settings

From "**General settings"** tab, you can see configuration options used to manage this search module.

Total Search Pro is an upgrade of the PrestaShop default search module. It enables customers to not only search for products but also search for product categories, CMS pages, manufacturers/suppliers, etc.
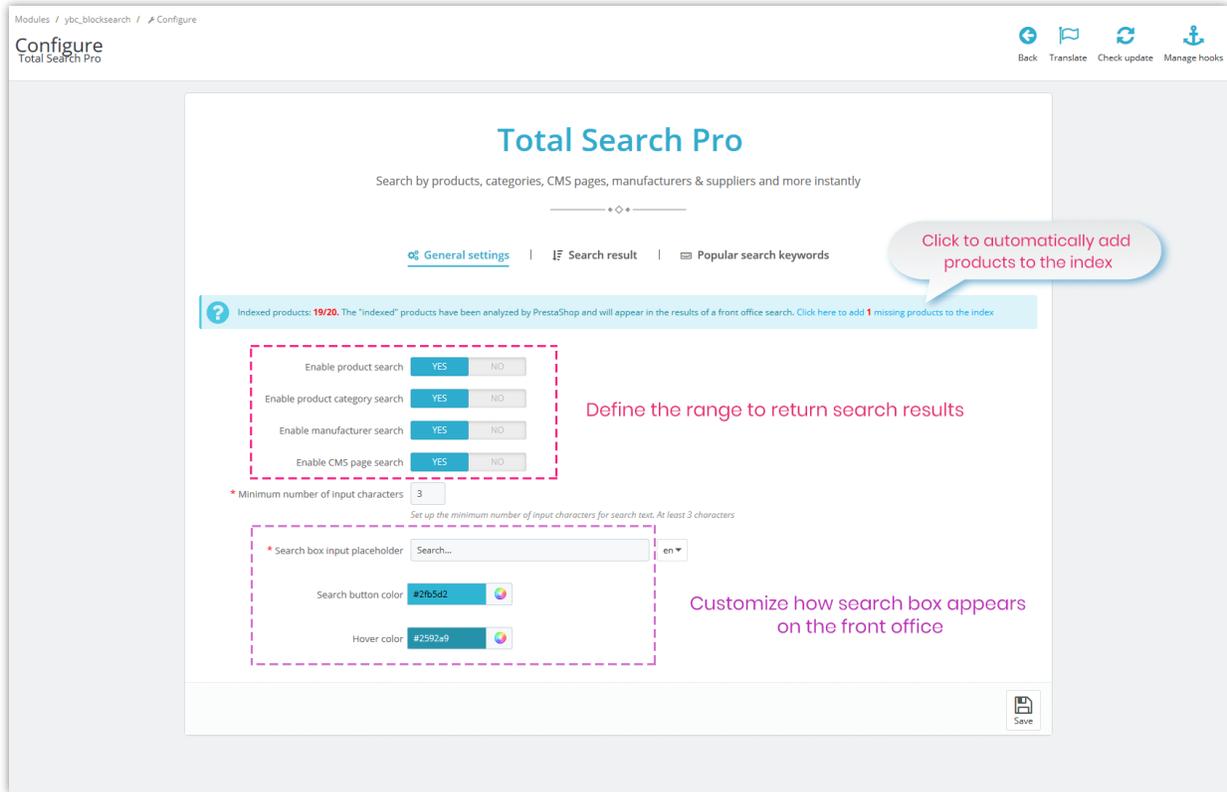

The search box is placed on expected position on your website to quickly get customer's attention and is customizable. You can select the search box color and the number of search results displayed to fit with your current theme.
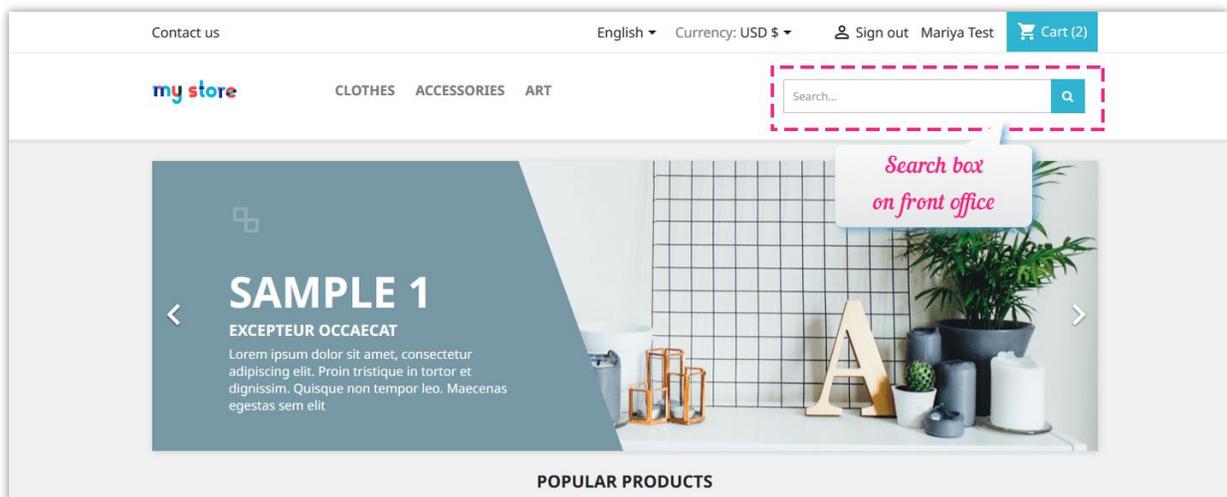

Our module provides a **wide search scope** that doesn't stop at the object's title, it may bring out search results from the description of products, description of product categories, etc. and give customers the most relevant results.

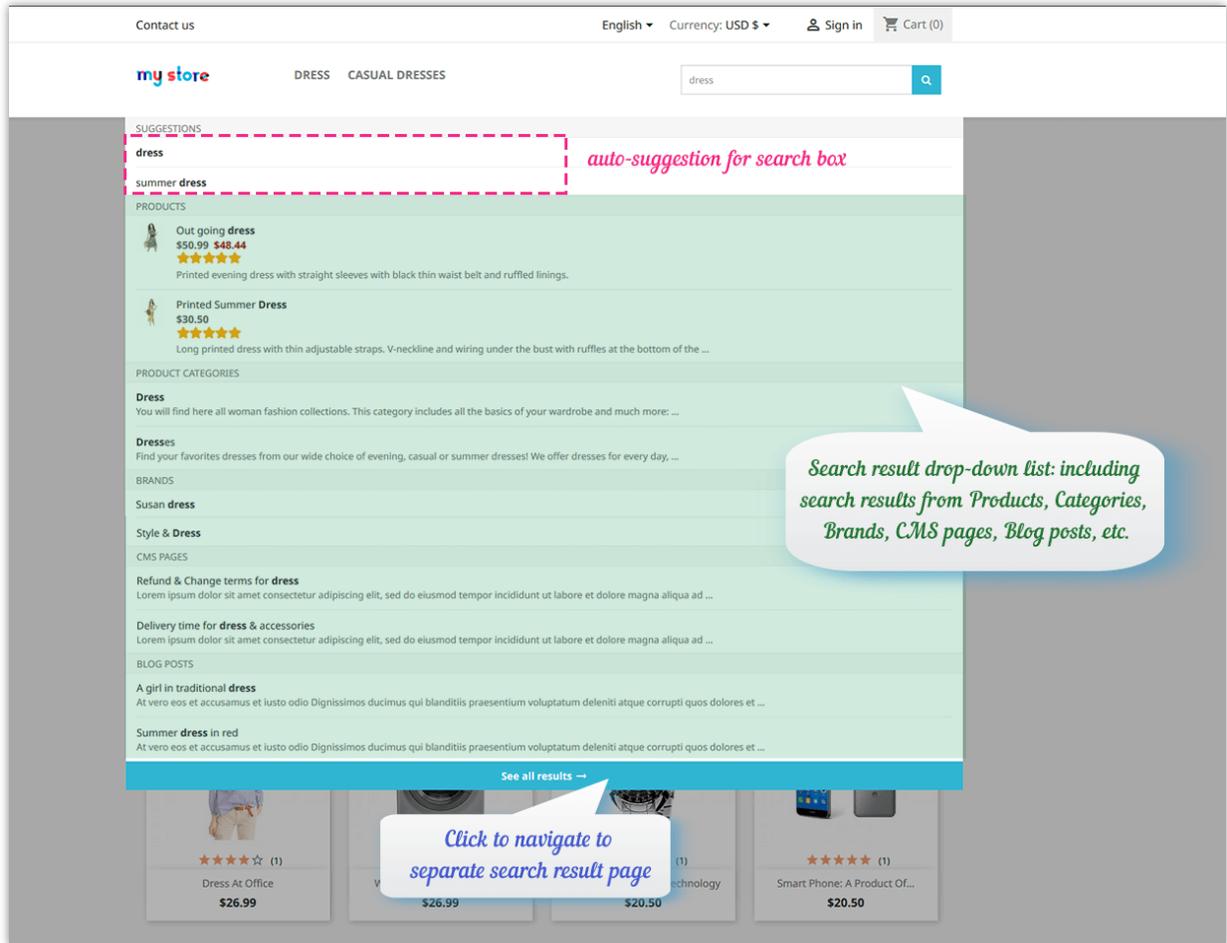

2. Search result

With **Total Search Pro**, customers will get instant search results thanks to the integrated **jQuery Ajax technology**. It brings out a detailed result drop-down list with product images, prices, and even short descriptions to help customers select the best search result for them.

Total Search Pro

Search by products, categories, CMS pages, brands and more instantly

⚙ General settings | ↓F Search result | ✉ Popular search keywords

Show product image in Ajax search result	🟢 Yes
Show product price in Ajax search result	🟢 Yes
Show short description in Ajax search result	🟢 Yes
Show product rating in Ajax search result	🟢 Yes
Display out of stock products in search results?	🟢 Yes
Show short description in search result page	🟢 Yes

Copy {hook h='etsShowShortDescription' product=$product} and paste into the "product.tpl" file of folder themes/my_theme/templates/catalog/_partials/miniatures/product.tpl

Delay time between 2 Ajax requests [ ] ms

Leave blank for the fastest display of instant search results. Increase this value for a weak server to avoid a massive number of Ajax requests.

Save
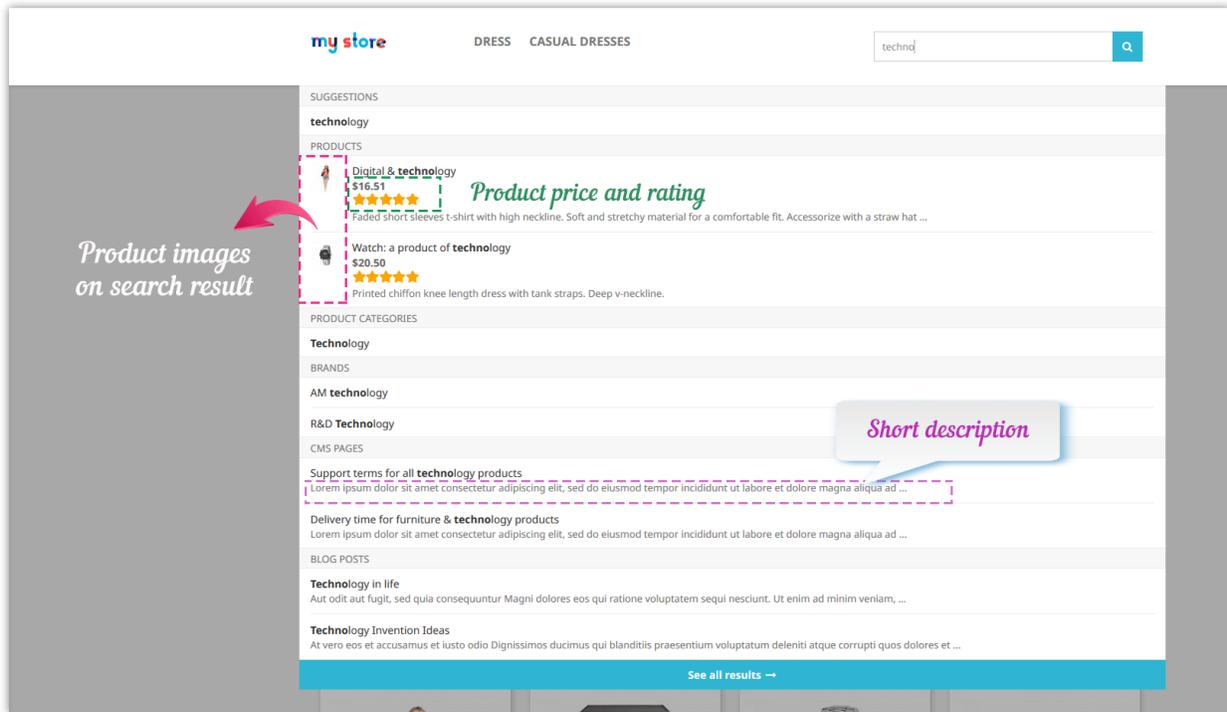

Besides, our module also provides a **separate search result page** to display all possible search results. This may encourage customers to take a look at other items on your website and purchase more.

Click on "**See all results**" link to navigate to search result page.
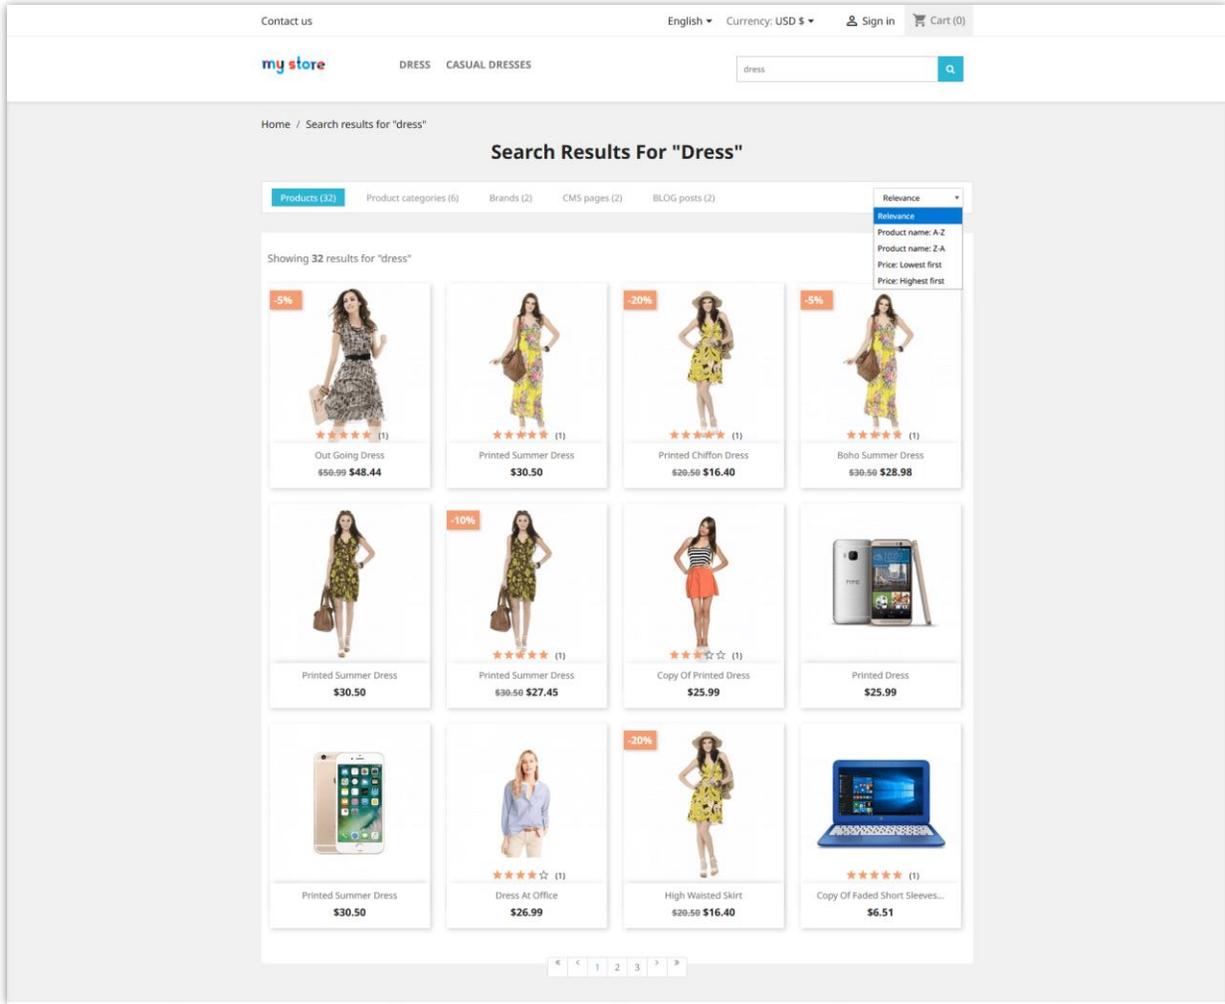

You can customize the content of search result page when there is no result. You can also search and select the suggested products to display on search result page when there is no available result.

3. Popular search keywords

The search suggestion feature allows you to **add popular search keywords** and make auto-suggestion for search box. These suggestions will help customers make better search queries and suggest relevant products that they might not have thought of.

You can add, edit or delete a keyword. You can also add different search keywords for each language existing on your online store.

V.   THANK YOU

Thank you again for purchasing our product and going through this documentation. We hope this document is helpful and efficient in the installation and usage of **Total Search Pro** module. If you do have any questions for which the answer is not available in this document, please feel free to contact us.
