I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

***Note:**

All instruction screenshots are taken from Prestashop 1.7, but installing and configuring this module on Prestashop 1.6 is similar.

II. INTRODUCTION

If your site has many levels of categories, sub-categories, or you want to show many things on the menu such as hot deals products, tutorials, google map, images, brands, etc. it's impossible to show all of them on a default Prestashop menu module.

Due to that fact, we took a long time to research and build “**Mega Menu PRO**” - a great module to help you configure and display everything you like on the menu bar easily.

* “**Mega Menu PRO**” is compatible with Prestashop 1.6.x, Prestashop 1.7.x and 8.x

III. INSTALLATION

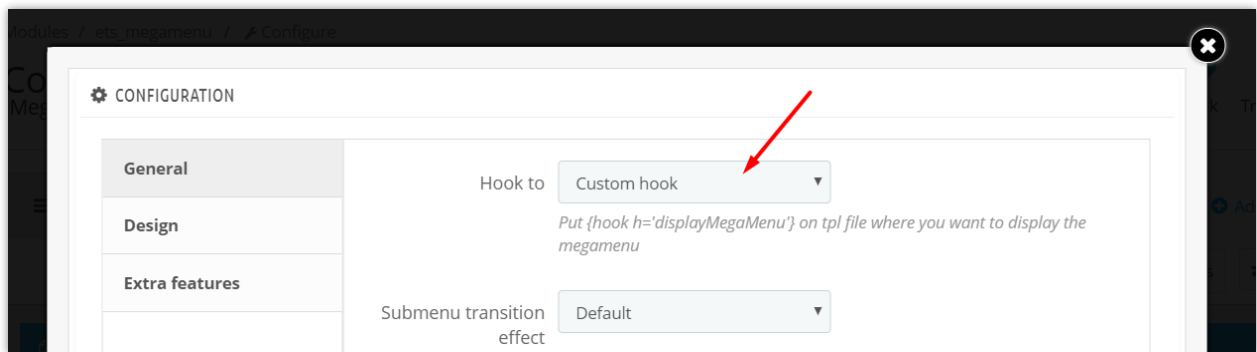

1. Navigate to “**Modules / Modules & Services**”, click on “**Upload a module / Select file**”
 2. Select the module file “**ets_megamenu.zip**” from your computer then click on “**Open**” to install
- ❖ Click on “**Configure**” button of the module you just installed to open the module’s configuration page.

IV. CONFIGURATION

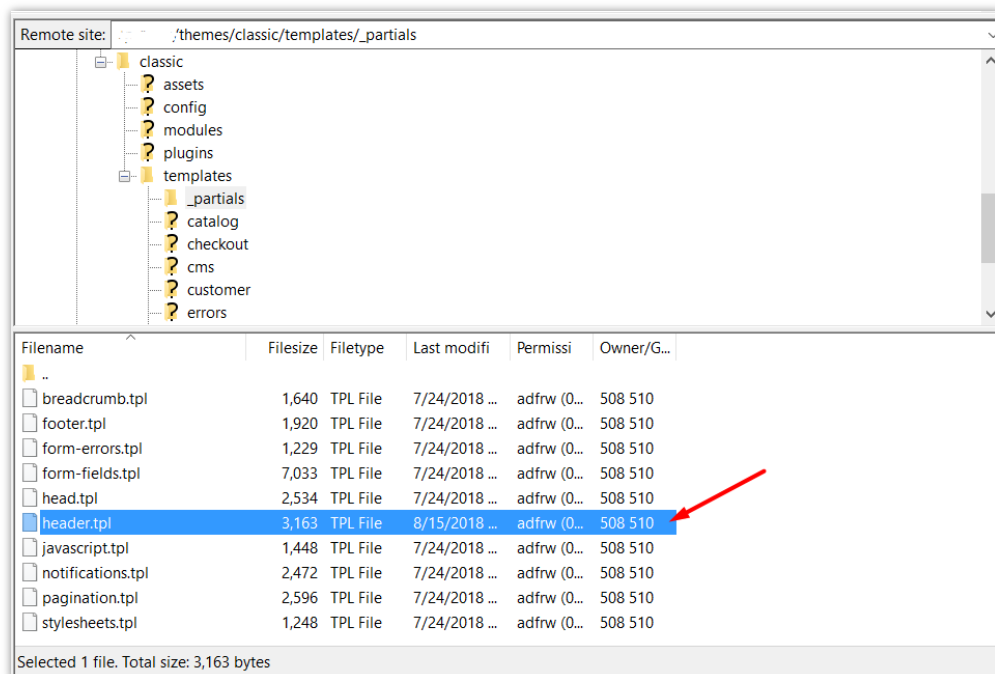

1. Full menu and custom hook

If you install **Mega Menu PRO** on a website with default Prestashop theme (or most of other custom Prestashop themes), the module is displayed inside default “*displayTop*” hook of Prestashop which is limited in width by a HTML “**div**” with a class called “**container**”, this causes the menu to be not full-width.

But no worries, we can quickly fix it. From the menu backend “**Settings**”, select “**Custom hook**” for “**Hook to**” and save.

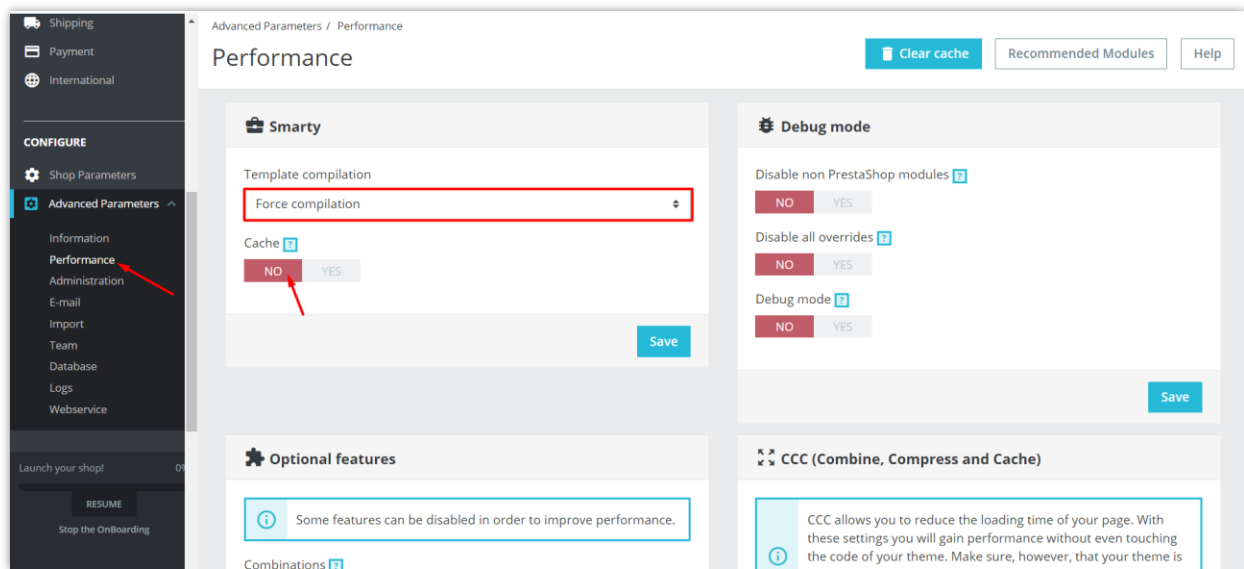

Copy the text `{hook h='displayMegaMenu'}` and paste to your **header.tpl** (inside your theme folder) where it's not limited in width by any container elements.

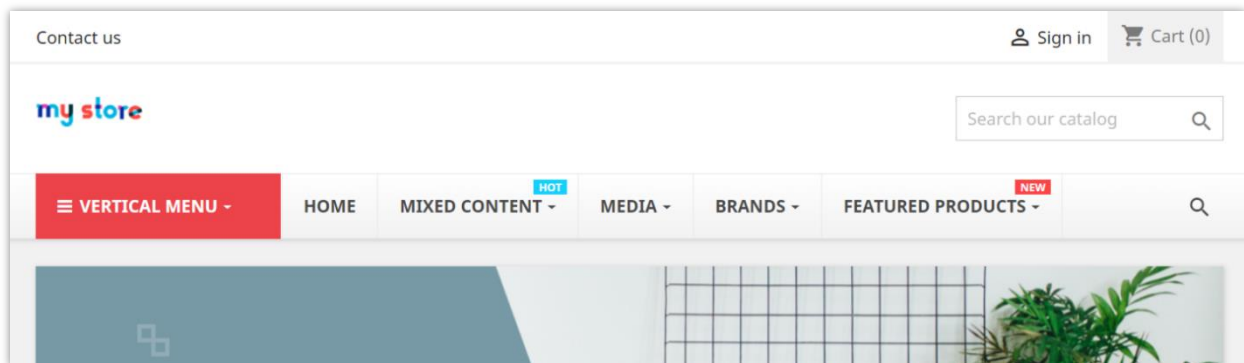

```
header.tpl
54 </nav>
55 {/block}
56
57 {block name='header_top'}
58 <div class="header-top">
59 <div class="container">
60 <div class="row">
61 <div class="col-md-2 hidden-sm-down" id="_desktop_logo">
62 {if $page.page_name == 'index'}
63 <h1>
64 <a href="{ $urls.base_url }">
65 
66 </a>
67 </h1>
68 {else}
69 <a href="{ $urls.base_url }">
70 
71 </a>
72 {/if}
73 </div>
74 <div class="col-md-10 col-sm-12 position-static">
75 {hook h='displayTop'}
76 <div class="clearfix"></div>
77 </div>
78 </div>
79 <div id="mobile_top_menu_wrapper" class="row hidden-md-up" style="display:none;">
80 <div class="js-top-menu mobile" id="_mobile_top_menu"></div>
81 <div class="js-top-menu-bottom">
82 <div id="_mobile_currency_selector"></div>
83 <div id="_mobile_language_selector"></div>
84 <div id="_mobile_contact_link"></div>
85 </div>
86 </div>
87 </div>
88 </div>
89 {hook h='displayNavFullWidth'}
90 {hook h='displayMegaMenu'}
91 {/block}
92
```

*** Note:**

You need to clear your site's cache or disable it and force the site to recompile Smarty files in order to change to take effect. To clear cache, please follow the instructions in the below screenshot.

Now your menu should be displayed full-width like this:

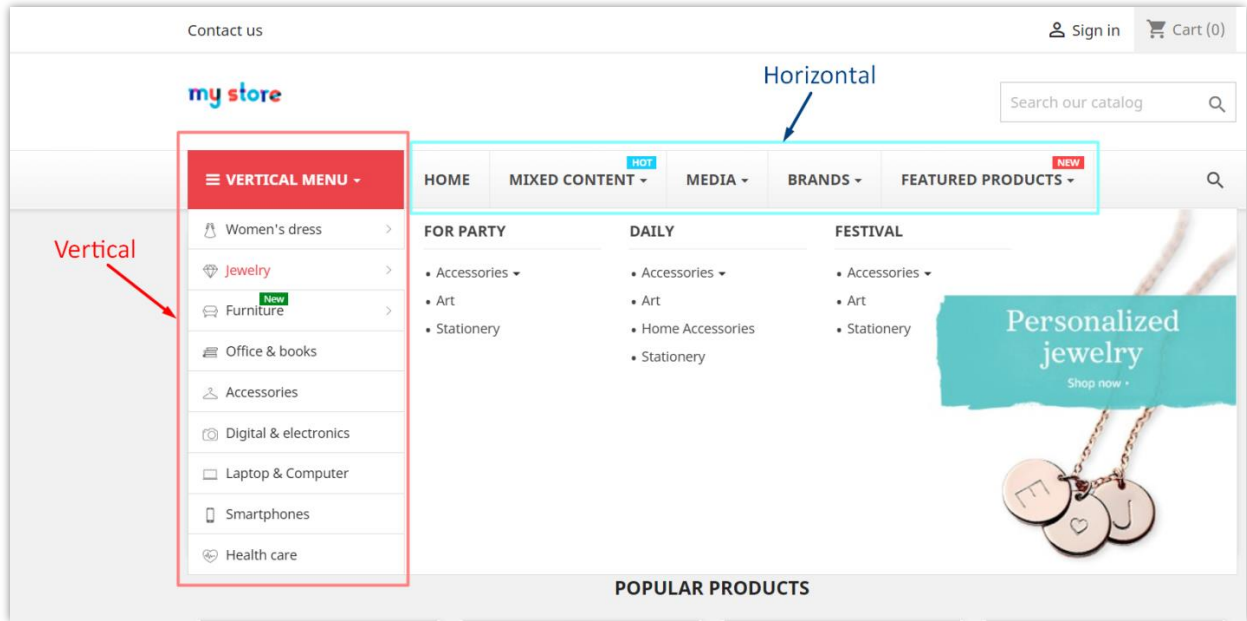

2. Create menu item

- ❖ Click on “**Add menu**” button to add a new menu item.

The screenshot shows a form titled "ADD MENU" with the following fields and options:

- Direction:** Horizontal (dropdown)
- Menu link type:** Custom link (dropdown)
- * Title:** Text input field with a language dropdown set to "en".
- * Custom link:** Text input field with a language dropdown set to "en".
- Menu icon font:** Text input field with a "Browse icon" button. Below it, a note says: "Use font awesome class. Eg: fa-bars, fa-plus, ..."
- Menu icon image:** File upload area with an "Add file" button. Below it, a note says: "Recommended size: 20 x 20".
- Submenu alignment (LTR layout):** Auto (dropdown). Below it, a note says: "Submenu alignment is reversed on RTL layout automatically".
- * Sub menu width:** 100% (text input). Below it, a note says: "Use 'px' or '%' or 'vw'. Eg: '100%' or '100px' or '80vw'".
- Custom class:** Text input field.
- Bubble alert text:** Text input field with a language dropdown set to "en". Below it, a note says: "New, Sale, Hot... Leave blank if you do not want to have a bubble alert for this menu".
- Bubble alert text color:** Color picker showing "#ffffff".
- Bubble alert background color:** Color picker showing "#FC4444".
- Background image:** File upload area with an "Add file" button.
- Position background:** Center (dropdown).
- Open link in new tab:** YES (selected) / NO (button).
- Enabled:** YES (selected) / NO (button).

- ❖ There are 2 directions available for your choice:

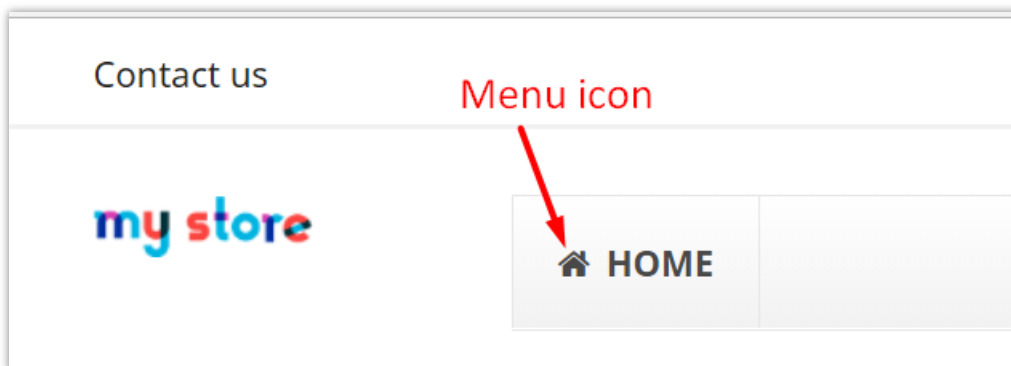

❖ You can add an icon for each menu item by using **font awesome** class or upload an icon image.

Menu icon font

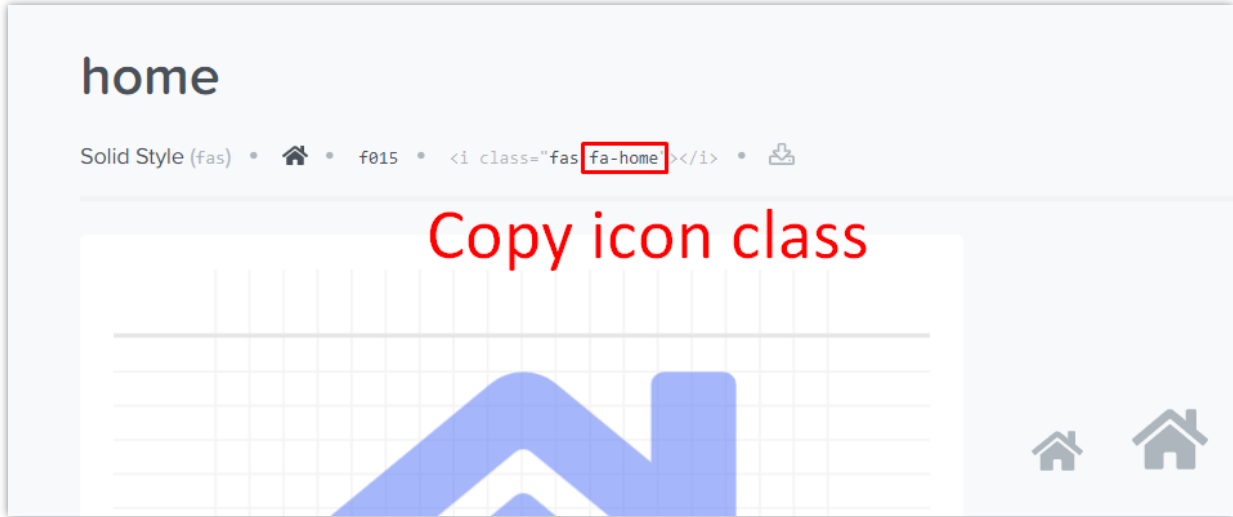

Use font awesome class. Eg: fa-bars, fa-plus, ...

Menu icon image

Recommended size:20 x 20

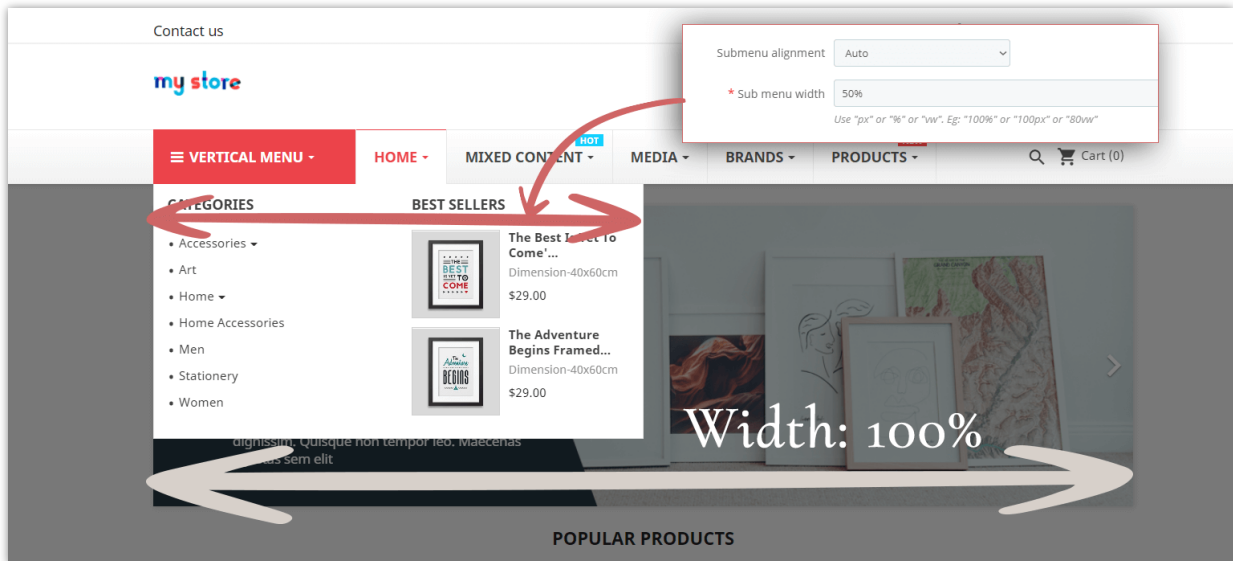

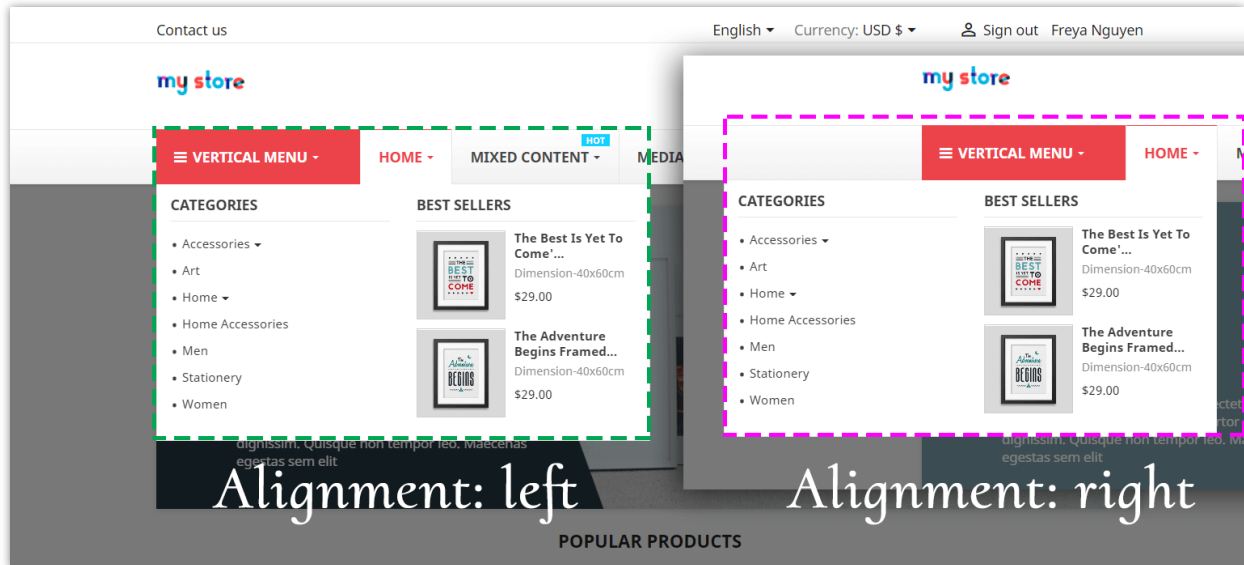

***Tip:** for more menu icon font, you can find at: <https://fontawesome.com/icons?d=gallery>. Click on an icon that you want to use, then copy the icon class.

❖ Submenu alignment and submenu width:

You can choose between 3 values of alignment: auto, left and right. When you select “**auto**”, the sub menu will start from left to right.

***Note:**

“Display tab with full width” option is only available for Vertical menu. It will show the tabs of Vertical menu in full width, even when the menu doesn’t have any tab content.

❖ **Bubble alert text and background image**

You can attract customer's attention with bubble alert text such as "Hot", "New", "Sale", etc. You can customize text content, background color and text color of alert bubble.

Bubble alert text

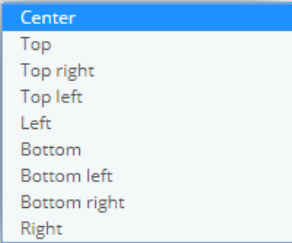

New, Sale, Hot... Leave blank if you do not want to have a bubble alert for this menu

Bubble alert text color

Bubble alert background color

Mega Menu PRO also allows you to upload a background image and select suitable position for this background image.

3. Add column for menu item

Click “Add column” button under menu item to create a new column. There are 12 columns available for each menu item.

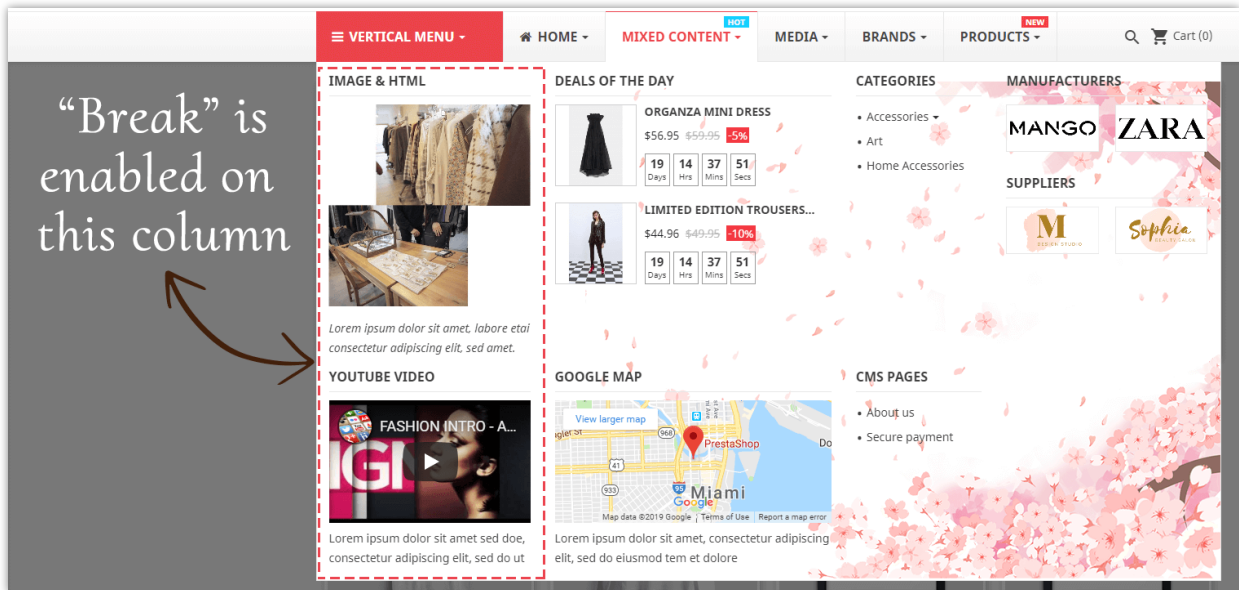

If you want to show 3 columns for a menu item, then create 3 columns with width size for each column is 4/12.

- Choose 12/12 for 1 column full width
- Choose 6/12 for 2 same width columns
- Choose 4/12 for 3 same width columns
- Choose 3/12 for 4 same width columns

-

If you want to show the blocks of column in each row, you can enable “**Break**” option.

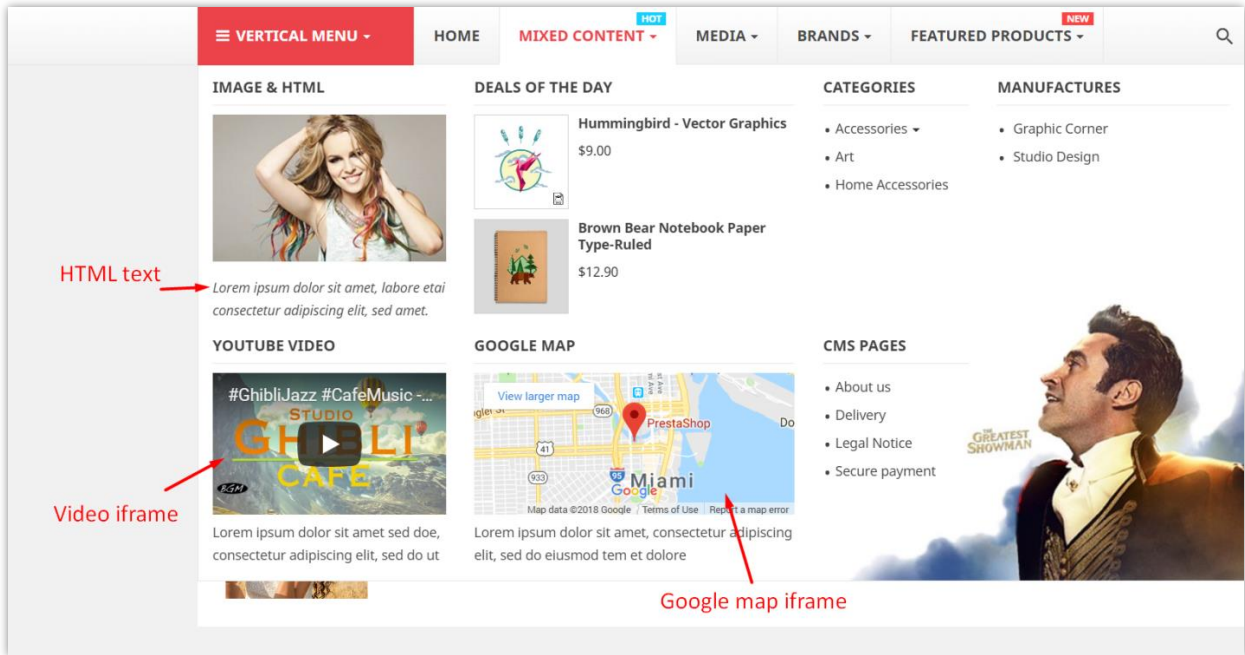

4. Add block for a column

Click “**Add block**” button under each column to add new block

There are 7 block types for your choice:

- Text/Html
- Image
- Category
- CMS page
- Manufacturer
- Supplier
- Products
- ❖ **Text/HTML**

By using this block type, you can add a text paragraph using HTML tag, add a video or Google map using iframe.

GREATEST SHOWMAN

❖ **Manufacturer**

Manufacturer block type allows you to display a list of manufacturers on your mega menu.

The screenshot shows the 'ADD BLOCK' configuration interface for the 'Manufacturer' block type. The form includes the following fields and options:

- Block type:** A dropdown menu set to 'Manufacturer'.
- * Title:** A text input field containing 'Manufacturer'.
- Title link:** An empty text input field with a note below it: 'Leave blank if you do not want to add a link to block title'.
- *Manufacturers:** A section with three checked checkboxes: 'Select/Unselect all', 'Graphic Corner', and 'Studio Design'.
- Order by:** A dropdown menu set to 'Name A-Z'.
- Display manufacturers image:** A toggle switch with 'YES' and 'NO' options. The 'NO' option is selected and highlighted in red. A red arrow points to this option with the text: 'Image is disabled. Only show manufacturer's name'.
- Display title:** A toggle switch with 'YES' and 'NO' options. The 'YES' option is selected and highlighted in blue.
- Enabled:** A toggle switch with 'YES' and 'NO' options. The 'YES' option is selected and highlighted in blue.

If you want to show manufacturer logos, you can enable “**Display manufacturer image**” option.

Choose product type

*Product count item(s)

Display title

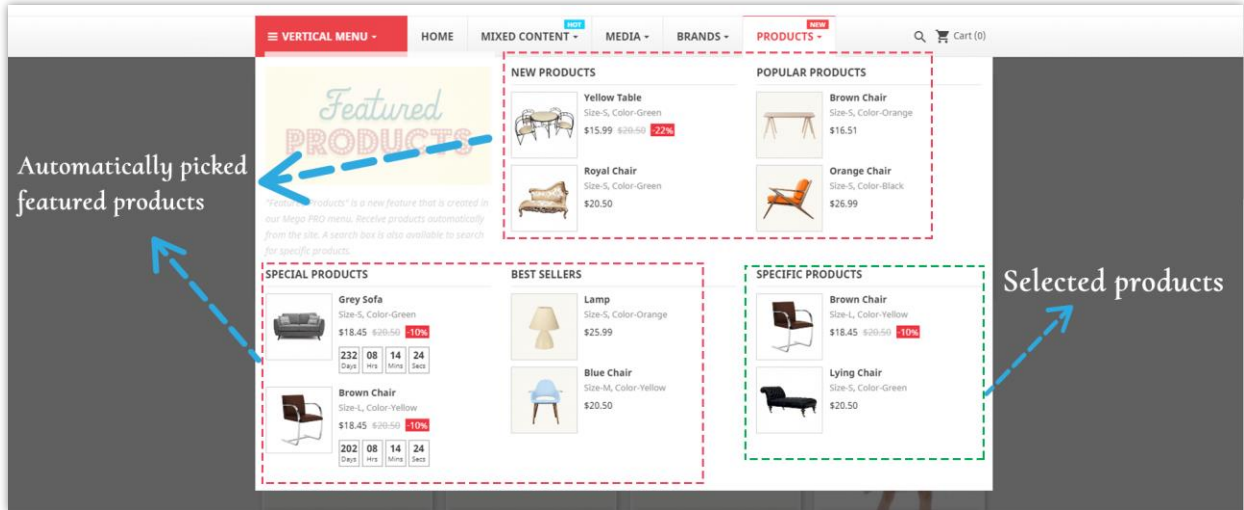

Enable product description

Enable count down clock

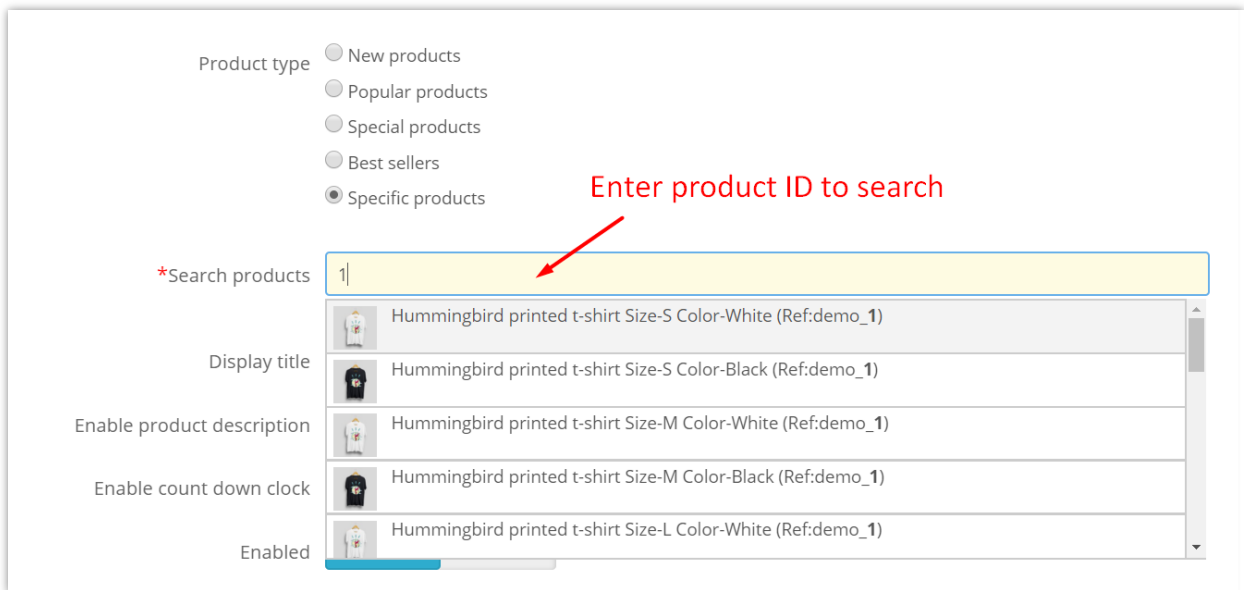

Enabled

*Tips:

- You can enable countdown clock if the product has discount price and time setting.
- If you select one of the featured product type (new, popular, special, best sellers), **Mega menu PRO** will automatically get the items belong to these categories and display them.

- For “Specific products”, you can search for a product by entering its ID, name or reference.

5. Manage vertical menu

❖ Vertical menu item

To set up vertical menu, you need to select “Vertical” direction from “Add menu” popup form.

ADD MENU
✕

Direction Vertical

Vertical menu text color #ffffff

Vertical menu background color #666666

Always open vertical menu YES NO

Remove border YES NO

Menu item width 230px
Use "px" or "%" or "vw". Eg: "20%" or "230px" or "80vw"

Tab item width 230px
Use "px" or "%" or "vw". Eg: "20%" or "230px" or "80vw"

Menu link type Custom link

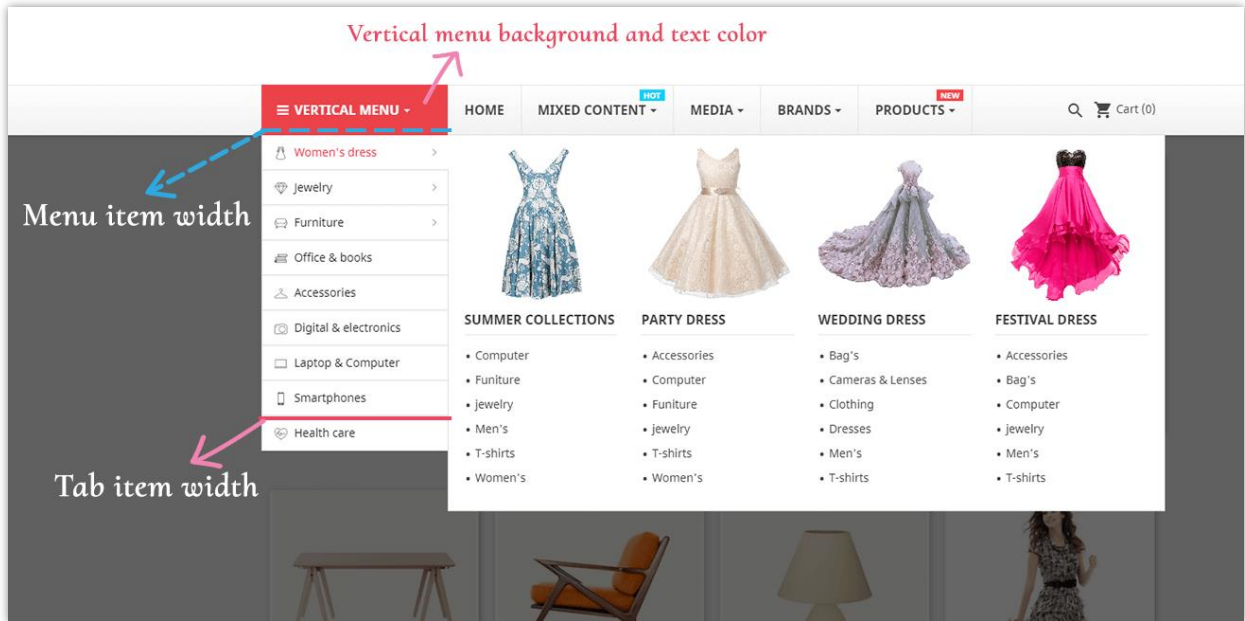

* Title

*Custom link

Menu icon font
Use font awesome class. Eg: fa-bars, fa-plus, ...

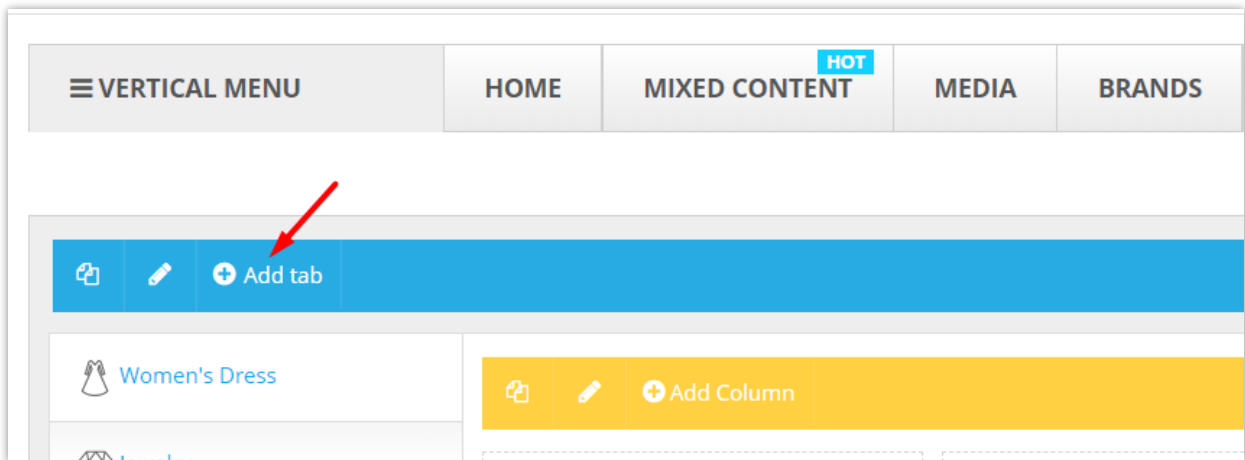

These options only available for Vertical menu

By enable “**Remove border**”, it will remove all borders (top, bottom, left, right) of the vertical menu. This option is useful when you have background for vertical menu item so you don’t need border anymore. If you don’t use background, just set the option as disabled then your vertical menu item will have borders as the same other menu items.

❖ Add a tab

For vertical menu, we need to add tabs before creating column for menu item.

The setting options are similar with **Manage horizontal menu**:

* Title

Custom link

Tab icon font

Use font awesome class. Ex: fa-bars, fa-plus, ...

Tab icon image

Recommended size:20 x 20

Uploaded image: 

Leaving it blank, the menu will spread to full width

Tab content width

Use "px" or "%" or "vw". Eg: "20%" or "230px" or "80vw"

Display tab content from top YES NO

Bubble alert text

New, Sale, Hot... Leave blank if you do not want to have a bubble alert for this menu

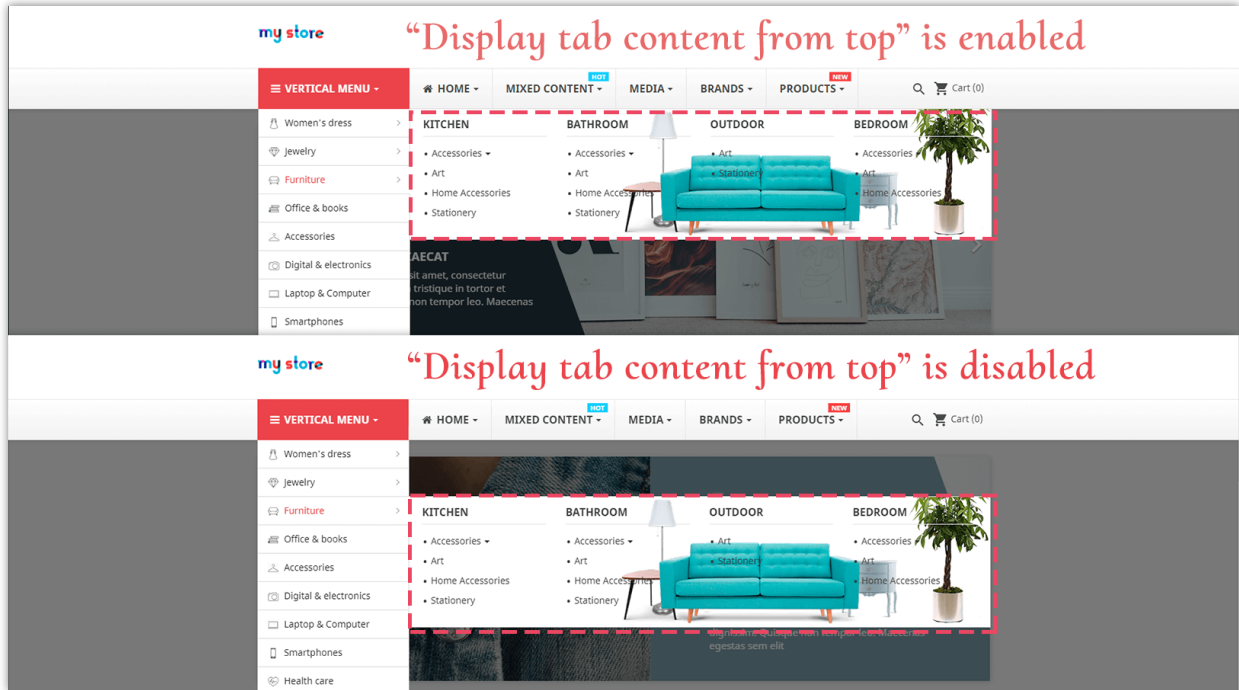

Bubble alert text color

Bubble alert background color

Background image

Position background ▼

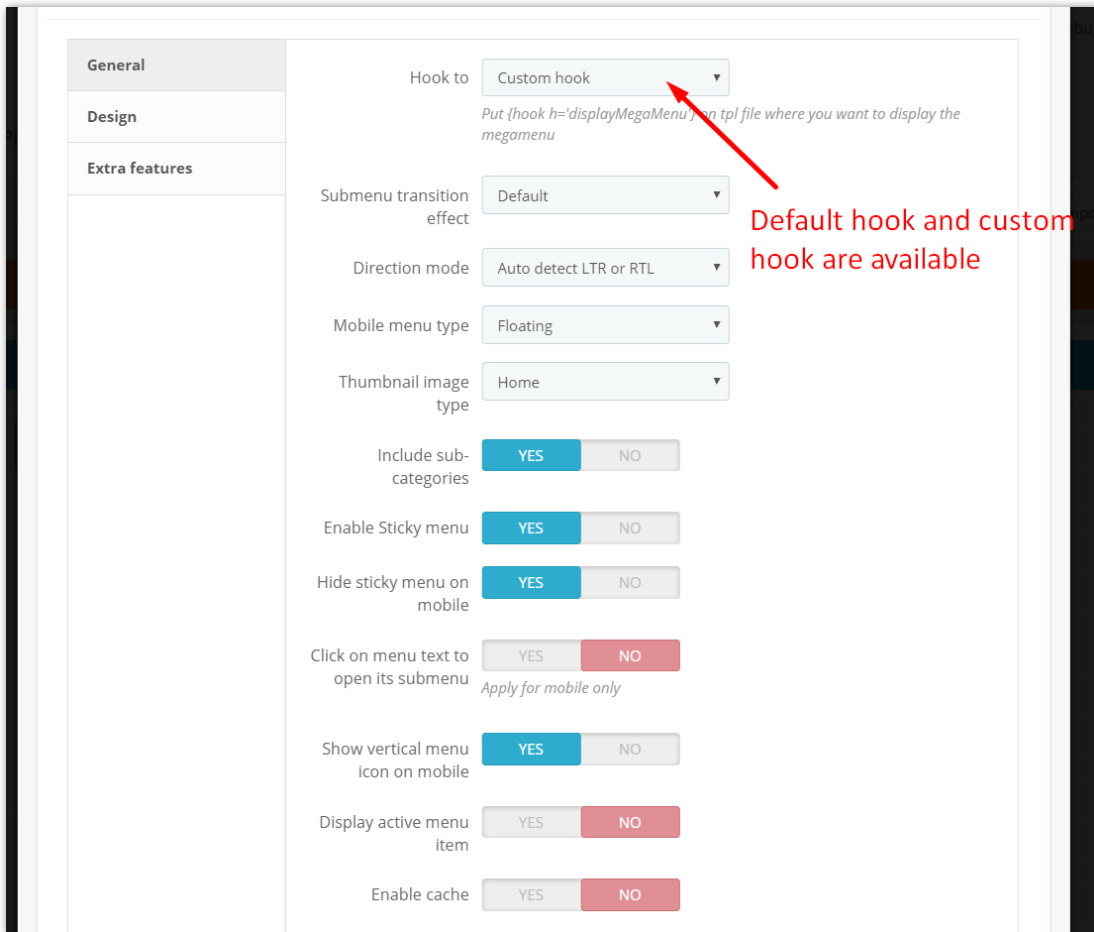

❖ **Display tab content from top**

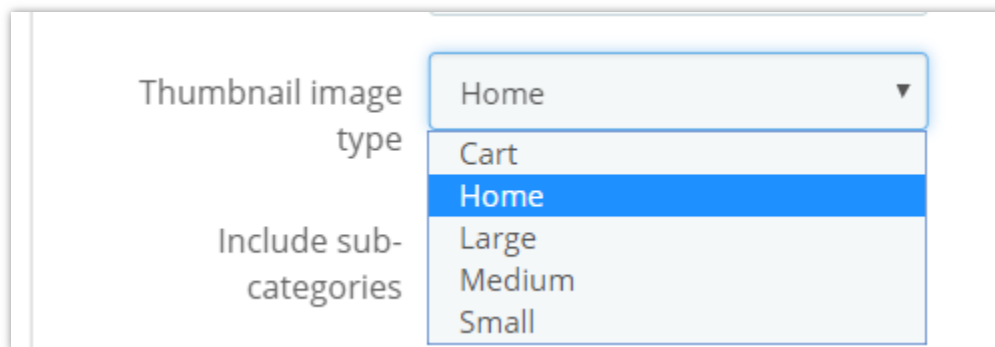

6. Mega menu settings

❖ General setting

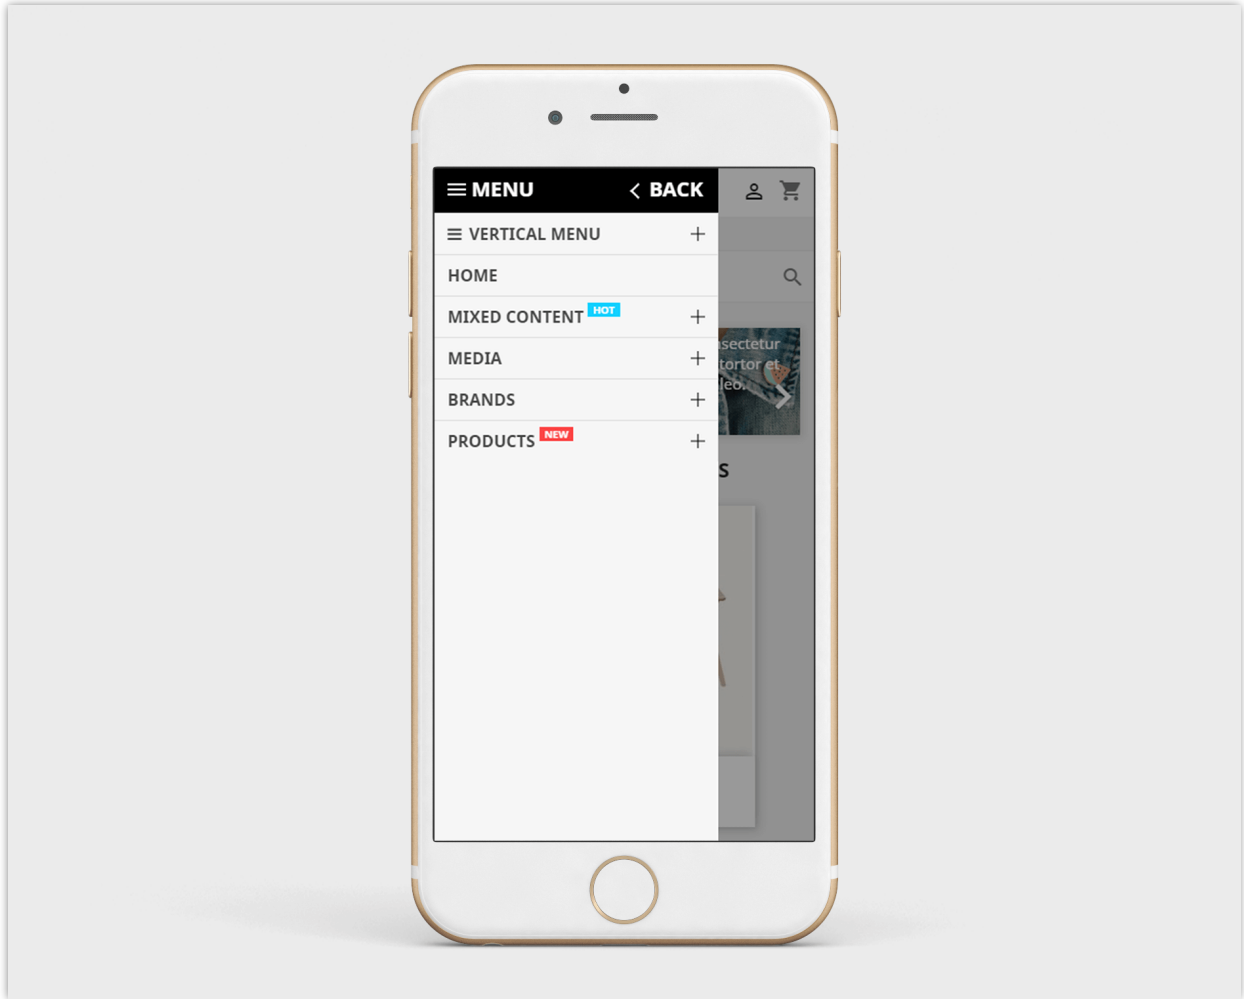

In this tab, you will find general setting options for mega menu.

Thumbnail image type: Our module supports 5 thumbnail image types to display on mega menu. You can select the one most suitable with your current Prestashop theme.

You can also enable/disable **sticky menu** on mobile screen.

For mobile devices, **Mega Menu PRO** allows customers to “**Click on menu text to open its submenu**”.

❖ Design

You can configure the menu layout easily with design options from this tab.

**Tip: If your menu has many items and doesn't have enough space to show all of them, you can reduce the text font size to have more space.*

*** Note:**

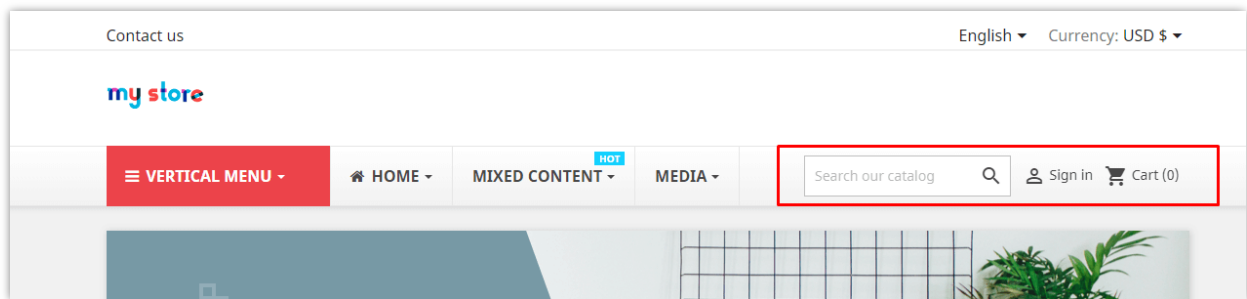

- *Select a menu layout type from 5 pre-defined layouts available*
- *Enable cache for production website to load front end menu a lot faster.*
- *Select Google fonts you like, the font will be automatically imported into your website*
- *Custom CSS can be used with available font and color codes that you defined in the previous options.*

General	Layout type <input type="text" value="Layout 1"/>
Design	Heading font <input type="text" value="THEME DEFAULT FONT"/> <p><i>Use default font of your theme or select a Google font from the list</i></p>
Extra features	Heading font size <input type="text" value="16"/> px
	General text font <input type="text" value="THEME DEFAULT FONT"/> <p><i>Use default font of your theme or select a Google font from the list</i></p>
	Title submenu font size <input type="text" value="16"/> px
	General text font size <input type="text" value="14"/> px
	Menu background <input type="color" value="black"/>
	Menu text color <input type="color" value="#484848"/>
	Menu text hover <input type="color" value="#ec4249"/>
	Menu background hover <input type="color" value="white"/>
	Sub-menu background <input type="color" value="white"/>
	Sub-menu title <input type="color" value="black"/>
	Sub-menu text color <input type="color" value="black"/>
	Sub-menu link hover <input type="color" value="#ec4249"/>

	Menu bar background on mobile <input type="text" value="#000000"/>
	Menu bar color on mobile <input type="text" value="#ffffff"/>
	Custom class <input type="text"/>
 Reset	 Save

❖ Extra features

This is new feature that we have developed in this version which allows you to move some elements from default position to mega menu bar.

Enable the element you want to display on mega menu bar and click “**Save**” to apply the changes.

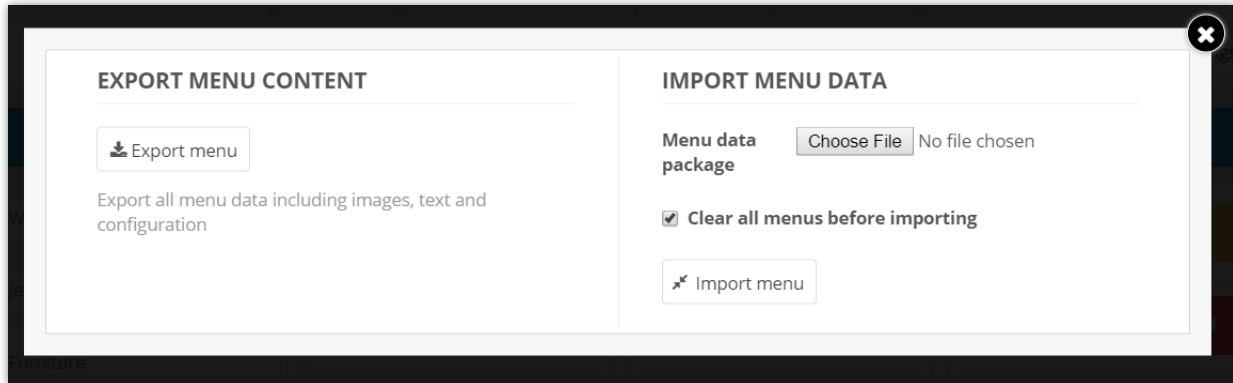

General	Display shopping cart <input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
Design	
Extra features	
	<div style="background-color: #fff9c4; padding: 5px; border: 1px solid #ccc;"> <p>! Not recommended! For advanced users only. Menu can be broken when this option is enabled (especially on custom theme), You are required to have HTML/CSS knowledge to refine the issues. Please understand this is out of free support as it depends on your theme</p> </div>
	Display search <input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
	<div style="background-color: #fff9c4; padding: 5px; border: 1px solid #ccc;"> <p>! Not recommended! For default search module and advanced users only. Menu can be broken when this option is enabled (especially on custom theme), You are required to have HTML/CSS knowledge to refine the issues. Please understand this is out of free support as it depends on your theme</p> </div>
	Open searchbox by default <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
	Display user info links <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
	<div style="background-color: #fff9c4; padding: 5px; border: 1px solid #ccc;"> <p>! Not recommended! For advanced users only. Menu can be broken when this option is enabled (especially on custom theme), You are required to have HTML/CSS knowledge to refine the issues. Please understand this is out of free support as it depends on your theme</p> </div>
	Custom HTML text <input style="background-color: #fff9c4;" type="text"/>

**Note: The “Search” option is applied to Default search module only.*

By enable these options, it might make your menu broken by moving the search, cart, user info module from default position to menu bar. So, just use it if you understand well about HTML/CSS and you can make the necessary changes yourself, as these options are out of our term for free support.

7. Import/Export

Click on “**Import/Export**” button to open the working area.

***Note:**

- *Only default language text is exported, other languages' translation is not!*
- *A sample data package is available at*

<https://drive.google.com/file/d/1oGOGOi95Ue00llOmidHEDogjmsU9CmHe/view>

*To show the menu content the same as our demo, please set the menu in “**Custom hook**” and copy the hook to the **.tpl** file where you want to show the menu in full width (See how to put custom hook in the top of this document).*

The categories, products, manufacturer, suppliers... on your site are not the same our demo site, so it will be a bit different. Just set up with your real data, then you will see it looks beautiful.

V. THANK YOU

Thank you again for purchasing our product and going through this documentation. We hope this document is helpful and efficient in the complete setup of this module. If you do have any questions for which the answer is not available in this document, please feel free to contact us.
