I. INTRODUCTION

1 CLICK to Migrate or Upgrade is one of the best modules to migrate or upgrade PrestaShop 1.3, 1.4, 1.5, 1.6, 1.7 to PrestaShop 8.0 or migrate data between PrestaShop websites (any version) within seconds!

II. PREPARATION

For source store:

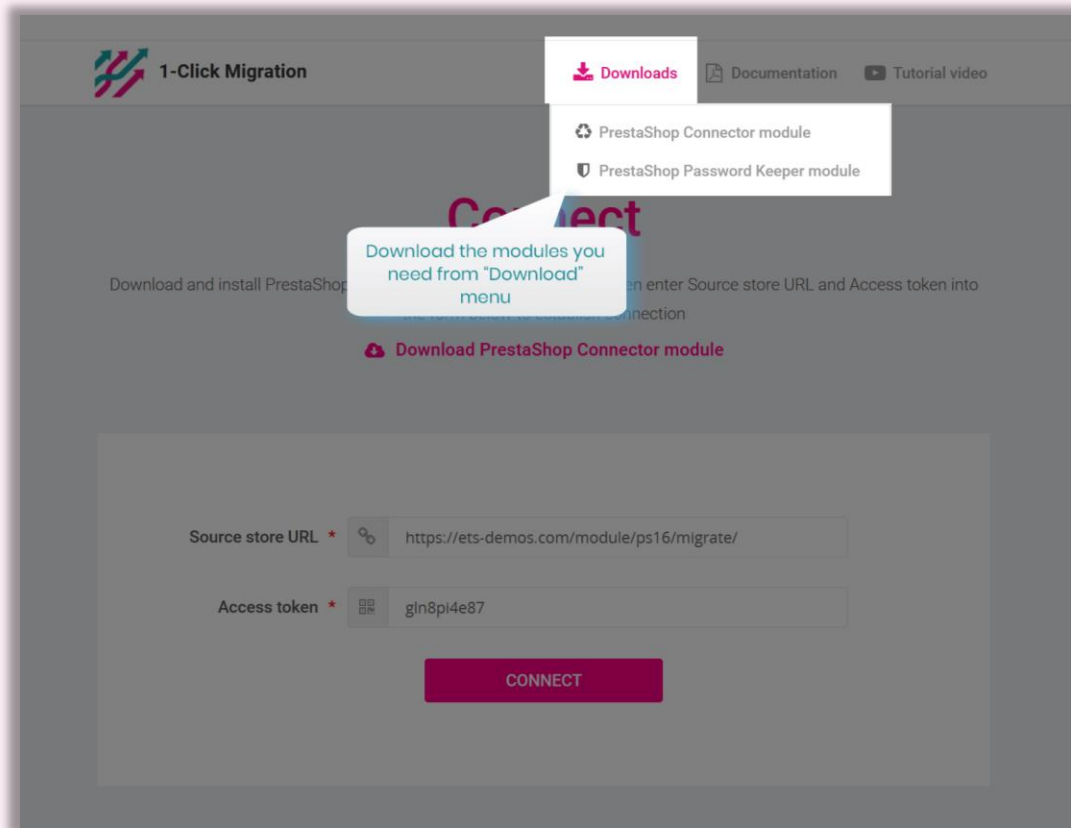

- Navigate to **“Modules / Modules & Services”** > click on **“Upload a module / Select file”** > install **PrestaShop Connector** module on the source store.

For target store (the website will receive migration data):

- Navigate to **“Modules / Modules & Services”** > click on **“Upload a module / Select file”** > install **1 CLICK to Migrate or Upgrade** on the target store.
- Similarly, install **PrestaShop Password Keeper** module on the target store.

***NOTE:**

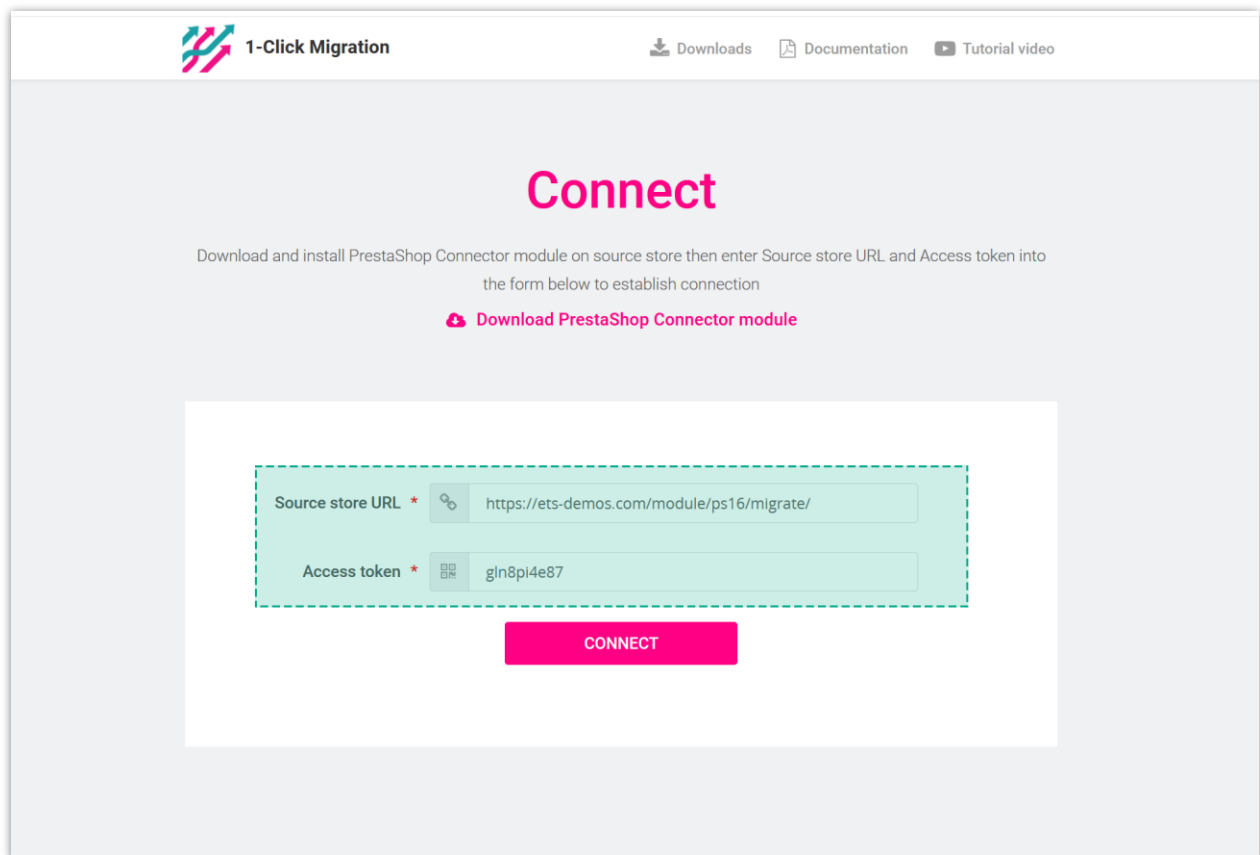

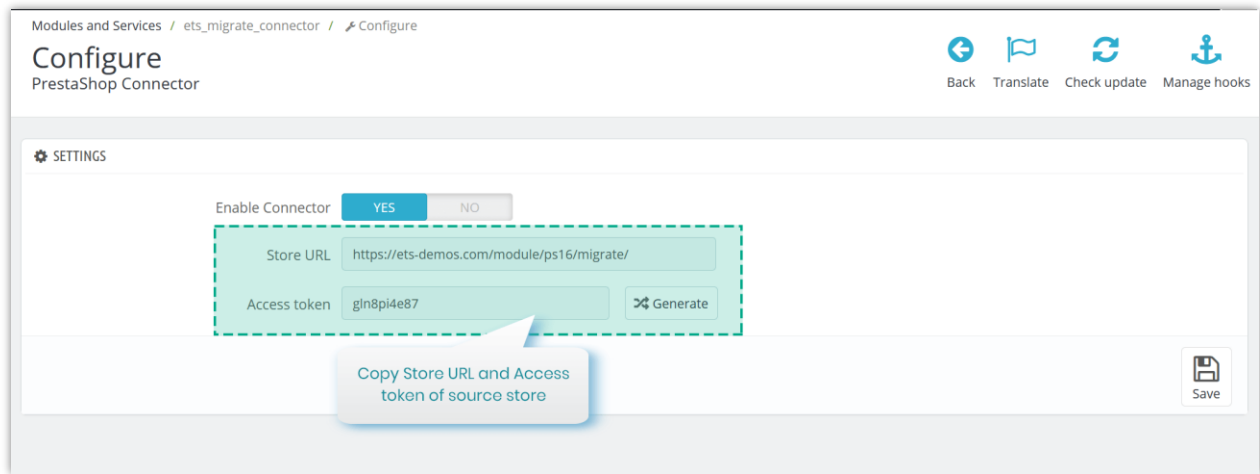

- Please create a backup for target store before performing migration process.
- You can download the free modules – “**PrestaShop Connector**” and “**PrestaShop Password Keeper**” – from **1 CLICK to Migrate or Upgrade** back office:

III. MIGRATION PROCESS

1. Connect source store with target store

Copy **“Source store URL”** and **“Access token”** provided by **“PrestaShop Connector”** module on source store and paste them into respective fields on target store.

Now we have filled in required information, click on **“Connect”** button to start connecting PrestaShop stores.

2. Migration options

The second step is to select data types and migration options you prefer before starting your automated migration process.

- Click on **“Migrate”** button to start migration instantly with default migration settings and pre-selected data entities.
- Click on **“Advanced settings”** to configure migration options as you preferred.

The screenshot displays the '1-Click Migration' interface. At the top, there is a navigation bar with the logo '1-Click Migration' and links for 'Downloads', 'Documentation', and 'Tutorial video'. The main heading is 'Migration', followed by a sub-heading: 'Selected data entities indicated below will be migrated. By default, all data entities are selected. Click Advanced settings for more migration options.'

Below the text is a central illustration of a smartphone with a 'MIGRATE' button on the screen. A red arrow points from the phone to a 'CMS' icon, and another red arrow points from the phone to a 'PREBOOKING' icon. To the left of the phone are icons for a person, a shopping cart, and a storefront. To the right are icons for a factory, a mail envelope, and a storefront.

On the right side of the interface is a table of data entities and their item counts:

Data entities	Item count
Products & SEO	13
Product categories	16
Customers & addresses	11
Employees	1
Orders & shopping carts	14
Carriers & shipping	2

Below the table is a 'View more' link with a circular arrow icon. At the bottom of the interface are three buttons: 'Back', 'Advanced settings', and 'Migrate'.

2.1. Advanced settings

Advanced settings

Data entities to migrate

- Select/unselect all
- Products & SEO
- Employees
- Catalog price rules
- Suppliers
- Meta data & SEO
- Product categories
- Orders & shopping carts
- CMS categories
- Manufacturers
- Top menus
- Customers & addresses
- Carriers & shipping
- CMSs
- Contact form messages

Migration options

Keep IDs YES NO
Keep ID of data entities such as product IDs, customer, IDs, etc.

How to migrate images? Automatically migrate images (will take more time)
 Manually copy images to target site when database migration completed

How to generate product thumbnail images? Automatically generate thumbnail images (will take more time)
 Manually generate thumbnail images when migration completed

Images migrated per request

How to migrate attachments & files? Automatically migrate attachments & files (will take more time)
 Manually copy attachments & files to target site when database migration completed

Attachments & files migrated per request

Migrate empty shopping carts? YES NO

Migration speed

Items migrated per request Low Medium High
5000

- **Data entities to migrate:** select the data entities you want to migrate into target store.

***NOTE:**

There are some data entities that needs to be migrated together. You cannot migrate these data entities alone since it can break the logic of database. For example:

- **“Products & SEO” and “Product categories”**
- **“Orders & shopping carts”, “Customers & addresses” and “Carriers & shipping”**

- **Shop mapping:** if source store has multi-shops, you can select where data of each shop from source store will be migrated into the multi-shops on target shop.
- **Keep IDs:** keep ID of data entities such as product IDs, customer IDs, etc. from source store.

***NOTE:**

When you enable **“Keep IDs”** option, all the data entities selected on **“Data entities to migrate”** section of target store will be deleted before migrating new data from source store. This deletion is compulsory to protect the logic of database.

- **How to migrate images and attachments & files:** you can allow **1 CLICK to Migrate or Upgrade** to automatically migrate images, attachments and files or manually upload your data to target site when migration completed.

- If your server has low performance or if you encountered time out error while migrating, please decrease the “**Images migrated per request**” and “**Attachments & files migrated per request**” value.
- **Migration speed**: the number of data records migrated per request. You can increase this value if your server has high performance and unlimited “**max_excution_time**”. On the contrast, please decrease this value if your server has low performance or if you encountered time out error.

2.2. Confirmation popup

After clicking on “**Migrate**” button, a confirmation popup will appear. It displays all data entities and migration options that will be migrated to target store.

If you agree with the migration settings, please click on “**Migrate Now**” button to start your migration.

Before Start ✕

Please review and confirm the migration settings before processing it. You are recommended to make a complete backup of target store (both files and database), if existing data is important to you.

3. Migration status

On this step, you will see the migration status of all data entities. During migration process, you can pause, resume or cancel the migration.

Migration process

This process is running automatically. Please be patient and do not close your web browser.
The migration status of each data entity is displaying below.

[Play](#) [Pause](#) [Cancel](#) [Settings](#)

Migration status	00 : 00 : 36
Minor data	100% ✓
Employees	100% / 1 ✓
Product categories	100% / 11 ✓
Manufacturers	100% / 5 ✓
Suppliers	100% / 1 ✓
Customers & addresses	100% / 189 ✓
Carriers & shipping	100% / 14 ✓
Products	0.00% / 14 ⚠
Product comments	0% / 4 ⏸
Cart rules	0% / 2 ⏸
Catalog price rules	0% / 11 ⏸
Orders & shopping carts	0% / 29 ⏸
CMS categories	0% / 1 ⏸
CMSs	0% / 5 ⏸
Contact form messages	0% / 2 ⏸
Top menus	0% / 3 ⏸
Finalization	0% / 14 ⏸

During migration process, you can change migration speed. Click on **“Settings”** link to open **“Settings”** popup.

NEW MIGRATION

RESUME

4. Enjoy new store!

Your migration is now completed. All data entities have been successfully migrated from the source store.

4.1. Keep customer passwords

- If you haven't installed "**PrestaShop Password Keeper**" module, please save `_COOKIE_KEY_` in somewhere then install "**PrestaShop Password Keeper**" on the target store.

 1-Click Migration Downloads Documentation Tutorial video

✓ Congratulations!

Your migration has been successfully completed.
You are almost done, please do some final tweaks before putting your website to live.

Keep customer passwords

Step 1: Download our free PrestaShop Password Keeper module
Step 2: Install PrestaShop Password Keeper module on target store (this website)
Step 3: Copy the `_COOKIE_KEY_` of source store provided below then paste it into PrestaShop Password Keeper configuration page.

Here is `_COOKIE_KEY_` of the source store:

```
ygT3ElyDJoUPnBvRGgNCaa2hBaFXhD4Z0fCVIQSdix4aqs82y4dZMeeu
```

[NEW MIGRATION](#) [VIEW YOUR SHOP](#)

- Open the “**PrestaShop Password Keeper**” configuration page and paste **_COOKIE_KEY_** into the input field. Click “**Save**” to finish.

SETTING

* _COOKIE_KEY_ of source Prestashop website

_COOKIE_KEY_ is provided when you finish the migration using Migration 4.0. It is also available on settings file (settings.inc.php) of source website.

Save

4.2. Manually migrate images, attachments and files

By default, **1 CLICK to Migrate or Upgrade** will **automatically migrate all images, attachments, and files** from the source store to the target store. We recommend you select this automatic migration feature for your images, attachments, and files if your source store has small to medium data sizes.

Otherwise, if you select to **manually migrate images/files on the previous step**, you will find the list of folders that needs to manually copy to the target store. You can use **FTP software** or **cPanel** to upload the images/files to the target store.

✓ Congratulations!

Your migration has been successfully completed.
You are almost done, please do some final tweaks before putting your website to live.

Copy images

Please copy images from the source store and upload them to respective folders on target store (this website) to complete the migration.
