## I. WELCOME

Thank you for downloading our theme. We hope to guide you through all the aspects of the theme installation and the theme setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

*\*The **Cosmetics** is compatible with PrestaShop 1.7.x*

## II. SERVER REQUIREMENTS

### PHP configuration:

- "memory\_limit" need to be at least "64M"
- "upload\_max\_filesize" need to be at least "16M"
- "allow\_url\_fopen" need to be set to "on"
- "register\_global" should be set to "off"
- "safe\_mode" should be set to "off"

### Extensions required:

- GD
- cURL
- SimpleXML
- SOAP

### File permissions:

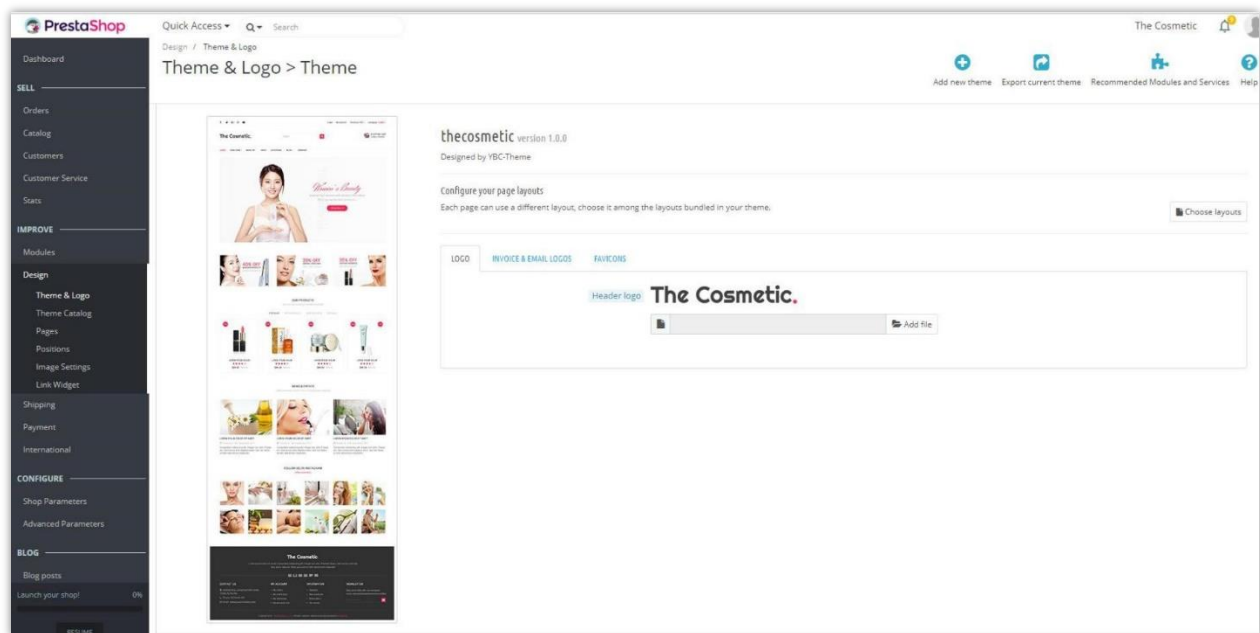

- All files need to be "664"
- All folders need to be "755"

### III. INSTALLATION

#### 1. Upload theme

Follow these steps to install our theme manually:

- Login to your back office and navigate to **Design > Theme & logo** and click on **“Add new theme”**.
- From **“IMPORT FROM YOUR COMPUTER”** section, choose your theme file (**thecosmetic.zip**) from the **“theme”** folder in the download file and click **“Save”**.
- Choose the theme you uploaded and click **“Use this theme”**.
- Upload logo: Navigate to **“Theme & Logo / Theme”**, select and upload your website logo.

#### **NOTE:**

- Since the install package is larger than 2MB, therefore you should increase the **“Maximum size for attached files”** value of your site (**“Configure” > “Advanced Parameters” > “Administration”** page). We recommend the minimum value of 30 MB.

- After successfully uploading the install package, you can change this parameter back to the initial value.
- You can also contact the host manager to increase the "max\_upload\_filesize" value of your server to be able to upload larger file.

## 2. Image

Navigate to "**Design / Image settings**". Make sure your image sizes are configured as below:

PrestaShop Quick Access Search Cosmetic

Design / Image Settings

## Image Settings

IMAGE SETTINGS 7

| ID | Name             | Width  | Height | Products | Categories | Brands | Suppliers | Stores |      |

Bulk actions

Set up image quality that you prefer to use on your website:

### IMAGES GENERATION OPTIONS

JPEG images have a small file size and standard quality. PNG images have a larger file size, a higher quality and support transparency. Note that in all cases the image files will have the .jpg extension.  
 WARNING: This feature may not be compatible with your theme, or with some of your modules. In particular, PNG mode is not compatible with the Watermark module. If you encounter any issues, turn it off by selecting "Use JPEG".

Image format

- Use JPEG.
- Use PNG only if the base image is in PNG format.
- Use PNG for all images.

\* JPEG compression: 90

\* PNG compression: 7

Generate images based on one side of the source image: Automatic (longest side)

\* Maximum file size of product customization pictures: 8388608 bytes

\* Product picture width: 64 pixels

\* Product picture height: 64 pixels

Generate high resolution images: YES NO

*Enable to optimize the display of your images on high pixel density screens.*

Save

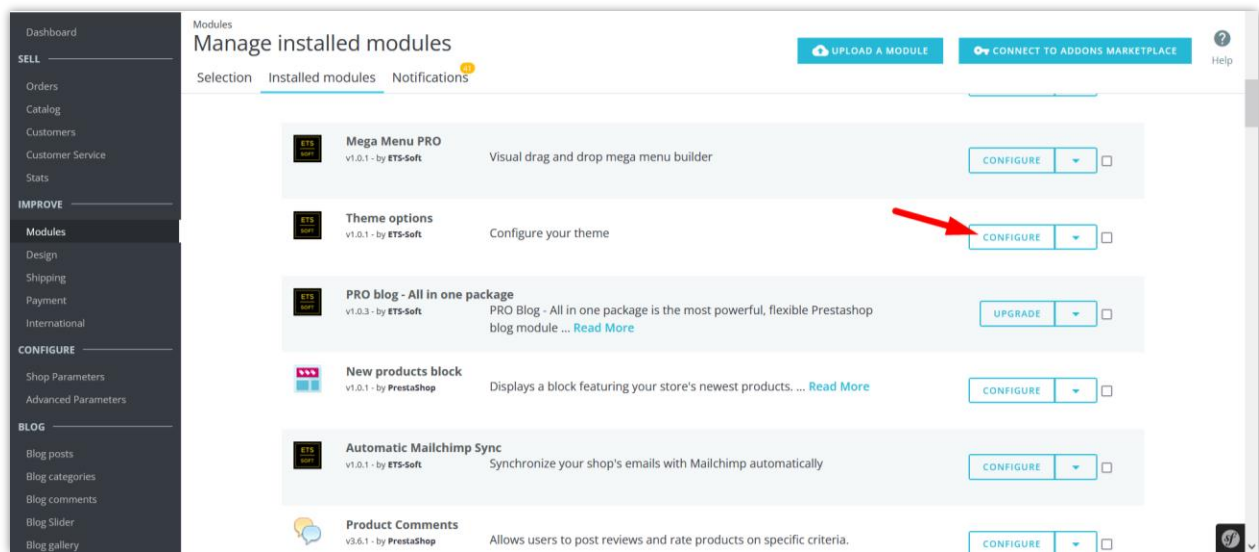

Regenerate image thumbnails:

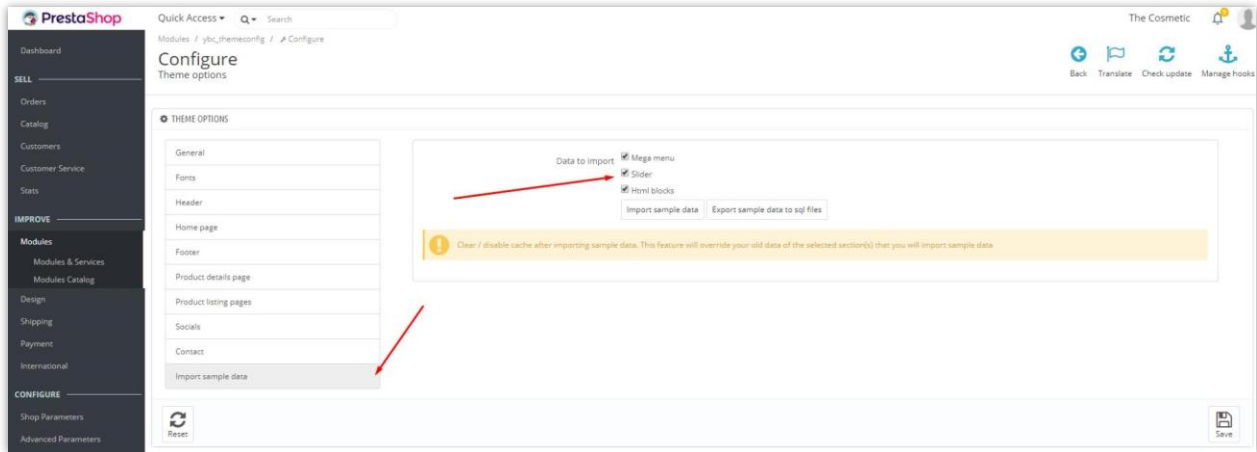

## IV. IMPORT SAMPLE DATA

You can quickly import our sample data to your PrestaShop website to make it the same as our demo websites.

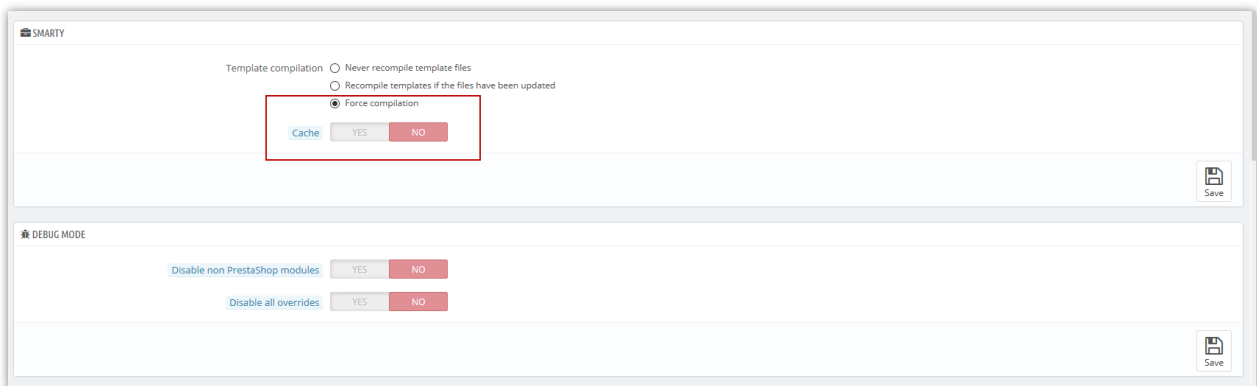

Go to **"Modules / Modules and services / Installed module"** click on **"Configure"** of **"Theme options"** module.

Open tab **"Import sample data"**, choose type of data that you want to import.

*Note: This option is recommended when you install the theme on a fresh PrestaShop website. Clear your website cache (or turn it off) after importing sample data.*

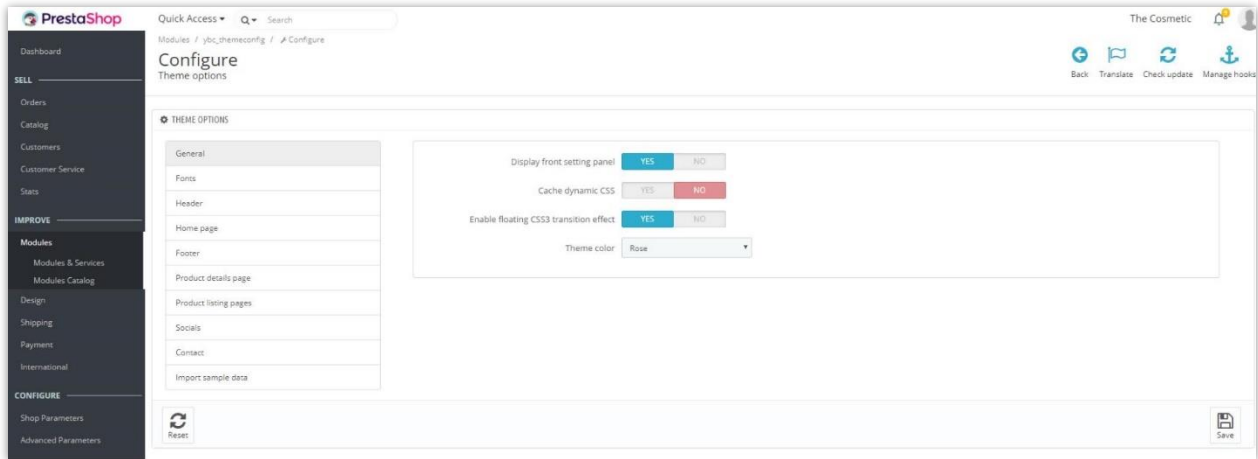

## V. THEME OPTIONS

This is a powerful PrestaShop theme, it offers many useful features that help you to manage the theme easily.

Navigate to **“Theme options”**:

- After selecting a theme layout, you should reimport sample data to make your website like our live demos then start to replace the images/text by your real data (make sure your image sizes are the same as the sizes of our sample images).
- You can define your custom color set by selecting **“Custom color”** from **“Theme color”**.
- Cache dynamic CSS should be enabled for live website.
- This theme supports Google font, you can setup your custom font as below.

General font name   
*Leave blank to use default font*

General font data

---

Heading font name   
*Leave blank to use default font*

Heading font data

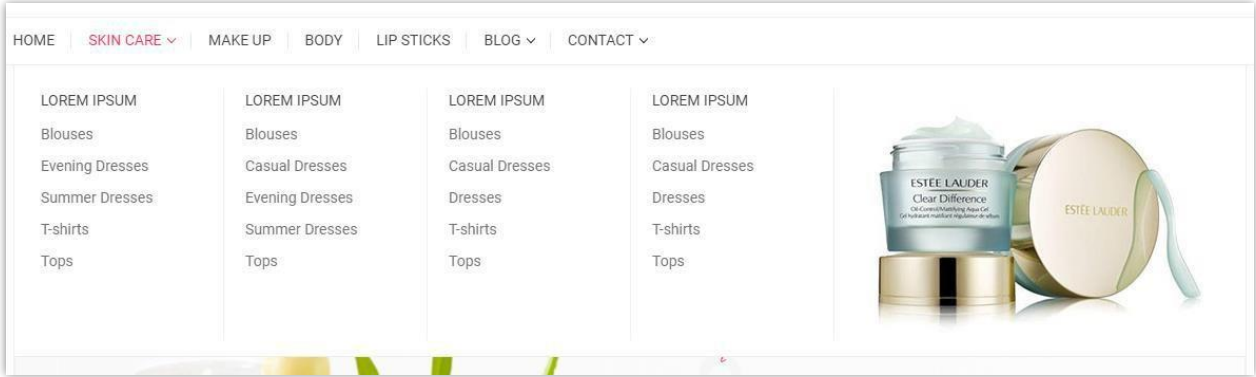

---

Other font name   
*Leave blank to use default font*

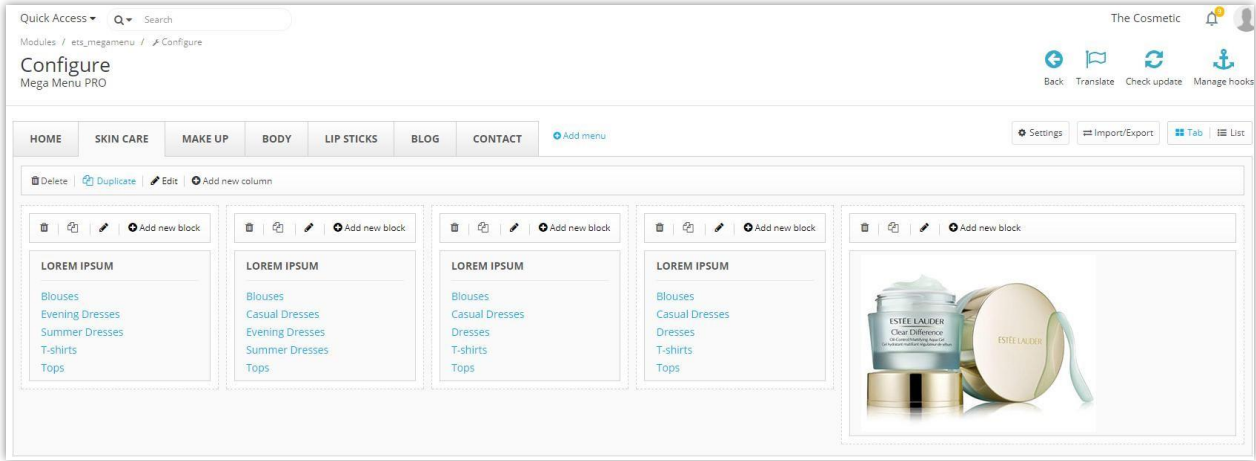

Other font data

# VI. MEGA MENU MODULE

Our mega menu is organized by 3 main elements: menus, columns and blocks which will give you easy and flexible ways to create different types of simple or complex structures for your top menu.

To manage your mega menu, go to **“Modules / Modules and services / Installed module”** and select **“Mega menu PRO”** from the module list.

*Note: if you are transferring your site to new hosting service or domain, the “**Enable cache**” option (in “**Settings**” area) should be deactivated by selecting the “no” option and should be reactivated once the website is transferred, by selecting the “yes” option. “**Enable cache**” helps to load your site faster when you have a complex menu structure.*

## VII. BLOG MODULE

With this theme you have one of the most powerful PrestaShop blog modules in the market place! You have a separated menu to manage your blog in the back office. This menu helps you manage your blog posts, categories, comments, slider, gallery and settings.

*\*Note: Set up your “notification emails” from the settings area in the back office to receive notification emails when someone comments on one of your blog posts or reports a comment as abused.*

*\*Tip: To have a link or a menu item to display your blog in the frontend of the website, copy the blog preview link from back office and add it to your top mega menu. Settings area gives you many different options for configuring your blog, take some time to check it out.*

## VIII. HTML WIDGETS

First of all, you need to understand what widgets are. Widgets are combinations of text and images placed on specific positions (hooks) of the website. With this theme you can create unlimited widgets and place them in different positions of your website.

Let's take a look at our frontend after the installation of the theme. These are the widgets that are available by default:

Enter your email

To manage widgets, navigate to “**Modules / Modules and services / Installed module/ HTML widgets**”:

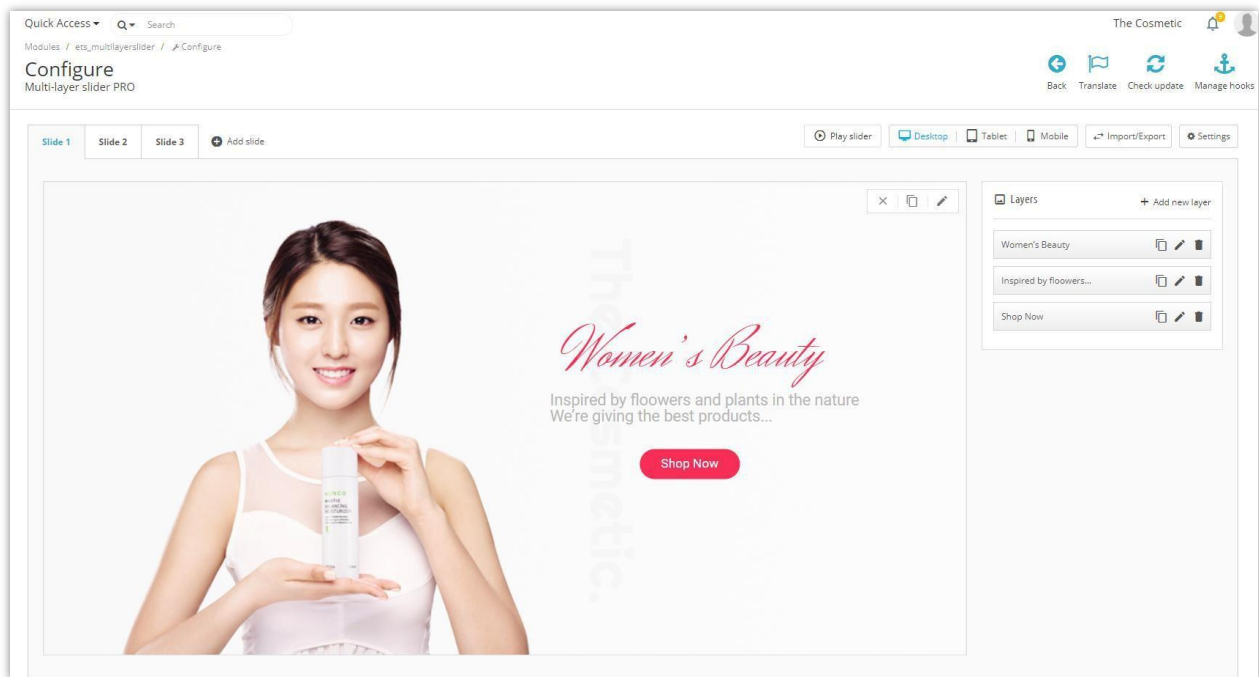

*\*Note:*

- *Uploading images with appropriate size to each widget is necessary because the upload of too large images could break the layout of the theme.*
- *Import sample data then replace images/text by your real data to make your site like our demo site.*

## IX. MULTI-LAYER SLIDER

To manage the home slider, navigate to **“Modules / Modules and services / Installed module”** then select **“Multi-layer slider PRO”** from the module list.

## X. FREQUENTLY PURCHASED TOGETHER

On this theme, we have “Frequently purchased together” module which shows all other products that usually purchased with current product.

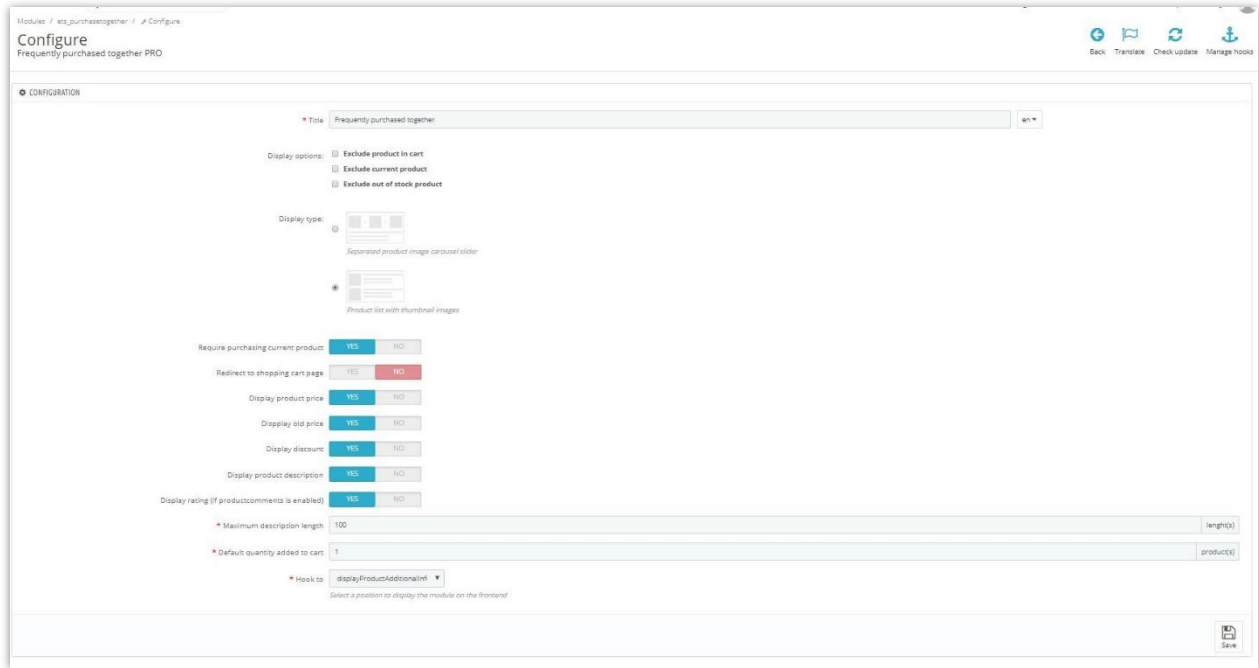

The screenshot shows a product page for a 'Faded Short Sleeves T-shirt'. The main product image is a lipstick, with a 'NEW' badge in the top left corner. Below the main image are four smaller images showing models wearing different outfits. To the right of the main image, the product details for the 'Faded Short Sleeves T-shirt' are displayed, including the price '\$16.51', a description, size and color selection options, a quantity selector set to '1', an 'ADD TO CART' button, a 'WISHLIST' button, and social sharing icons.

The 'FREQUENTLY PURCHASED TOGETHER' module is highlighted with a red border. It contains two product recommendations:

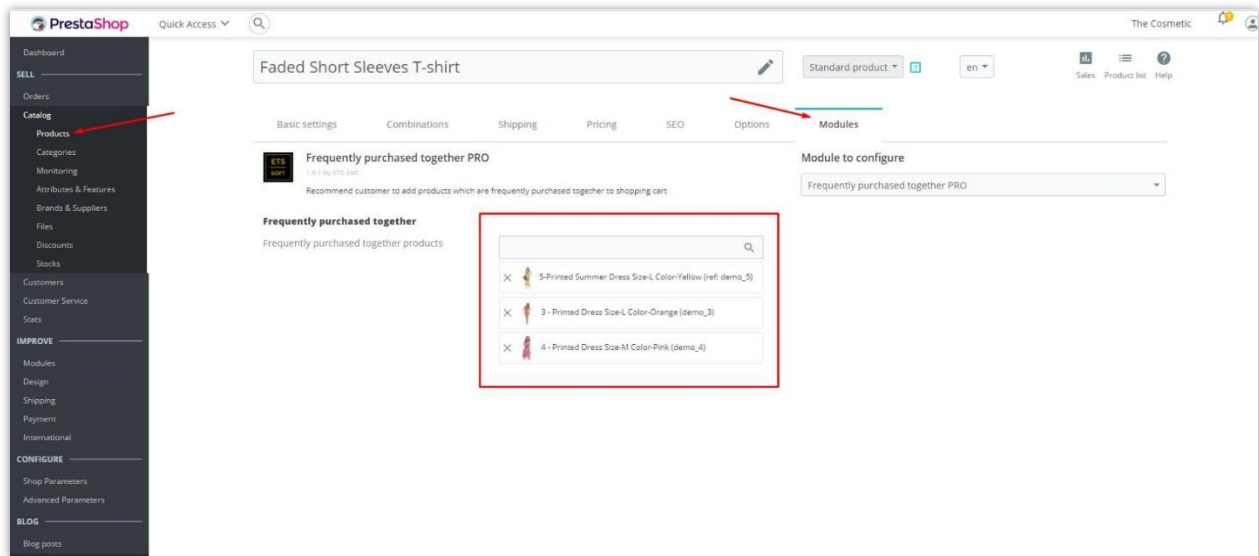

- Faded Short Sleeves T-shirt**: Price \$16.51, Size: S, Color: Orange. Description: Faded short sleeves t-shirt with high neckline. Soft and stretchy material for a comfortable...
- Printed Summer Dress**: Price \$28.98 (discounted from \$30.50 by 5%), Size: L, Color: Yellow. Description: Long printed dress with thin adjustable straps. V-neckline and wiring under the bust with...

At the bottom of the module is an 'ADD ALL PRODUCTS TO CART' button.

To manage the module from back office, navigate to **Module / Modules & Services / Installed modules** and select “ **Frequently purchased together PRO**” from the module list.

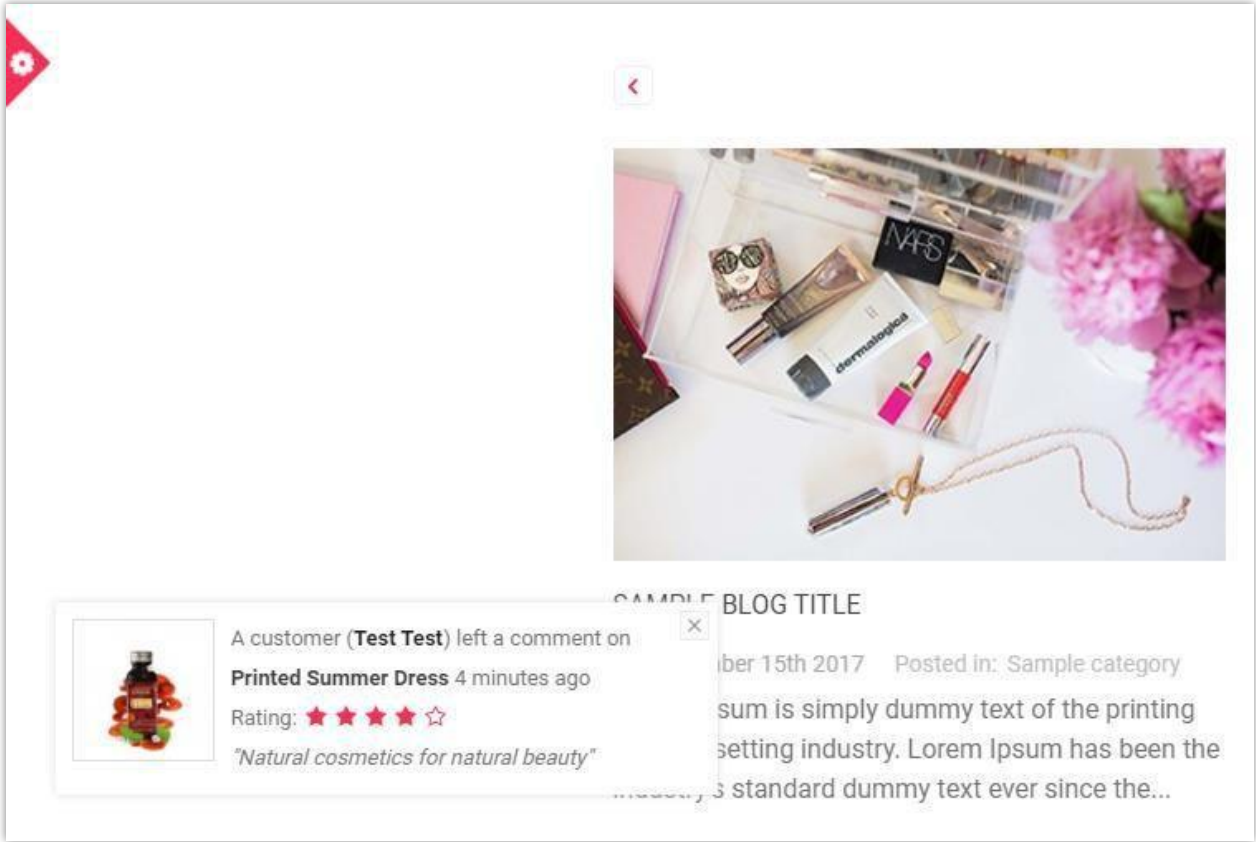

Add purchased together products into each product:

## XI. REVIEW TICKER

We integrated this new module on the theme: "Review Ticker", to attract your online customers by displaying real-time product reviews & comments in a beautiful way. "Review Ticker" helps display beautiful bubble alerts every time your shop gets new product reviews/comments.

To use this "Review Ticker" module, make sure the "Comment product" module is **Enable** on your site:

To manage this module, navigate to **"Modules and services"** then select **"PrestaHero Instagram free"** from the module list.

For more reference of how to get Instagram user ID and access token, check [here](#).

[How to get access token?](#)

Refresh token

*The access token life-time is 90 days since generated time*
- Display name: Fashion for you
- Instagram profile URL: [https://www.instagram.com/new\\_trend\\_fashion\\_for\\_you/](https://www.instagram.com/new_trend_fashion_for_you/)
- Display "Follow us" link:  YES  NO
- \* Number of displayed images**: 6
- Cache Instagram request:  YES  NO
- \* Cronjob token**

8eca33071595c0e7e70140af1ea8f8be4

*The cronjob will refresh Instagram access token every 80 days*

Setup a cronjob as below on your server to refresh access token of Instagram:

```
***** php /mnt/volume_nyc1_01/ets-demos.com/theme/boom17/modules/ph_instagram/cronjob.php?secure=8eca33071595c0e7e70140af1ea8f8be4
```

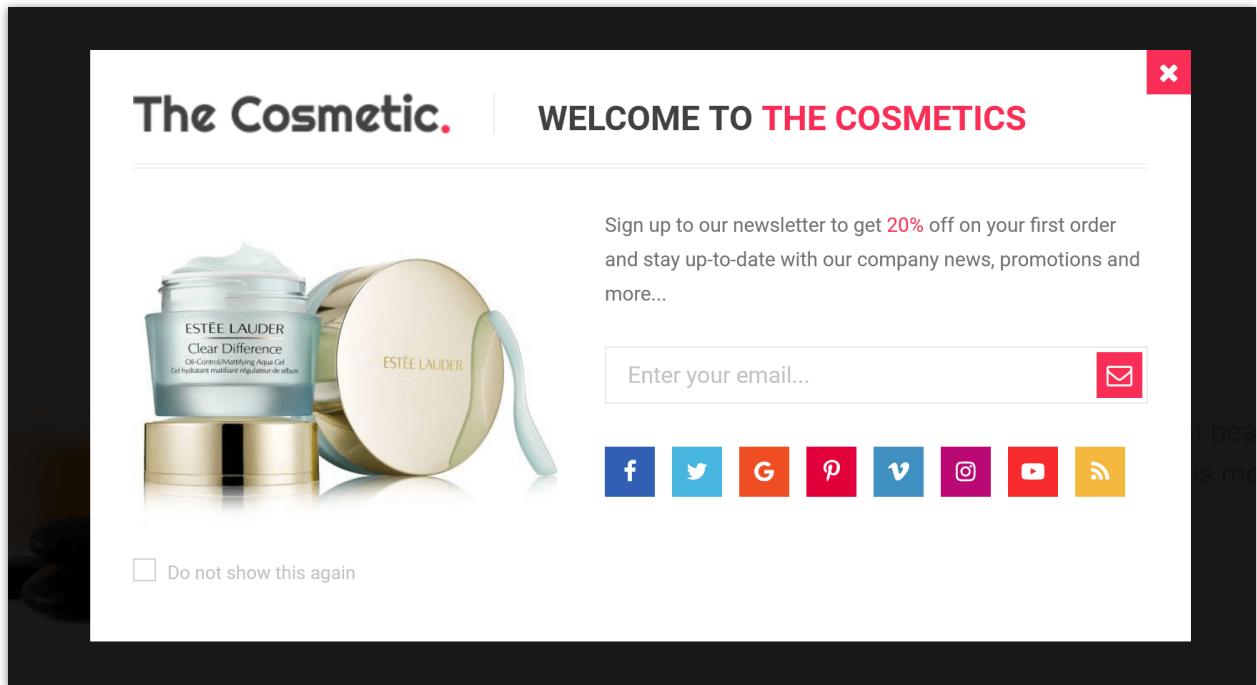

Manually refresh access token of Instagram by running the following URL on your web browser:

[http://ets-demos.com/theme/boom17/modules/ph\\_instagram/cronjob.php?secure=8eca33071595c0e7e70140af1ea8f8be4](http://ets-demos.com/theme/boom17/modules/ph_instagram/cronjob.php?secure=8eca33071595c0e7e70140af1ea8f8be4)

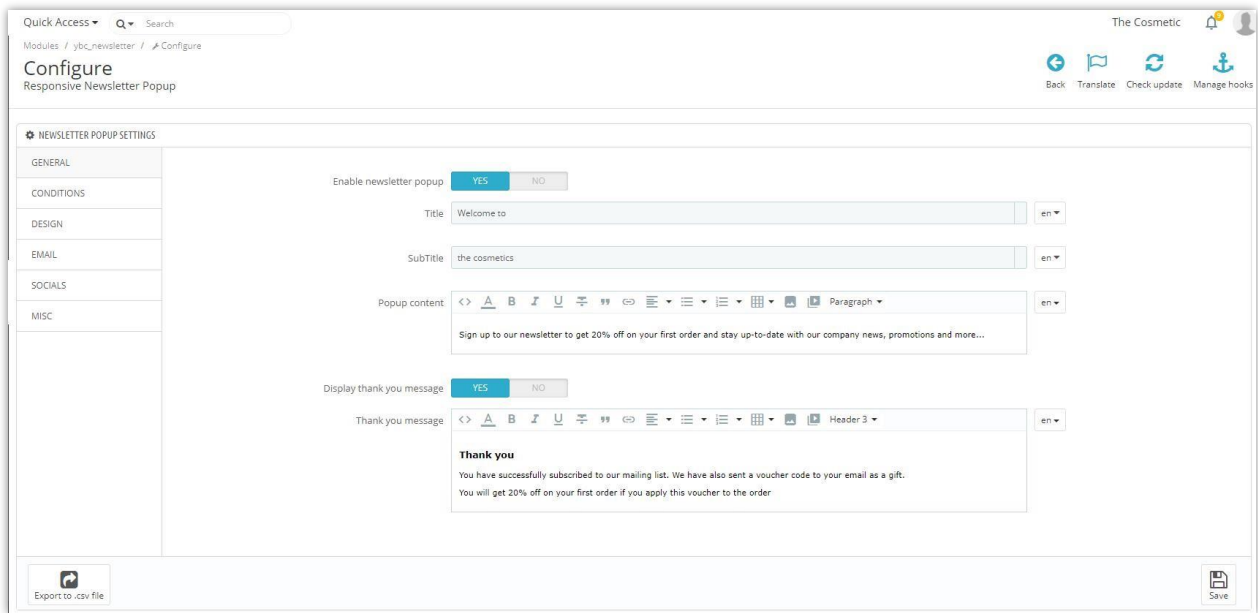

Save

### XIII. RESPONSIVE NEWSLETTER POPUP

This “Responsive newsletter popup” module allows you to display a newsletter popup form on your website.

To manage this module, navigate to **Module / Modules & Services / Installed modules**, then select “**Responsive newsletter popup**” from the module list.

## XIV. AUTOMATIC MAILCHIMP SYNC

This theme is attached with a powerful Mailchimp module which helps you easily integrate your customer database with your Mailchimp account.

To manage this module, navigate to **“Modules / Modules and services / Installed module”** the select **“Automatic Mailchimp Sync”** from the module list.
