I. INTRODUCTION

Pretty Menu is a visual, drag-and-drop, fully customizable, and responsive menu builder for PrestaShop. This module supports different content types for menu and enables you to create an amazing mobile menu with a smooth browsing experience.

***"Pretty Menu"** is compatible with PrestaShop 1.6.x, 1.7.x and PrestaShop 8.x

II. INSTALLATION

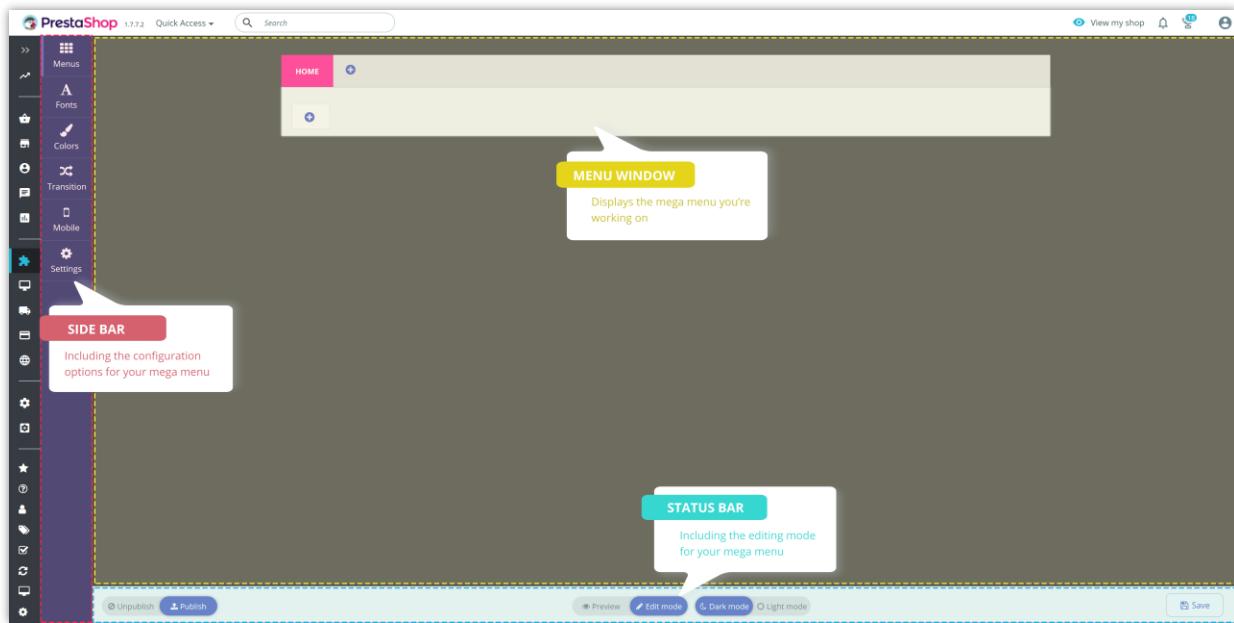

- Navigate to “**Modules / Modules Manager**” > click on “**Upload a module / Select file**”.
- Select the module file “**ets_prettymenu.zip**” from your computer then click on “**Open**” to install.
- Click on “**Configure**” button of the module you just installed to open the module’s configuration page.

III. CONFIGURATION

1. Pretty Menu's interface

From your installed module list (Located at “**Modules/Modules Manager/Installed modules**”), find “**Pretty Menu**” then click on the “**Configure**” button to open it.

You will see the workspace used for creating a new menu with the live editor, manage menu elements, change menu layout, color, font, background, etc. as you wish. We can divide the interface of this module into 3 main components: sidebar, status bar, and menu window. Let's have a look at its interface.

1.1. Side bar

- Menus: display your menu in “**Edit mode**”.
- Fonts: select a font and customize font size for specific menu elements.
- Colors: select color for specific menu elements.
- Transition: select a transition effect for your menu.
- Mobile: select a display mode for your mobile menu.
- Settings: general setting options for your menu.

1.2. Status bar

- Edit mode: live edit your menu.
- Preview mode: see how your menu will appear in the front office.
- Publish: all the changes you made in this mode will be directly applied to your menu.

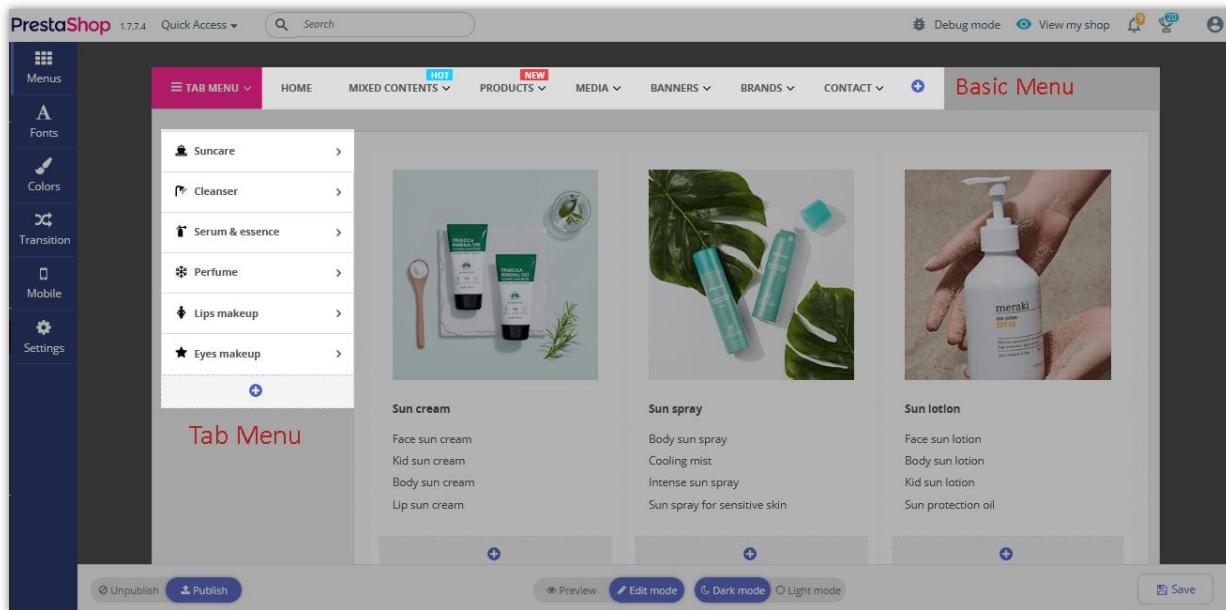

- Unpublish: all the changes you made in this mode will not appear in the front office. Your site's default menu will appear in the front office instead.
- Desktop | Mobile: view how your menu will display on a desktop device or mobile device.
- Light mode/Dark mode: change the background screen to a light/dark color depending on your interests and your habits.

1.3. Menu window:

Display the menu you're working on.

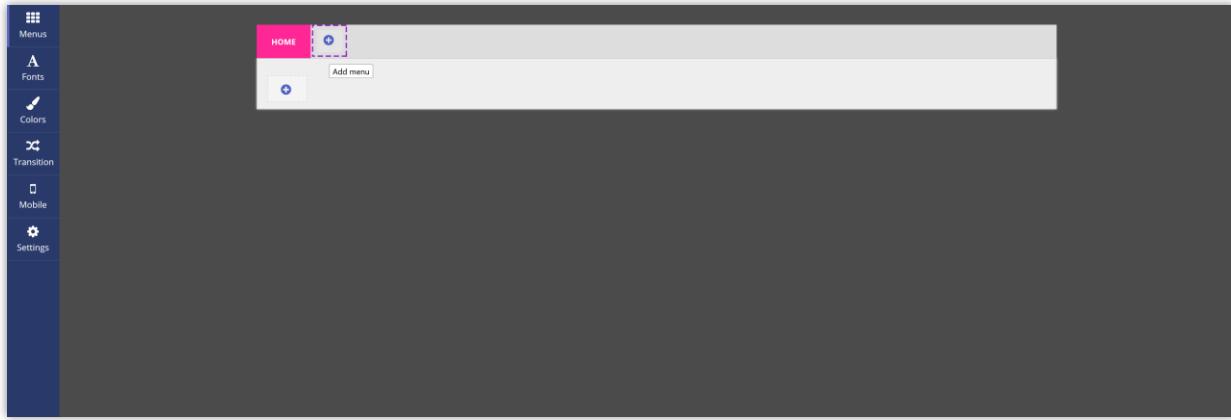

2. Add a new menu

Pretty Menu enables you to build both horizontal menu and vertical menu on your PrestaShop store.

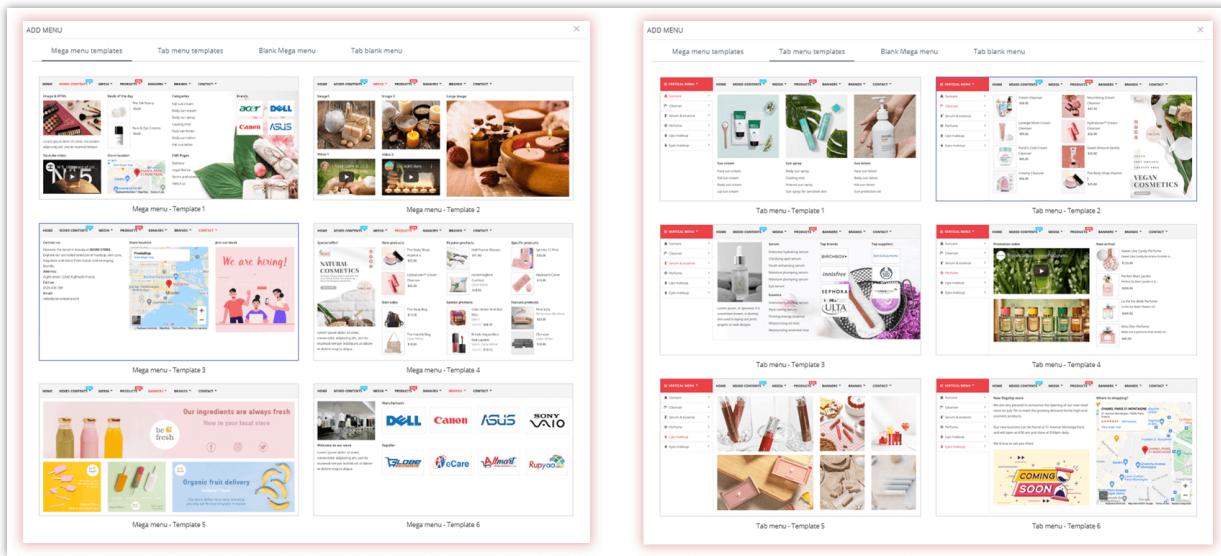

In this section, we will guide you on how to add a new menu to your online store. We have optimized **Pretty Menu** with a user-friendly interface to help you easily create an eye-catching mega menu.

Step 1: From **Pretty Menu** module's menu window, click on “**Add menu**” button.

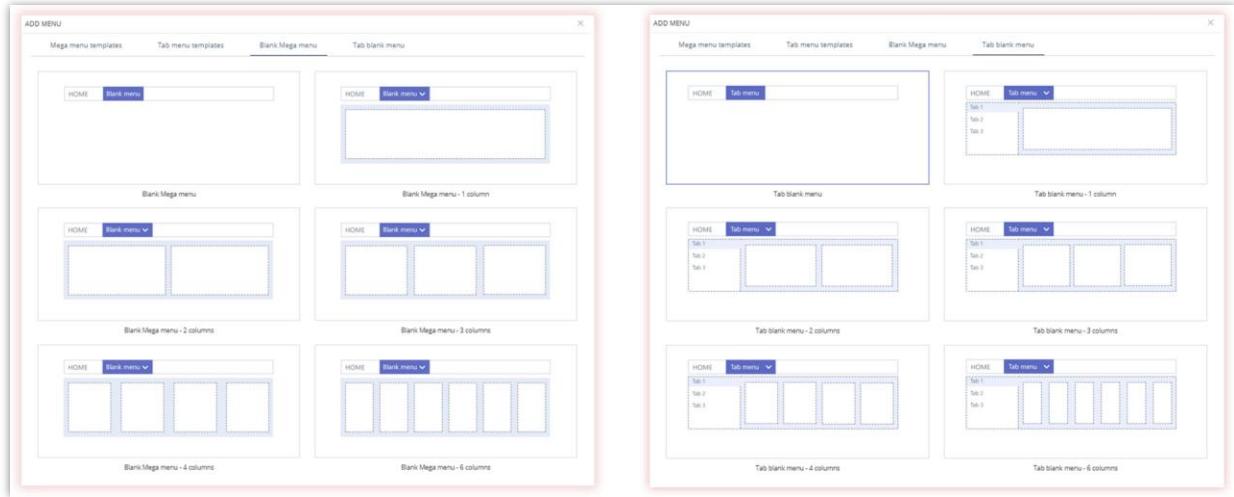

Step 2: On “**Add menu**” pop up, select the menu you want to add.

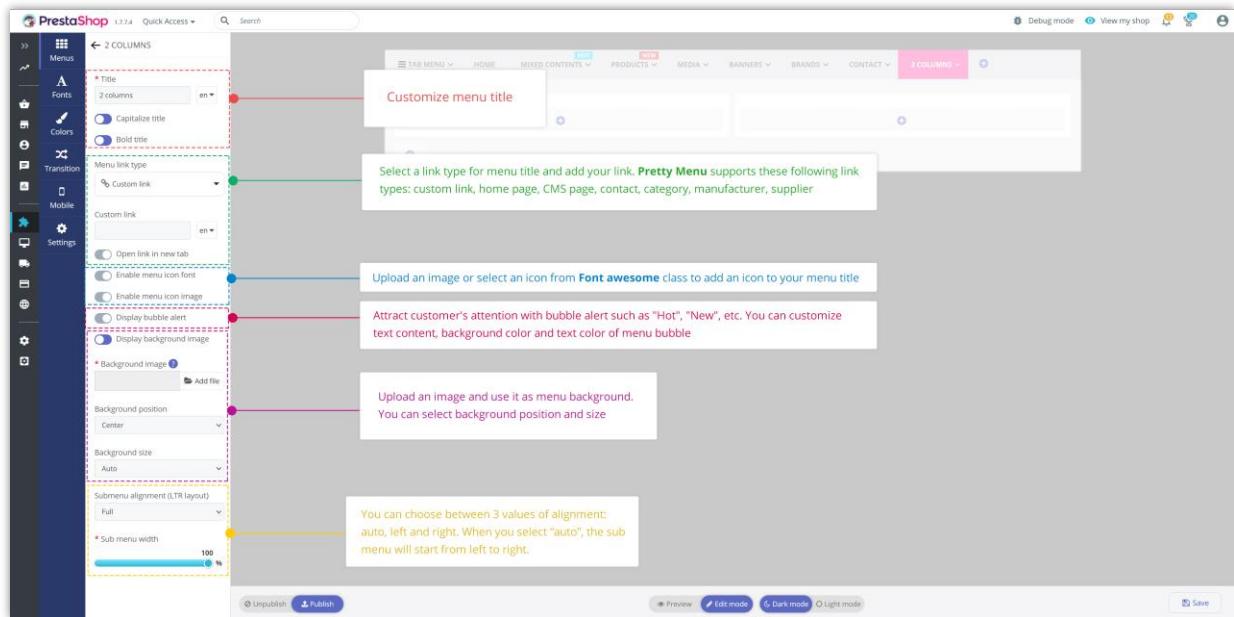

“**Mega menu templates**” and “**Tab menu templates**” provide 6 pre-made mega menu templates with demo data for each horizontal menu and vertical menu. You can select the pre-made mega menu and then customize it as you want.

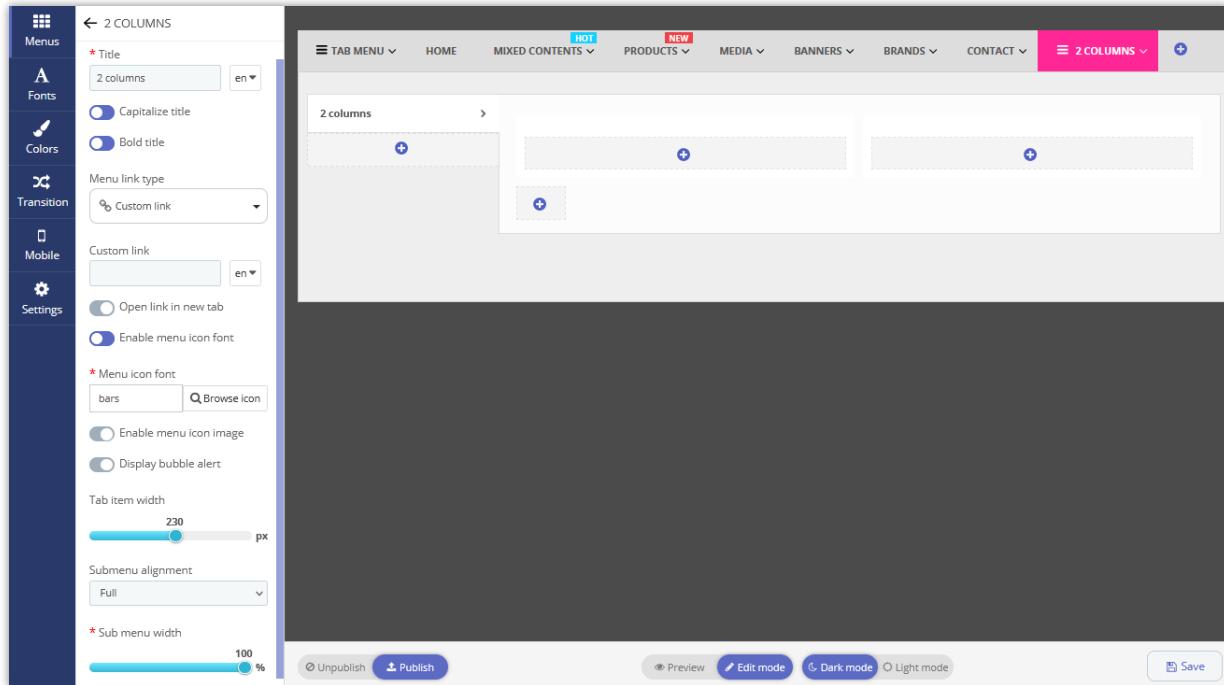

“**Blank mega menu**” and “**Tab blank menu**” also have 6 menu templates for each horizontal menu and vertical menu for you to choose and edit.

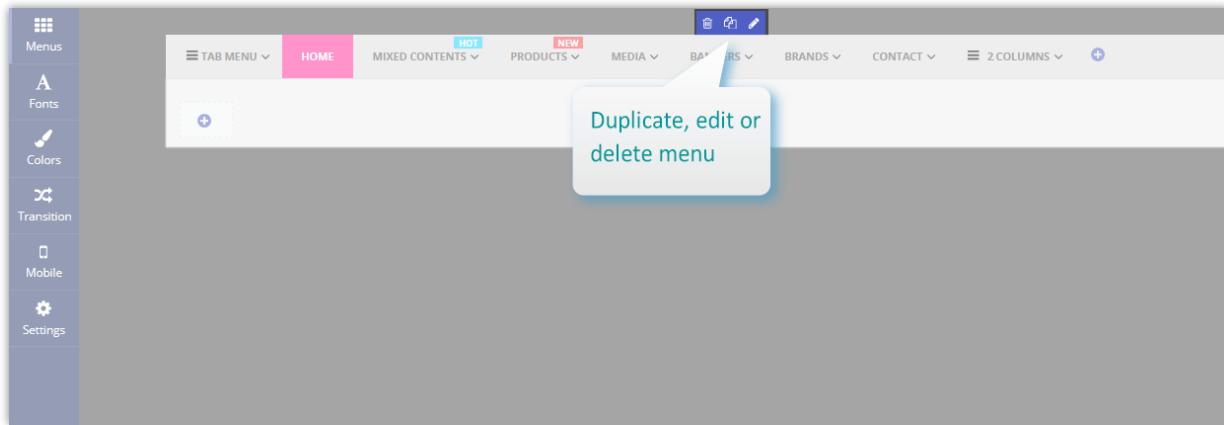

Step 3: After you choose and click on the kind of menu you need, you will see the general settings for the new menu on the sidebar as below (add “**Blank mega menu**” for example)

Similar to the mega menu, you can customize the general settings after adding a new tab menu.

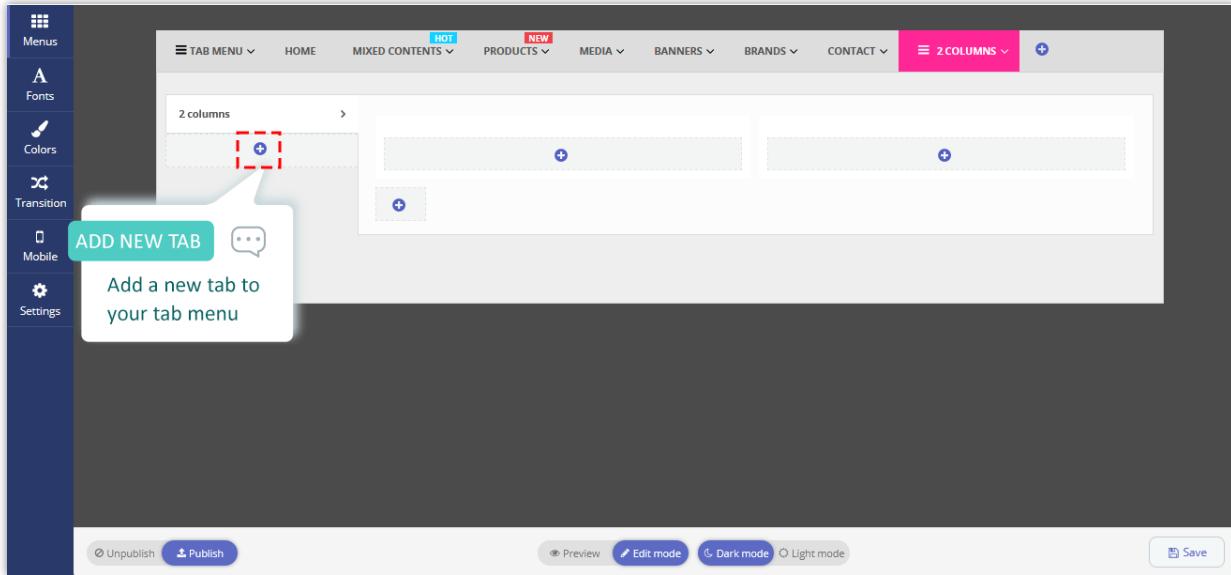

You also can duplicate, edit or delete a menu by hovering the mouse over the menu name and clicking the icon for the action you want. Drag and drop menu name to arrange menu's order.

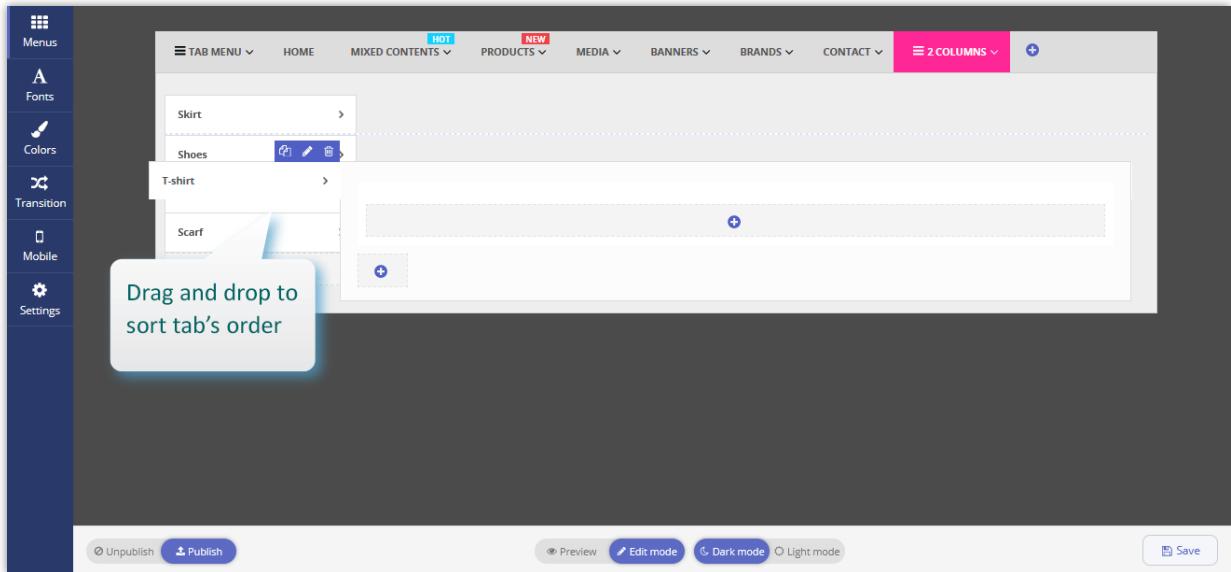

Click the **“Save”** button to save your changes.

3. Add a new tab

To add a new tab in the tab menu to make your store look more scientific and eye-catching, please click on the “**Add new tab**” button below the tab menu.

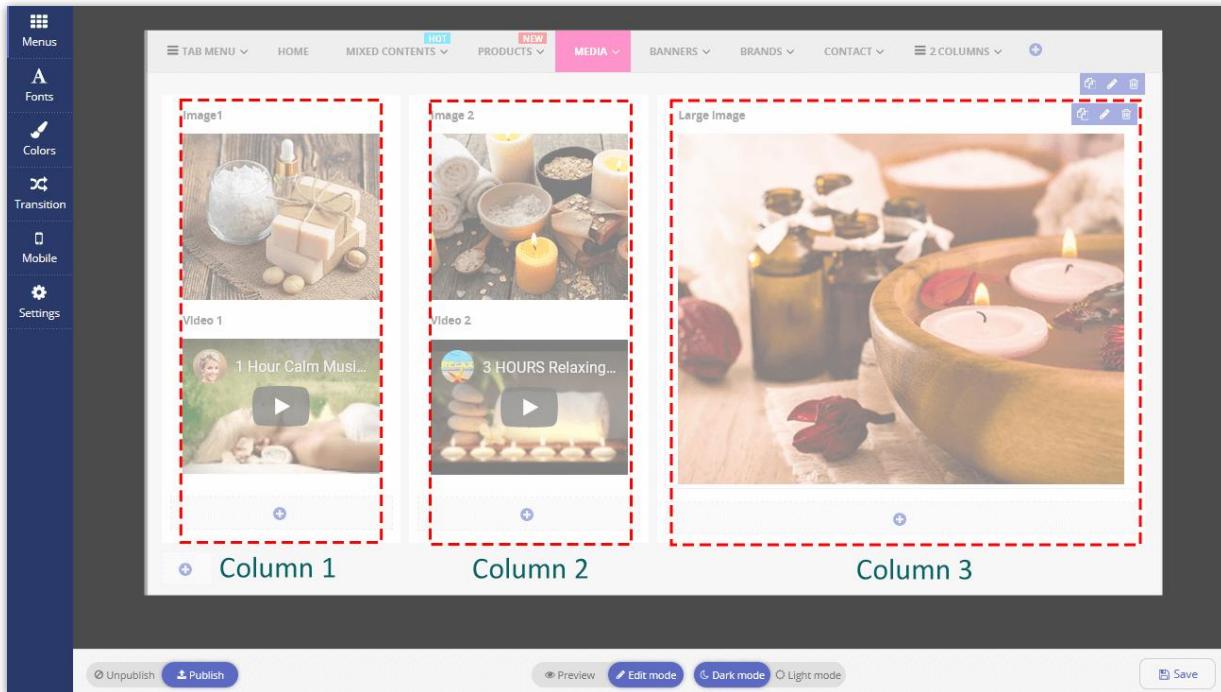

You also can duplicate, edit or delete a tab. Drag and drop tab name to sort tab's order.

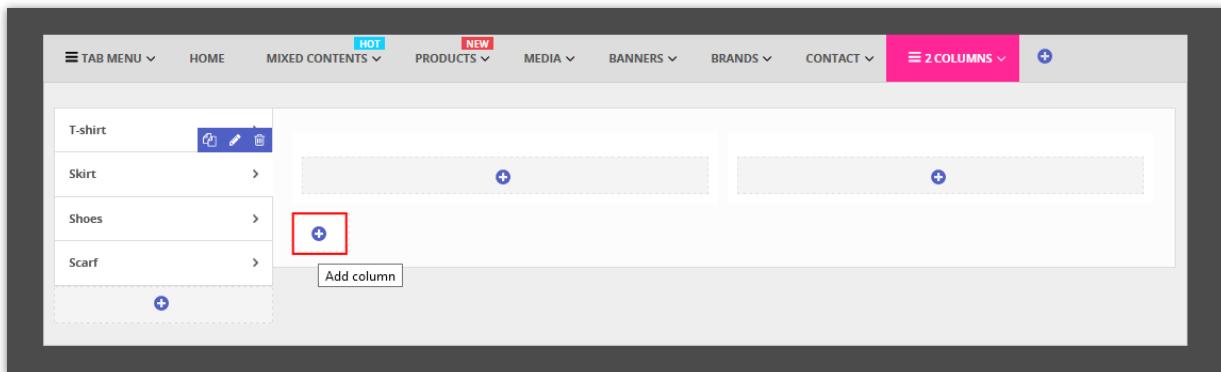

4. Add a new column

After creating a new menu, we will start adding menu columns. Each menu included one or several columns, you can customize the number of columns and their width size.

From the menu window, select the menu you want to add a new column. Click on “**Add column**” button under menu item to create a new column. There are 12 columns available for each menu.

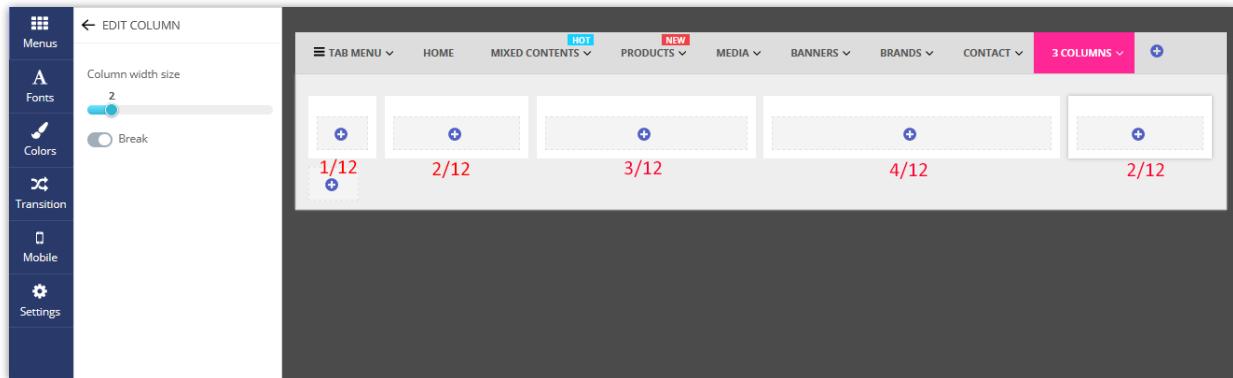

Column widths are divided into 12 different sizes from 1-12. Depending on the display you want, you can adjust the width of the column accordingly. Hover your mouse over the column then click on “**Edit**” icon to customize column width.

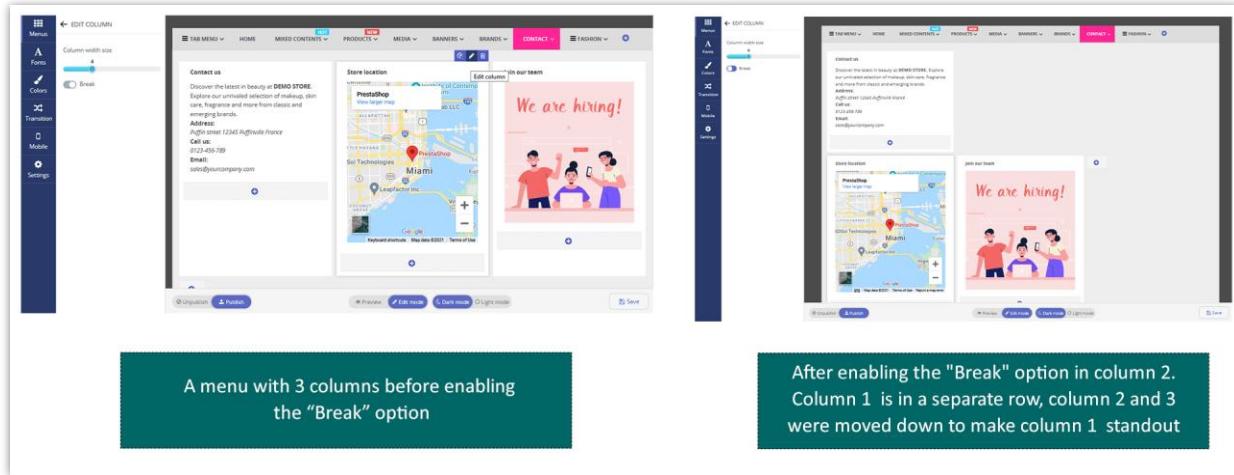

If you want to show 3 columns for a menu item, then create 3 columns with width size for each column is 4/12.

- Choose 12/12 for 1 column full width
- Choose 6/12 for 2 same width columns
- Choose 4/12 for 3 same width columns
- Choose 3/12 for 4 same width columns

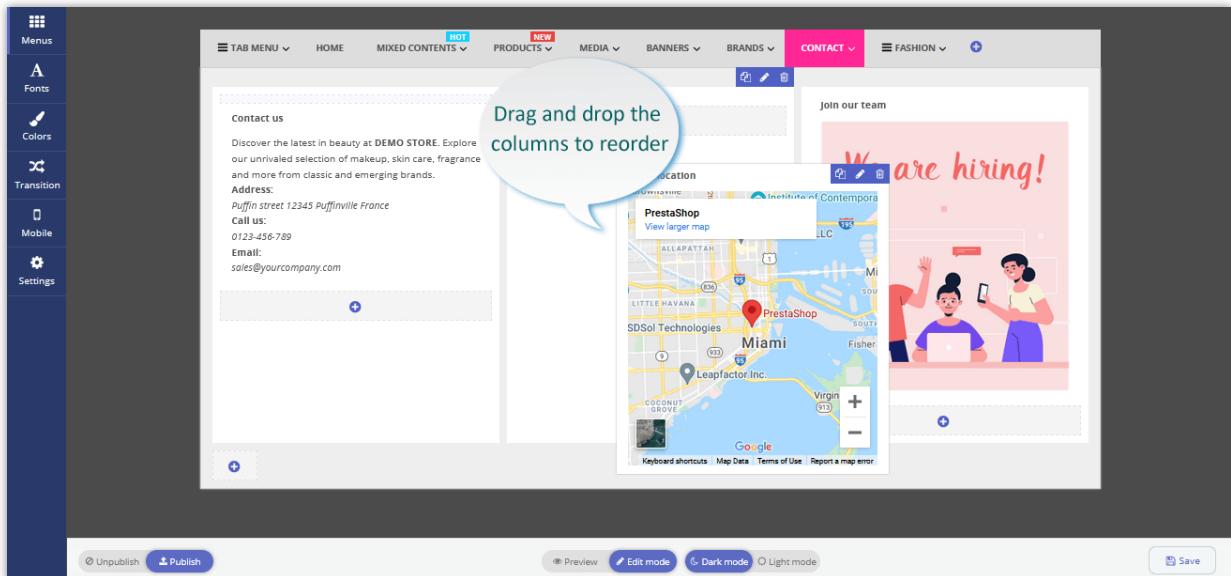

...

If you want to display the blocks of column in a row to make them stand out and attract the viewer's attention, you can enable the "**Break**" option. Here is an example of the difference before and after you turn on "**Break**" option.

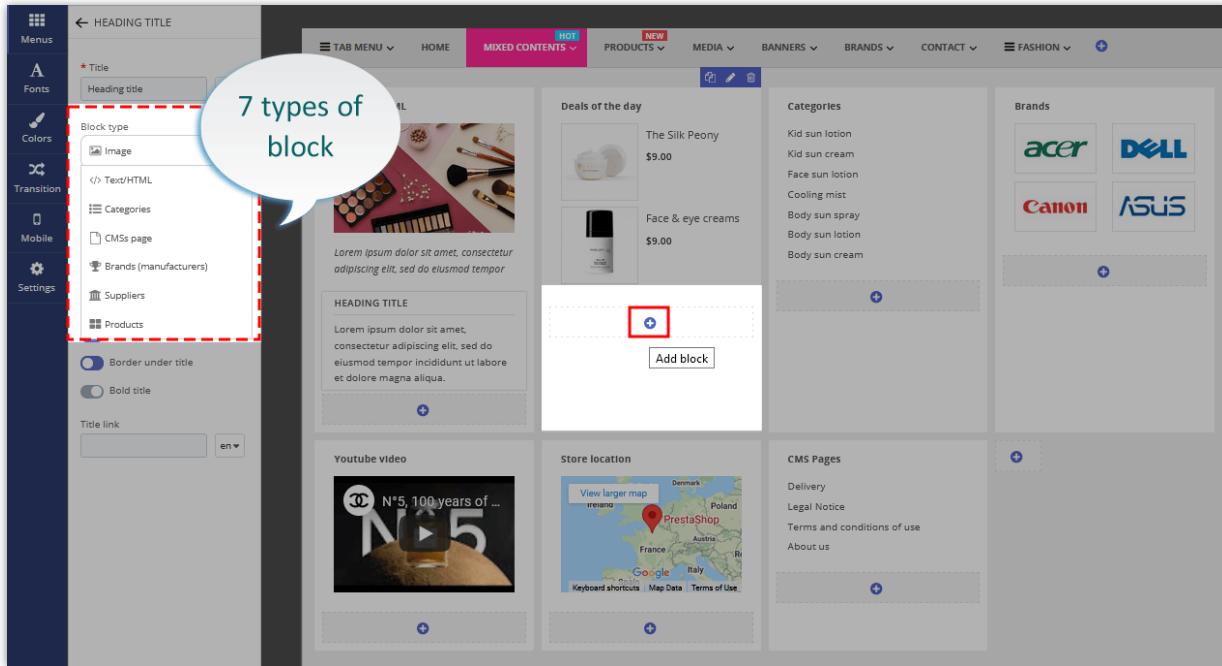

You can drag and drop columns to arrange their order.

5. Add a new block

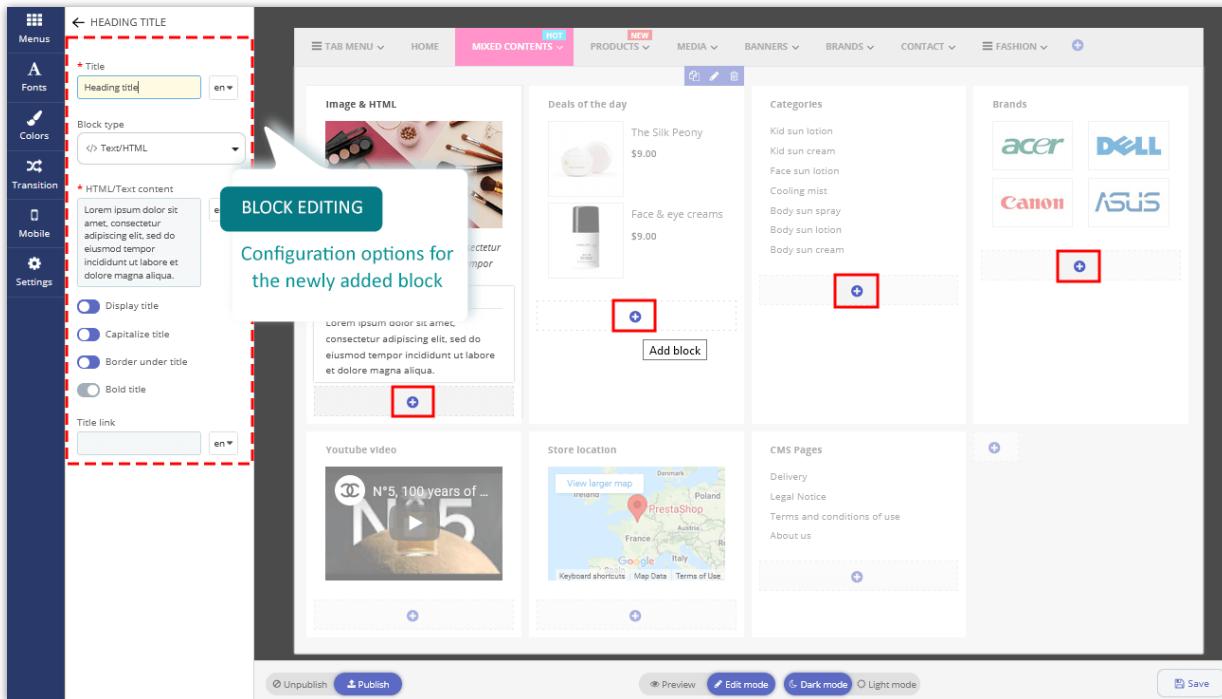

After you add blank columns for your new menu. Now it's time to make your mega menu more detailed and attractive by creating blocks and filling different contents into your menu.

Each type of content will be contained in a block. **Pretty Menu** allows you to add 7 types of blocks into your mega menu:

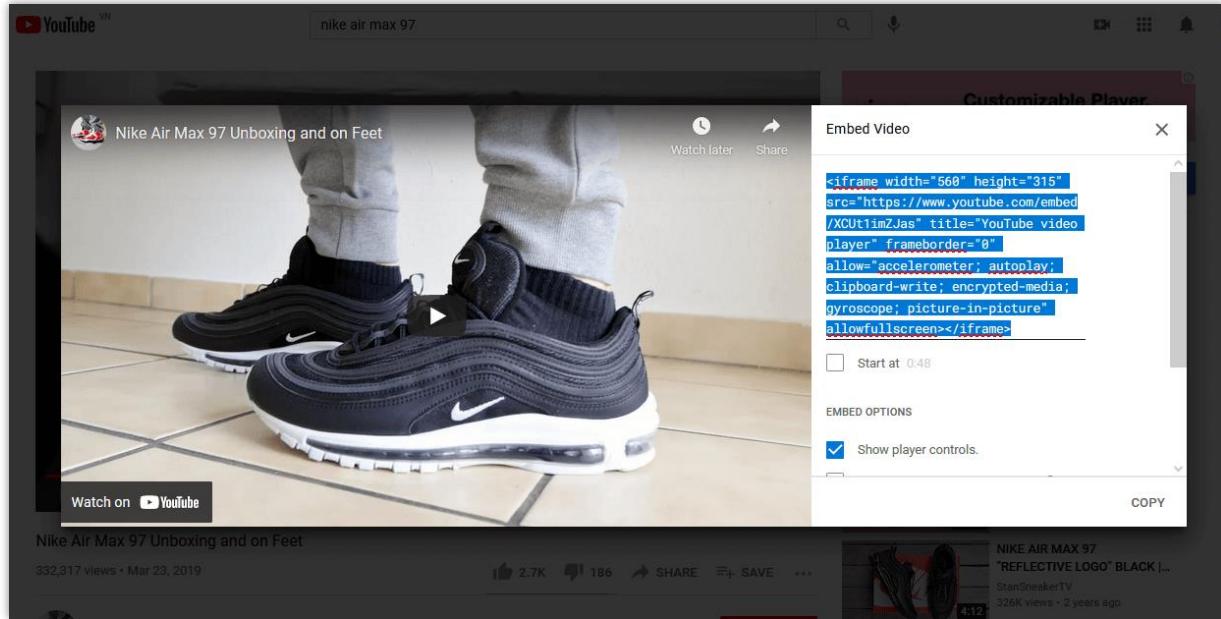

5.1. Text/HTML

This type of block allows you to add a text paragraph using HTML tags, embed a video or Google map using iframe.

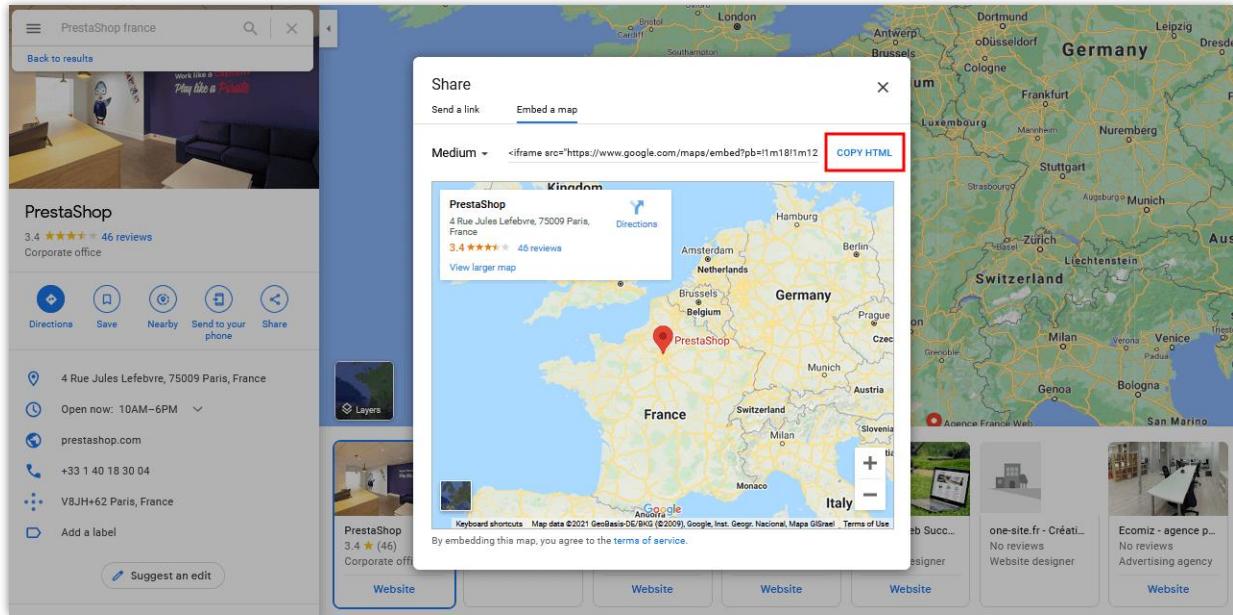

- **How to get video iframe code from YouTube**

Find a video on YouTube > Click on “**Share**” button below each video > Select “**Embed**” >
Copy the iframe code > paste into “**HTML/Text content**” box > Save

- **How to get iframe code from Google map:**

Find a place on the map > Click on “**Share**” button > Open “**Embed a map**” tab > Copy iframe code > Paste the link into “**HTML/Text content**” box > Save.

5.2. Image

By using this block type, you can upload any image with the following format: jpg, jpeg, png, gif.

5.3. Categories

Categories block type allows you to display the categories list on your mega menu.

The screenshot shows the PrestaShop back office interface. On the left, a sidebar contains various settings like Menus, Fonts, Colors, Transition, Mobile, and Settings. The main area is titled 'CATEGORIES'. It has a title field ('Categories') and a 'Block type' dropdown set to 'Categories'. Below this is a 'Categories' section with checkboxes for various product categories. A preview window on the right shows a mega menu item with a grid layout. One of the grid items is a 'Categories' block, which displays a list of product categories such as 'Kid sun lotion', 'Kid sun cream', 'Face sun lotion', etc. Other items in the grid include 'Image & HTML', 'Deals of the day', 'Youtube video', and 'Store location'.

5.4. CMSs page

Pages block type allows you to display a list of CMS pages on your mega menu.

The screenshot shows the PrestaShop back office interface. On the left, a sidebar contains various settings like Menus, Fonts, Colors, Transition, Mobile, and Settings. The main area is titled 'CMS PAGES'. It has a title field ('CMS Pages') and a 'Block type' dropdown set to 'CMS pages'. Below this is a 'CMS pages' section with a dropdown menu showing options like 'Please select CMS page', 'Delivery', 'Legal Notice', 'Terms and conditions of use', and 'About us'. There are also several toggle switches for 'Display title', 'Capitalize title', 'Display divider line under title', 'Bold title', and a 'Title link' input field. A preview window on the right shows a mega menu item with a grid layout. One of the grid items is a 'CMS Pages' block, which displays a list of CMS pages including 'Delivery', 'Legal Notice', 'Terms and conditions of use', and 'About us'. Other items in the grid include 'Image & HTML', 'Deals of the day', 'Youtube video', and 'Store location'.

5.5. Brand (Manufacturers)

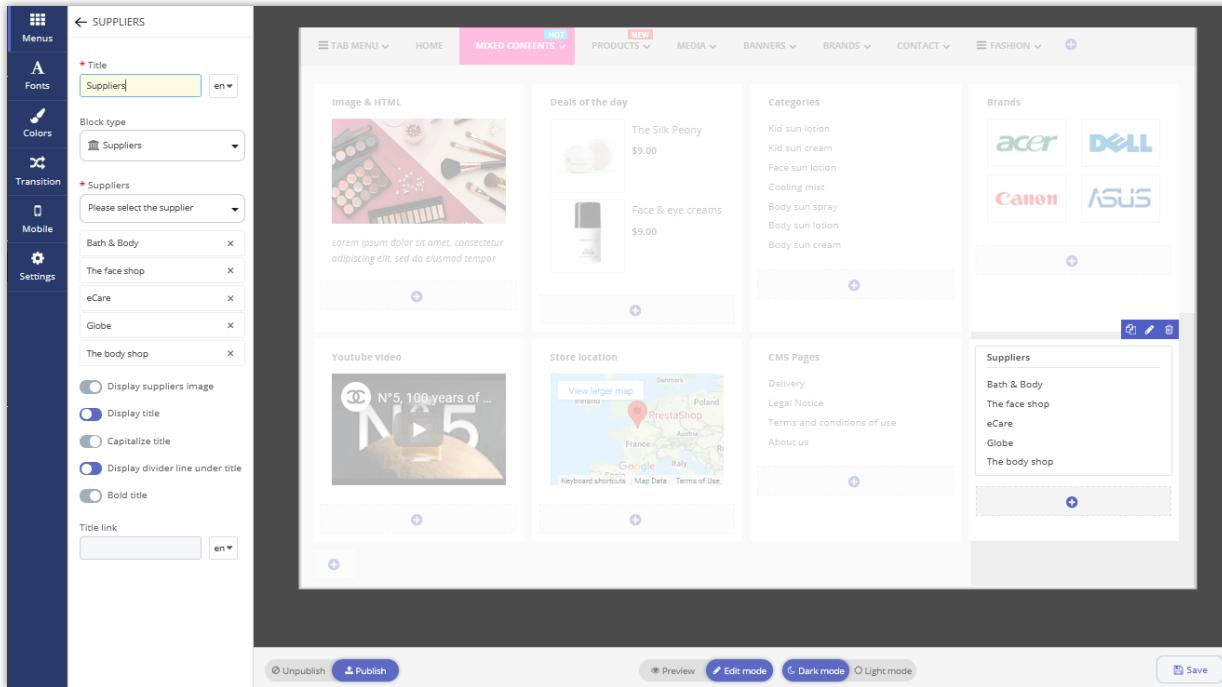

You also can create a brand block, then you can choose the brand's name and images that represent the brands you want to display.

The screenshot shows the PrestaShop back office interface. On the left, a sidebar contains various settings like 'Menus', 'Fonts', 'Colors', 'Transition', 'Mobile', and 'Settings'. Under 'Settings', there is a 'Brands' section where the title is set to 'Brands'. Below this, a dropdown menu for 'Block type' is open, showing 'Brands (Manufacturers)' selected. A note says 'Please select brands (manufacturers)'. A list of brands includes 'Studio Design', 'Dell', 'Canon', and 'Asus', each with a delete icon. There are several toggle switches for displaying titles, names, images, and divider lines. A 'Number of brands (manufacturers) per row' slider is set to 2. At the bottom of this sidebar are buttons for 'Unpublish', 'Publish', 'Preview', 'Edit mode', 'Dark mode', 'Light mode', and 'Save'.

The main content area displays a 'MIXED CONTENTS' page. It features a 'Image & HTML' block showing makeup products, a 'Deals of the day' block with two items: 'The Silk Peony' and 'Face & eye creams', both at \$9.00. A 'Categories' block lists skincare items like 'Kid sun lotion' and 'Kid sun cream'. A 'Brands' block on the right shows logos for 'acer', 'DELL', 'Canon', and 'ASUS'. Other sections include 'Youtube video' (showing a Chanel N°5 video), 'Store location' (a map of Europe with a red pin in France), and 'CMS Pages' (Delivery, Legal Notice, Terms and conditions of use, About us). At the bottom of the main content are buttons for 'Unpublish', 'Publish', 'Preview', 'Edit mode', 'Dark mode', 'Light mode', and 'Save'.

5.6. Suppliers

Similarly, supplier block type allows you to display supplier lists on your mega menu.

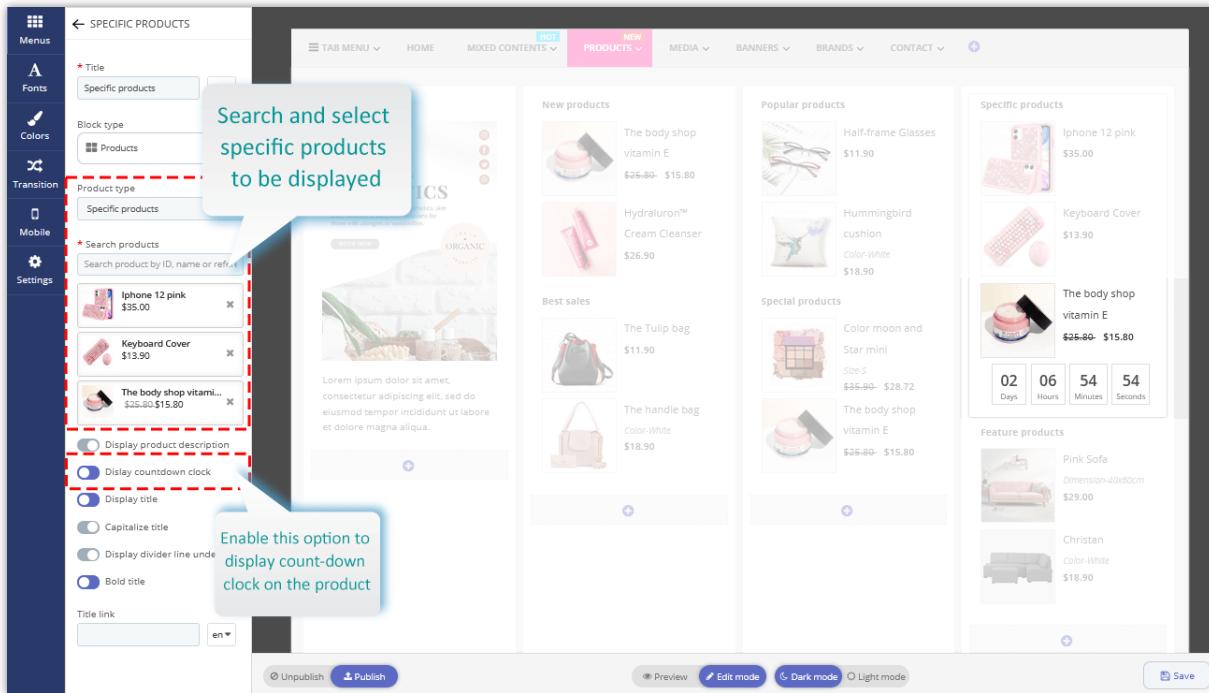

5.7. Products

There are 5 types of products you can choose to be displayed on your mega menu: new products, special products, popular products, best sellers, and specific products.

For the first 4 product groups, you only need to choose the name of product type such as: new products, best sellers, etc. **Pretty Menu** module will automatically select the displayed products based on statistics.

You can also choose a specific product from your store to display on mega menu by searching the product's name or ID. There are some options you can choose from for your product display settings.

NOTE:

The “**Countdown**” option only applies to products on sale.

IV. CUSTOMIZE YOUR MEGA MENU

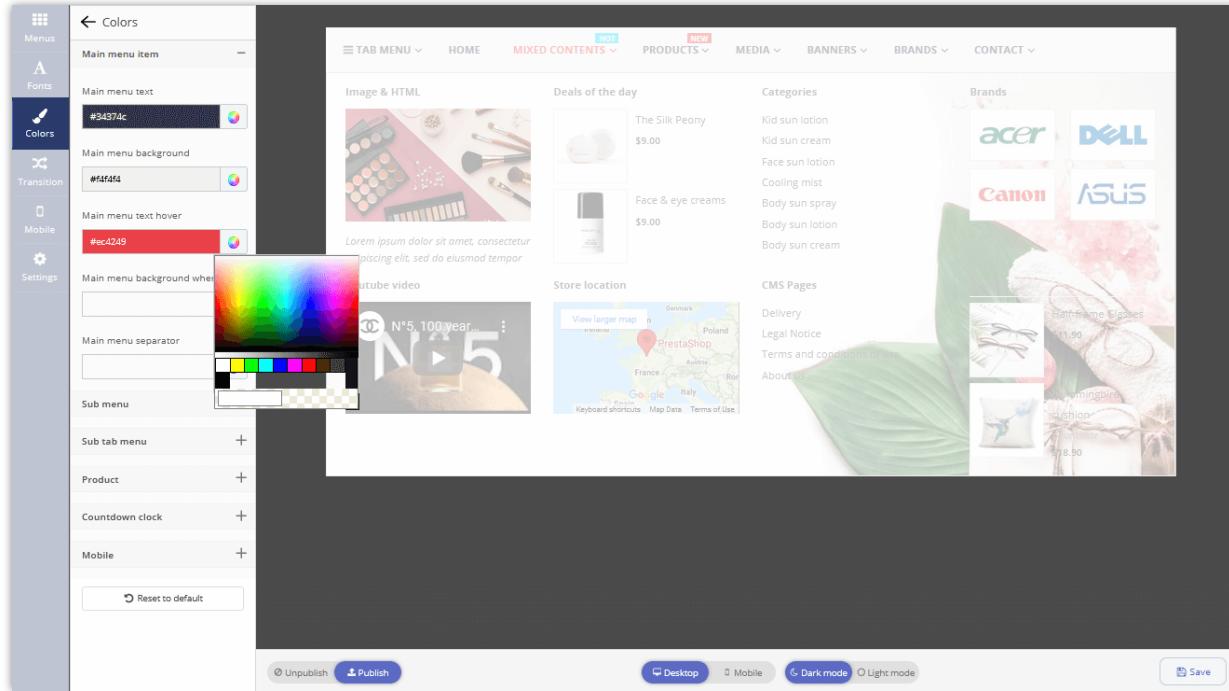

1. Font

You can select and customize different fonts and font sizes for a specific menu element with this option:

- Main menu
- Tab menu
- Sub menu: sub menu heading font, sub menu heading font size.
- Product: product name, product description, product price, product selling price, product old price.

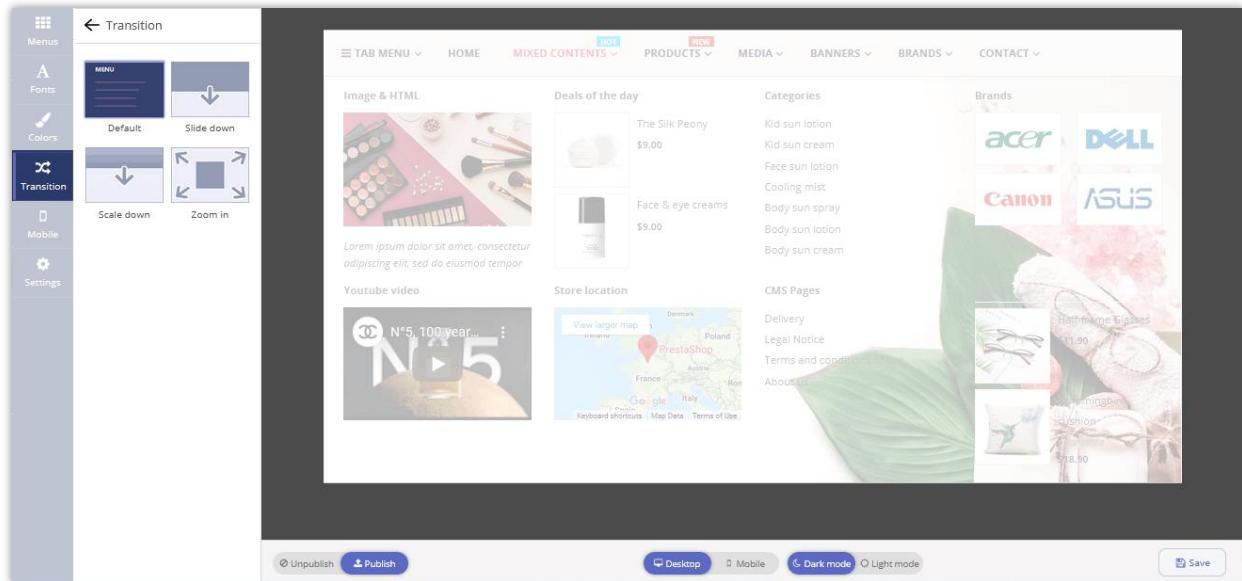

2. Colors

On this tab, you can also select a color for different menu elements:

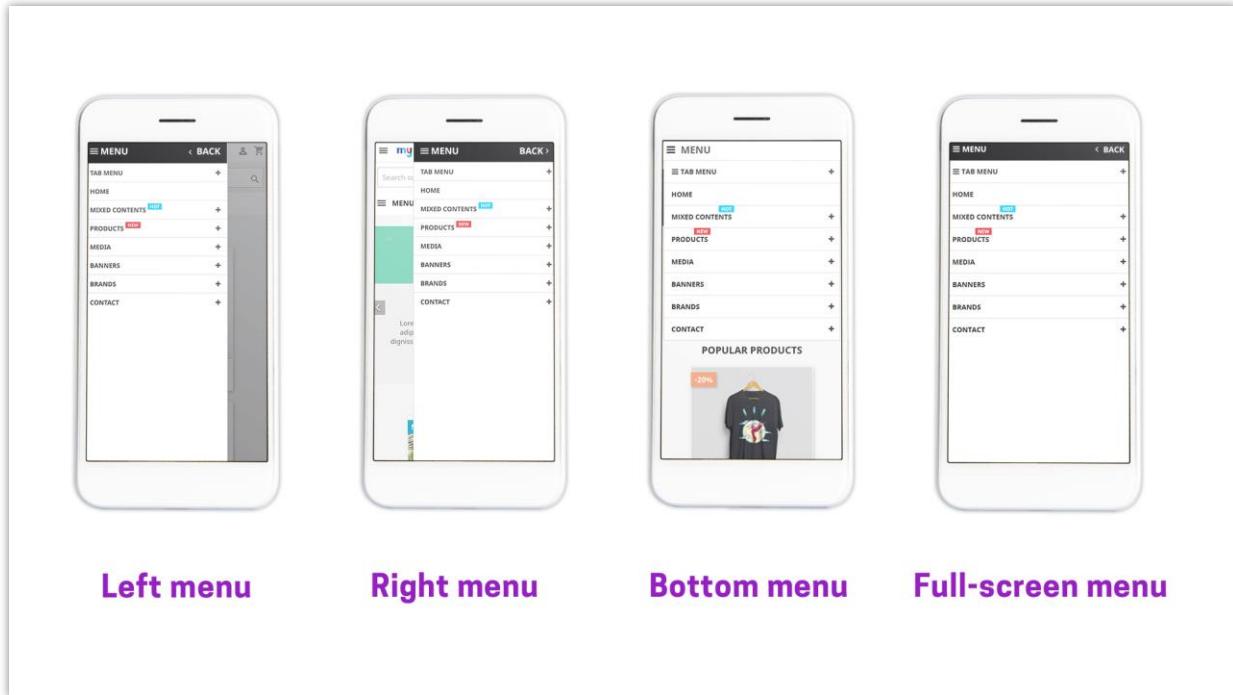

3. Transition

Select a transition effect you want to apply to your menu. **Pretty Menu** module provides 4 types of transition effect: default, slide down, scale down, zoom in.

4. Mobile

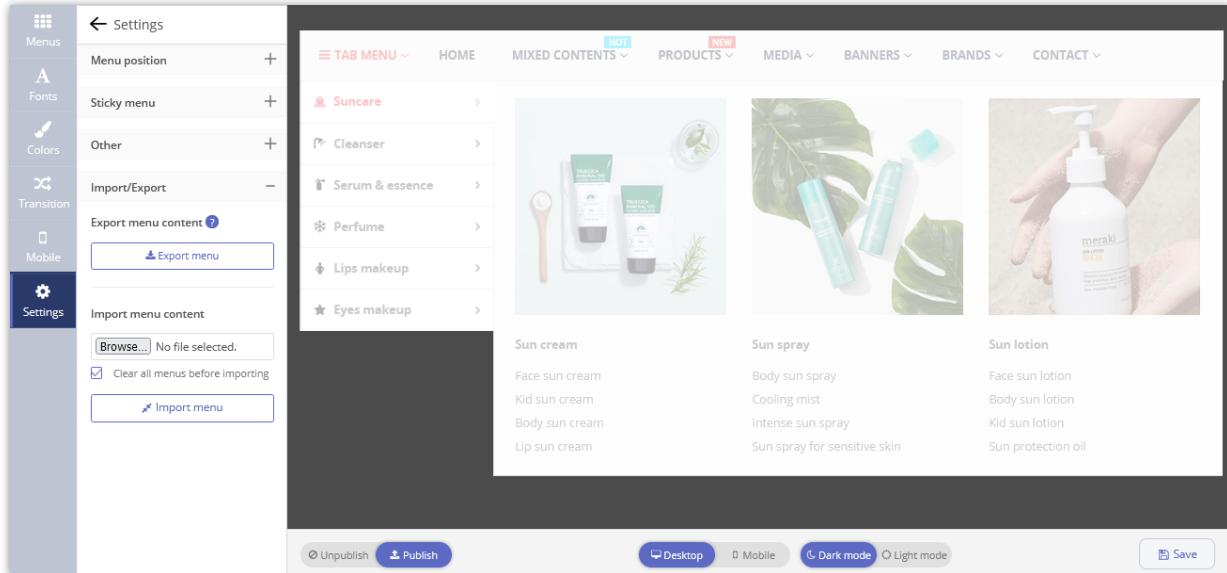

Pretty Menu provides 4 mobile menu types to display your menu on mobile devices: Left, Right, Bottom, Full-screen.

V. GENERAL SETTINGS

In this section, we will instruct you on how to configure the general settings for your mega menu.

From **Pretty Menu** configuration page, click on “**Settings**” tab on the sidebar:

1. Menu position

Select a position to display your mega menu on front office:

Default: the mega menu you created will replace the default menu of your current theme.

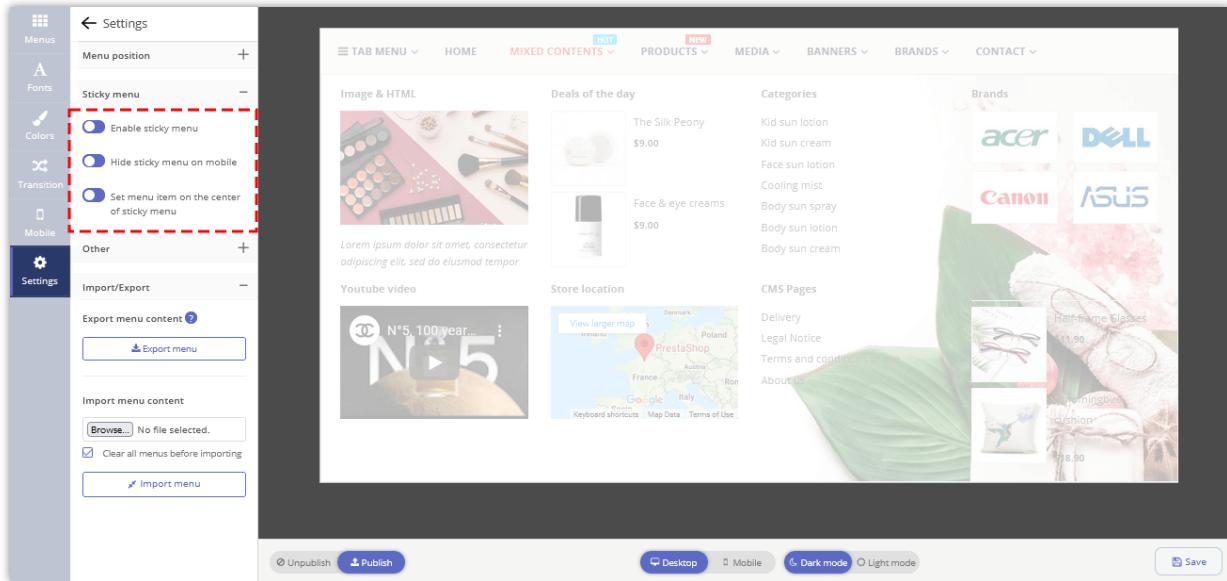

Custom hook: Display menu anywhere using custom hook: if you want to display the mega menu on a specific position, copy hook and paste it into the "**tpl**" file where you want to display the menu.

The screenshot shows the PrestaShop back office's 'Settings' menu. In the 'Custom hook' section, there is a highlighted code block: '{hook h='displayPrettyMenu'}'. A tooltip says 'Copy the hook above then paste into the tpl file where you want to display the menu.' Below this, there are sections for 'Sticky menu' and 'Other'.

The screenshot shows the PrestaShop back office's code editor with the file 'manufacturers.tpl' open. A red arrow points to the line of code: '{hook h='displayPrettyMenu'}

2. Sticky menu

When the user scrolls down, the sticky menu still is on the top of the page if you enable the sticky menu. You can find and change all setting options related to the sticky menu as you want here:

3. Other settings

You also can customize menu height, width, count down animation type, or choose to display shopping cart, search box, user links, etc on the main menu.

The screenshot shows the 'Settings' section of the PrestaShop back office. A red dashed box highlights the 'Sticky menu' configuration area. It includes fields for 'Menu height' (set to 60 px), 'Menu width' (set to Fixed, 1170 px), and various other settings like 'Display shopping cart' and 'Enable Cache'. Below this, there's a preview of the store front with a sidebar containing deals, categories, brands, and CMS pages.

The screenshot shows the PrestaShop front office with a dark header. A red box highlights the shopping cart icon in the top right corner, which displays 'Cart (0)'. A callout bubble points to this icon with the text: 'The shopping cart icon will be displayed on the front office after enabling "Display Shopping cart" option'.

4. Import/Export

For convenience as well as risk prevention, we have built this module and allow you to import/export your entire menu content in one click. This is an advanced, unique feature in **Pretty Menu** which helps you to easily backup or transfer menu content when required.

Click on “**import menu/export menu**” to import or export your menu content.

VI. THANK YOU

Thank you again for purchasing our product and going through this documentation. We hope this document is helpful and efficient in the installation and usage of **Pretty Menu** module. If you do have any questions for which the answer is not available in this document, please feel free to contact us.
