## I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

### **\*Note:**

*All instruction screenshots are taken from PrestaShop 1.7, but installing and configuring this module on PrestaShop 1.6 is similar.*

## II. INTRODUCTION

Nowadays, with the burgeoning of e-commerce websites via open source platforms such as PrestaShop, more and more people start to construct their own online businesses. PrestaShop is currently used by 270,000 shops worldwide and allows users to customize store themes. It has more than 300 built-in features for managing product listing, payments, shipping, manufacturers, and suppliers.

It is undeniable that PrestaShop is convenient and effective, but there is a problem. You can only introduce and sell your products, reviewing or having a thorough analysis of them is impossible. It is scientifically proven that the review and PR articles strongly affect the success of any business – they directly stimulate customers to buy more items and keep their interest to maximize site visit time.

Understanding that important need, we spent a lot of time researching and developing "**BLOG**" - a PrestaShop module that helps you easily create and manage the article to meet the requirements above. We believe it will attract a large number of customers visiting your website.

\* "**BLOG**" is compatible with PrestaShop 1.6.x, 1.7.x and PrestaShop 8.x

### III. INSTALLATION

- Navigate to **“Modules / Modules & Services”**, and click on **“Upload a module / Select file”**
- Select the module file **“ybc\_blog.zip”** from your computer then click on **“Open”** to install

Click on **“Configure”** button of the module you just installed to open the module's configuration page. You can also navigate to **BLOG** configuration page by browsing **“Quick access”** menu.

### IV. CONFIGURATION

#### 1. Blog posts

In this tab, you will see a list of all the posts created by you or your customers and post's status.

**\*Note:** on the following screenshots you will see demo data that we imported for demonstration purposes.

Total number of blog posts Add new post | Preview all posts

### Add a new blog post

- ❖ Click on the **"Add new"** icon.
- ❖ Start filling in the forms. Every field with a red asterisk mark is compulsory.
- ❖ The module was integrated with ChatGPT, so you can easily create compelling blog posts. It will be an efficient tool to help you craft engaging titles, short descriptions, meta titles, meta descriptions, and blog post content easier than ever!

Manage posts

Basic content SEO Options

\* Post title: 100 Most Popular Street Foods in the World

\* Short description: Nemo enim ipsam voluptatem quia voluptas sit aspernatur aut odit aut fugit, sed quia consequuntur magni dolores eos qui ratione voluptatem sequi nesciunt. Neque porro quisquam est, qui dolorem ipsum quia dolor sit amet, consectetur, adipisci velit, sed quia non numquam eius modi tempora incidunt ut labore et dolore magnam aliquam quaerat voluptatem.

\* Post content:
 

### Lorem ipsum dolor sit amet

>Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt in culpa qui officia deserunt mollit anim id est laborum

### Sed ut perspiciatis unde omnis iste natus

#### Et harum quidem rerum facilis

Sed ut perspiciatis unde omnis iste natus error sit voluptatem accusantium doloremque laudantium, totam rem

❖ You can use prompts that you created and saved in the global settings to save time:

- ❖ **BLOG** module allows you to add post thumbnail and post main image for each available language on your website.
- ❖ Enter meta title, meta description, meta keywords, and URL alias for your blog post

- ❖ Add blog post tags, related products, and related product categories, set the post as featured (if you want to).

#### ❖ Related categories

You can choose to display the product categories related to your post's content. Select related categories by checking the boxes next to their name.

#### ❖ Status

**BLOG** provides 4 statuses for a blog post: published, pending, draft/unpublished and schedule publish date.

To schedule a post for publication on a future time or date, select **"Schedule publish date"** and choose a day you want. You can also change the publish date to a date in the past to back-date posts.

Status Schedule publish date ▼

Publish date  📅

*You can select a date from the calendar. Leave blank to save this post as draft*

March 2019

Mo	Tu	We	Th	Fr	Sa	Su
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	31

❖ Author

After publish a post, you can change the author role between “Administrator author” and “Community author”.

Author: Freya Test ✎ Change

Administrator - Authors

Community - Authors

Administrator - Author Freya Test ▼

And we’re done! Click **“Preview blog posts”** button to view your new blog post.

## 4. Blog polls

---

Polls are another great way to enhance your blog with an interactive element or feature. **BLOG** allows you to add a poll to every blog post. You can set up poll options on the “**Global settings**” tab.

### Nam libero tempore

*Cum soluta nobis est eligendi* optio cumque nihil impedit quo minus id quod maxime placeat facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet ut et voluptates repudiandae sint et molestiae non recusandae.

Nam libero tempore, cum soluta nobis est eligendi optio cumque nihil impedit quo minus id quod maxime placeat facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet ut et voluptates repudiandae sint et molestiae non recusandae.

Was this blog post helpful to you? 👍 Yes (2) 👎 No(0)

Please leave us your feedback

e6143

↻

In the “**Blog poll**” tab you can see a list of blog polls with detailed information: ID, voter name, feedback, etc.

Vote ID	Name	Email	Blog post	Feedback	Helpful	Action

You can also send an email to a voter by clicking on **“Send email”** option.

The screenshot shows a modal window for composing an email. At the top, there are navigation links: "Vote ID", "Name", "Email", "Blog post", and "Feedback". The form contains three main sections: "To" with a text input field containing "Sumant kumar <test@gmail.com>", "Subject\*" with a text input field containing "Reply", and "Message\*" with a larger text area containing a Latin placeholder text: "Et harum quidem rerum facilis est et expedita distinctio. Nam libero tempore, cum soluta nobis est eligendi optio cumque nihil impedit quo minus id quod maxime placeat facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet ut et voluptates repudiandae sint et molestiae non recusandae." Below the message field is a blue "SEND" button. The background of the modal is dark grey, and there is a close button (X) in the top right corner.

## 5. Blog slider

---

In this tab, you can manage pictures used in the slider on the Blog main page.

**Add a new image to slider:**

- ❖ Click the “+” icon
- ❖ Fill in the blank. You must not ignore the fields with a red asterisk.
- ❖ Upload an image from your computer; it should be the recommended size. The **BLOG** module allows you to add slider images for each available language on your website.
- ❖ Click “**Save**” to complete.

**Edit an image:**

- ❖ Click on the **“Edit”** button
- ❖ Change the caption or any field as you want.
- ❖ Click **“Save”** to apply the changes.

Here is an example of a blog slider on Blog main page:

## 6. Blog Gallery

**BLOG** allows you to present your beautiful photos on a separate Photo gallery page, on the sidebar of blog pages, or in your PrestaShop store’s homepage.

When you click on any picture, a slide show will appear and run through every picture in your gallery. It automatically active, but you can pause and move to each image manually. To manage the slide show, please head to the **“Global settings >> Gallery”** tab.

You may manage gallery photos on **“Blog gallery”** tab:

## **Add a new photo:**

- ❖ Click on the “+” button
- ❖ Fill in the form.
- ❖ Upload a picture from your computer. **BLOG** module allows you to add images for each available language on your website.
- ❖ You can mark this picture as “**Featured**” and display it or not.
- ❖ Click “**Save**” to finish.

\* Name  en ▾

Caption  en ▾

\* Thumbnail image

Recommended size: 180x180

\* Large Image

Recommended size: 600x600

Featured  YES  NO  
Enable if you want to display this image in the featured gallery block on the front office

Enabled  YES  NO

## **Edit a photo:**

- ❖ Click the “**Edit**” button
- ❖ Change photo’s name or any field as you want.
- ❖ Click “**Save**” to apply the changes.

## 7. RSS feed

---

It is understandable if you want to allow your customers to create their online feeds filled with custom updates from your websites. **BLOG** is integrated with the RSS feature to help you satisfy your customer requirements.

The screenshot shows the 'RSS FEED' configuration page in Prestashop. At the top left, there is an RSS icon and the text 'RSS FEED'. Below this, there is a section 'Enable RSS feed' with two buttons: 'YES' (highlighted in blue) and 'NO' (greyed out). Underneath, there is a section 'RSS feed URLs:' with a list of six URLs, each preceded by a small flag icon representing a language: English, French, German, Spanish, Catalan, and Portuguese. Below the URLs, there is a section 'Display RSS icon on' with three checkboxes: 'Select/Unselect all' (checked), 'Side bar' (checked), and 'Custom hook' (checked). Below these checkboxes, there is a note: 'Insert line `{hook h='blogRssSidebar'}` into template .tpl file where you want to display RSS icon'. At the bottom, there is a section 'Data to feed' with six checkboxes: 'Select/Unselect all' (checked), 'Latest posts' (checked), 'Popular posts' (checked), 'Featured posts' (checked), 'Post categories' (checked), and 'Authors' (checked).

You can enable or disable RSS feed, where to display your RSS icon, and what type of RSS will be provided to your readers.

Remember to click **“Save”** to apply your setup.

## 8. SEO

---

In general, the earlier (or higher ranked on the search results page), and more frequently a website appears in the search results list, the more visitors it will receive from the search engine's users and these visitors can then be converted into customers.

Therefore, **BLOG** offers you some SEO settings that will take a different approach to your Internet marketing strategies. Let's look through the SEO tab:

❖ Blog friendly URL

**BLOG** will auto generate "friendly URL" to help your visitors remember web addresses, which means they can revisit pages by simply typing in the URL address bar.

The screenshot shows the 'Enable blog friendly URL' setting in the Prestashop admin interface. The 'YES' radio button is selected. Below this, there is a text input field for 'Blog alias' containing the word 'blog'. A note below the input field reads: 'Your blog main page: <https://demo1.etssoft.net/blog/en/blog>. Copy this link and paste it to your top menu or somewhere in order to link the blog area with your website'.

❖ URL suffix: display the ".html" part in the URL or not.

❖ Remove blog post and category ID on URL: help your URLs become more friendly

❖ Alias

**BLOG** allows you to set the alias for the items below to optimize your SEO process.

- Single post page
- Community author page
- Category page
- Tag page

- Category list page
- Gallery page
- Latest posts page
- Search page
- Author page
- RSS featured posts page
- Archive year page
- Archive month page
- RSS page
- RSS latest posts page
- RSS popular posts page

Click **“Save”** after changing any configuration.

## 9. Socials setting

---

On each post there are several social network sharing buttons as you can see below. **BLOG** can make it easier than ever for your audience to spread your content around the web.

To enable or disable these buttons, head to **“Socials”** tab and change the status as you want. Click **“Save”** to apply the settings.

Email template detail:

## 12. Image

In this tab you can see the pre-defined image size settings. You can adjust them to be suitable with your current theme.

**IMAGE**

**BLOG POST THUMBNAIL IMAGE (260 X 180 IS RECOMMENDED)**

\*Width  px  
*Valid values: 50 - 3000*

\*Height  px  
*Valid values: 50 - 3000*

---

**BLOG POST MAIN IMAGE (1920 X 750 IS RECOMMENDED)**

\*Width  px  
*Valid values: 50 - 3000*

\*Height  px  
*Valid values: 50 - 3000*

---

**CATEGORY THUMBNAIL IMAGE (300 X 170 IS RECOMMENDED)**

\*Width  px  
*Valid values: 50 - 3000*

\*Height  px  
*Valid values: 50 - 3000*

You can also set the default avatar for your customers and allow your customers to upload their own avatar.

### 13. Sidebar

All sidebar blocks are easily managed through setting popup boxes. You can drag and drop each block to sort the order of blog blocks on sidebar.

### Sidebar general configuration

CONFIGURATION

Sidebar position:

Enable sidebar when collapsed:  YES  NO

Expand sidebar on mobile by default:  YES  NO

Sidebar title when collapsed:

Display post excerpt for related post for post blocks:  YES  NO

How to display post blocks in sidebar:

Display blog sidebar elements on blog pages only:  YES  NO

❖ **Enable sidebar when collapsed:** on a small width web browser, the blog sidebar will appear as a button. Click on the sidebar title to open it.

- ❖ To help your customers experience a convenient interface on their mobile devices, you can turn off the “**Expand sidebar on mobile by default**” option. Sidebar blocks will withdraw into **Blog navigation** menu located above **Blog slider**.

- ❖ **Display blog sidebar elements on blog pages only:** If you disable this option, blog sidebar elements will appear on other positions such as product category page, product listing page, etc.

## 19. Authors

Moving to **“Authors”** tab, you can manage all authors who are contributing to your blog. We have 3 sub tabs:

- “Administrators – Authors”
- “Community – Authors” (this sub tab only appears after you turning on **“Allow customer to submit post”** option on **Settings** sub tab)
- “Settings”.

**Administrators - Authors** are you or the people who responsible for administrating your website while **Community - Authors** are the customers who created a user account on your web. You can edit their author information by selecting **“Edit”** button.

Administrator - Authors 5 | Community - Authors 3 | Settings

## 20. Import / Export

- ❖ You want to export all your blog data for storing purpose or upload it to another website? With **BLOG**, it will only take you a second. Select the **“Import/Export”** tab and hit **“Export”** button. And done, your data will be compressed and automatically downloaded to your computer.

- ❖ On the other hand, if you want to import the data to your blog, firstly ensure it is compressed. Then select the **"Import/Export"** tab, click **"Browse"** button.

- ❖ Select the file you need to import and click **Open**.
- ❖ Select types of data to import:

- ❖ You can choose to **“Override existing data if exist the same ID”** (which means if the import data has an item shares the same ID with an existing one, **BLOG** will replace the latter with imported data), **“Keep post author ID”** or **“Keep commenter ID”**. Finally, click **“Import”** button to start.

**Import options:**

- Override existing if exist the same ID
- Keep post author ID
- Keep commenter ID

### **How to Import data from WordPress**

If you already have a blog on WordPress and want to migrate all blog data to your PrestaShop website, **BLOG** can help you transfer everything easily!

**IMPORT FROM WORDPRESS**

**Data package**  No file selected.

This data package can be exported using default built-in Wordpress export feature

**Override existing if exist the same ID**

- ❖ Step 1: Login to your WordPress site admin panel.
- ❖ Step 2: Navigate to **Tools >> Export >> Select “All content”**

- ❖ Step 3: Click **“Download export file”**. An XML file will be automatically downloaded to your computer.

- ❖ Step 4: Back to **“Import”** sector of **BLOG**. Upload the file you just received.
- ❖ Step 5: Click **“Import”** button.

## 21. Statistics

**BLOG** also provides a detailed statistic tool for you. It has a chart visualize your blog views, likes and comments data with time filter.

In addition, this module also saves the entire view log and “like” log data such as: your readers IP addresses, web browsers, which post they read/liked, etc. so you can have more insight information. You may know which blog article is the most favorite via blog’s likes log and pay more attention for its content.

**BLOG** module supports clear log feature to save your server storage capacity.

IP address	Browser	Customer	Post	Date	Action

## 22. Global settings

---

In this tab, you can manage different objects from general settings, blog post, gallery to slider, likes and comments and polls. Remember to click **“Save”** button so that the configuration is applied.

### (a) General settings

#### ❖ Blog layout

You can choose different layout for post listing pages such as main blog page, blog category pages, author pages, etc. **BLOG** supports 4 types of layouts: list, grid, large box and grid, large box and list.

#### ❖ Custom color and change “Read more” text

You can change the main and hover color of buttons, link, highlight text, etc. “Read more” text can also be adjusted into something else.

Main color	#2fb5d2	
	<i>Used for buttons, link, high light text, etc</i>	
Hover color	#00cefd	
	<i>Used for buttons, link, high light text, etc</i>	
"Read more" text	Read more	
	<i>Leave blank to hide the "Read more" link</i>	

❖ **Date format**

You can set up how the time will be displayed. The default value is "F jS Y".

❖ **Table of content for the post**

To help readers grasp the main content of a post and navigate to that position easily; our module provides a fixed table on the top of blog post and a floating "Table of contents" button.

Allow creating a table of contents for the post	<input checked="" type="radio"/> YES	<input type="radio"/> NO
Title for table of contents section	<input type="text" value="Table of contents"/>	<input type="button" value="en ▼"/>
	<i>If you leave this field blank, the default value "Table of contents" will be applied.</i>	

Fixed table on the front office:

Floating “Table of contents” on the front office:

❖ Set up CAPTCHA type

**BLOG** offers a capacity of generating captcha images to protect your PrestaShop blog from spam. However, if you think it's not secure enough, you can select Google reCAPTCHA – a famous captcha solution provided by Google.

The screenshot shows a configuration form for CAPTCHA type. The 'CAPTCHA type' dropdown menu is set to 'Google reCAPTCHA2'. A blue dashed arrow points from this dropdown to a secondary dropdown menu labeled 'Image CAPTCHA', which has 'Google reCAPTCHA2' selected. Below the dropdowns, there are two input fields: '\* Site key' with the value '6LecXnYUAAAAAGazdBctCqkK6RnhtKHBHjGikg' and '\* Secret key' with the value '6LecXnYUAAAAAFBdaVyVp\_vgM2vzJCFurhkHyBI'. A link 'How to get Site key and Secret key for reCAPTCHA - v2' is located between the dropdowns and the input fields.

To use Google reCAPTCHA, you will need to enter **Site key and Secret key** (for the Classic reCAPTCHA key) **or reCAPTCHA ID** (for the new reCAPTCHA project created in Google Cloud Console).

Google has announced that **all reCAPTCHA Classic keys must be migrated to Google Cloud Console by the end of 2025**. Previously, reCAPTCHA keys were managed separately on **Google reCAPTCHA Admin**, where users could create keys for free without linking a credit card. However, Google is now moving all reCAPTCHA services under **Google Cloud Console** for **centralized management**.

### ? What Does This Mean for You?

- If you **already have reCAPTCHA Classic keys**, you can still use them **until the end of 2025**, but you need to migrate them to a **Google Cloud project**.
- If you're **setting up reCAPTCHA for the first time**, you must generate **new keys** in **Google Cloud Console** instead of the old Google reCAPTCHA Admin.

### ◆ What You Need to Do

#### **If you are using reCAPTCHA Classic keys:**

To continue using your existing keys, you must migrate them to Google Cloud Console.

Follow this guide: [How to Migrate reCAPTCHA Classic to Google Cloud](#)

#### **If you need new reCAPTCHA keys:**

You must create new keys, depending on where you want to manage them:

- **Using the old Google reCAPTCHA Admin (until it is fully deprecated):**  
[Create reCAPTCHA Key in Google reCAPTCHA Admin](#)
- **Using Google Cloud Console (recommended for future compatibility):**  
[How to Create reCAPTCHA Keys in Google Cloud](#)

Once you have your new keys, update them in the **BLOG** module settings in your PrestaShop back office.

#### ❖ **Enable Owl carousel – jQuery library**

Owl carousel helps **BLOG** create a beautiful responsive carousel slider in your blog page. But if your website already has this library, you can disable this option.

#### ❖ **RTL mode**

RTL stands for “Right to left”. If your website is using a language that is read from right to left (like Hebrew and Arabic), switch to this mode in the drop-down menu. There are other choices for the remaining languages.

#### ❖ **Admin folder**

Enter your website admin directory (appeared in back office URLs). This value is used to generate the correct URLs to your back office, which will be used in the email sent to the admin.

### **(b) Gallery**

#### ❖ **Gallery slideshow**

- You can set the number of images displayed on gallery block or turn on/off the gallery slide show.
- For different slide show effects, select the one you like in the drop-down menu.
- You can enable/disable the auto play slide show option.

## (g) ChatGPT

The **BLOG** module offers a time-saving prompt creation feature, empowering store admins to pre-define prompts to use for titles, short descriptions, meta titles, meta descriptions, and content. No more repetitive tasks and streamline your blog creation process. With this feature, you can save valuable time and focus on crafting compelling content that drives engagement.

- ❖ First, you need to enter ChatGPT API key and save it to use this feature.
- ❖ Click on the “+” button to add a new prompt

- ❖ On the “**Add prompt template**” popup, fill in the label and content of the prompt. You should write the content as detailed as possible so ChatGPT can understand easily and return the best result.

And here you can see and use the prompts that you created:

## V. THANK YOU

Thank you again for purchasing our product and going through this documentation. We hope this document is helpful and efficient in the complete setup of this module on your website.

If you have any questions for which the answer is not available in this document, please feel free to contact us.
