I. WELCOME

Thank you for purchasing our theme. We hope to guide you through all the aspects of the theme installation and the theme setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

II. SERVER REQUIREMENTS

PHP configuration:

- "memory_limit" need to be at least "64M"
- "upload_max_filesize" need to be at least "16M"
- "allow_url_fopen" need to be set to "on"
- "register_global" should be set to "off"
- "safe_mode" should be set to "off"

Extensions required:

- GD
- cURL

- SimpleXML
- SOAP

File permissions:

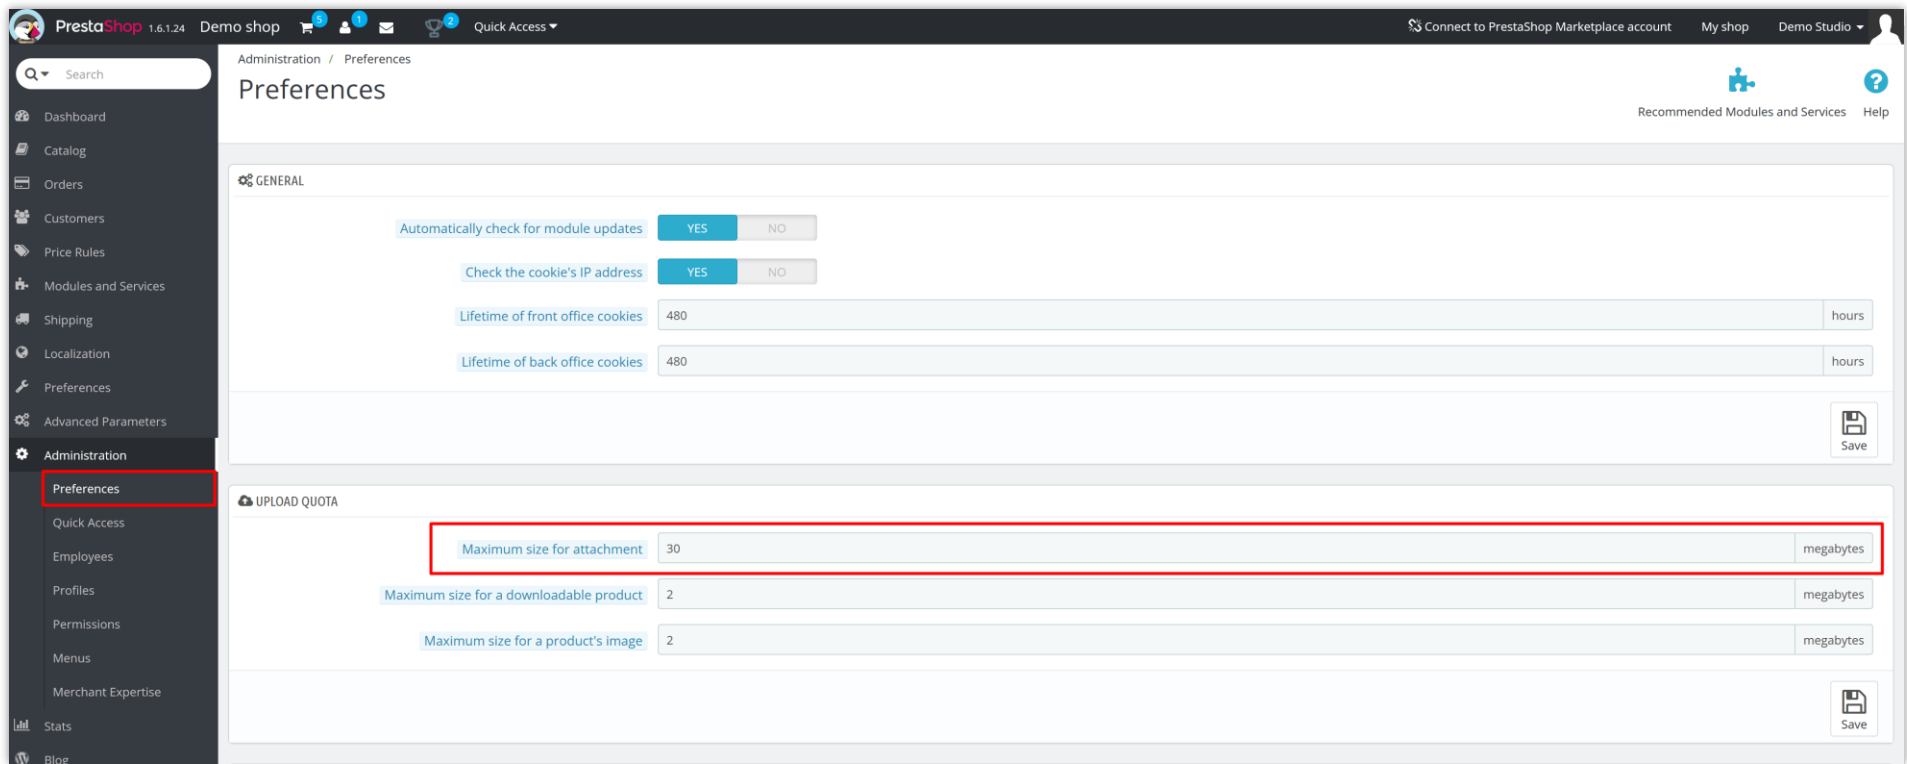

- All files need to be "664"
- All folders need to be "755"

III. INSTALLATION

Before installing the theme, you need to install a Prestashop 1.6.x website on your server.

NOTE:

- Since the install package is larger than 2MB, therefore you should increase the “**Maximum size for attached files**” value of your site (“**Administration**” > “**Preferences**” page). We recommend the minimum value of 30 MB.
- After successfully uploading the install package, you can change this parameter back to the initial value.
- You can also contact the host manager to increase the “max_upload_filesize” value of your server to be able to upload larger file.

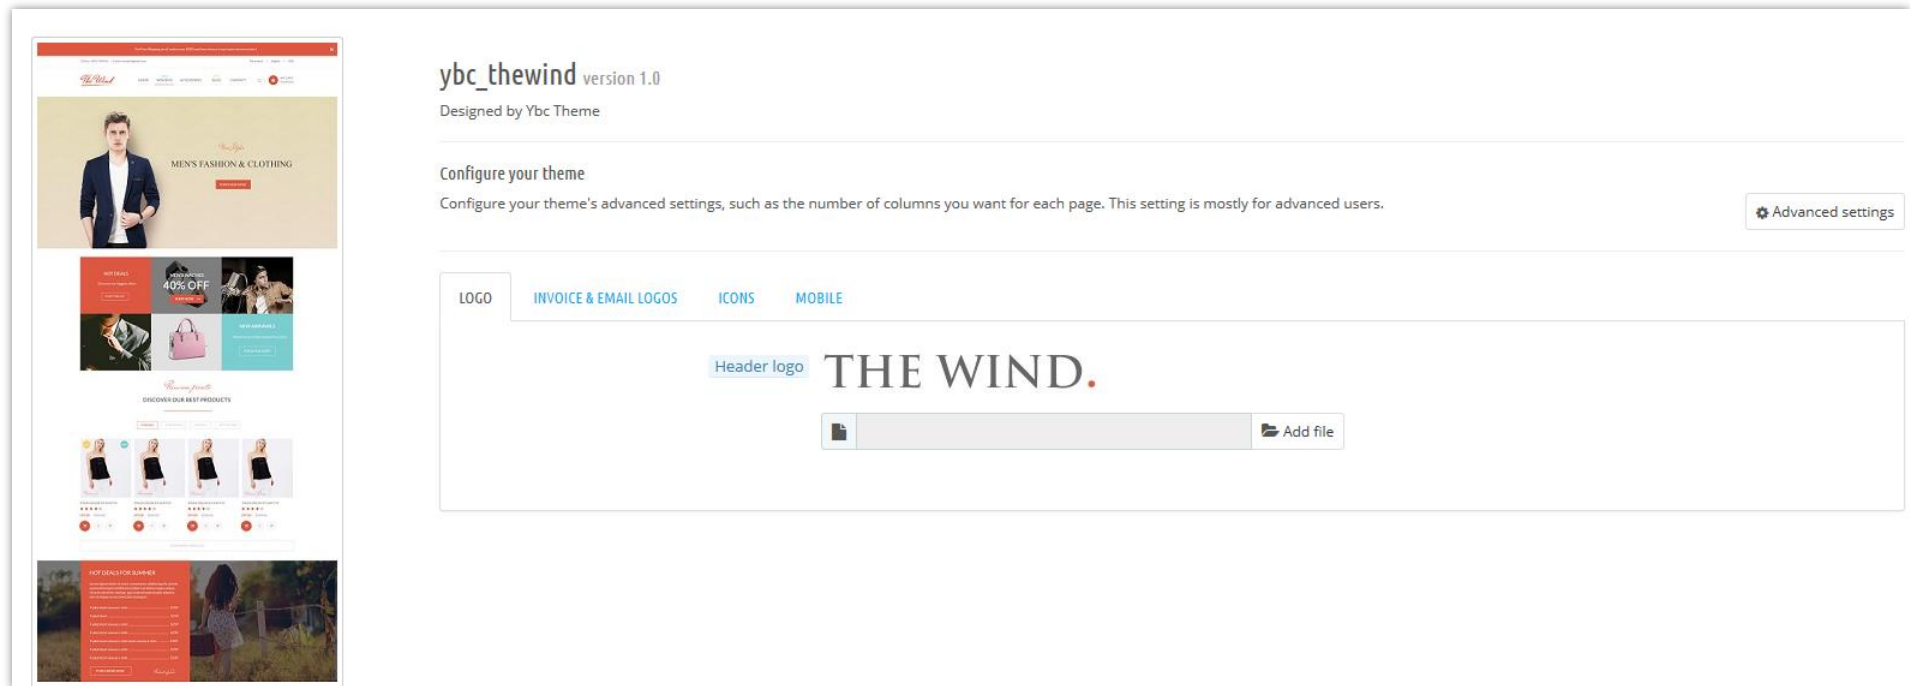

Upload theme

Follow these steps to install our theme manually:

- Login to your back office and navigate to **Preferences > Themes** and click on “Add new theme”.
- Choose your theme file (thewind.zip) from the “theme” folder in the download file and click “Save”.
- Choose the theme you uploaded and click “Use this theme”

- Upload logo: Navigate to “**Theme & Logo / Theme**”, select and upload your website logo

❖ Image

Navigate to "**Design / Image settings**". Make sure your image sizes are configured as below:

IMAGES 9

ID	Name	Width	Height	Products	Categories	Manufacturers	Suppliers	Stores	
10	cart_default	200 px	233 px	✓	✗	✗	✗	✓	Edit
11	small_default	98 px	98 px	✓	✗	✓	✓	✓	Edit
12	medium_default	125 px	125 px	✓	✓	✓	✓	✓	Edit
13	home_default	350 px	408 px	✓	✗	✗	✗	✓	Edit
14	large_default	600 px	699 px	✓	✗	✓	✓	✓	Edit
15	thickbox_default	800 px	932 px	✓	✗	✗	✗	✓	Edit
16	category_default	870 px	217 px	✗	✓	✗	✗	✓	Edit
17	scene_default	870 px	270 px	✗	✗	✗	✗	✓	Edit
18	m_scene_default	161 px	58 px	✗	✗	✗	✗	✓	Edit

Bulk actions

Set up image quality that you prefer to use on your website.

IMAGES GENERATION OPTIONS

? JPEG images have a small file size and standard quality. PNG images have a larger file size, a higher quality and support transparency. Note that in all cases the image files will have the .jpg extension.

WARNING: This feature may not be compatible with your theme, or with some of your modules. In particular, PNG mode is not compatible with the Watermark module. If you encounter any issues, turn it off by selecting "Use JPEG".

Image format Use JPEG.
 Use PNG only if the base image is in PNG format.
 Use PNG for all images.

* JPEG compression

* PNG compression

Generate images based on one side of the source image

* Maximum file size of product customization pictures bytes

* Product picture width pixels

* Product picture height pixels

Generate high resolution images YES NO

Enable to optimize the display of your images on high pixel density screens.

 Save

Regenerate image thumbnails

 **REGENERATE THUMBNAI**

 Regenerates thumbnails for all existing images
Please be patient. This can take several minutes.
Be careful! Manually uploaded thumbnails will be erased and replaced by automatically generated thumbnails.

Select an image

Erase previous images

Select "No" only if your server timed out and you need to resume the regeneration.

  **Regenerate thumbnails**

❖ **Module positions**

Navigate to “**Modules and services**” / “**Positions**”, here you can see the orders of your modules in each Prestashop hook, check a hook called “Header”, make sure “Theme options” is on the top of the module list:

Header 43 Modules

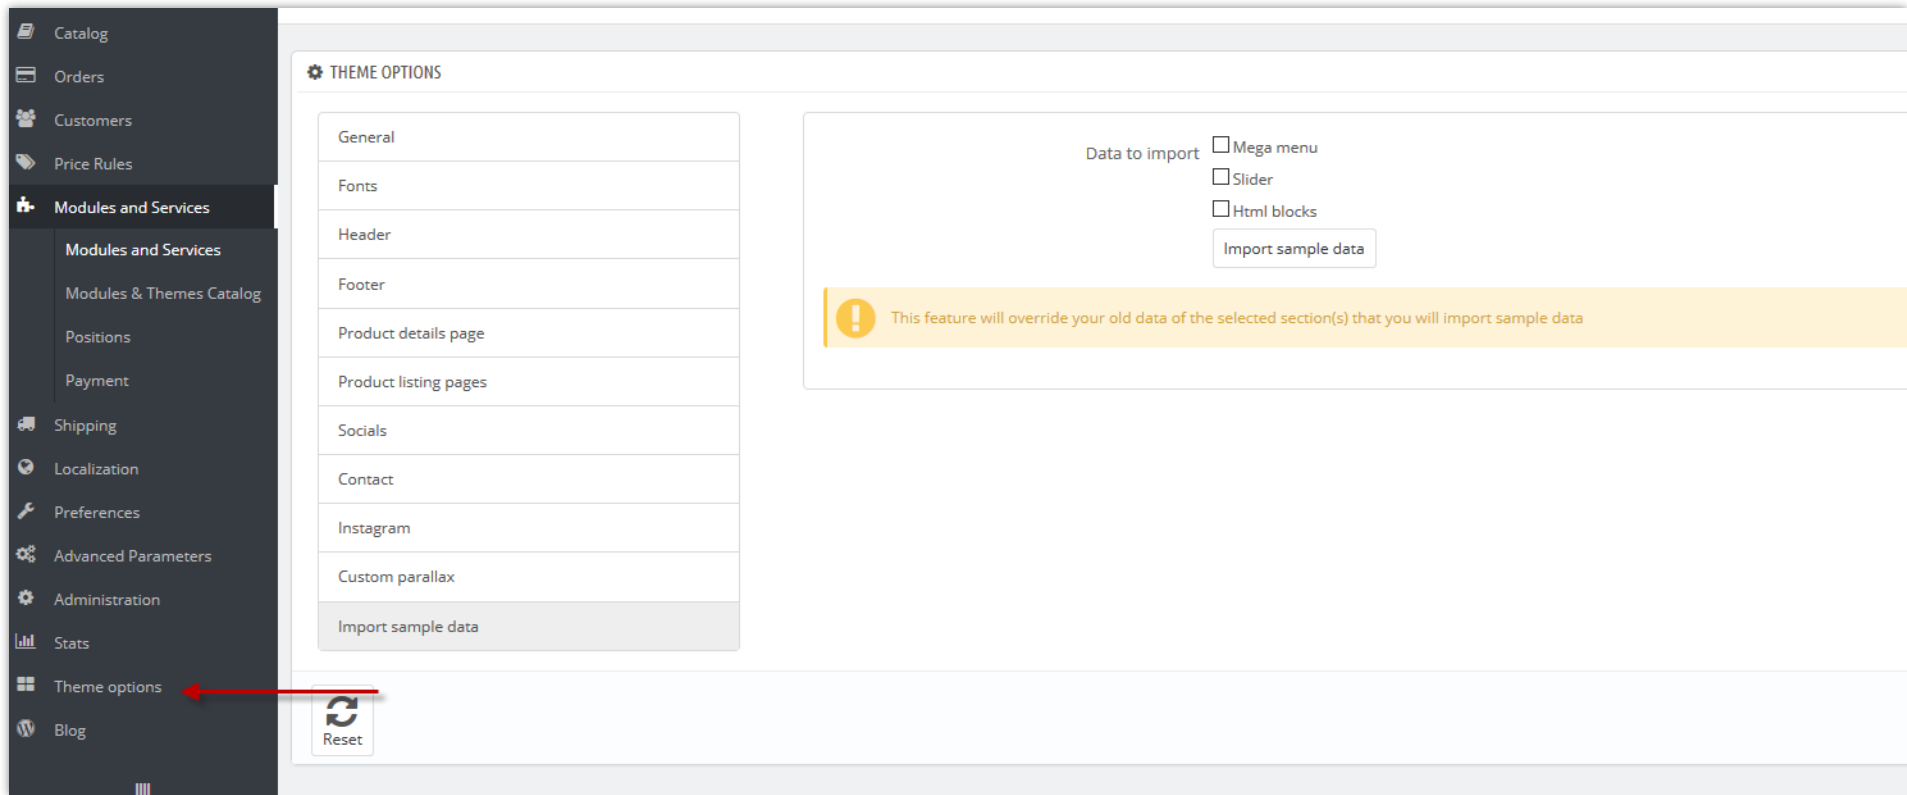

This hook adds additional elements in the head section of your pages (head section of html)

<input type="checkbox"/>	1		Theme options - v1.0 Configure your theme	<input type="button" value="Edit"/>
<input type="checkbox"/>	2		Social sharing - v1.4 Displays social sharing buttons (Twitter, Facebook, Google+ and Pinterest) on every product page.	<input type="button" value="Edit"/>
<input type="checkbox"/>	3		Banner block - v1.4 Displays a banner at the top of the shop.	<input type="button" value="Edit"/>
<input type="checkbox"/>	4		Top-sellers block - v1.8 Adds a block displaying your store's top-selling products.	<input type="button" value="Edit"/>
<input type="checkbox"/>	5		Cart block - v1.6 Adds a block containing the customer's shopping cart.	<input type="button" value="Edit"/>

IV. IMPORT SAMPLE DATA

You can quickly import our sample data to your Prestashop website to make it the same as our demo website.

Go to “**Theme options / Import sample data**” and choose type of data that you want to import.

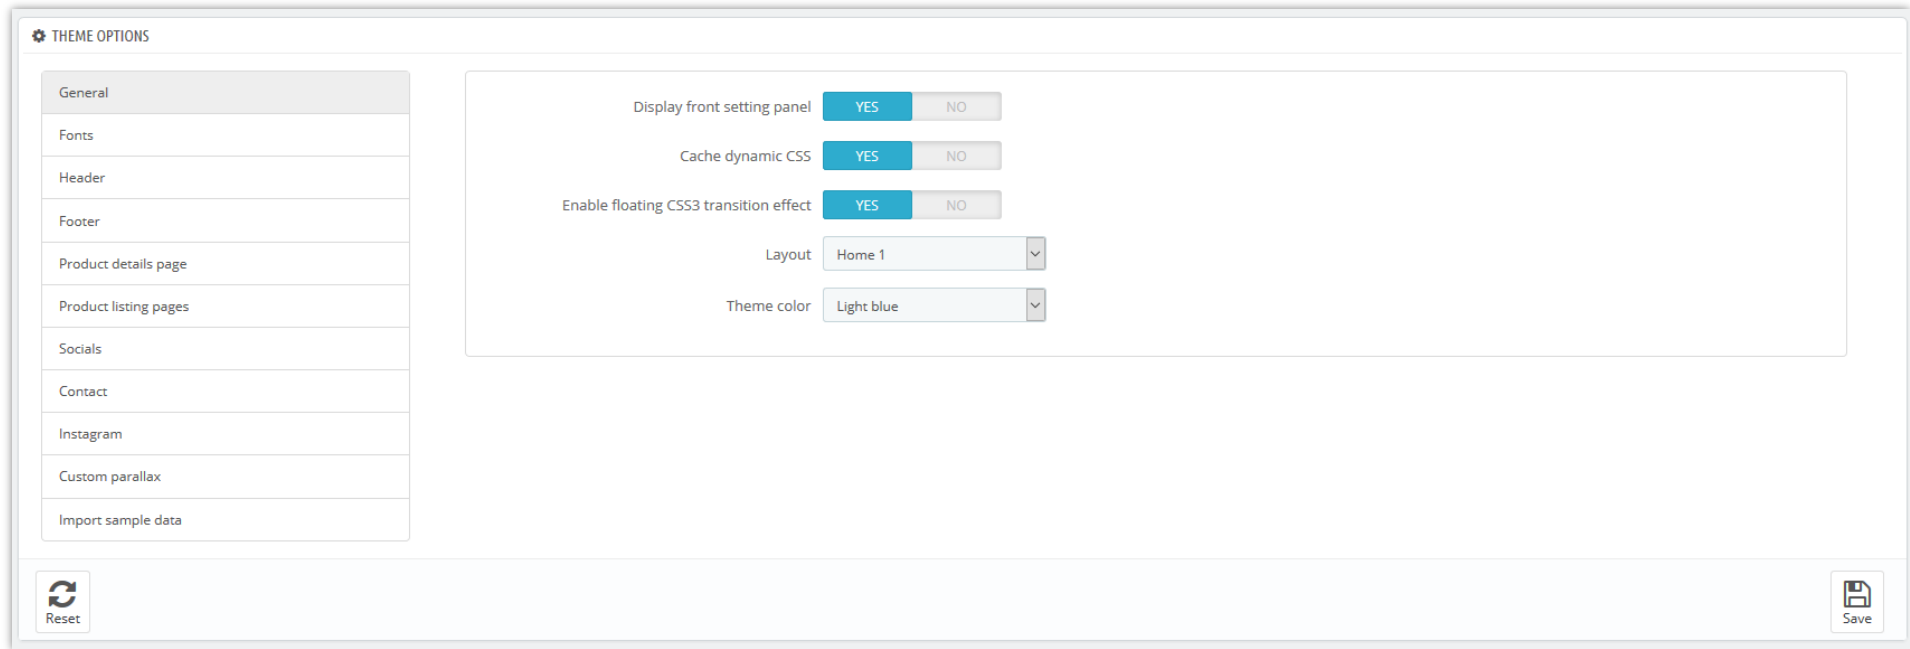

Note: This option is recommended when you install the theme on a fresh Prestashop website. Clear your website cache (or turn it off) after importing sample data.

The screenshot displays the 'Theme options' interface for a PrestaShop theme. It is divided into two main sections: 'SMARTY' and 'DEBUG MODE'.
In the 'SMARTY' section, there are three radio button options for 'Template compilation': 'Never recompile template files', 'Recompile templates if the files have been updated', and 'Force compilation' (which is selected). Below these options is a 'Cache' button and two buttons labeled 'YES' and 'NO'.
In the 'DEBUG MODE' section, there are two toggle buttons: 'Disable non PrestaShop modules' and 'Disable all overrides', each with 'YES' and 'NO' options.
Both sections have a 'Save' button in the bottom right corner.

V. THEME OPTIONS

This is a powerful Prestashop theme, it offers many useful features that help you to manage the theme easily.

Navigate to **“Theme options”**:

- ❖ After selecting a theme layout, you should reimport sample data to make your website like our live demos then start to replace the images/text by your real data (make sure your image sizes are the same as the sizes of our sample images)
- ❖ You can define your custom color set by selecting “Custom color” from “Theme color”
- ❖ Cache dynamic CSS should be enabled for live website
- ❖ This theme supports Google font, you can setup your custom font as below:

General font name

Leave blank to use default font

General font data

Heading font name

Leave blank to use default font

Heading font data

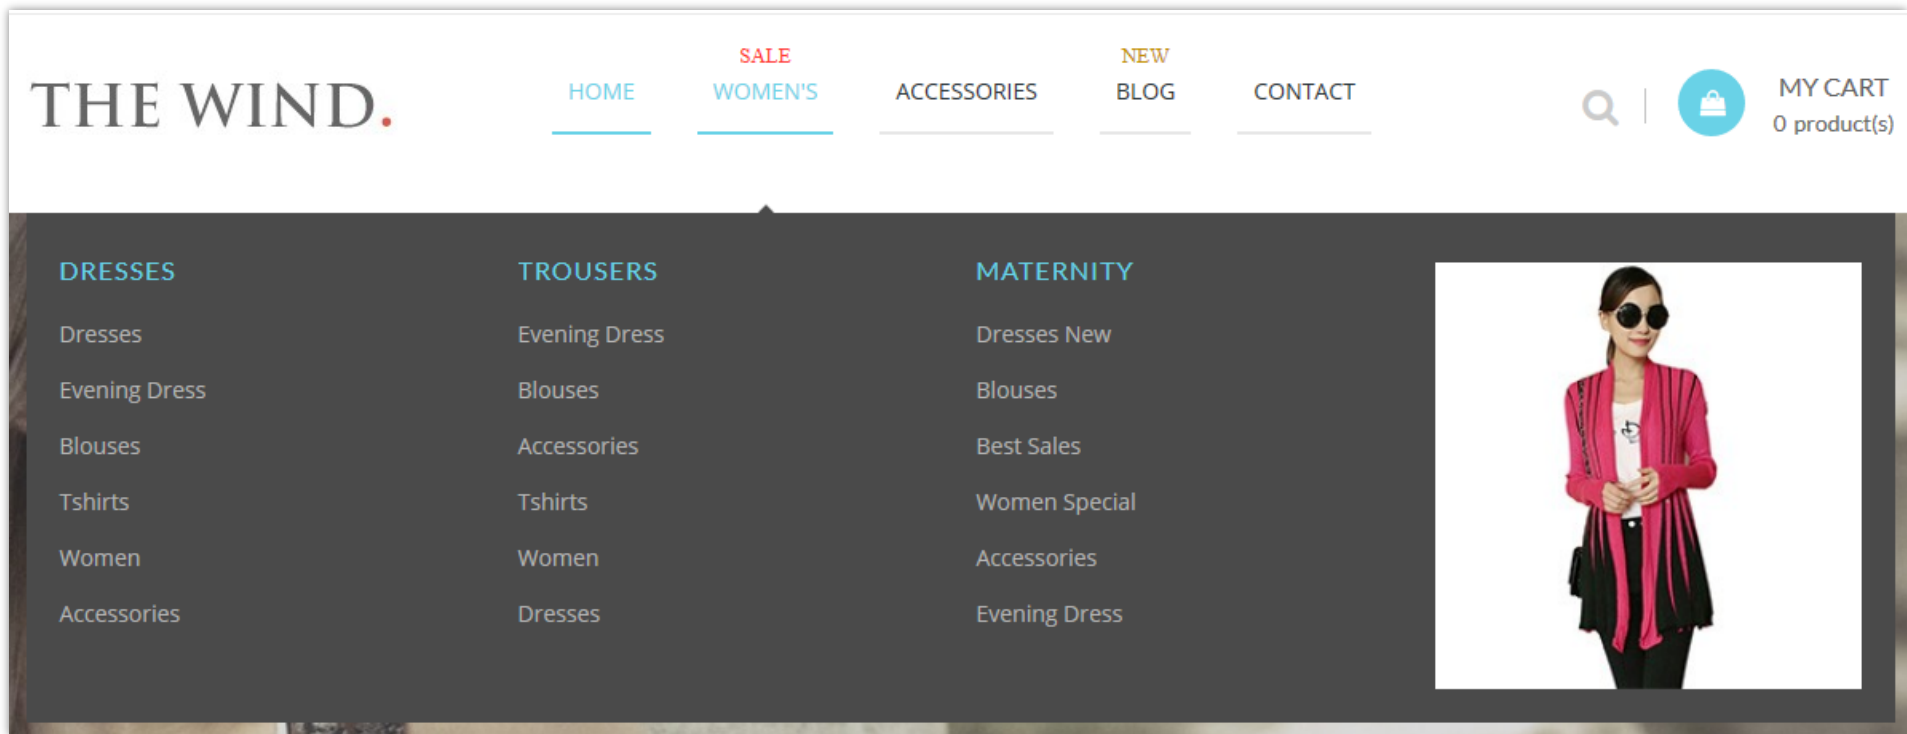

Other font name

Leave blank to use default font

Other font data

VI. MEGA MENU MODULE

Our mega menu is organized by 3 main elements: menus, columns and blocks which will give you easy and flexible ways to create different types of simple or complex structures for your top menu.

To manage your mega menu, go to “**Modules / Modules and services**” and select “**Rich Mega menu**” from the module list.

MENU STRUCTURE

- HOME
- MULTI BLOCKS
- Categories
- Categories
- Categories
- Manufacturers
- Manufacturers
- Manufacturers
- Cms and HTML
- CMS pages

MEGA MENU GLOBAL CONFIGURATION

* Transition effect: Slide down

* Skin: Default

Custom CSS

Custom class

Show images on mobile devices: YES (selected) NO

Use cache: YES NO

Save

Annotations:

- Add new menu (points to top right + icon)
- Add new column (points to MULTI BLOCKS + icon)
- Add new block (points to Categories + icon)
- Menu tree (points to Manufacturers + icon)

Note: if you are transferring your site to new hosting service or domain, the “Use cache” option should be deactivated by selecting the “no” option and should be reactivated once the website is transferred, by selecting the “yes” option. “Use cache” helps to load your site faster when you have a complex menu structure.

VII. BLOG MODULE

With this theme you have one of the most powerful Prestashop blog modules in the market place! You have a separated menu to manage your blog in the backoffice. This menu helps you manage your blog posts, categories, comments, slider, gallery and settings.

Note: Set up your “**notification emails**” from the settings area in the backoffice to receive notification emails when someone comments on one of your blog posts or reports a comment as abused.

**Tip:* To have a link or a menu item to display your blog in the frontend of the website, copy the blog preview link from backoffice and add it to your top mega menu. Settings area gives you many different options for configuring your blog, take some time to check it out.

VIII. HTML WIDGETS

First of all you need to understand what widgets are. Widgets are combinations of text and images placed on specific positions (hooks) of the website. With this theme you can create unlimited widgets and place them in different positions of your website.

Let's take a look at our frontend after the installation of the theme. These are the widgets that are available by default:

HOT DEALS FOR SUMMER

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco nisi ut aliquip ex ea commodo consequat

banner 1

Hook Left Column

Hook Right Column

Hook Left Column Product

Hook Right Column Product

Hook Footer

Hook Footer links

Hook Footer payment logo

Hook Custom 1

Hook Custom 2

Hook Custom 3

Note:

- ❖ Uploading images with appropriate size to each widget is necessary because the upload of too large images could break the layout of the theme.
- ❖ Import sample data then replace images/text by your real data to make your site like our demo sites.

IX. HOME SLIDER

To manage the home slider, navigate to “**Modules and services**” then select “**YourBestCode Nivo slider**” from the module list:

SLIDES LIST ⚙️ +

+

#1 - Women's Fashion
✔ Enabled
✎ Edit
🗑 Delete

+

#5 - New Styles
✔ Enabled
✎ Edit
🗑 Delete

X. MANUFACTURERS/BRANDS MODULE

					
---	---	--	---	---	---

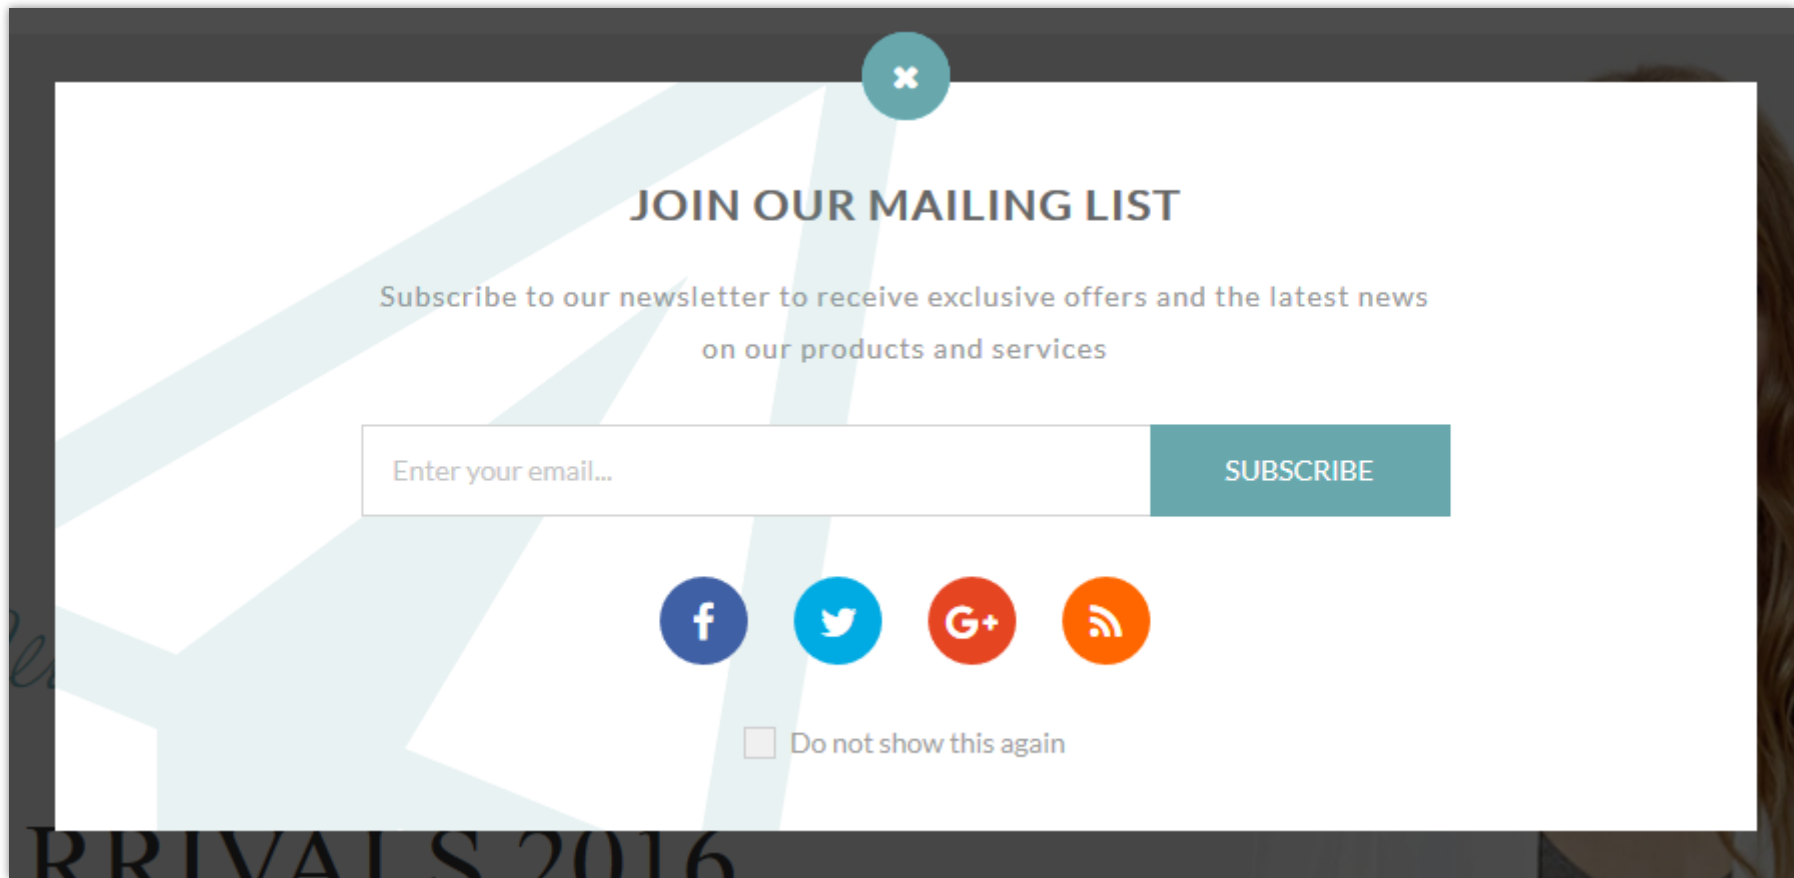

To manage this module, navigate to “**Modules and services**” the select “**YourBestCode manufacturers/brands block**” from the module list:

The screenshot shows a configuration window titled "CONFIGURATION" with a gear icon. It contains three input fields and a save button. The first field is labeled "* Block title" and contains the text "Our brands". The second field is labeled "* Number of manufacturers to display" and contains the number "10". The third field is labeled "Show manufacturer name" and has two radio buttons, "YES" and "NO", with "NO" being selected. A "Save" button with a floppy disk icon is located in the bottom right corner.

XI. NEWSLETTER POPUP

This theme comes with a professional newsletter popup module which has advanced options that offer you many ways of customizing the look of the popup.

To make customization to the newsletter popup, navigate to **“Modules and services”** then select **“Pretty Newsletter popup”**.
