I. WELCOME

Thank you for purchasing our theme. We hope to guide you through all the aspects of the theme installation and the theme setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

II. SERVER REQUIREMENTS

PHP configuration:

- "memory_limit" need to be at least "64M"
- "upload_max_filesize" need to be at least "16M"
- "allow_url_fopen" need to be set to "on"
- "register global" should be set to "off"
- "safe_mode" should be set to "off"

Extensions required:

- GD
- cURL

- SimpleXML
- SOAP

File permissions:

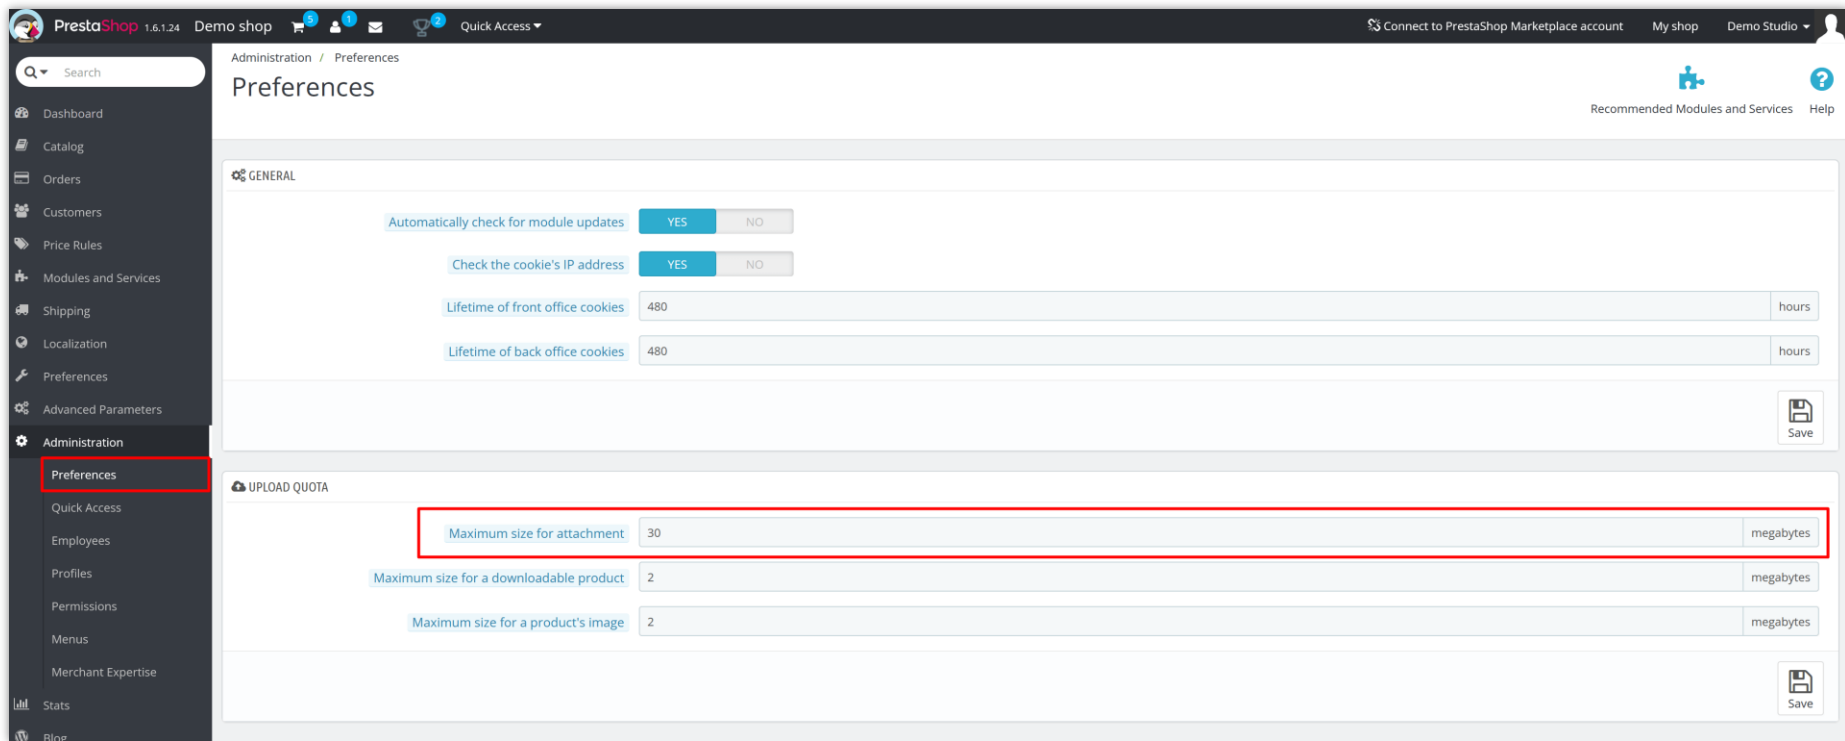

- All files need to be "664"
- All folders need to be "755"

III. INSTALLATION

Before installing the theme, you need to install a Prestashop 1.6.x website on your server.

NOTE:

- Since the install package is larger than 2MB, therefore you should increase the “**Maximum size for attached files**” value of your site (“**Administration**” > “**Preferences**” page). We recommend the minimum value of 30 MB.
- After successfully uploading the install package, you can change this parameter back to the initial value.
- You can also contact the host manager to increase the “max_upload_filesize” value of your server to be able to upload larger file.

❖ Upload theme

Follow these steps to install our theme manually:

- Login to your back office and navigate to **Preferences > Themes** and click on “Add new theme”.
- Choose your theme file (imake.zip) from the “theme” folder in the download file and click “Save”.
- Choose the theme you uploaded and click “Use this theme”
- Upload logo: Navigate to “Preferences / Themes”, select and upload your website logo

Bulk actions

Set up image quality that you prefer to use on your website.

IMAGES GENERATION OPTIONS

? JPEG images have a small file size and standard quality. PNG images have a larger file size, a higher quality and support transparency. Note that in all cases the image files will have the .jpg extension.

WARNING: This feature may not be compatible with your theme, or with some of your modules. In particular, PNG mode is not compatible with the Watermark module. If you encounter any issues, turn it off by selecting "Use JPEG".

Image format Use JPEG.
 Use PNG only if the base image is in PNG format.
 Use PNG for all images.

* JPEG compression

* PNG compression

Generate images based on one side of the source image

* Maximum file size of product customization pictures bytes

* Product picture width pixels

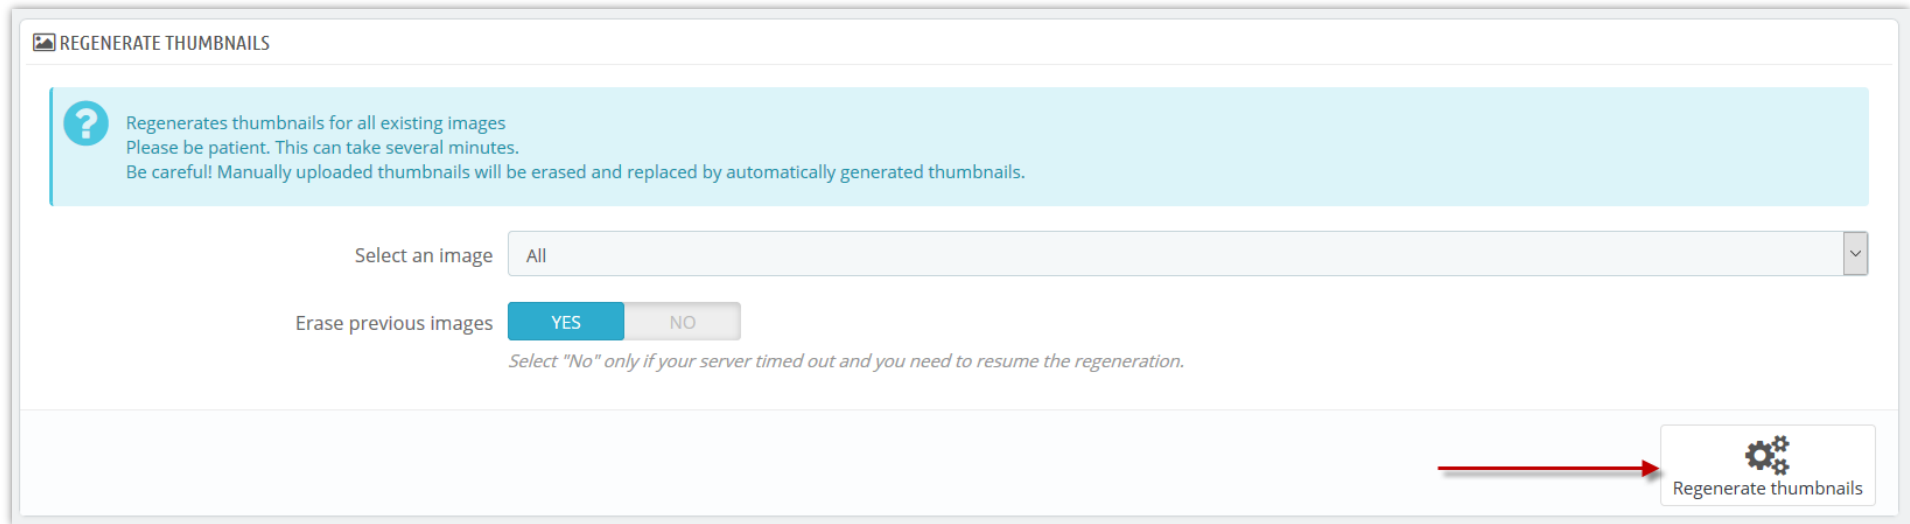

* Product picture height pixels

Generate high resolution images YES NO

Enable to optimize the display of your images on high pixel density screens.

 Save

Regenerate image thumbnails

❖ Module positions

Navigate to “**Modules and services**” / “**Positions**”, here you can see the orders of your modules in each Prestashop hook, check a hook called “Header”, make sure “Theme options” is on the top of the module list.

Header 43 Modules

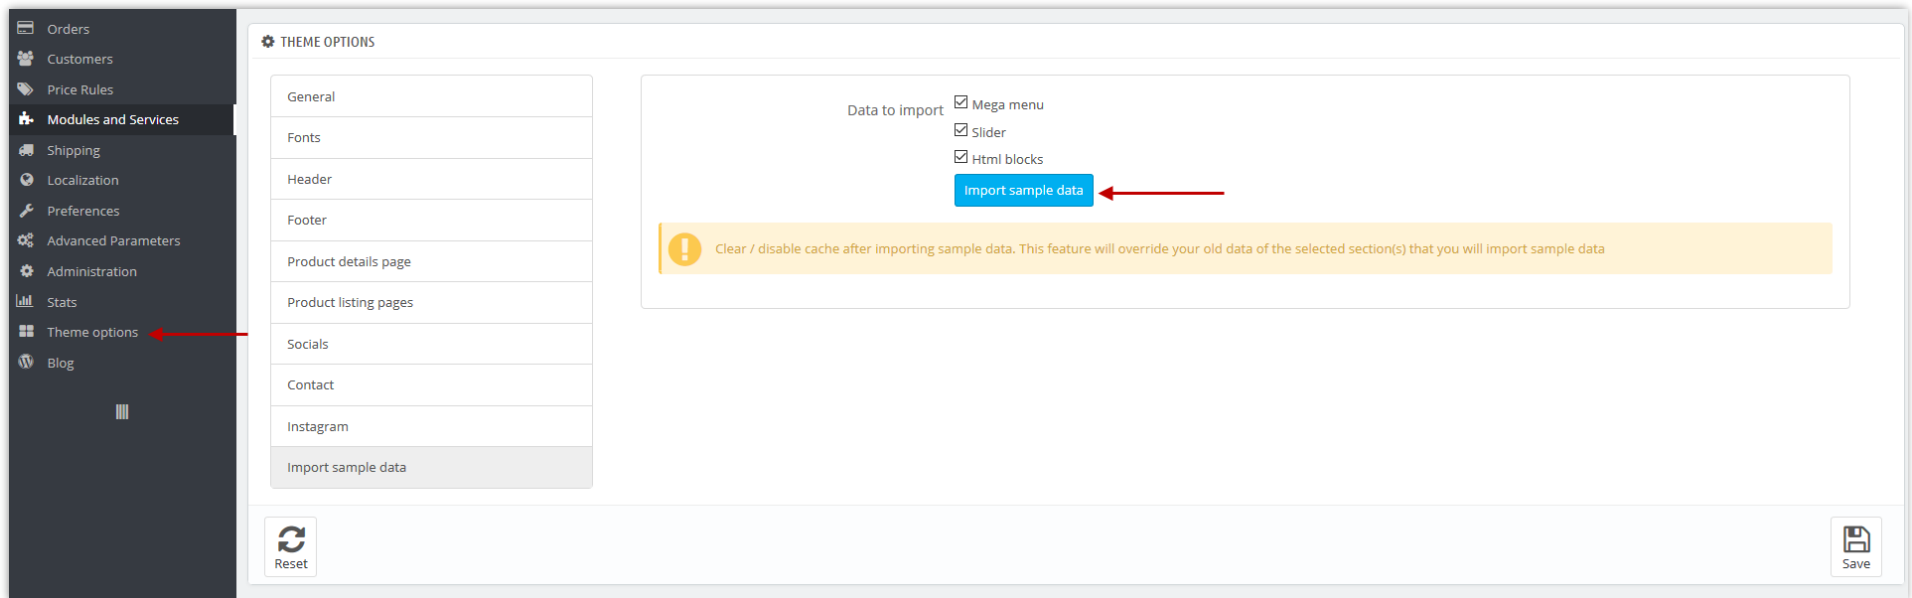

This hook adds additional elements in the head section of your pages (head section of html)

<input type="checkbox"/>	1		Theme options - v1.0 Configure your theme	 Edit
<input type="checkbox"/>	2		Social sharing - v1.4 Displays social sharing buttons (Twitter, Facebook, Google+ and Pinterest) on every product page.	 Edit
<input type="checkbox"/>	3		Banner block - v1.4 Displays a banner at the top of the shop.	 Edit
<input type="checkbox"/>	4		Top-sellers block - v1.8 Adds a block displaying your store's top-selling products.	 Edit
<input type="checkbox"/>	5		Cart block - v1.6 Adds a block containing the customer's shopping cart.	 Edit

IV. IMPORT SAMPLE DATA

You can quickly import our sample data to your Prestashop website to make it the same as our demo website.

Go to **“Theme options / Import sample data”** and choose type of data that you want to import.

Note: This option is recommended when you install the theme on a fresh Prestashop website. Clear your website cache (or turn it off) after importing sample data.

The screenshot displays the 'Theme options' interface in PrestaShop, divided into two main sections: SMARTY and DEBUG MODE.

SMARTY Section:

- Template compilation options:
 - Never recompile template files
 - Recompile templates if the files have been updated
 - Force compilation
- A 'Cache' button is located to the left of the 'Force compilation' radio button.
- Below the radio buttons are three buttons: 'Cache' (light blue), 'YES' (grey), and 'NO' (red).
- A 'Save' button with a floppy disk icon is located in the bottom right corner of this section.

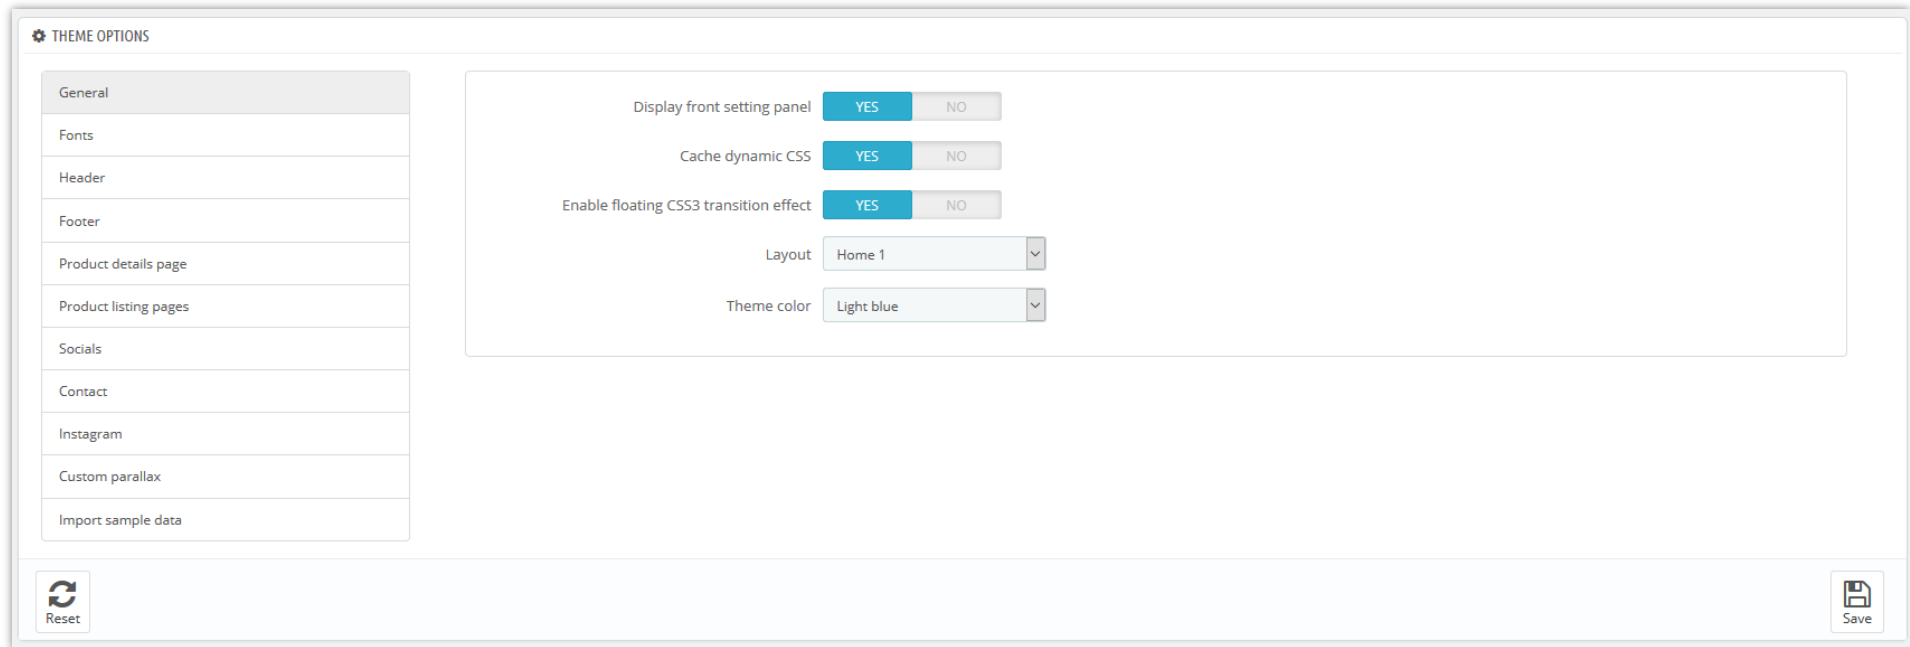

DEBUG MODE Section:

- 'Disable non PrestaShop modules' with 'YES' (grey) and 'NO' (red) buttons.
- 'Disable all overrides' with 'YES' (grey) and 'NO' (red) buttons.
- A 'Save' button with a floppy disk icon is located in the bottom right corner of this section.

V. THEME OPTIONS

This is a powerful Prestashop theme, it offers many useful features that help you to manage the theme easily.

Navigate to **“Theme options”**:

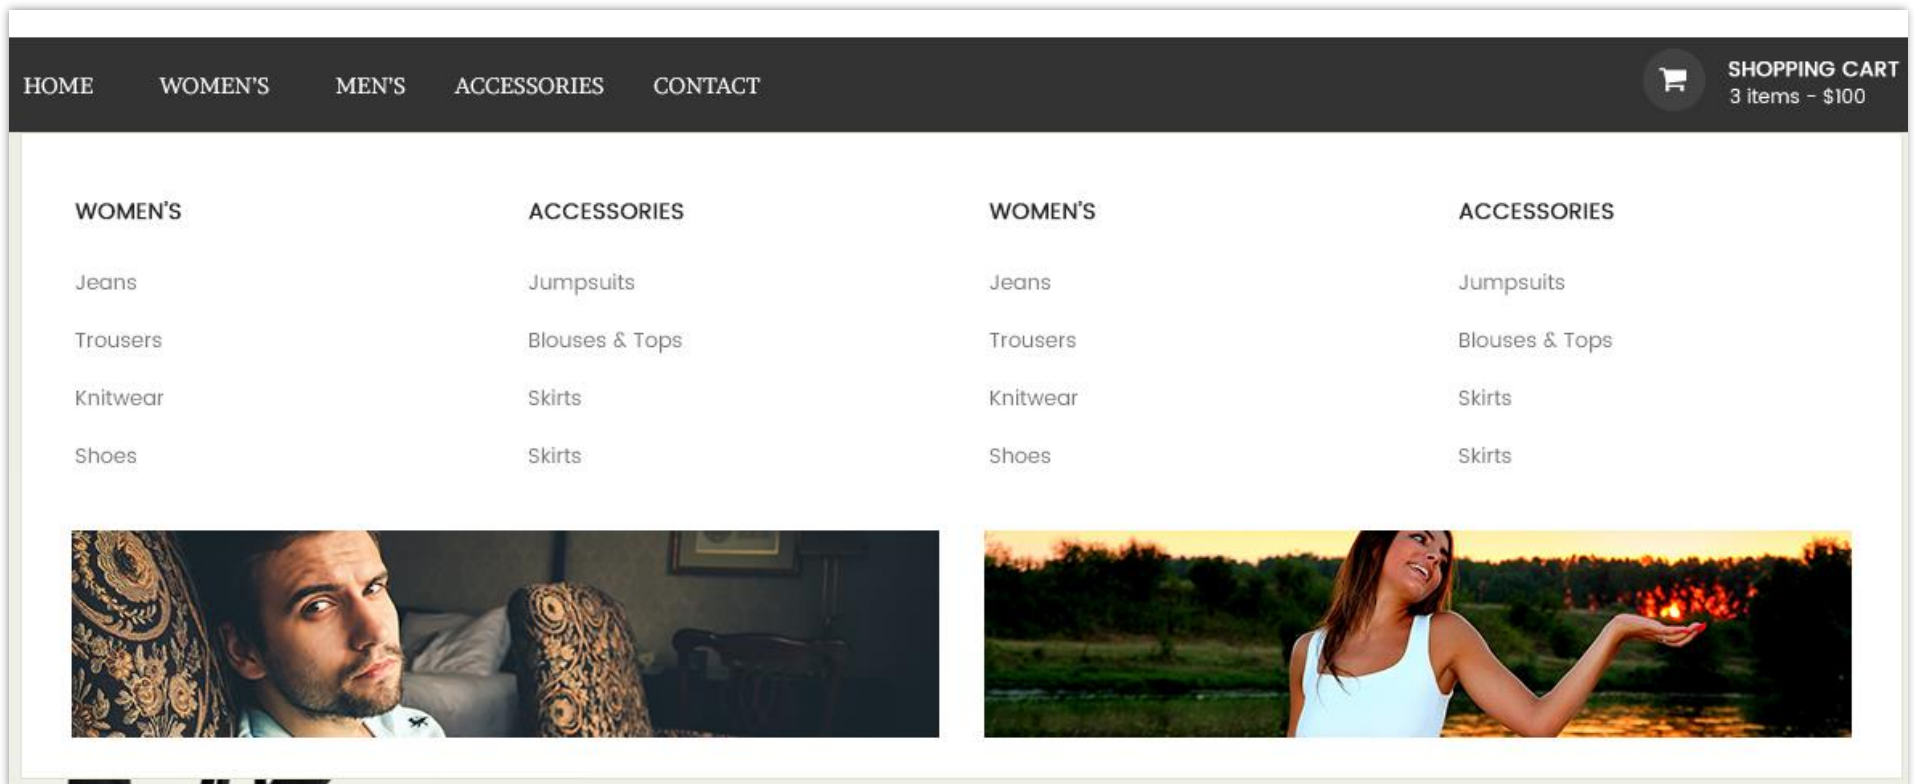

- ❖ After selecting a theme layout, you should reimport sample data to make your website like our live demos then start to replace the images/text by your real data (make sure your image sizes are the same as the sizes of our sample images)
- ❖ You can define your custom color set by selecting “Custom color” from “Theme color”
- ❖ Cache dynamic CSS should be enabled for live website
- ❖ This theme supports Google font, you can setup your custom font as below:

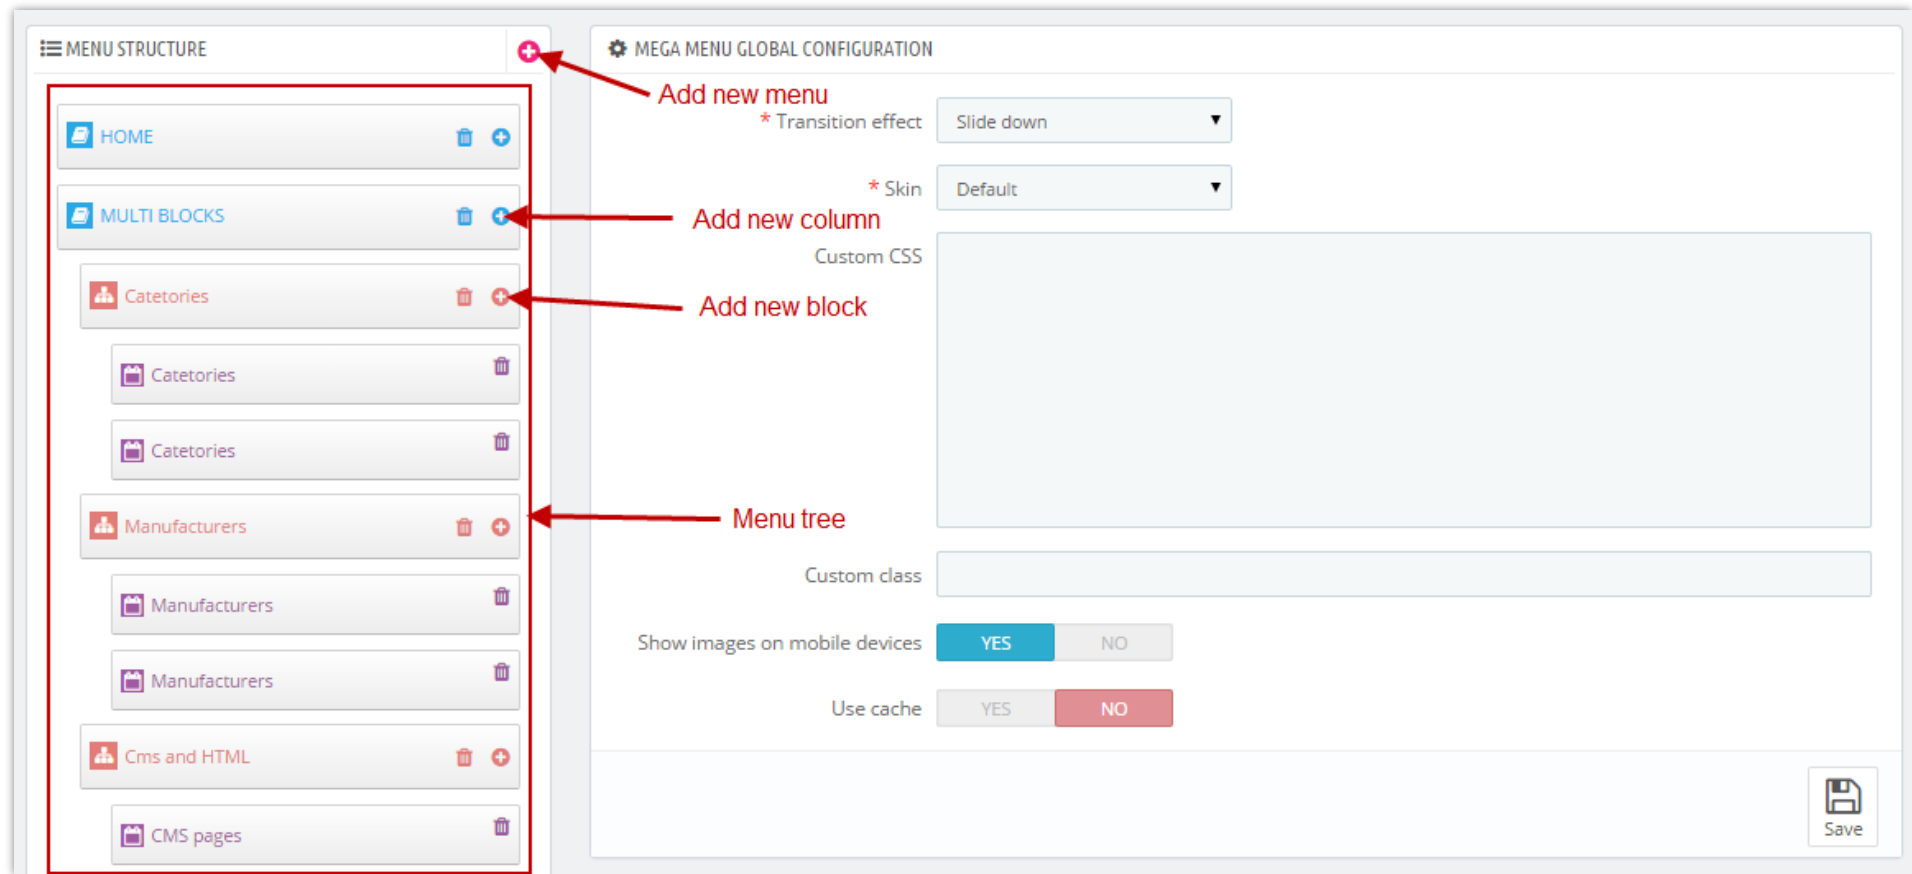

General font name	<input type="text" value="Open Sans"/>
	<i>Leave blank to use default font</i>
General font data	<input type="text" value="https://fonts.googleapis.com/css?family=Open+Sans"/>
<hr/>	
Heading font name	<input type="text"/>
	<i>Leave blank to use default font</i>
Heading font data	<input type="text"/>
<hr/>	
Other font name	<input type="text"/>
	<i>Leave blank to use default font</i>
Other font data	<input type="text"/>

VI. MEGA MENU MODULE

Our mega menu is organized by 3 main elements: menus, columns and blocks which will give you easy and flexible ways to create different types of simple or complex structures for your top menu.

To manage your mega menu, go to “**Modules / Modules and services**” and select “**Rich Mega menu**” from the module list.

Note: if you are transferring your site to new hosting service or domain, the “Use cache” option should be deactivated by selecting the “no” option and should be reactivated once the website is transferred, by selecting the “yes” option. “Use cache” helps to load your site faster when you have a complex menu structure.

VII. BLOG MODULE

With this theme you have one of the most powerful Prestashop blog modules in the market place! You have a separated menu to manage your blog in the backoffice. This menu helps you manage your blog posts, categories, comments, slider, gallery and settings.

Note: Set up your “**notification emails**” from the settings area in the backoffice to receive notification emails when someone comments on one of your blog posts or reports a comment as abused.

**Tip:* To have a link or a menu item to display your blog in the frontend of the website, copy the blog preview link from backoffice and add it to your top mega menu. Settings area gives you many different options for configuring your blog, take some time to check it out.

VIII. HTML WIDGETS

First of all you need to understand what widgets are. Widgets are combinations of text and images placed on specific positions (hooks) of the website. With this theme you can create unlimited widgets and place them in different positions of your website.

Let's take a look at our frontend after the installation of the theme. These are the widgets that are available by default:

Widget 1

Widget 2

To manage widgets, navigate to “**Modules / Modules and services / YBC widgets**”:

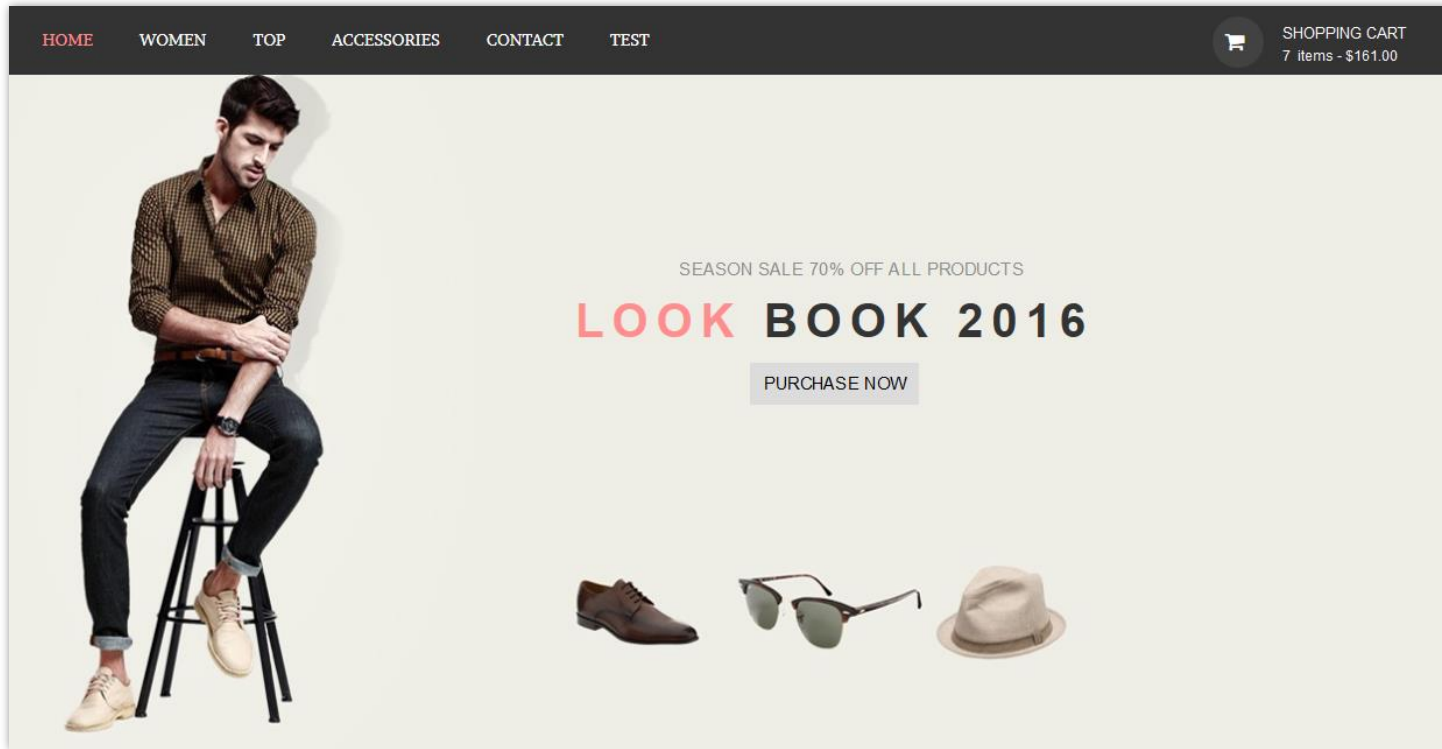

The screenshot displays the 'Configure YBC widgets' interface. At the top, the breadcrumb path is 'Modules and Services / ybc_widget / Configure'. The main title is 'Configure YBC widgets'. In the top right corner, there are four icons: 'Back', 'Translate', 'Check update', and 'Manage hooks'. The interface is organized into several hook categories, each with a list of widgets and their status:

- Hook Top Column:** Contains three widgets: 'banner 1' (checked), 'banner 2' (checked), and 'banner 3' (unchecked).
- Hook Home:** Contains one widget: 'Tesimonials' (checked).
- Hook Top Navigation:** Currently empty.
- Hook Top:** Currently empty.
- Hook Left Column:** Currently empty.
- Hook Right Column:** Currently empty.
- Hook Footer:** Currently empty.
- Hook Custom 1:** Currently empty.
- Hook Custom 2:** Contains four widgets: 'delivery' (checked), 'support' (checked), 'return & exchange' (checked), and 'Paypal checkout' (checked).
- Hook Custom 3:** Contains five widgets: 'Tops' (checked), 'Blouses' (checked), 'T-shirts' (checked), 'Casual Dresses' (checked), and 'Evening Dresses' (checked). 'Summer Dresses' is also listed but its status is not clearly visible.

Note:

- ❖ Uploading images with appropriate size to each widget is necessary because the upload of too large images could break the layout of the theme.
- ❖ Import sample data then replace images/text by your real data to make your site like our demo sites.

IX. HOME SLIDER

To manage the home slider, navigate to “**Modules and services**” then select “**YourBestCode Nivo slider**” from the module list

SLIDES LIST

+  #1 - Season sale 70% off all products Enabled Edit Delete

+  #2 - New product arrivals Enabled Edit Delete

+  #3 - Save up to 20% for al dresses Enabled Edit Delete

X. MANUFACTURERS/BRANDS MODULE

To manage this module, navigate to **“Modules and services”** the select **“YourBestCode manufacturers/brands block”** from the module list
