I. WELCOME

Thank you for purchasing our theme. We hope to guide you through all the aspects of the theme installation and the theme setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

II. SERVER REQUIREMENTS

PHP configuration:

- "memory_limit" need to be at least "64M"
- "upload_max_filesize" need to be at least "16M"
- "allow_url_fopen" need to be set to "on"
- "register_global" should be set to "off"
- "safe_mode" should be set to "off"

Extensions required:

- GD
- cURL

- SimpleXML
- SOAP

File permissions:

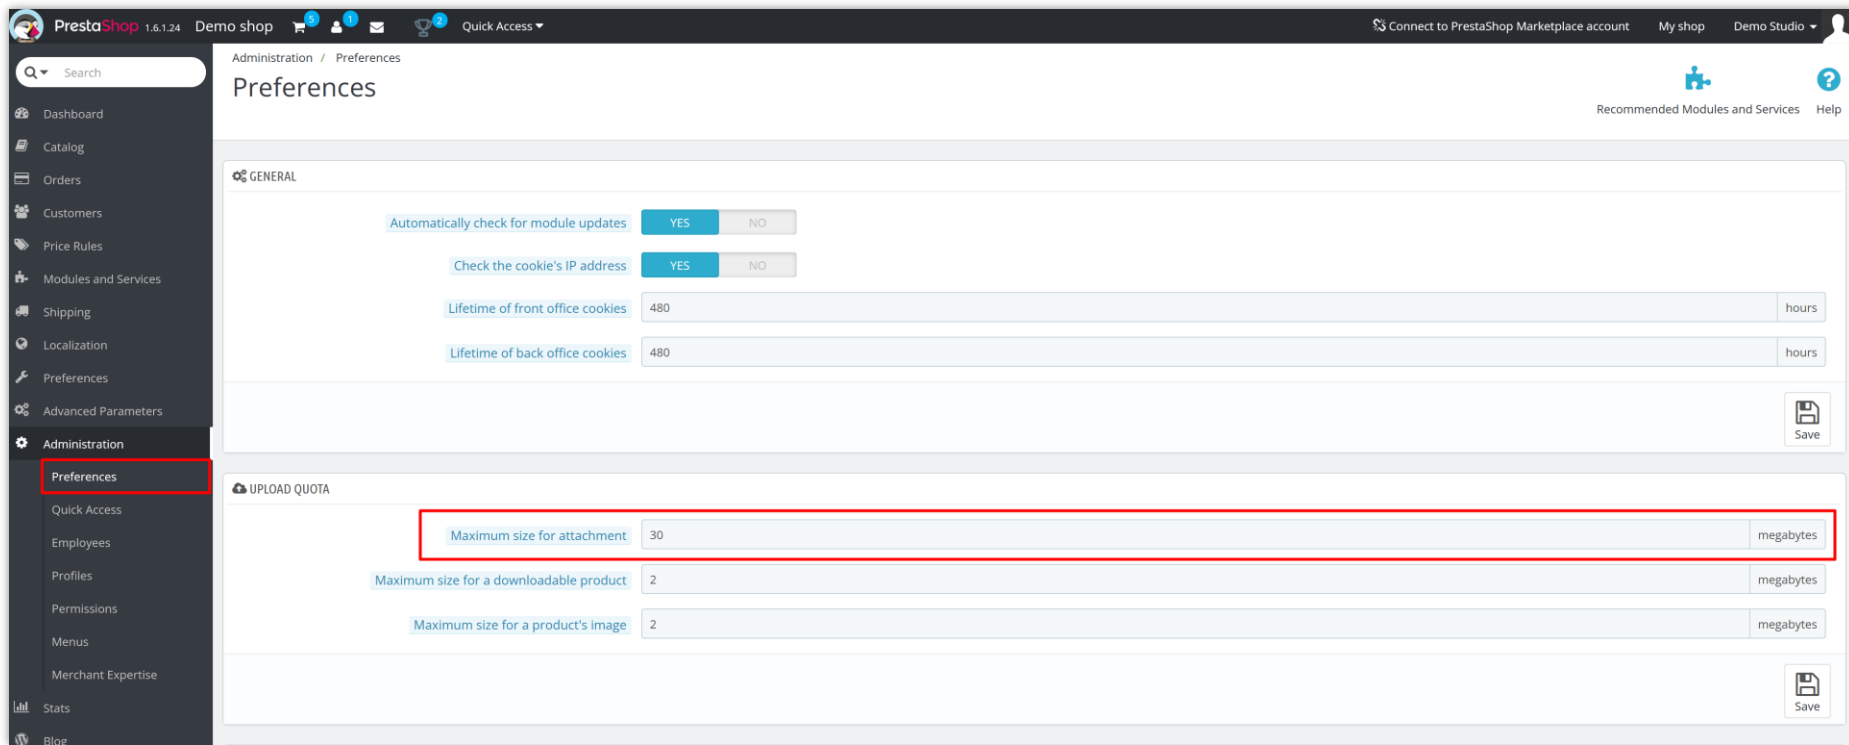

- All files need to be "664"
- All folders need to be "755"

III. INSTALLATION

Before installing the theme, you need to install a Prestashop 1.6.x website on your server.

NOTE:

- Since the install package is larger than 2MB, therefore you should increase the “**Maximum size for attached files**” value of your site (“**Administration**” > “**Preferences**” page). We recommend the minimum value of 30 MB.
- After successfully uploading the install package, you can change this parameter back to the initial value.
- You can also contact the host manager to increase the “max_upload_filesize” value of your server to be able to upload larger file.

Upload theme

Follow these steps to install our theme manually:

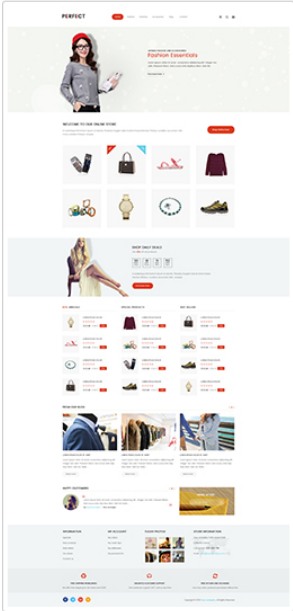

- Login to your back office and navigate to **Preferences > Themes** and click on “Add new theme”.
- Choose your theme file (imake.zip) from the “theme” folder in the download file and click “Save”.
- Choose the theme you uploaded and click “Use this theme”
- Upload logo: Navigate to “Preferences / Themes”, select and upload your website logo

Preferences / Themes

36	m_scene_default	161 px	58 px	✗	✗	✗	✗	✓	Edit

Bulk actions

Set up image quality that you prefer to use on your website.

IMAGES GENERATION OPTIONS

? JPEG images have a small file size and standard quality. PNG images have a larger file size, a higher quality and support transparency. Note that in all cases the image files will have the .jpg extension.

WARNING: This feature may not be compatible with your theme, or with some of your modules. In particular, PNG mode is not compatible with the Watermark module. If you encounter any issues, turn it off by selecting "Use JPEG".

Image format Use JPEG.
 Use PNG only if the base image is in PNG format.
 Use PNG for all images.

* JPEG compression

* PNG compression

Generate images based on one side of the source image

* Maximum file size of product customization pictures bytes

* Product picture width pixels

* Product picture height pixels

Generate high resolution images YES NO

Enable to optimize the display of your images on high pixel density screens.

 Save

Regenerate image thumbnails

 **REGENERATE THUMBNAI**

 Regenerates thumbnails for all existing images
Please be patient. This can take several minutes.
Be careful! Manually uploaded thumbnails will be erased and replaced by automatically generated thumbnails.

Select an image

Erase previous images

Select "No" only if your server timed out and you need to resume the regeneration.

  **Regenerate thumbnails**

❖ **Module positions**

Navigate to “**Modules and services**” / “**Positions**”, here you can see the orders of your modules in each Prestashop hook, check a hook called “Header”, make sure “Theme options” is on the top of the module list.

Header 43 Modules

This hook adds additional elements in the head section of your pages (head section of html)

<input type="checkbox"/>	1		Theme options - v1.0 Configure your theme	<input type="button" value="Edit"/>
<input type="checkbox"/>	2		Social sharing - v1.4 Displays social sharing buttons (Twitter, Facebook, Google+ and Pinterest) on every product page.	<input type="button" value="Edit"/>
<input type="checkbox"/>	3		Banner block - v1.4 Displays a banner at the top of the shop.	<input type="button" value="Edit"/>
<input type="checkbox"/>	4		Top-sellers block - v1.8 Adds a block displaying your store's top-selling products.	<input type="button" value="Edit"/>
<input type="checkbox"/>	5		Cart block - v1.6 Adds a block containing the customer's shopping cart.	<input type="button" value="Edit"/>

IV. IMPORT SAMPLE DATA

You can quickly import our sample data to your Prestashop website to make it the same as our demo website.

Go to **“Theme options / Import sample data”** and choose type of data that you want to import.

The screenshot displays the Prestashop administration interface, specifically the 'THEME OPTIONS' section. On the left, a dark sidebar menu lists various settings categories, with 'Theme options' highlighted and a red arrow pointing to it. The main content area is titled 'THEME OPTIONS' and features a list of settings categories on the left: General, Fonts, Header, Footer, Product details page, Product listing pages, Socials, Contact, Instagram, and Import sample data. The 'Import sample data' option is selected and highlighted in grey. To the right of this list, there is a section for 'Data to import' with three checked options: 'Mega menu', 'Slider', and 'Html blocks'. Below these options is a blue button labeled 'Import sample data', which is pointed to by a red arrow. A yellow warning banner below the button contains an exclamation mark icon and the text: 'Clear / disable cache after importing sample data. This feature will override your old data of the selected section(s) that you will import sample data'. At the bottom of the interface, there are 'Reset' and 'Save' buttons.

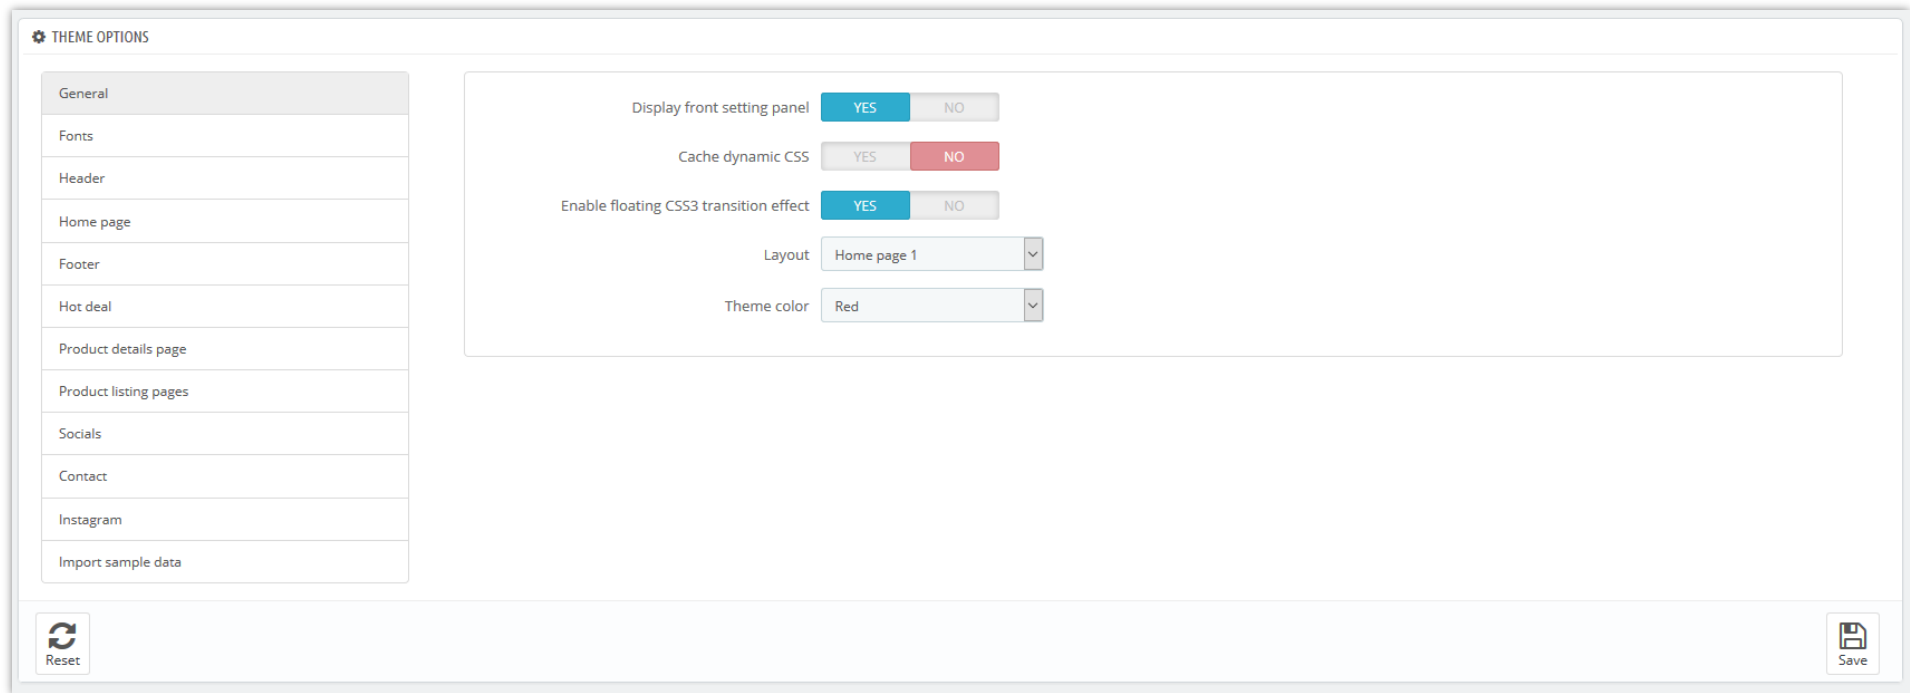

Note: This option is recommended when you install the theme on a fresh Prestashop website. Clear your website cache (or turn it off) after importing sample data.

The screenshot displays the 'Theme options' interface in PrestaShop. It is divided into two main sections: 'SMARTY' and 'DEBUG MODE'.
In the 'SMARTY' section, there are three radio button options for 'Template compilation':
- 'Never recompile template files' (unselected)
- 'Recompile templates if the files have been updated' (unselected)
- 'Force compilation' (selected)
Below these options is a 'Cache' section with three buttons: 'Cache' (highlighted in blue), 'YES', and 'NO'. A red rectangular box highlights the 'Cache', 'YES', and 'NO' buttons.
In the 'DEBUG MODE' section, there are two toggle options:
- 'Disable non PrestaShop modules' with 'YES' and 'NO' buttons.
- 'Disable all overrides' with 'YES' and 'NO' buttons.
Each section has a 'Save' button with a floppy disk icon in the bottom right corner.

V. THEME OPTIONS

This is a powerful Prestashop theme, it offers many useful features that help you to manage the theme easily.

Navigate to **“Theme options”**:

- ❖ After selecting a theme layout, you should reimport sample data to make your website like our live demos then start to replace the images/text by your real data (make sure your image sizes are the same as the sizes of our sample images)
- ❖ You can define your custom color set by selecting “Custom color” from “Theme color”
- ❖ Cache dynamic CSS should be enabled for live website
- ❖ This theme supports Google font, you can setup your custom font as below:

General font name

Leave blank to use default font

General font data

Heading font name

Leave blank to use default font

Heading font data

Other font name

Leave blank to use default font

Other font data

VI. MEGA MENU MODULE

Our mega menu is organized by 3 main elements: menus, columns and blocks which will give you easy and flexible ways to create different types of simple or complex structures for your top menu.

WOMEN'S

[Blouses](#)[Tshirts](#)[Summer Dresses](#)[New Fashion](#)

ACCESSORIES

[Tops](#)[Dresses](#)[Blouses](#)[New Fashion](#)

FASHION

[Fashion](#)[Tshirts](#)[Casual Dresses](#)[New Fashion](#)

BLOUSES

[Blouses](#)[Tshirts](#)[Casual Dresses](#)[Evening Dresses](#)

To manage your mega menu, go to **“Modules / Modules and services”** and select **“Rich Mega menu”** from the module list.

MENU STRUCTURE

- HOME
- MULTI BLOCKS
- Categories
- Categories
- Categories
- Manufacturers
- Manufacturers
- Manufacturers
- Cms and HTML
- CMS pages

MEGA MENU GLOBAL CONFIGURATION

- * Transition effect: Slide down
- * Skin: Default
- Custom CSS
- Custom class
- Show images on mobile devices: YES (selected), NO
- Use cache: YES, NO (selected)
- Save

Annotations:

- Add new menu
- Add new column
- Add new block
- Menu tree

Note: if you are transferring your site to new hosting service or domain, the “Use cache” option should be deactivated by selecting the “no” option and should be reactivated once the website is transferred, by selecting the “yes” option. “Use cache” helps to load your site faster when you have a complex menu structure.

VII. BLOG MODULE

With this theme you have one of the most powerful Prestashop blog modules in the market place! You have a separated menu to manage your blog in the backoffice. This menu helps you manage your blog posts, categories, comments, slider, gallery and settings.

Note: Set up your “**notification emails**” from the settings area in the backoffice to receive notification emails when someone comments on one of your blog posts or reports a comment as abused.

**Tip:* To have a link or a menu item to display your blog in the frontend of the website, copy the blog preview link from backoffice and add it to your top mega menu. Settings area gives you many different options for configuring your blog, take some time to check it out.

VIII. HTML WIDGETS

First of all you need to understand what widgets are. Widgets are combinations of text and images placed on specific positions (hooks) of the website. With this theme you can create unlimited widgets and place them in different positions of your website.

Let's take a look at our frontend after the installation of the theme. These are the widgets that are available by default:

NEW ARRIVALS

 **FADED SHORT SLEEVES T-SHIRT**
☆☆☆☆☆
\$34.00

 **PRINTED CHIFFON DRESS**
☆☆☆☆☆
\$15.50 ~~\$20.60~~ **-\$5.00**

 **PRINTED SUMMER DRESS**
☆☆☆☆☆
\$30.50

 **PRINTED SUMMER DRESS**
☆☆☆☆☆
\$28.98 ~~\$30.61~~ **-\$1.63**

BEST SELLERS

 **BLOUSE**

To manage widgets, navigate to “**Modules / Modules and services / YBC widgets**”:

The screenshot shows the 'Configure' page for 'YBC HTML widgets'. The breadcrumb trail is 'Modules and Services / ybc_widget / Configure'. The page title is 'Configure YBC HTML widgets'. In the top right corner, there are four icons: a back arrow, a flag, a refresh symbol, and an anchor, with labels 'Back', 'Translate', 'Check update', and 'Manage hooks' respectively. The main content area is titled 'WIDGETS' and contains a grid of widget configuration boxes. Each box has a title, a plus icon, and a list of widget instances with a checkmark and a trash icon. The widgets and their instances are: 'Hook Top Column' (Welcome to our online store), 'Hook Home' (empty), 'Hook Top Navigation' (empty), 'Hook Top' (empty), 'Hook Left Column' (empty), 'Hook Right Column' (empty), 'Hook Footer' (empty), 'Big banner in home' (Custom furniture design), 'Tesimonials in home page' (Tesimonials), 'Footer middle' (FREE SHIPPING WORLDWIDE, unlimited customer support, return & exchange), and 'Banner inside slider (home layout 4)' (Apple watch, Nokia Lumia).

Note:

- ❖ Uploading images with appropriate size to each widget is necessary because the upload of too large images could break the layout of the theme.
- ❖ Import sample data then replace images/text by your real data to make your site like our demo sites.

IX. HOME SLIDER

To manage the home slider, navigate to “**Modules and services**” then select “**YourBestCode Nivo slider**” from the module list

Configure
