## I. WELCOME

Thank you for downloading our theme. We hope to guide you through all the aspects of the theme installation and the theme setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

\*"**Pflat**" is compatible with PrestaShop 1.6.x

# II. SERVER REQUIREMENTS

#### **PHP configuration:**

- "memory\_limit" need to be at least "64M"
- "upload\_max\_filesize" need to be at least "16M"
- "allow\_url\_fopen" need to be set to "on"
- "register global" should be set to "off"
- "safe\_mode" should be set to "off"

#### **Extensions required:**

- GD
- cURL
- SimpleXML
- SOAP

#### File permissions:

- All files need to be "664"
- All folders need to be "755"

## III. INSTALLATION

#### NOTE:

- Since the install package is larger than 2MB, therefore you should increase the "Maximum size for attached files" value of your site ("Administration" > "Preferences" page). We recommend the minimum value of 30 MB.
- After successfully uploading the install package, you can change this parameter back to the initial value.
- You can also contact the host manager to increase the "max\_upload\_filesize" value of your server to be able to upload larger file.

Set up image quality that you prefer to use on your website:

MAGES GENERATION OPTIONS							
	PEG images have a small file size and standard quality. PNG images have a larger file size, a higher quality and support transparency. Note that in all cases the image files will have the jpg extension. WARNING: This feature may not be compatible with your theme, or with some of your modules. In particular, PNG mode is not compatible with the Watermark module. If you encounter any issues, turn it off by selecting "Use JPEG".						
Image format 🔘 Usel/PEG.							
5	<ul> <li>Use PNG only if the base image is in PNG format.</li> </ul>						
	O Use PNG for all images.						
* JPEG compression	90						
* PNG compression	7						
Generate images based on one side of the source image	Automatic (longest side)						
* Maximum file size of product customization pictures	8388608	bytes					
* Product picture width	64	pixels					
* Product picture height	64	pixels					
Generate high resolution images	VES NO Enable to optimize the display of your images on high pixel density screens.

To manage your mega menu, go to "*Modules/Modules and services*" and select "*Mega menu PRO*" from the module list.

\*Note: if you are transferring your site to new hosting service or domain, the "Enable cache" option (in "Settings" area) should be deactivated by selecting the "no" option and should be reactivated once the website is transferred, by selecting the "yes" option. "Enable cache" helps to load your site faster when you have a complex menu structure.

#### VII. BLOG MODULE

With this theme you have one of the most powerful Prestashop blog modules in the market place! You have a separated menu to manage your blog in the backoffice. This menu helps you manage your blog posts, categories, comments, slider, gallery and settings.

**\*Note:** Set up your "**notification emails**" from the settings area in the backoffice to receive notification emails when someone comments on one of your blog posts or reports a comment as abused.

**\*Tip:** To have a link or a menu item to display your blog in the frontend of the website, copy the blog preview link from backoffice and add it to your top mega menu. Settings area gives you many different options for configuring your blog, take some time to check it out.
