I. WELCOME

Thank you for downloading our theme. We hope to guide you through all the aspects of the theme installation and the theme setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

*"Camila" is compatible with PrestaShop 1.6.x

II. SERVER REQUIREMENTS

PHP configuration:

- "memory_limit" need to be at least "64M"
- "upload_max_filesize" need to be at least "16M"
- "allow_url_fopen" need to be set to "on"
- "register global" should be set to "off"
- "safe_mode" should be set to "off"

Extensions required:

- GD
- cURL
- SimpleXML
- SOAP

File permissions:

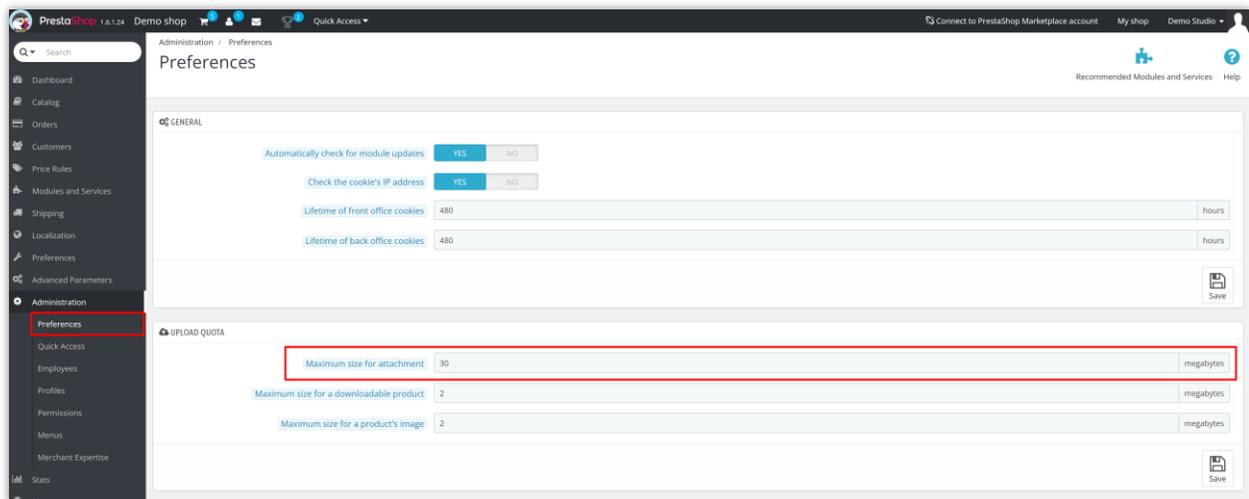

- All files need to be "664"

- All folders need to be "755"

III. INSTALLATION

NOTE:

- Since the install package is larger than 2MB, therefore you should increase the **"Maximum size for attached files"** value of your site (**"Administration"** > **"Preferences"** page). We recommend the minimum value of 30 MB.
- After successfully uploading the install package, you can change this parameter back to the initial value.
- You can also contact the host manager to increase the "max_upload_filesize" value of your server to be able to upload larger file.

Upload theme

Follow these steps to install our theme manually:

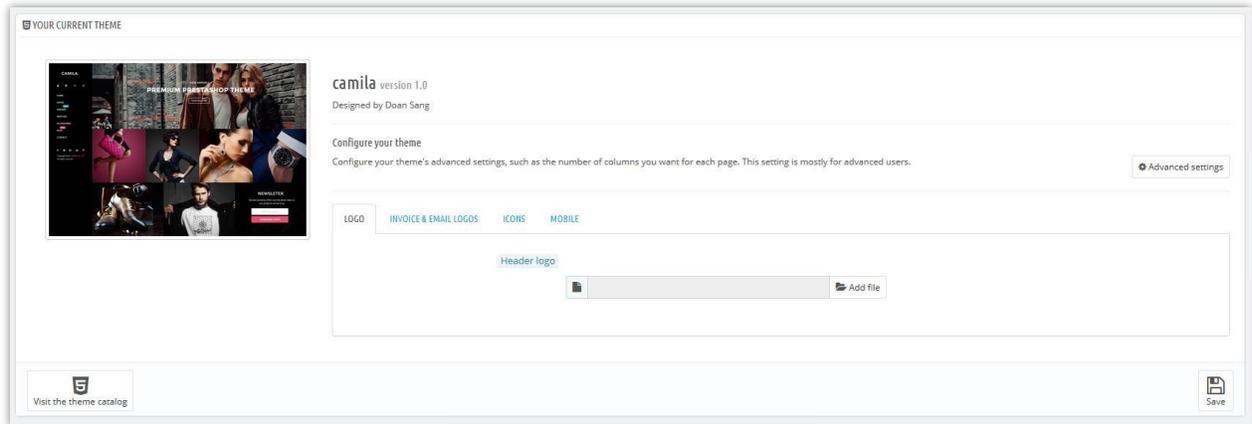

- Login to your back office and navigate to **Design > Theme & logo** and click on **"Add new theme"**.

- From **"IMPORT FROM YOUR COMPUTER"** section, choose your theme file (**camila.zip**) from the **"theme"** folder in the download file and click **"Save"**.

- Choose the theme you uploaded and click **"Use this theme"**

Upload logo

Navigate to **"Design > Themes & Logo"**, select and upload your website logo.

Images

Make sure your image sizes are configured as below:

Navigate to **Design/Image Settings**.

The screenshot shows the 'IMAGE SETTINGS' table with the following data:

| ID | Name | Width | Height | Products | Categories | Brands | Suppliers | Stores | |
|----|------------------|--------|---------|----------|------------|--------|-----------|--------|------|
| 1 | cart_default | 130 px | 162 px | ✓ | ✗ | ✗ | ✗ | ✗ | Edit |
| 2 | small_default | 100 px | 125 px | ✓ | ✓ | ✓ | ✓ | ✗ | Edit |
| 3 | medium_default | 452 px | 565 px | ✓ | ✗ | ✓ | ✓ | ✗ | Edit |
| 4 | home_default | 450 px | 563 px | ✓ | ✗ | ✗ | ✗ | ✗ | Edit |
| 5 | large_default | 800 px | 1000 px | ✓ | ✗ | ✓ | ✓ | ✗ | Edit |
| 6 | category_default | 850 px | 226 px | ✗ | ✓ | ✗ | ✗ | ✗ | Edit |
| 7 | stores_default | 170 px | 115 px | ✗ | ✗ | ✗ | ✗ | ✓ | Edit |

Set up image quality that you prefer to use on your website:

IMAGES GENERATION OPTIONS

? JPEG images have a small file size and standard quality. PNG images have a larger file size, a higher quality and support transparency. Note that in all cases the image files will have the .jpg extension.
 WARNING: This feature may not be compatible with your theme, or with some of your modules. In particular, PNG mode is not compatible with the Watermark module. If you encounter any issues, turn it off by selecting "Use JPEG".

Image format Use JPEG.
 Use PNG only if the base image is in PNG format.
 Use PNG for all images.

* JPEG compression: 90

* PNG compression: 7

Generate images based on one side of the source image: Automatic (longest side)

* Maximum file size of product customization pictures: 8388608 bytes

* Product picture width: 64 pixels

* Product picture height: 64 pixels

Generate high resolution images: YES NO
 Enable to optimize the display of your images on high pixel density screens.

Save

Regenerate image thumbnails:

REGENERATE THUMBNAILS

? Regenerates thumbnails for all existing images
 Please be patient. This can take several minutes.
 Be careful! Manually uploaded thumbnails will be erased and replaced by automatically generated thumbnails.

Select an image: All

Erase previous images: YES NO
 Select "No" only if your server timed out and you need to resume the regeneration.

Regenerate thumbnails

Module positions

Navigate to "Modules and services" / "Positions", here you can see the orders of your modules in each PrestaShop hook, check a hook called "Header", make sure "Theme options" is on the top of the module list:

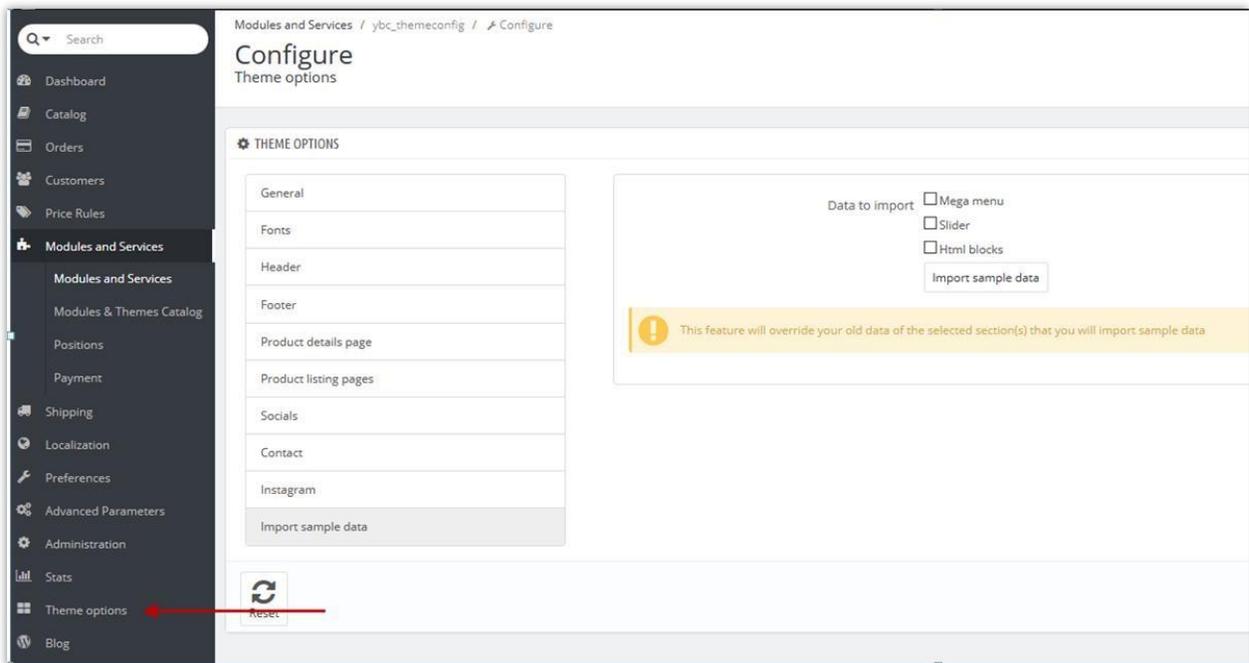

Header 43 Modules

This hook adds additional elements in the head section of your pages (head section of html)

| | | | | |
|--------------------------|---|--|---|------|
| <input type="checkbox"/> | 1 | | Theme options - v1.0 Configure your theme | Edit |
| <input type="checkbox"/> | 2 | | Social sharing - v1.4 Displays social sharing buttons (Twitter, Facebook, Google+ and Pinterest) on every product page. | Edit |
| <input type="checkbox"/> | 3 | | Banner block - v1.4 Displays a banner at the top of the shop. | Edit |

IV. IMPORT SAMPLE DATA

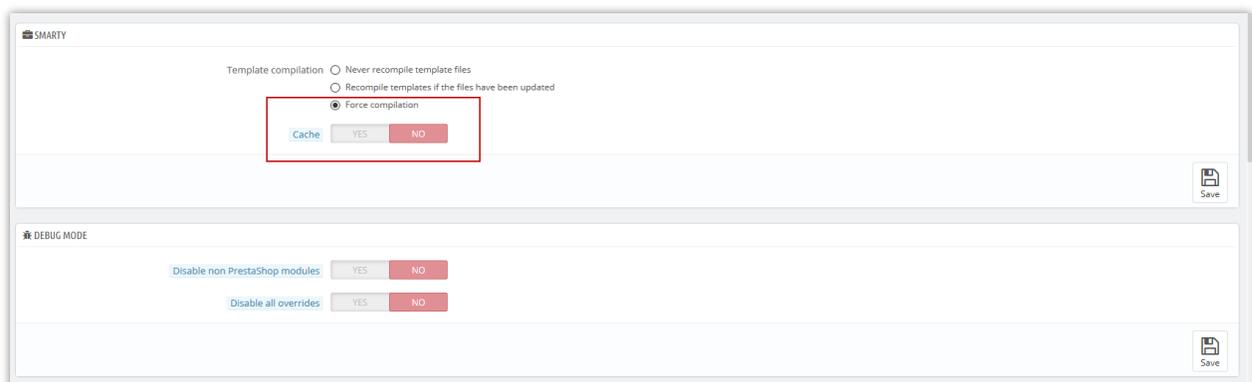

You can quickly import our sample data to your PrestaShop website to make it the same as our demo websites. Navigate to “**Modules / Modules & Services**”, select Installed modules tab, search for “**Theme options**” module and click “**Configure**”.

Click “**Import sample data**” then select type of data that you want to import.

Note: This option is recommended when you install the theme on a fresh PrestaShop website.

Clear your website cache (or turn it off) after importing sample data.

V. THEME OPTIONS

This is a powerful PrestaShop theme, it offers many useful features that help you to manage the theme easily.

Navigate to **“Theme options”**:

THEME OPTIONS

General

Fonts

Header

Footer

Product details page

Product listing pages

Socials

Contact

Import sample data

Display front setting panel YES NO

Cache dynamic CSS YES NO

Enable floating CSS3 transition effect YES NO

Theme color

Reset Save

- After selecting a theme layout, you should reimport sample data to make your website like our live demos then start to replace the images/text by your real data (make sure your image sizes are the same as the sizes of our sample images)
- You can define your custom color set by selecting **“Custom color”** from **“Theme color”**
- Cache dynamic CSS should be enabled for live website
- This theme supports Google font, you can setup your custom font as below:

General font name
Leave blank to use default font

General font data

Heading font name
Leave blank to use default font

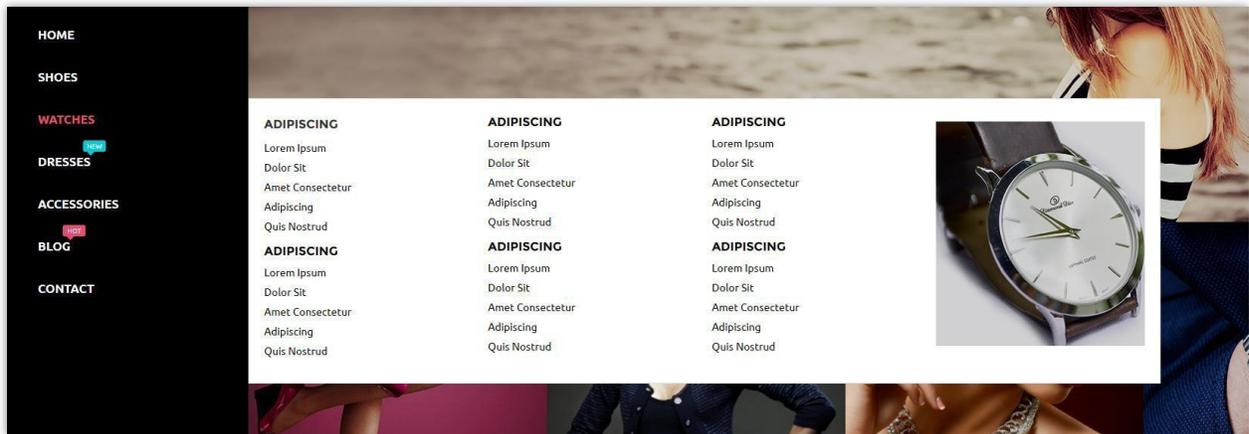

Heading font data

Other font name
Leave blank to use default font

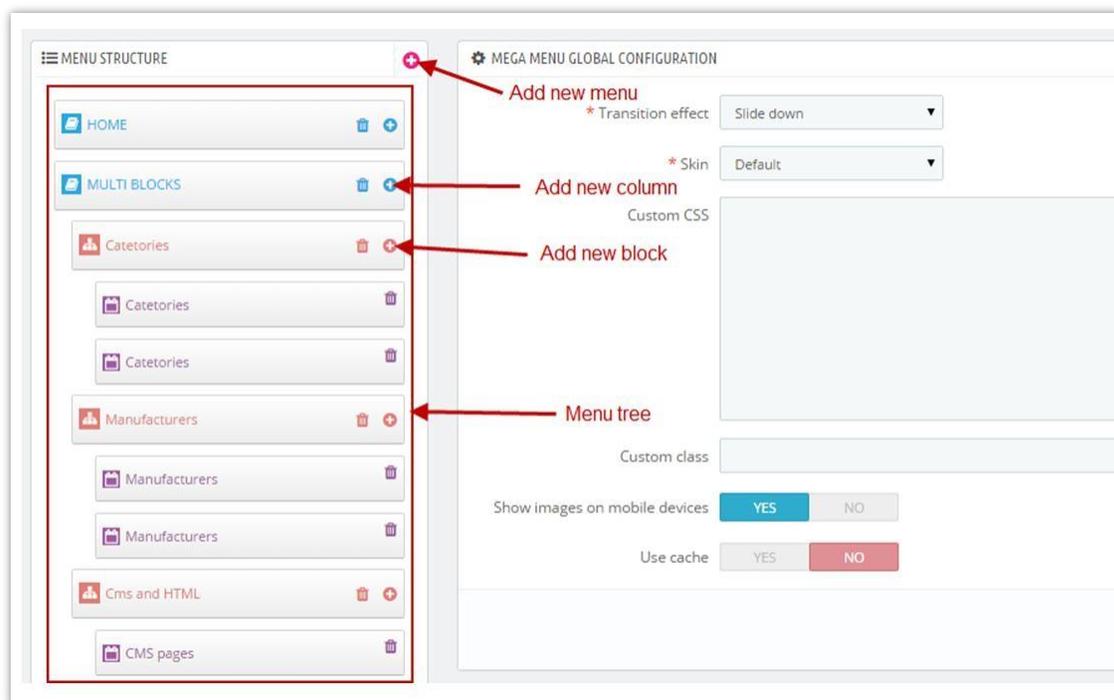

Other font data

VI. MEGA MENU MODULE

Our mega menu is organized by 3 main elements: menus, columns and blocks which will give you easy and flexible ways to create different types of simple or complex structures for your top menu.

To manage your mega menu, go to **“Modules / Modules and services”** and select **“Mega menu PRO”** from the module list.

****Note:** if you are transferring your site to new hosting service or domain, the “**Enable cache**” option (in “**Settings**” area) should be deactivated by selecting the “**no**” option and should be reactivated once the website is transferred, by selecting the “**yes**” option. “**Enable cache**” helps to load your site faster when you have a complex menu structure.*

VII. BLOG MODULE

With this theme you have one of the most powerful PrestaShop blog modules in the market place! You have a separated menu to manage your blog in the back office. This menu helps you manage your blog posts, categories, comments, slider, gallery and settings.

****Note:** Set up your “**notification emails**” from the settings area in the back office to receive notification emails when someone comments on one of your blog posts or reports a comment as abused.*

****Tip:** To have a link or a menu item to display your blog in the frontend of the website, copy the blog preview link from back office and add it to your top mega menu. Settings area gives you many different options for configuring your blog, take some time to check it out.*

VIII. HOME SLIDER

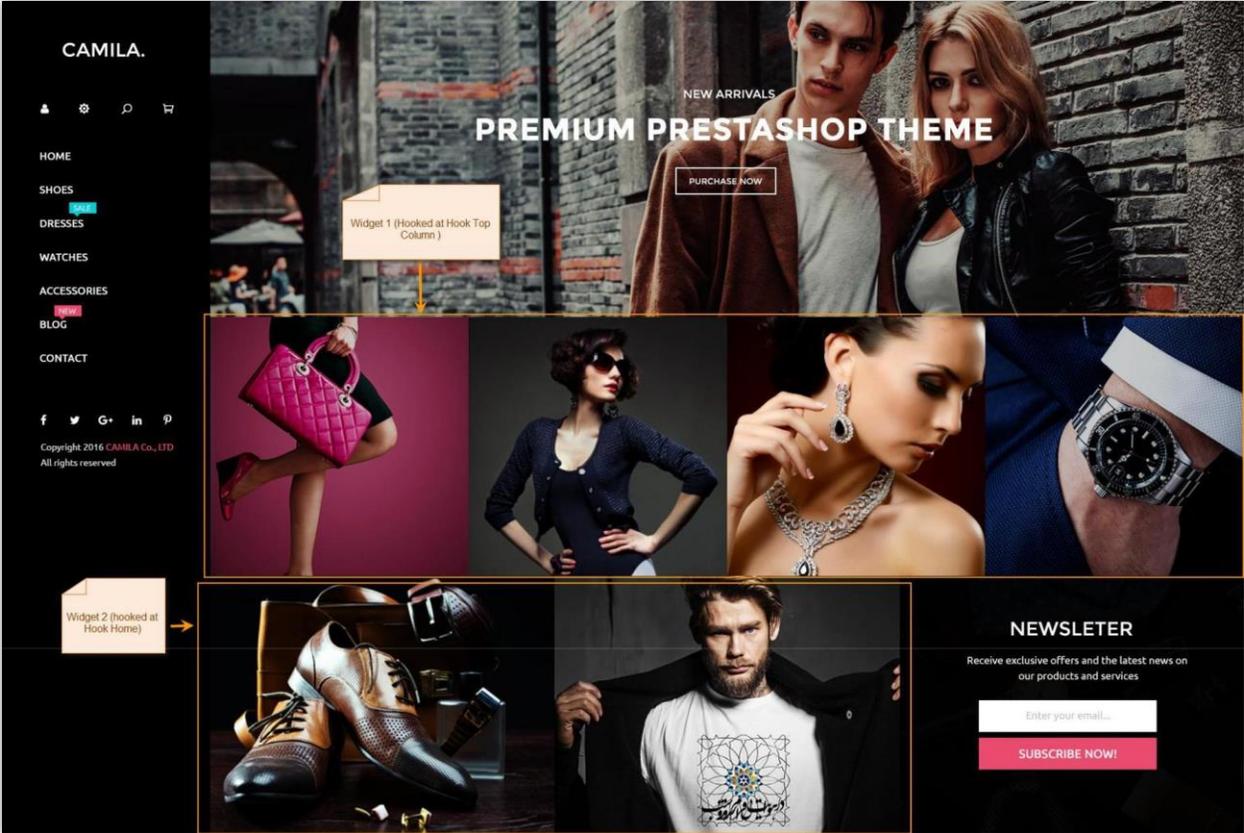

To manage the home slider, navigate to **Modules / Modules and Services / Installed modules** then select "**Multi-layer slider PRO**" from the module list.

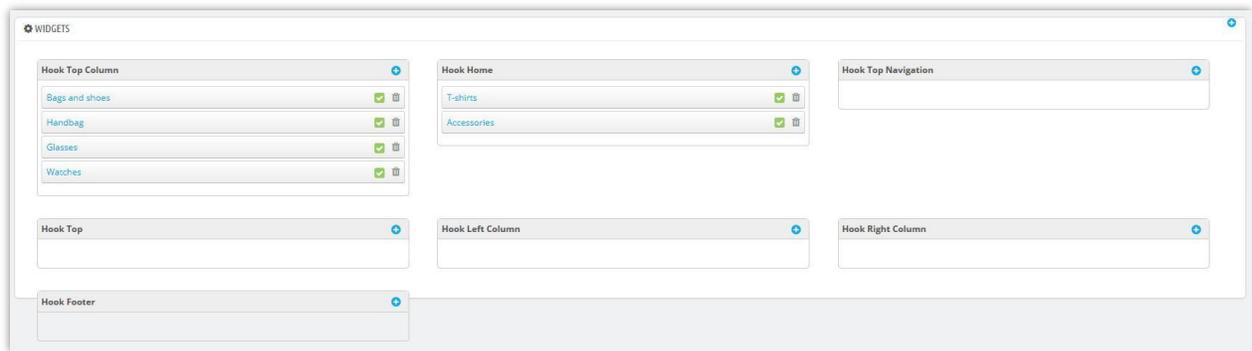

IX. HTML WIDGET

First of all, you need to understand what widgets are. Widgets are combinations of text and images placed on specific positions (hooks) of the website. With this theme you can create unlimited widgets and place them in different positions of your website. Let's take a look at our frontend after the installation of the theme. These are the widgets that are available by default:

To manage widgets, navigate to “**Modules and services / HTML Widgets**”:

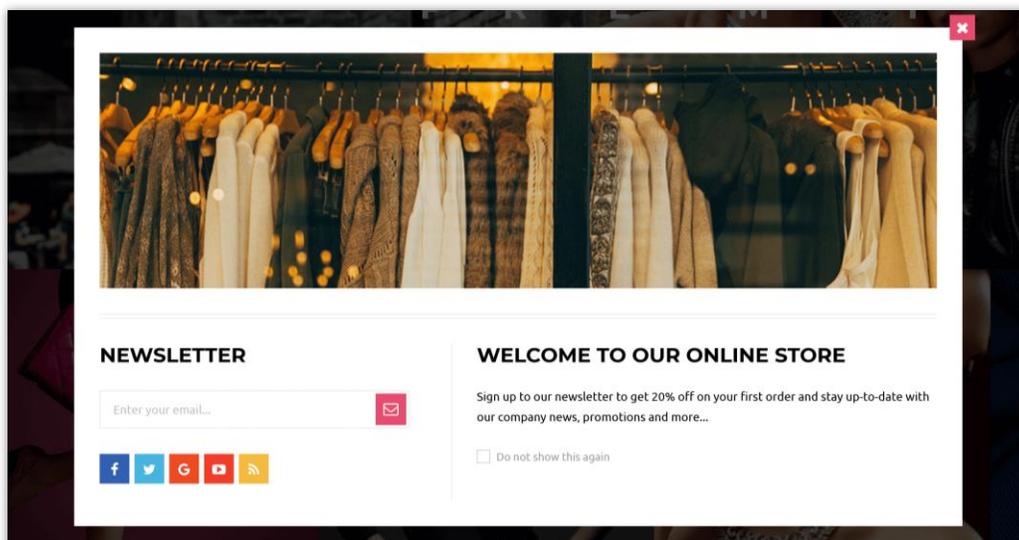

*Note:

- *Uploading images with appropriate size to each widget is necessary because the upload of too large images could break the layout of the theme.*
- *Import sample data then replace images/text by your real data to make your site like our demo sites.*

X. NEWSLETTER POPUP

This theme comes with a professional newsletter popup module which has advanced options that offer you many ways of customizing the look of the popup.

To make customization to the newsletter popup, navigate to “**Modules and services**” then select “**Responsive Newsletter Popup**”.
