I. WELCOME

Thank you for downloading our product. We hope to guide you through all the aspects of the module installation and the module setup within this document (All screenshots are taken from Prestashop 1.7). But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

II. INTRODUCTION

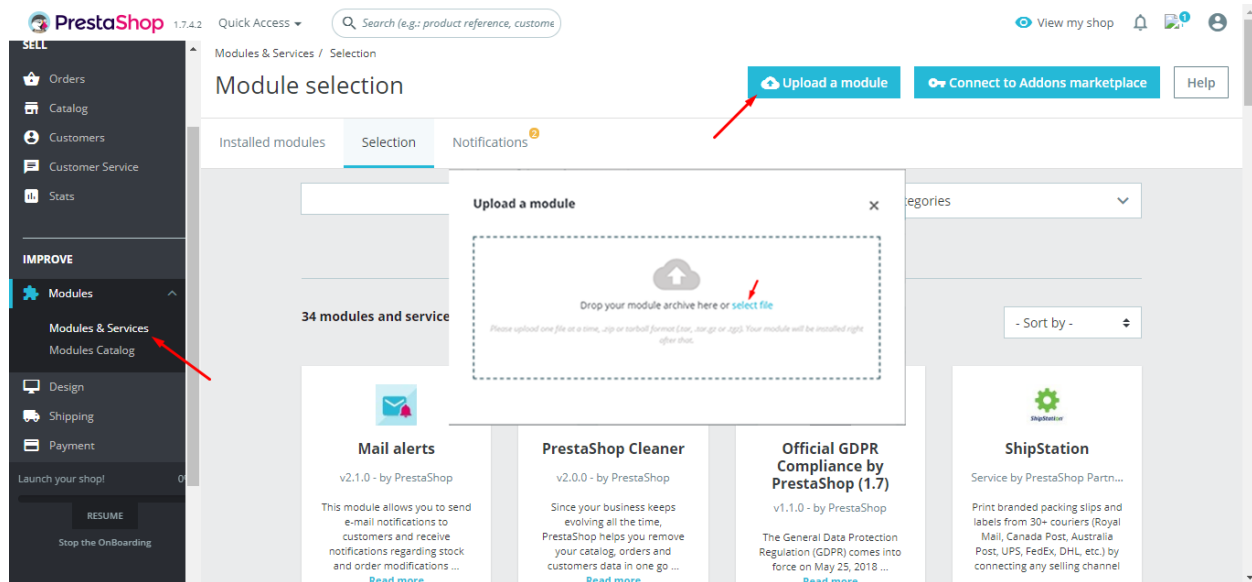

Upgrading your website to a new version of Prestashop can be a daunting and stressful experience, but it doesn't need to be. Moreover, it isn't particularly difficult to move your entire e-commerce to a different website. That said, there are a number of factors to take into account and a procedure to follow in a set order to avoid problems with your stores.

We've created a **Prestashop Migrator Free** module that will help you migrate or upgrade your website to the latest version in a few clicks. No more worries about complicated and difficult processes, with **Prestashop Migrator Free**, everything will be simple and easy!

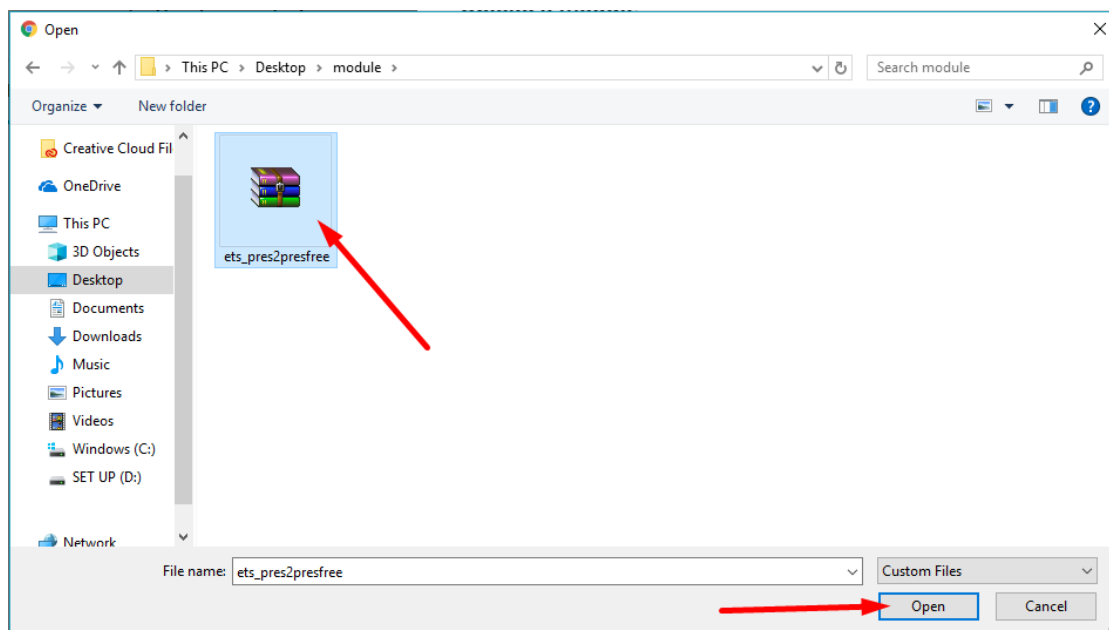

* *“Prestashop Migrator Free” is compatible with Prestashop 1.6.x and Prestashop 1.7.x*

III. INSTALLATION

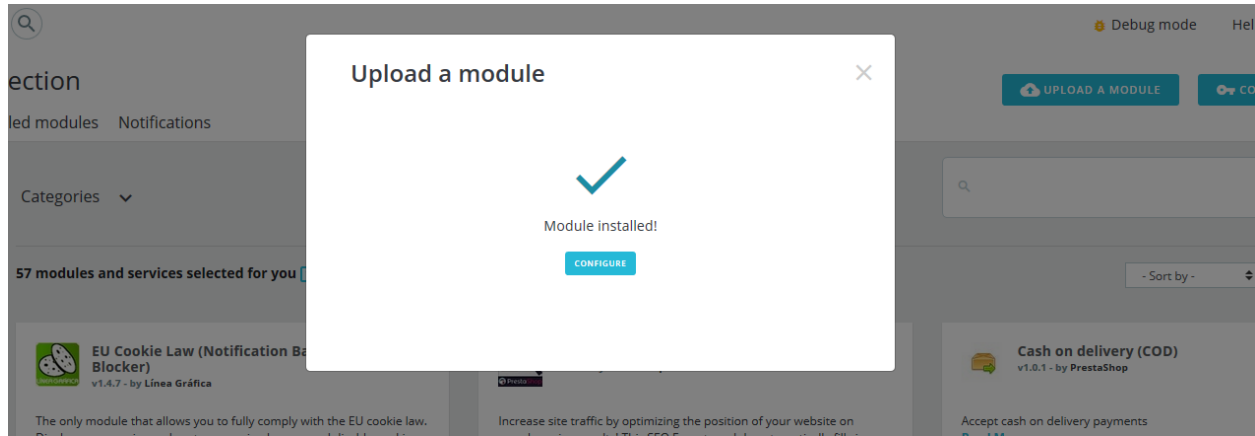

1. Navigate to “**Modules / Modules & Services**”, click on “**Upload a module / Select file**”

2. Select the module file “**ets_livechat_free.zip**” from your computer then click on “**Open**” to install

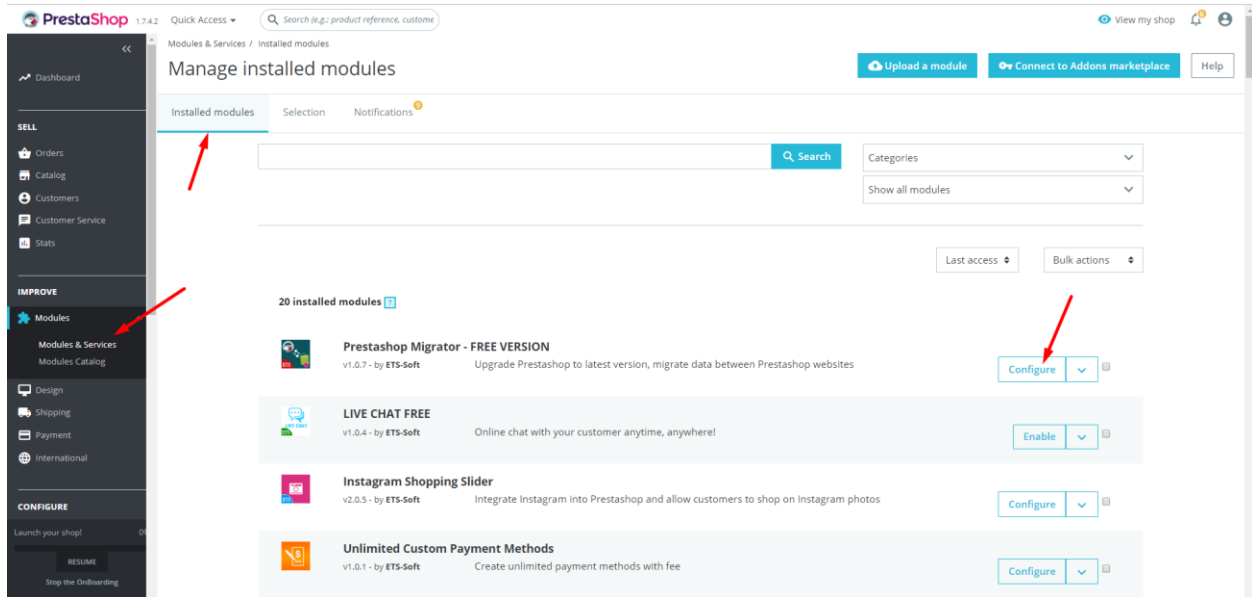

- ❖ Click on “**Configure**” button of the module you just installed to open the module’s configuration page.

IV. CONFIGURATION

From your installed module list (Located at “**Modules/Modules & services/Installed modules**”), find “**Prestashop Migrator – Free version**” then click on the “**Configure**” button to open its configuration page.

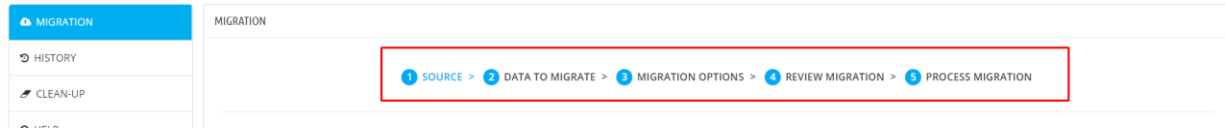

From **Configuration** page, you will see these tabs below which will be used to manage Prestashop Migrator Free:

- ❖ Migration
- ❖ History
- ❖ Clean-up
- ❖ Help

1. Migration

The migration process includes 5 steps and they are displayed in the top area of this tab.

❖ Step 0: Download Prestashop connector module

Before getting started with the migration, please download **Prestashop Connector module** and install the module on the **source** Prestashop website (the download link is given in the bottom of this tab).

This connector module will give you "Connector URL" and "Secure access token" (or data file) that is required.

DIRECT MIGRATION

Enable Direct migration ☒ YES ☐ NOConnector URL http://web.prestahero.com/.../modules/ets_pres2presconnector/connector.phpSecure access token [Generate](#)

Save

Copy "Connector URL" and
"Secure access token"

You can also download entire website data from **source** Prestashop website then importing into **destination** website.

DOWNLOAD ENTIRE DATA FOR MIGRATION

Besides direct migration using "Secure access token", you can also download entire website data from Source Prestashop website then importing the data into Target Prestashop website using Prestashop Migrator module

[Download](#)

❖ Step 1: Select source data

You can choose between 3 types of source data to prepare for migration.

- *Use connector URL:* In the destination website, paste connector URL and secure access token received from above and click "Next".

5 PROCESS MIGRATION

Source type

Connector URL*

Secure access token*

Before getting started with the migration, please download [Prestashop Connector](#) module and install the module on source Prestashop website. This Connector module gives you "Connector URL" and "Secure access token" (or data file) that is required above

[Back](#)
[Next](#)

- *Upload data file from computer:* select the compressed file downloaded in **Step 0** then click "Next".

MIGRATION

1 SOURCE > 2 DATA TO MIGRATE > 3 MIGRATION OPTIONS > 4 REVIEW MIGRATION > 5 PROCESS MIGRATION

Source type

Select data file* [Choose file](#)

? Before getting started with the migration, please download **Prestashop Connector** module and install the module on source Prestashop website. This Connector module gives you "Connector URL" and "Secure access token" (or data file) that is required above

[Back](#) [Next](#)

- *Upload data file from URL:* if you store your data in other storing website, please enter the URL of data file then click “Next”.

MIGRATION

1 SOURCE > 2 DATA TO MIGRATE > 3 MIGRATION OPTIONS > 4 REVIEW MIGRATION > 5 PROCESS MIGRATION

Source type

Enter data file URL* **Paste the data URL here**

? Before getting started with the migration, please download **Prestashop Connector** module and install the module on source Prestashop website. This Connector module gives you "Connector URL" and "Secure access token" (or data file) that is required above

[Back](#) [Next](#)

Prestashop Migrator Free will load and check the data package. You can change data source before proceeding to **Step 2**.

❖ Step 2: Select type of data to migrate

Prestashop Migration Free supports 3 kinds of data to import to your website.

To transfer every data types to the target website, please purchase the premium version of this module.

Click “Next” to continue.

❖ Step 3: Migrate options

(1) Select *Default supplier* and *Default manufacturer*.

(2) Delete data before migrating: if you enable this option, the old data in your database which has same type with migration data selected in **Step 2** will be deleted.

(3) Force all ID number: enable this option to keep the ID number of source website's items.

(4) Regenerate password for new customers:

- If you turn on this feature, a password file with all new plain passwords can be downloaded when you complete the migration.
- If you choose to keep the password as before, you will need to install **“Prestashop Password Keeper”** module in the **source** website. The download link is included in this tab.

(5) Copy the highlighted `_COOKIE_KEY_` .

MIGRATION

1 SOURCE > 2 DATA TO MIGRATE > 3 MIGRATION OPTIONS > 4 REVIEW MIGRATION > 5 PROCESS MIGRATION

Default Supplier: None

Default manufacturer: None

Delete data before migrating: YES NO

Force all ID numbers: YES NO

Regenerate password for new customers: YES NO

Enable this option will delete the same kinds of data (that you are migrating) on your website before importing new data so make sure you want to do that

Keep ID numbers (such as product ID, customer ID, etc) of source website.

You will need to install [“Prestashop Password Keeper”](#) module and configure the module with `_COOKIE_KEY_` string of the source website. Refer to user guide document for more details.

`_COOKIE_KEY_` of source website: **b7frK2wEhrBbg94PTpEpnwx1gfziN4JR4a3UfG22FUTtEpKWORUX4vB**

Copy and store this cookie key to recover passwords in later steps

Back Next

(6) Back to the **source** website. After installing password keeper module, please enter the `_COOKIE_KEY_` and click “Save”.

Configure

Prestashop Password Keeper

1	<ul style="list-style-type: none">Categories: 9 /9 (Completed)Products: 0 /19 (Waiting)Customers: 5 /5 (Completed) <p>_COOKIE_KEY_ of source website: b7frX2wEhrBbg94PTtPEpnwx1gfcN4R4a3UfG22FUTtEpKWORUX4vB Install "Prestashop Password Keeper" to recover customer passwords</p>	2018-10-18 07:48:17	Restart migration Delete

- Restart migration: You can restart the migration process and adjust the selected data.
- Delete: erase information about migration process.

3. Clean-up

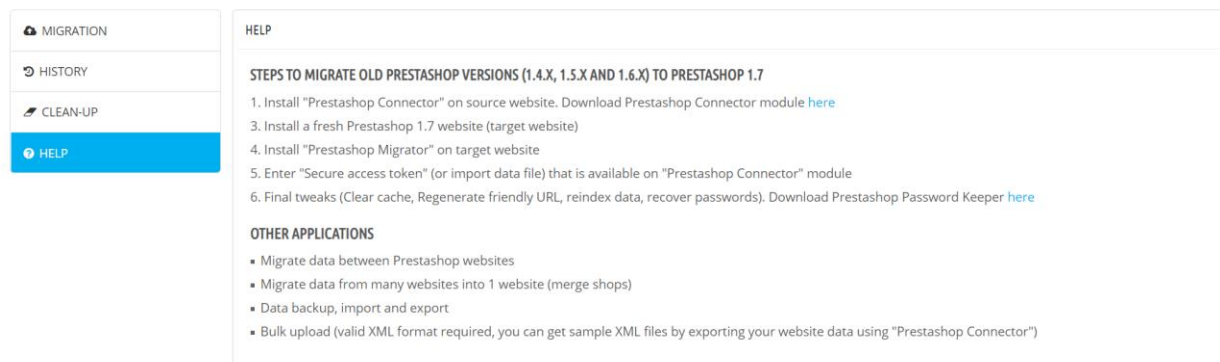

If you have a large number of migration history, you can head to **“Clean-up”** tab to clear these records and save your hosting disk space.

Select the time range from drop down menu then click **“Clear”**.

4. Help

You can find some useful notes to migrate old Prestashop versions (1.4, 1.5 and 1.6) to Prestashop 1.7 here and other applications of this module.

V. THANK YOU

Thank you again for downloading our product and going through this documentation. We hope this document is helpful and efficient in the complete setup of your website.

If you do have any questions for which the answer is not available in this document, please feel free to contact us.
