I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. If you have any questions that are beyond the scope of this documentation, please feel free to contact us.

***Note:**

Most of the instruction screenshots are taken from PrestaShop 1.7, but installing and configuring this module on PrestaShop 1.5 and 1.6 are similar.

II. INTRODUCTION

You are intending to upgrade your store from PrestaShop 1.5, 1.6, or older versions of PrestaShop 1.7 to the latest release of PrestaShop 8 using a migration tool? Wait! That's not the right way to do that! Why use migration tools (that only migrate your data with the risk of losing data, require a lot of time, and are very complicated) when you can directly upgrade your store to PrestaShop 8 in just 1-click?

1-Click Direct Upgrade is a fast, stable, reliable, and secure upgrade tool to upgrade PrestaShop to 8. And we guarantee that you will get a 100% refund if no success when using this module.

With **1-Click Direct Upgrade**, your online store will always stay up-to-date with the latest PrestaShop version!

III. INSTALLATION

"1-click Direct Upgrade" can be installed in one click as other standard PrestaShop modules. Follow the steps below to install this module on your website:

1. In your website back office, navigate to "**Modules > Modules Manager**"
2. Click on "**Upload a module**", select the module installation file (**ets_upgrade.zip**) then upload the module.
3. On the module listing page, click on "**Install**" button of the module you just uploaded and install it.
4. You're done! Click on the "**Configure**" button to navigate to module working area.

Below are screenshots from the **Modules** page on PrestaShop 1.6, and PrestaShop 1.7:

IV. DIRECTLY UPGRADE TO PRESTASHOP 8

Before upgrading, please make sure that you have manually made a full backup of your website (both files and MySQL database). You can use them to restore your website to the original version in case there are unexpected problems with the rollback.

After opening **1-Click Direct Upgrade** configuration page, please follow these steps to upgrade your website:

Step 1: This module will automatically detect your current PrestaShop version and the latest PrestaShop version available. Click on **“Upgrade now”** button.

Step 2:

- ✓ You can check the comparison between your current PrestaShop version with the latest PrestaShop version.
- ✓ Click “**Advanced settings**” button to open the advanced settings options area.
- ✓ **Select PrestaShop version to upgrade: 1-Click Direct Upgrade** can directly upgrade:
 - PrestaShop 8 to the latest version of PrestaShop 8
 - PrestaShop 1.7 to the latest version of PrestaShop 1.7
 - PrestaShop 1.6 to the latest version of PrestaShop 1.7
 - PrestaShop 1.6 to the minor version of PrestaShop 1.6
 - PrestaShop 1.5 to the latest version of PrestaShop 1.7
 - PrestaShop 1.5 to the latest version of PrestaShop 1.6
 - PrestaShop 1.5 to the minor version of PrestaShop 1.5

- ✓ You can roll back (restore) to the previous PrestaShop version at any time using **Rollback URL and rollback key**. Please save this information to use later.
- ✓ Click on “Yes, I have made a full backup manually” checkbox.
- ✓ Click “Start upgrade” button.

1-Click Direct Upgrade

Keep your store up-to-date with latest Prestashop official version

Your store will be upgraded to **8.1.3**

Current version: 1.7.8.0 [View more](#)

Rollback information

During or after the upgrade process, you can always rollback to your previous version using rollback URL & access key below. Copy and store the URL & the key somewhere in case you need to rollback to the old version of your website.

Rollback URL : http://localhost/prestashop_1.7.8.0/admin861gmhxze/ets_upgrade/rollback.php

Access key : **1714fecb676605accdecf331aea8eb21**

⚠ Before upgrading, please make sure that you have manually made a full back up of your website (both files and MySQL database). You can use them to restore your website to original version in case there are unexpected problems happen with the rollback. Please keep in mind that you **CANNOT ROLL BACK TO ORIGINAL VERSION WITHOUT BACK UP DATA**. If you don't know how to make manual backup, please contact your hosting provider or see [How to backup Prestashop](#)

Yes, I have made a full backup manually (both files and MySQL database)

Yes, I am using the latest version of "1-Click Direct Upgrade" module

Yes, I am using the latest version of PrestaHero modules

⚠ PrestaShop 1.7.8 requires PHP 7.4 or higher and PrestaShop 8.x requires PHP 8.1 but your current PHP version is 7.4.33 During the upgrade, please change the PHP version to match the version of Prestashop you upgrade when required.

Yes, I'm sure I'm able to upgrade my PHP version when required!

1-Click Direct Upgrade

Keep your store up-to-date with latest Prestashop official version

Your store will be upgraded to **8.1.3**

Current version: 1.7.8.0 [View more](#)

Advanced settings

Select Prestashop version to upgrade

- Prestashop 8.1 latest version - 8.1.3 (Recommended) [Change log](#)
- Prestashop 8.0 latest version - 8.0.4 [Change log](#)
- Prestashop 1.7 latest version - 1.7.8.11 [Change log](#)

Server performance

Low Medium (recommended) High

Unless you are using a dedicated server, select "Medium" or "Low".
A high value can cause the upgrade to fail if your server is not powerful enough to process the upgrade tasks in a short amount of time.

Disable non-native modules

Yes

All non-native modules can experience some compatibility issues, we recommend to disable them by default.
Keeping them enabled might prevent you from loading the "Modules" page properly after the upgrade.

Upgrade the default theme

Yes

If you customized the default PrestaShop theme in its folder (folder name "classic" in 1.7), enabling this option will lose your modifications.
If you are using your own theme, enabling this option will simply update the default theme files, and your own theme will be safe.
"Upgrade the default theme" is required if you upgrade PrestaShop: 1.5->1.6, 1.5->1.7, 1.5->1.8.x, 1.6->1.7 or 1.7->1.8.x

Switch to the default theme

Yes

This will change your theme: your shop will then use the default theme of the version of PrestaShop you are upgrading to.
"Switch to the default theme" is required if you upgrade PrestaShop: 1.5->1.6, 1.5->1.7, 1.5->1.8.x, 1.6->1.7 or 1.7->1.8.x

Keep the customized email templates

No

This will not upgrade the default PrestaShop e-mails.
If you customized the default PrestaShop e-mail templates, enabling this option will keep your modifications.

Back up my files and database

Yes

Automatically back up your database and files in order to restore your shop if needed. This is experimental: you should still perform your own manual backup for safety.

Back up my images

Yes

To save time, you can decide not to back your images up. In any case, always make sure you did back them up manually.

Read **“To Do list”** and make sure you check everything.

- If you upgrade PrestaShop 1.5.x to the latest version of PrestaShop 1.5 or upgrade PrestaShop 1.6.x to the latest version of PrestaShop 1.6 or upgrade PrestaShop 1.7.x to the latest version of PrestaShop 1.7, all your modules and themes will be persevered.
- If you upgrade PrestaShop 1.5.x to PrestaShop 8, upgrade PrestaShop 1.6.x to PrestaShop 8, and upgrade PrestaShop 1.7.x to PrestaShop 8, your old themes will be uninstalled and any module that is not compatible with the new PrestaShop version will be removed. Your store will use the default theme of PrestaShop 8.

Now you can enjoy your upgraded PrestaShop online store!

V. ROLLBACK TO PREVIOUS PRESTASHOP VERSION

With **1-Click Direct Upgrade**, you can rollback to previous PrestaShop version anytime you want.

Step 1: Open **1-Click Direct Upgrade** working area > Click on **“Rollback”**

Step 2: Select backup version to rollback. Click on the trash icon to delete the backup version.

Click **“Rollback”** button to continue.

Step 3: Please wait for the rollback process to complete.

Read **“To Do list”** and make sure you check everything.

And we’re done! Your store is restored to previous PrestaShop version.

VI. THANK YOU

Thank you again for purchasing our module and going through this documentation. We hope this documentation has provided all the necessary information to help you successfully set up the module and upgrade your website to the latest PrestaShop version.

If you have any questions for which the answer is not available on this documentation, please feel free to contact us.
