I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. If you have any questions that are beyond the scope of this documentation, please feel free to contact us.

II. INTRODUCTION

Free Translate & AI Content Generator module uses Google Translate automatic translation service to translate your PrestaShop online store with Google power and make it multilingual. With 103 available languages, your site will be available globally upon installation. Spend time on what's important: managing your orders and products, or communicating with your customers, in their preferred language.

Free Translate & AI Content Generator makes it easier to add translations to your PrestaShop store. Seamless integration with the familiar PrestaShop environment makes sure you remain inflow. Now, giving your customers a consistent language experience is straightforward and quick.

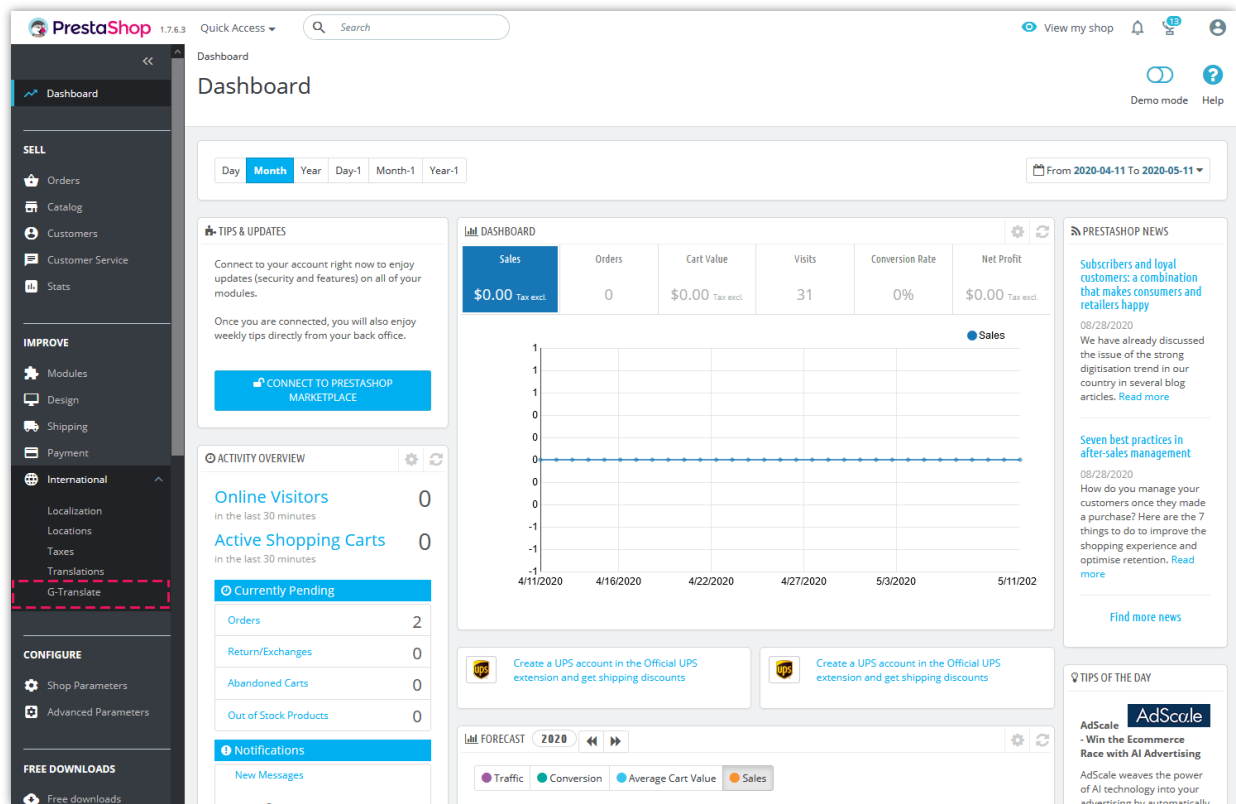

** "Free Translate & AI Content Generator" is compatible with PrestaShop 1.7.x and PrestaShop 8.x*

III. INSTALLATION

1. Navigate to **"Modules / Module manager"**, click on **"Upload a module / Select file"**
2. Select the module file **"ets_translate.zip"** from your computer then click on **"Open"** to install

3. Click on **“Configure”** button of the module you just installed to open the module’s configuration page

Quick access: You can also navigate to **Free Translate & AI Content Generator’s** configuration page through the quick access menu

IV. GENERAL SETTINGS

1. Translate settings

Firstly, we will need to select the translation API you want to use. **Free Translate & AI Content Generator** supports 6 types of API: Google Translate API, DeepL API, Bing Translation API, Libre API, Lecto API, and Yandex API.

Global settings 1-Click translate

[Translate settings](#) [Exceptions](#) [ChatGPT](#)

Select translation provider Google translate

* Google API key for "Cloud Translation API"

Auto apply global settings when translating

Translate from English (English)

* Translate to FR, ES, IT, CS, PL, PT, DE, HU, SI, LT, TR, RO, GB

Auto detect customer language when translating customer comments Yes

How to translate? Translate all missing translation fields (empty fields and fields which have the same content of source language)

Regenerate friendly URL when translating titles Yes

Analyze the translation before translating Yes

Ignore old controller files when translating Yes

Enable field translation Yes

Google translation pricing (per one million characters) USD

Enable translation log Yes

Click on "How to get API key?" link to learn how to create and get your translation API key. Enter your API key into **Free Translate & AI Content Generator's** configuration page then click "Save". And we're ready to go!

- **Auto apply global settings when translating:** The translation settings defined on this page will be automatically applied to all types of translation: product translation, CMS page translation, etc.
- **Automatic language detection to translate comments: Free Translate & AI Content Generator** will automatically detect the language of the customer's comment and perform translation.
- **Enable translation log: Free Translate & AI Content Generator** provides a translation log feature to help you keep track of this module's performance. Click on "View translation log here" link to open the translation log page.

 - Static pages (pages in SEO settings tab such homepage, login, my account, etc.)
- Customer Reassurance
- Link widget (footer menu)
- Main menu (top menu)
- Custom text blocks
- Image slider

Back Translate

2. Exceptions

Due to the characteristics of each language when translating, there will be errors in certain words, especially when a word has many meanings and stands alone. So, the module supports the feature that allows you to add fixed translations for some special words.

For example, the English word "Save" has many meanings: it means both "Enregistrer" and "sauvegarder" in French. However, when using the translation tools, if you want to show that the word "Save" means "Enregistrer" (for example, save the configuration), you can turn on the "**Fixed translation for some special words**" option and add the words you want to translate with fixed meanings. At that time, when encountering the word "save", the module will automatically translate it to "Enregistrer".

In addition, the module also supports the "**Append contextual words when translating**" feature.

The contextual words you add will help Google understand the context of the translation better, especially when the text to translate is too short (has only one or a few words).

Append contextual words when translating Yes

* Append contextual words to improve translations fr ▾

These words help Google understand the context of the translation better, especially when the text to translate is too short (has only one or a few words). These words will be removed from the translation result

* Pages to append contextual words when translating

- All pages
- Catalog (products, categories, features and attributes, etc.)
- CMS Pages and categories
- International / Translations (texts in tpl or php files and email templates)
- Customer Reassurance
- Link widget (footer menu)
- Main menu (top menu)
- Custom text blocks
- Image slider on home page

Append contextual words when original text to translate fewer than (or equals) words

Leave blank to append contextual words to every text when translating

3. ChatGPT

Integrated with ChatGPT, the module will make it easier and more efficient to create and translate product content. In this tab, you can add and save prompts to use in generating product content that meets their specific requirements without the need for manual input every time.

Global settings 1-Click translate

Translate settings Exceptions **ChatGPT**

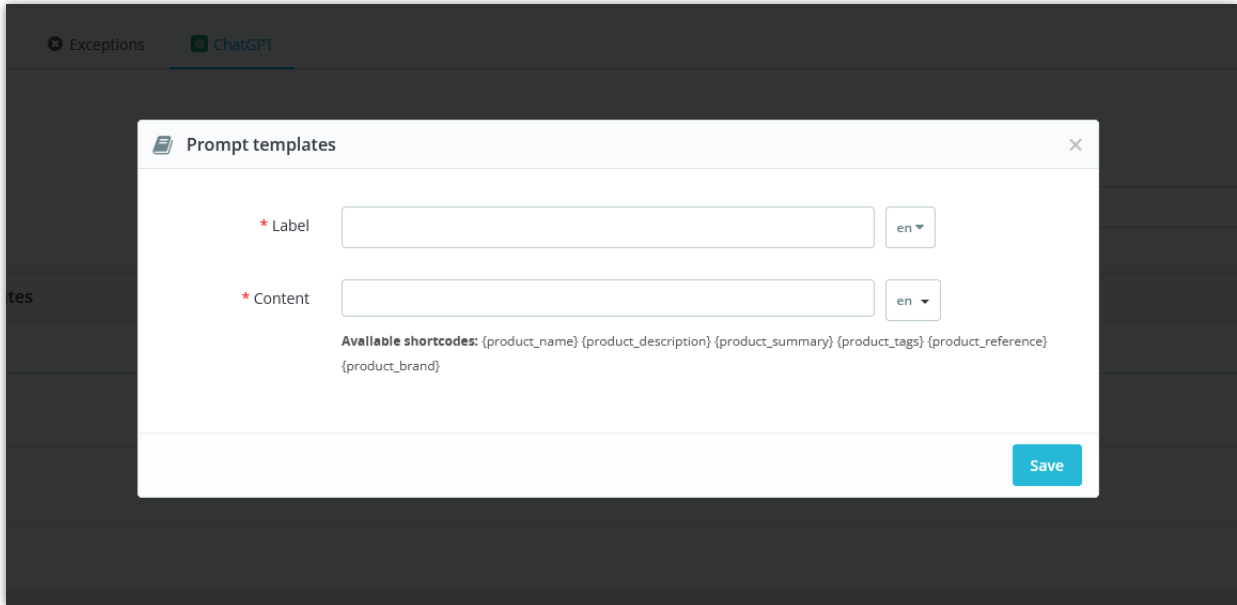

Enable ChatGPT Yes
Enable ChatGPT to create or edit content.

* ChatGPT API
How to get API key? Make sure you have enabled "ChatGPT API" for the project associated with this key

V. CATALOG TRANSLATION

1. Product translation

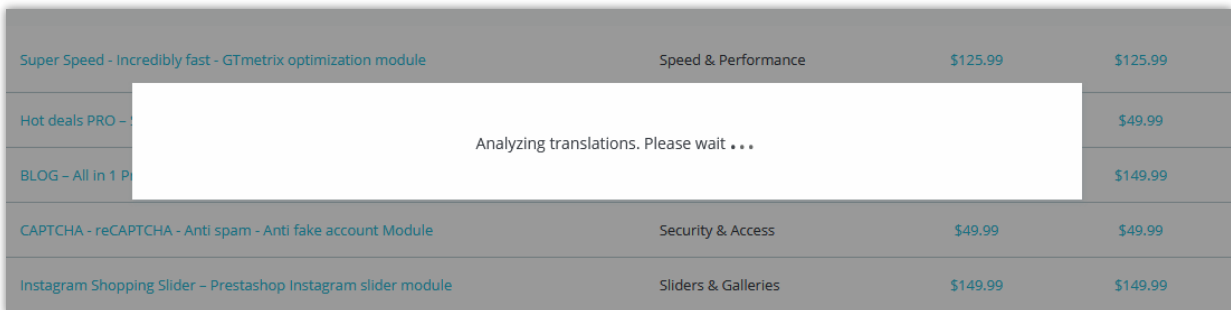

From **Products** listing page, you can run the quick product translation by selecting the products you want to translate then click on **“Translate”** button.

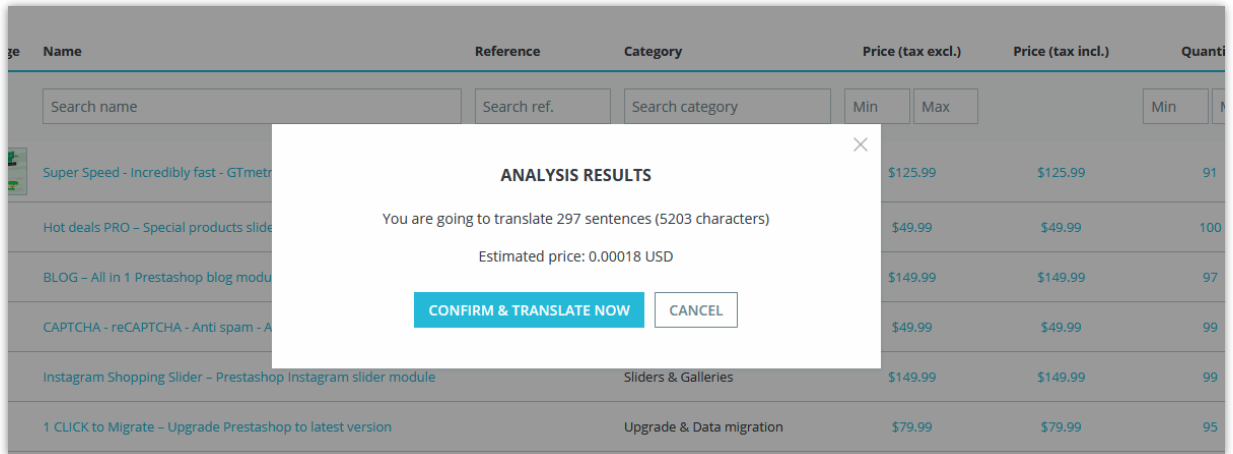

A popup will appear and display your defined translate configurations. You can edit the translate configurations before translating.

When you satisfy with your translate configurations, click on “Translate” button to start the analysis process:

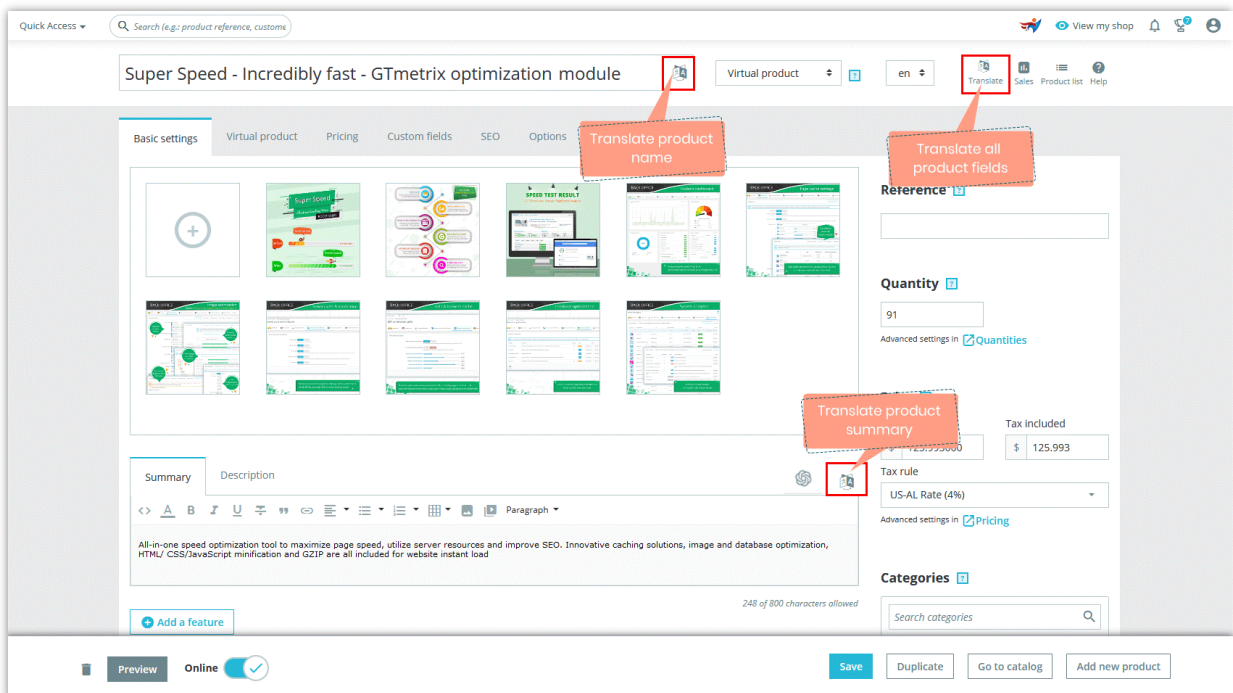

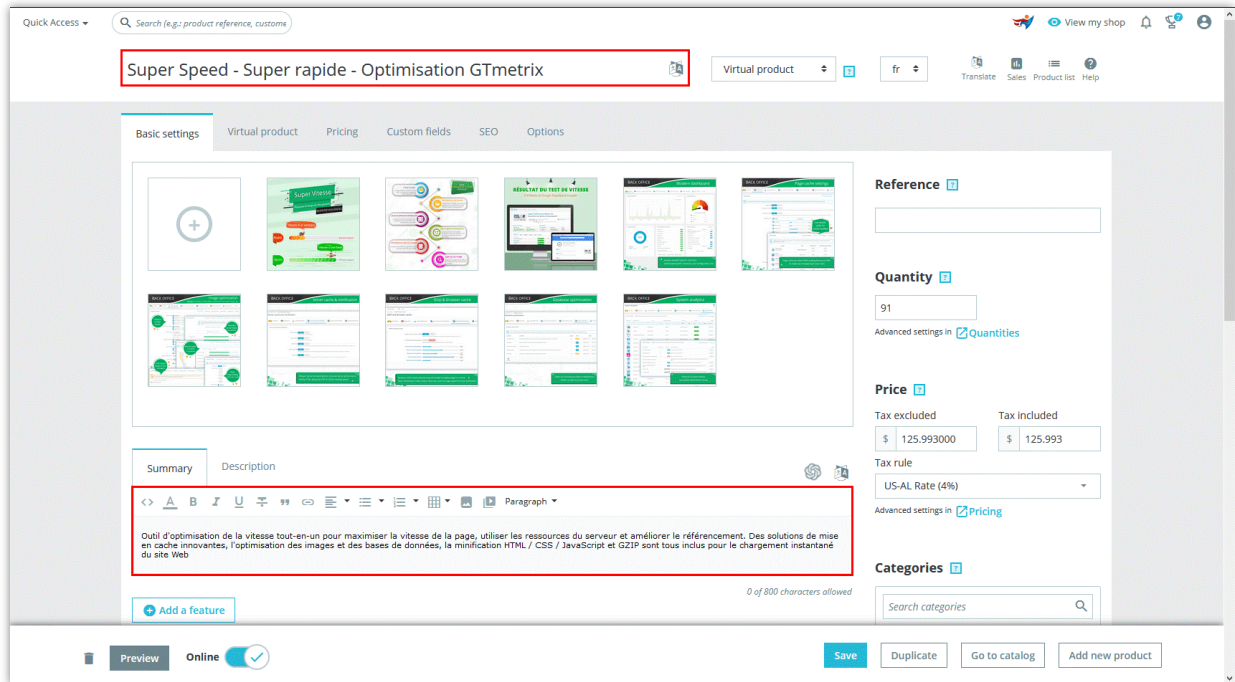

Click on **“Confirm and translate now”** button to start translating.

❖ Translate a specific product

Free Translate & AI Content Generator also enables you to translate a specific product. You simply need to open the product editing page and click on **“Translate”** icon where you want to translate its content.

Below is an example of a product name and summary after being translated from English to French:

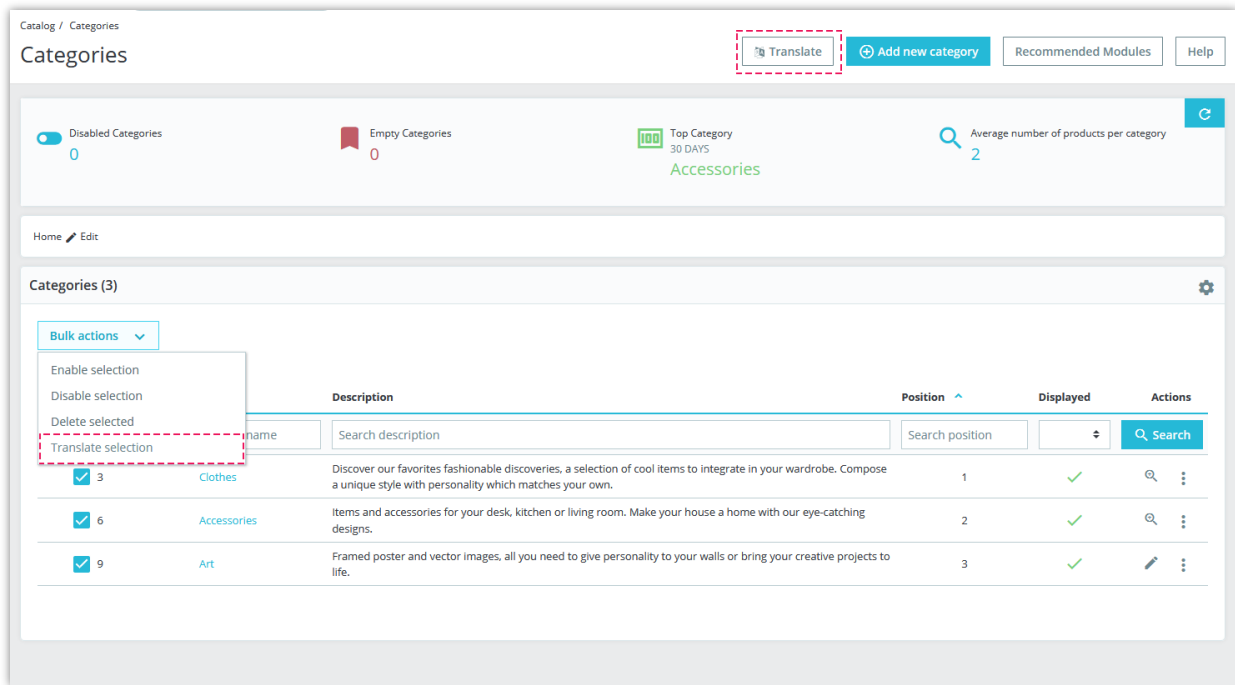

Besides, we also integrate ChatGPT into the module (on the summary and description section of the product page) to help store owners to create and translate product content easier.

Click on the ChatGPT icon in the product description or summary and start using it. Under the chat box with the labels of the prompts you have created, click on the label of the prompt you want to use to save time without having to manually retype the content you want.

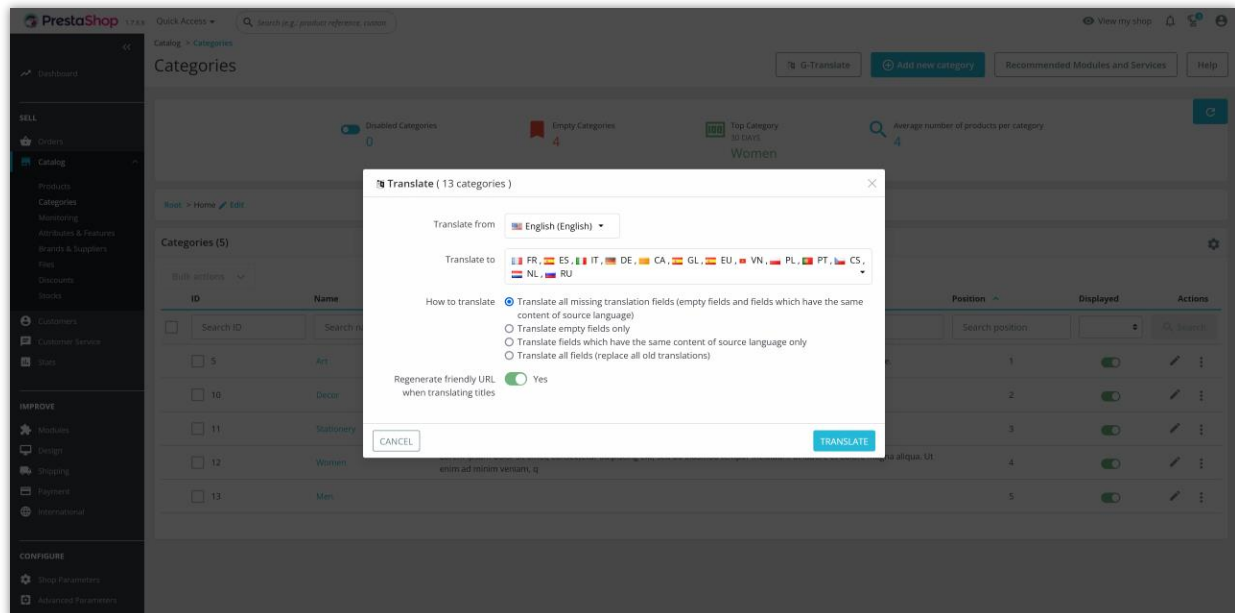

2. Product category translation

From **Categories** listing page, you can run the quick category translation by selecting the categories you want to translate then click on **“Translate”** button.

Similar to product translation, a popup will appear and display your defined translate configurations. You can modify translation settings before running translation process.

❖ Translate a specific category

Free Translate & AI Content Generator also enables you to translate a specific category. You simply need to open the category editing page and click on “Translate” icon where you want to translate its content.

The screenshot shows the PrestaShop Category editing interface. The page title is "Category". At the top right, there is a "Translate" button. The main form contains several sections:

- Name:** "Cross-selling & Product bundles" with a language dropdown set to "en". A red callout box labeled "translate category name" points to the text input field.
- Displayed:** A toggle switch set to "YES".
- Parent category:** A dropdown menu showing "Expand" and "Home". A red callout box labeled "Translate category description" points to the "Home" option.
- Description:** A rich text editor with a language dropdown set to "En". A red callout box labeled "Translate category description" points to the language dropdown.
- Category cover image, Category thumbnail, Menu thumbnails:** Each has a "Choose file(s)" button and a "Browse" button.
- SEO preview:** A preview box showing a sample meta title and description.
- Meta title, Meta description, Meta keywords:** A dashed purple box encloses these three fields. Each has a red callout box labeled "Translate category meta elements" pointing to the language dropdown menu.
- Friendly URL:** "cross-selling-product-bundles" with a language dropdown set to "en".
- Group access:** A list of customer groups with checkboxes: "Select all", "Visitor" (checked), "Guest" (checked), "Customer" (checked), and "Default level" (unchecked).

At the bottom, there are "Cancel" and "Save" buttons.

3. Brand and Supplier translation

From **Brands** and **Suppliers** listing page, you can translate all available brands and suppliers by clicking on “Translate” button.

Brands (2)

ID	Logo	Name	Addresses	Products	Enabled	Actions
2		Graphic Corner	--	9	✓	
1		Studio Design	1	9	✓	

SUPPLIERS (3)

ID	Logo	Name	Number of products	Enabled	Actions
3		Caroline Boutique	0	✓	
2		J.Smith Handcraft	0	✓	
1		Sophia Beauty Salon	0	✓	

4. Attributes and Features translation

From **Attributes and Features** listing page, you can translate all available attributes and features by clicking on “Translate” button or translate each specific item.

The screenshot displays the 'Attributes' management interface. At the top, there are navigation tabs for 'Attributes' and 'Features', and a toolbar with buttons for 'Translate', 'Add new attribute', 'Add new value', and 'Help'. The 'Translate' button is highlighted with a red dashed box. Below the toolbar, there is a table with columns for 'ID', 'Name', 'Values', and 'Position'. The table contains four rows of attributes: 'Size', 'Color', 'Dimension', and 'Paper Type'. A 'Bulk actions' dropdown menu is open, showing options: 'Select all', 'Unselect all', 'Delete selected', and 'Translate selection'. The 'Translate selection' option is highlighted with a red dashed box.

ID	Name	Values	Position
1	Size	4	1
2	Color	14	2
3	Dimension	3	3
4	Paper Type	4	4

VI. PAGE TRANSLATION

Free Translate & AI Content Generator enables you to translate all CMS page categories and CMS page. Click on “Translate” button to start the translation process.

5	secure-payment	Secure payment		5	✓	✎ ⋮

You can also translate a specific CMS page. Click "Edit" a page you want to translate then click on "Translate" icon where you want to translate its content.

The screenshot displays the 'Pages' configuration page in PrestaShop. At the top right, there is a 'Translate' button. Below it, several fields are shown with a 'Translate' icon (a document with a speech bubble) and a callout box that says 'Translate page title' or 'Translate meta elements' or 'Translate page content'. The fields include:

- Page category:** A dropdown menu with 'Expand' selected and 'Home' as a sub-option.
- * Title:** A text field containing 'Delivery' and a language dropdown set to 'en'. A callout box points to the 'Translate' icon.
- SEO preview:** A preview box showing the page title 'Delivery' and a URL 'http://localhost/prestashop_1.7/en/content/1-delivery'. Below it, it says 'Our terms and conditions of delivery'.
- Meta title:** An empty text field with a language dropdown set to 'en'. A callout box points to the 'Translate' icon.
- Meta description:** A text field containing 'Our terms and conditions of delivery' with a language dropdown set to 'en'. A callout box points to the 'Translate' icon.
- Meta keywords:** A text field containing 'conditions', 'delivery', 'delay', 'shipment', 'pack', and 'Add tag' with a language dropdown set to 'en'.
- * Friendly URL:** A text field containing 'delivery' and a language dropdown set to 'en'. A callout box points to the 'Translate' icon.
- Page content:** A rich text editor with a language dropdown set to 'En'. The content includes a heading 'Shipments and returns' and a sub-heading 'Your pack shipment'. A callout box points to the 'Translate' icon.

At the bottom, there are two toggle switches: 'Indexation by search engines' (set to 'NO') and 'Displayed' (set to 'YES'). At the very bottom, there are 'Cancel', 'Save and preview', and 'Save' buttons.

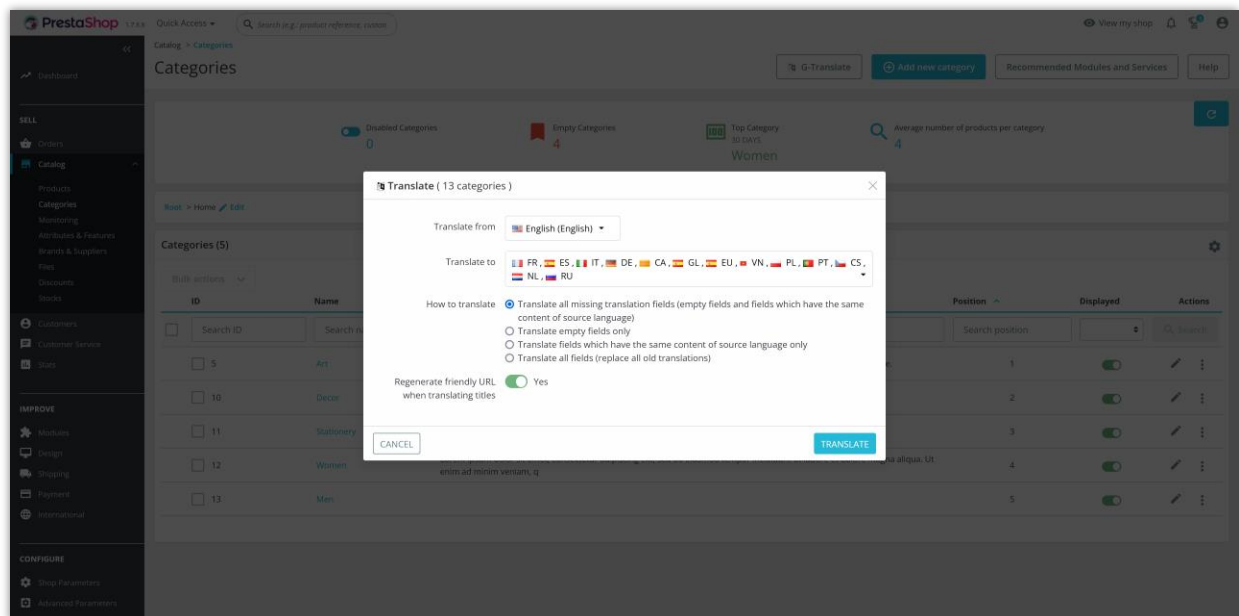

VII. INTERNATIONAL TRANSLATION

Free Translate & AI Content Generator offers you a comprehensive translate tool which allows you to translate your *back office, themes, installed modules, emails* and *other items* with Google translate API.

Navigate to **International > Translations** page. Click on “Translate” button at the top right corner.

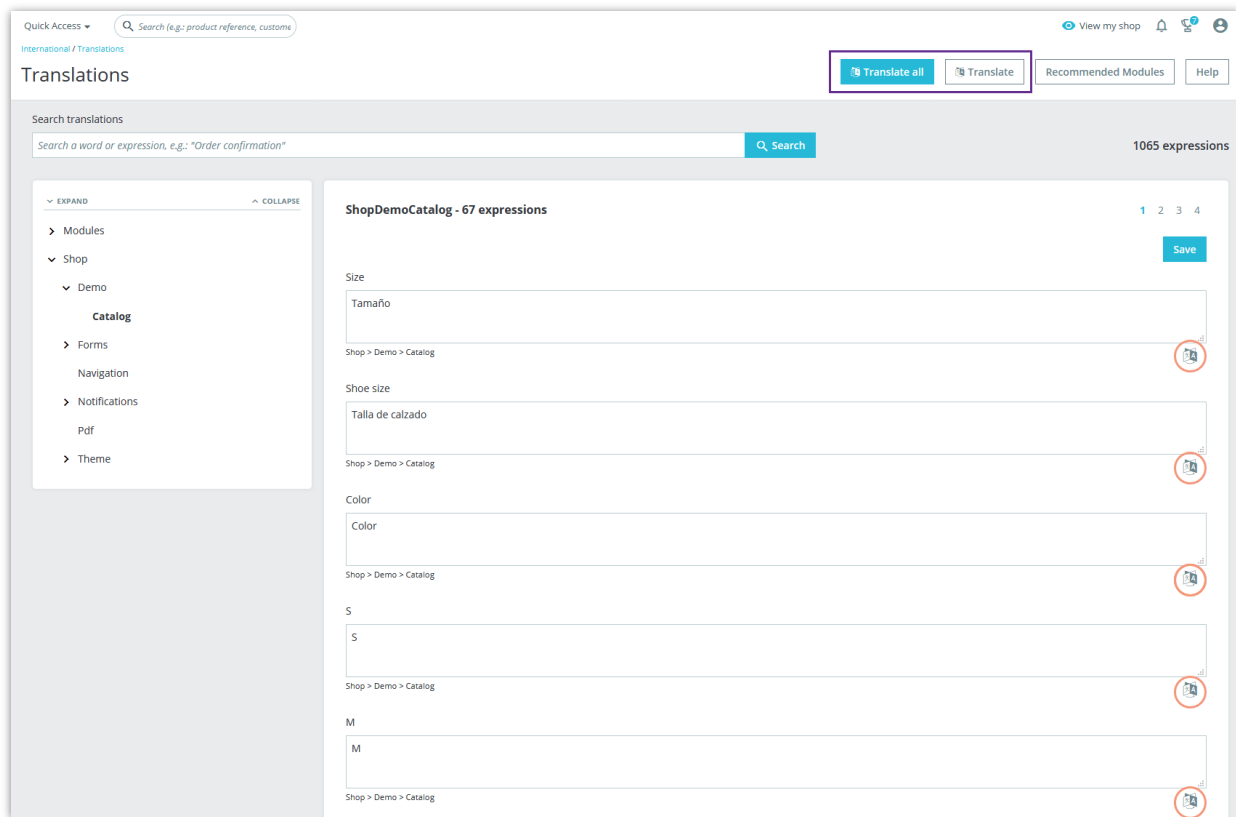

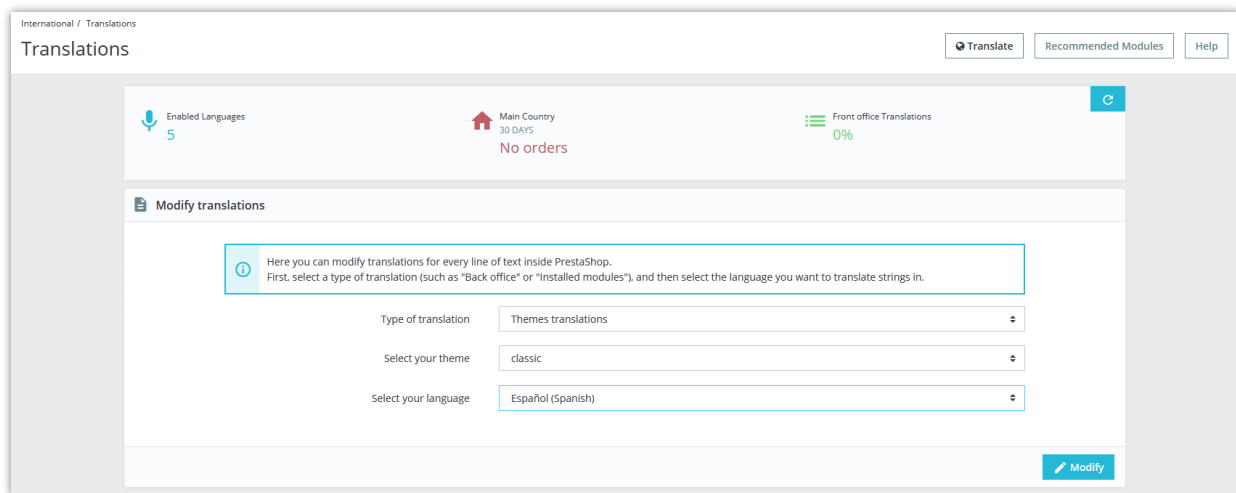

Select items you want to translate and modify the translation settings as you want, then click “Translate” to start translation process.

Or if you want to translate a specific item, **Free Translate & AI Content Generator** also supports you to translate each component or the whole item smoothly.

Below are example screenshots when we translate the "classic" theme of PrestaShop 1.7:

VIII. COMPATIBILITY WITH PRESTAHERO MODULES

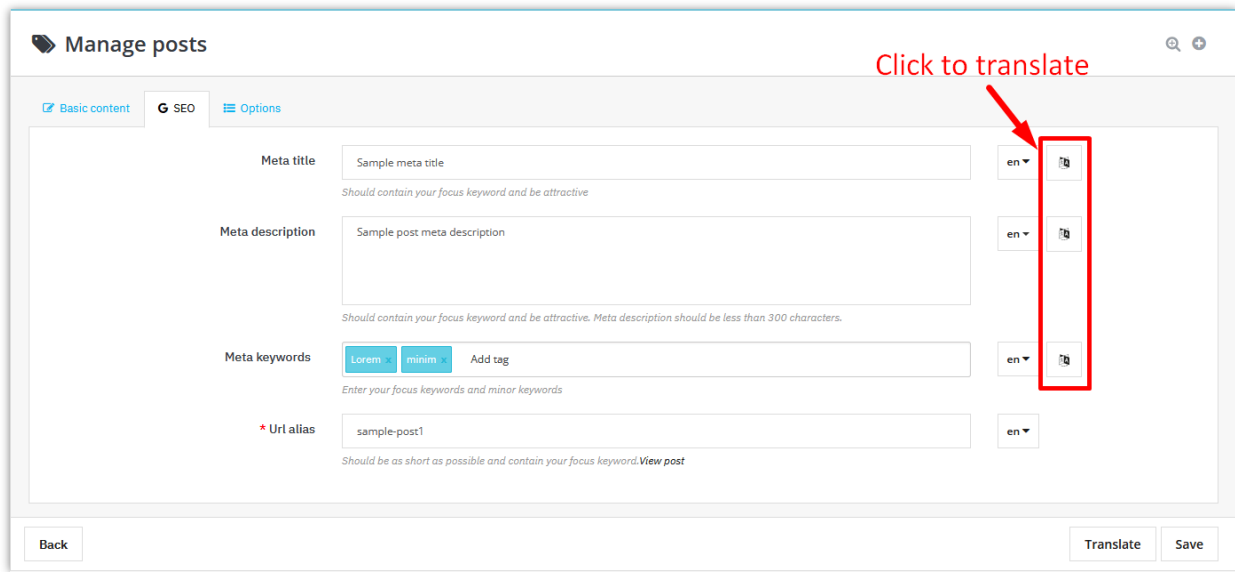

The Free Translate & AI Content Generator module is designed to be compatible with various PrestaHero modules, enhancing its functionality across different parts of your store. Below are the supported modules and how this integration works:

1. Compatibility with “Blog” module

Easily translate the content of your blog posts into over 110 languages. This allows you to share your store's news, updates, and articles with a global audience, all while maintaining the accuracy and readability of the original content.

In addition to the post content, the module also allows for the translation of meta titles, meta descriptions, and meta keywords, ensuring that your blog is fully optimized for international SEO and accessible to a global audience.

2. Compatibility with “Trusted Reviews” module

Automatically translate customer reviews on your store, making it easier for potential buyers from different regions to understand feedback from other customers. This improves transparency and helps boost customer trust in your store.

Additionally, the module supports translating your replies to customer reviews, comments, and questions, ensuring clear communication across all languages.

3. Compatibility with “Mega Menu Pro” module

Translate the text content within your mega menu, including menu items, menu tabs, and any other textual elements. This ensures that customers from different regions can easily navigate your store in their preferred language.

Click to translate text field

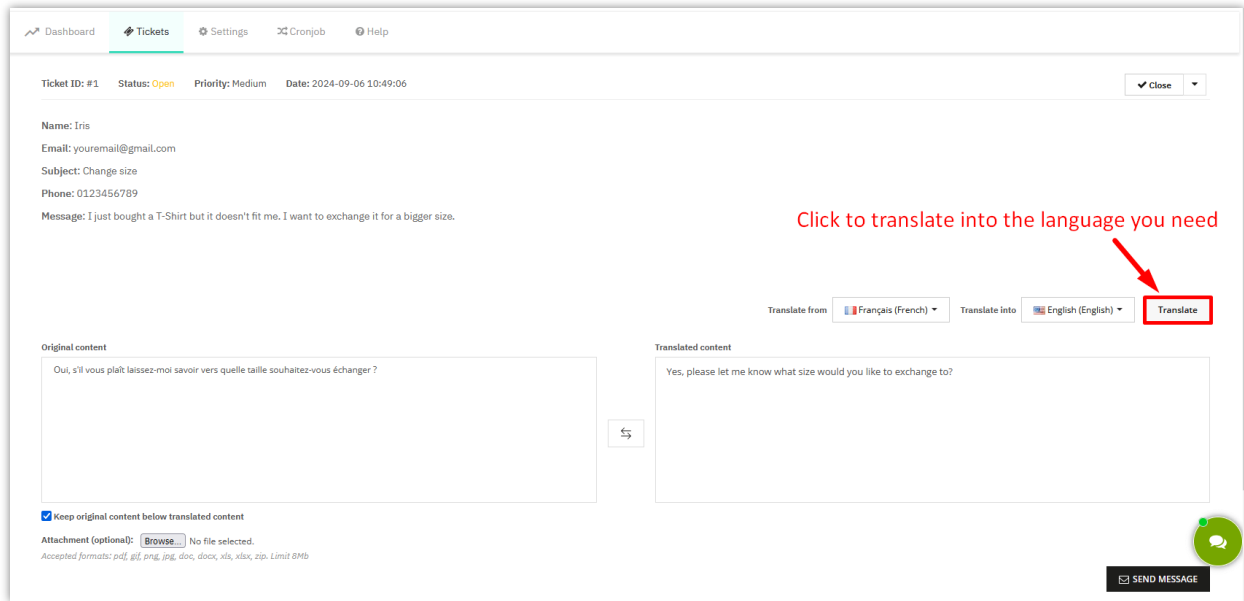

4. Compatibility with “Live Chat, Contact Form, and Ticketing System” module

Easily translate your replies to customer support tickets. When a customer submits a support ticket, administrators can write their response in their own language, then use the module to translate it.

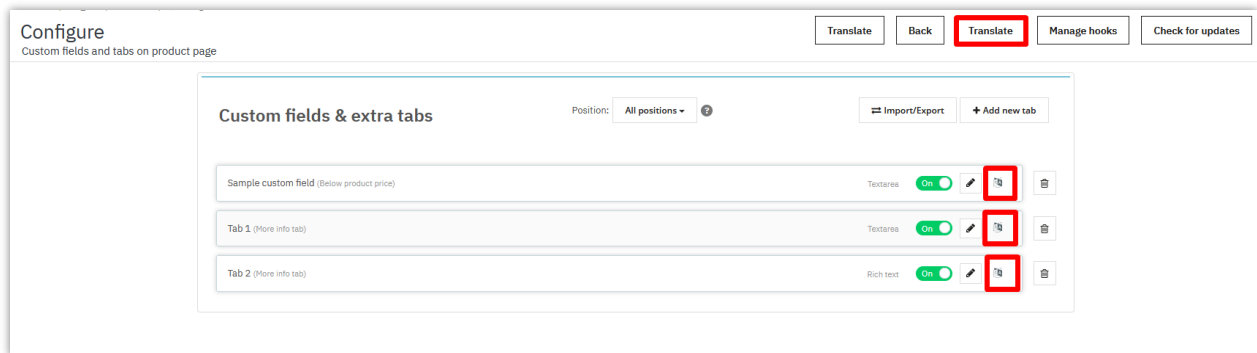

Simply select the source language (the language of the response) in the "**Translate from**" field, choose the target language (the customer’s language) in the "**Translate into**" field, and click the "**Translate**" button. The reply will be automatically translated, ensuring

smooth and clear communication between your support team and customers no matter what language is being used.

5. Compatibility with “Custom fields & tabs on product page” module

Support for translating the content of any custom product fields added by this module. This ensures that all additional product information you provide is accessible to customers in their preferred language.
