TOTAL PRODUCT SOLD

Display the number of total sold items for each product on the product detail page and product listing page.

A product of ETS-Soft

CONTENTS

I. INTRODUCTION

Total Product Sold is a PrestaShop sales count free module that helps you display the number of total sold items for each product on the product detail page and product listing page on the front office.

*"**Total Product Sold**" is compatible with PrestaShop 1.7.x

II. INSTALLATION

- Navigate to "**Modules / Modules Manager**" > click on "**Upload a module / Select file**".
- Select the module file "**ets_totalproduct_sold.zip**" from your computer then click on "**Open**" to install.
- Click on "**Configure**" button of the module you just installed to open the module's configuration page.

III. CONFIGURATION

From your installed module list (located at **"Modules/Module Manager"**), find **"Total Product Sold"** then click on the "**Configure**" button to open its configuration page.

You will see the options below which are used to manage the display of the number of total sold items for each product on the front office.

- **Total product sold label:** You can name the label to display outside the front end.
- **Display position:** You can choose to display the total product sold on the product detail page, product listing page, or both. Tick the box with the position you want to display.

Display on the product listing page:

Display on the product detail page:

- **You can set the initial total product sold for your product:** The module will add the number you set with the actual number of sold products, then display the total number in the front office.
- You can set up the module to automatically count a product as sold based on order status.
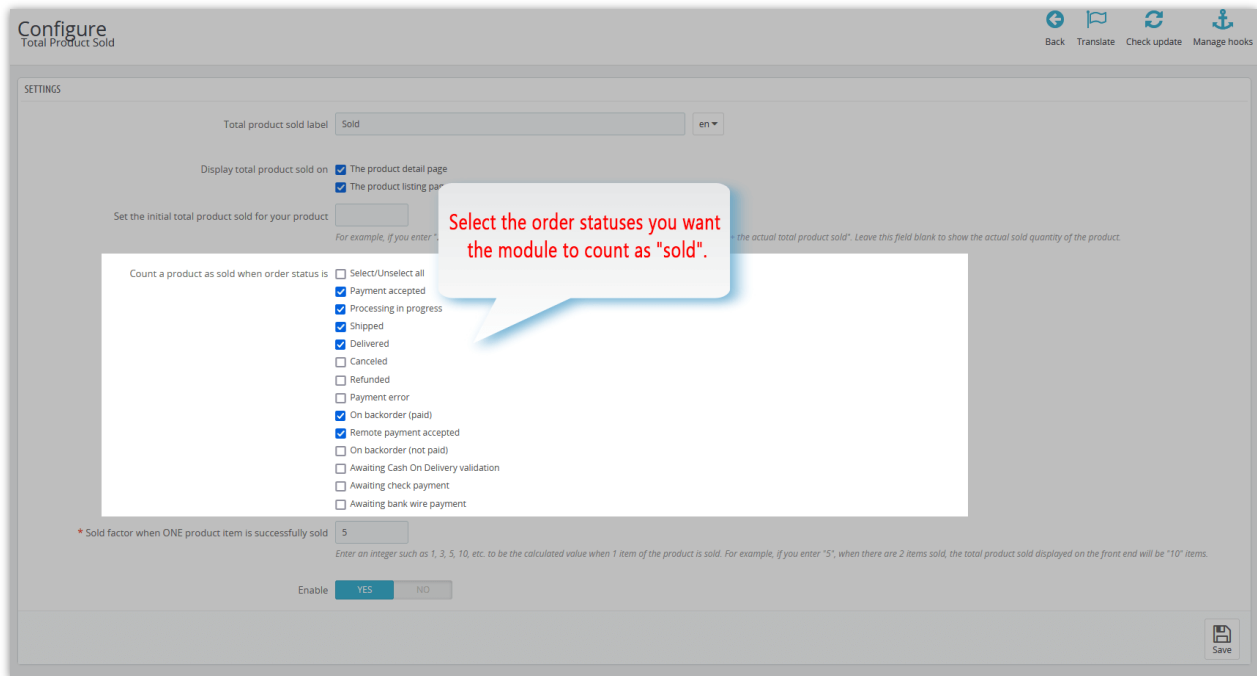

- You also can generate an ideal number of sold items to display on the front office by adding "**Sold factor**". Just enter an integer to be the calculated value when 1 item of the product is sold. For example, if you enter "5", when there are 2 items sold, the total product sold displayed on the front end will be "10" items.

Besides setting the display of the number of total sold items applied for all products in the store. You completely can set up to display the total sold number for a specific item:

- ➤ Open Product editing page of a specific product.
- ➤ Select the **"Modules"** tab then click on the **"Configure"** button of the **Total Product Sold** module.
- ➤ Enable **"Use specific settings for this product"**.
- ➤ Fill in the required fields and **"Save".**
