I. INTRODUCTION

MigrationPro Ultimate is the best module to migrate or upgrade PrestaShop 1.4, 1.5, 1.6, 1.7 to PrestaShop 8 or migrate data between PrestaShop websites (any version) within seconds!

II. PREPARATION

For source store:

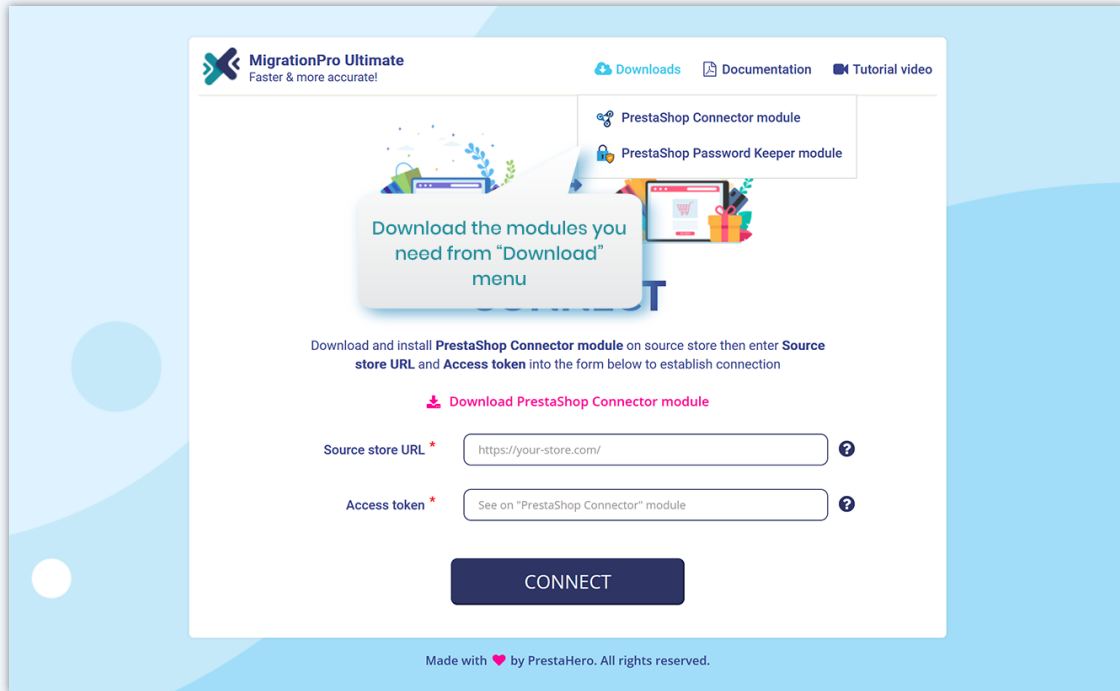

- Navigate to “**Modules / Modules & Services**” > click on “**Upload a module / Select file**” > install **PrestaShop Connector** module on the source store.

For target store (the website will receive migration data):

- Navigate to “**Modules / Modules & Services**” > click on “**Upload a module / Select file**” > install **MigrationPro Ultimate** on the target store.
- Similarly, install the **PrestaShop Password Keeper** module on the target store.

***NOTE:**

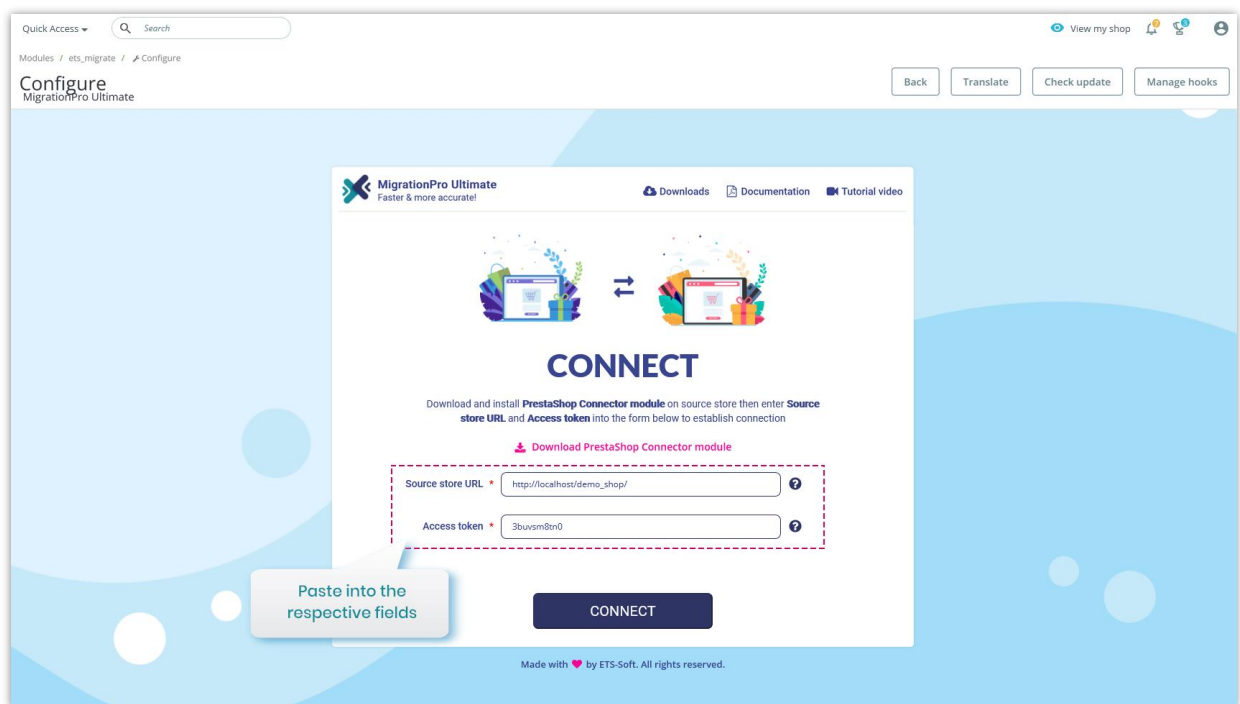

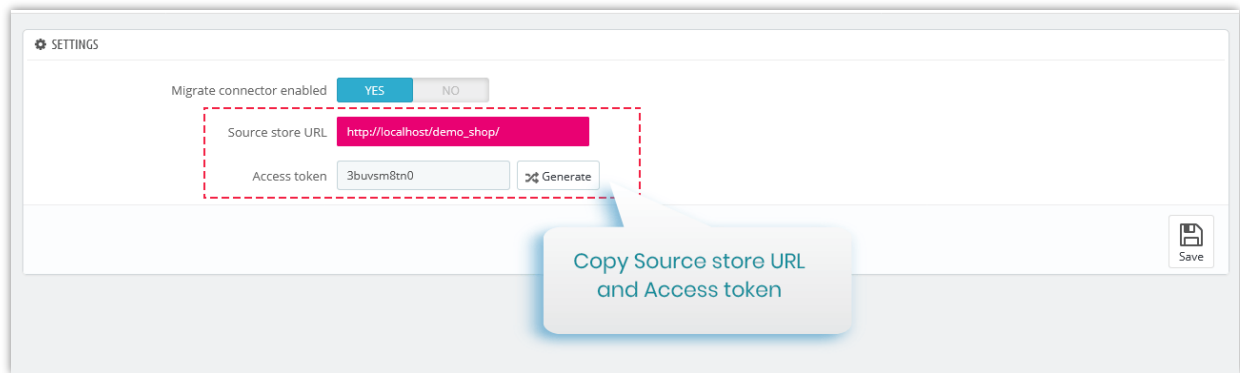

- Please create a backup for the target store before performing migration process.
- You can download the free modules – “**PrestaShop Connector**” and “**PrestaShop Password Keeper**” – from **MigrationPro Ultimate** back office:

III. MIGRATION PROCESS

1. Connect source store with target store

Copy “**Source store URL**” and “**Access token**” provided by “**PrestaShop Connector**” module on the source store and paste them into respective fields on the target store.

Now we have filled in the required information, click on “**Connect**” button to start connecting PrestaShop stores.

2. Migration options

The second step is to select data types and migration options you prefer before starting your automated migration process.

- Click on **“Migrate”** button to start migration instantly with default migration settings and pre-selected data entities.
- Click on **“Advanced settings”** to configure migration options as you prefer.

**MigrationPro Ultimate**
Faster & more accurate!

MIGRATE

7

- **Data entities to migrate:** select the data entities you want to migrate into the target store.

***NOTE:**

There are some data entities that need to be migrated together. You cannot migrate these data entities alone since it can break the logic of the database. For example:

- “**Products & SEO**” and “**Product categories**”
- “**Orders & shopping carts**”, “**Customers & addresses**” and “**Carriers & shipping**”

- **Shop mapping:** if the source store has multi-shops, you can select where data of each shop from source store will be migrated into the multi-shops on target shop.
- **Keep IDs:** keep ID of data entities such as product IDs, customer IDs, etc. from the source store.

***NOTE:**

When you enable “**Keep IDs**” option, all the data entities selected on “**Data entities to migrate**” section of target store will be deleted before migrating new data from source store. This deletion is compulsory to protect the logic of database.

- **How to migrate images and attachments & files:** you can allow **MigrationPro Ultimate** to automatically migrate images, attachments and files or manually upload your data to target site when migration completed.
- If your server has low performance or if you encountered time out error while migrating, please decrease the “**Images migrated per request**” and “**Attachments & files migrated per request**” value.

- **Migration speed:** the number of data records migrated per request. You can increase this value if your server has high performance and unlimited **"max_excution_time"**. On the contrast, please decrease this value if your server has low performance or if you encountered time out error.

2.2. Confirmation popup

After clicking on **"Migrate"** button, a confirmation popup will appear. It displays all data entities and migration options that will be migrated to target store.

If you agree with the migration settings, please click on **"Migrate Now"** button to start your migration.

Before Start

Please review and confirm the migration settings before processing it. You are recommended to make a complete backup of target store (both files and database), if existing data is important to you.

4. Enjoy new store!

Your migration is now completed. All data entities have been successfully migrated from the source store.

4.1. Keep customer passwords

- If you haven't installed "**PrestaShop Password Keeper**" module, the "**MigrationPro Ultimate**" module will automatically install it during the migration process and automatically fill in the **_COOKIE_KEY_** on the target store.

 **MigrationPro Ultimate**
Faster & more accurate!

[Downloads](#) [Documentation](#) [Tutorial video](#) [Support](#)

CONGRATULATIONS!

Your migration has been successfully completed.
You are almost done, please do some final tweaks before putting your website to live.

 **Keep customer passwords**

Step 1: Download our free **Prestashop Password Keeper** module

Step 2: Install **Prestashop Password Keeper** module on target store (this website)

Step 3: Copy the **_COOKIE_KEY_** of source store provided below then paste it into **Prestashop Password Keeper** configuration page.

Here is **_COOKIE_KEY_** of the source store:

```
x1wyVVvoX3KMYjfcptvG3q8aXkbqehR80NS61YXmqPRX9tcTIEFsSax
```

[NEW MIGRATION](#) [VIEW YOUR SHOP](#)

- Open the “**PrestaShop Password Keeper**” module’s configuration page to see the **_COOKIE_KEY_**.

SETTING

* _COOKIE_KEY_ of source Prestashop website

_COOKIE_KEY_ is provided when you finish the migration using Migration 4.0. It is also available on settings file (settings.inc.php) of source website.

Save

4.2. Manually migrate images, attachments and files

By default, **MigrationPro Ultimate** will **automatically migrate all images, attachments, and files** from the source store to the target store. We recommend you select this automatic migration feature for your images, attachments, and files if your source store has small to medium data sizes.

Otherwise, if you select to migrate images/files on the previous step manually, you will find the list of folders that need to be copied to the target store manually. You can use **FTP software** or **cPanel** to upload the images/files to the target store.

TO DO LIST!

Upload your attachments & files

Please copy your attachments and files from the source store folders and upload them to the respective folders on target store to complete your migration process.
