Contents

I. INTRODUCTION

Extra Options is an amazing **PrestaShop product combination module** that allows you to create global options that apply for all existing products, price impact for each option. Faster and easier to manage than **PrestaShop default combinations.**

*"**Extra Options**" is compatible with PrestaShop 1.7.x and PrestaShop 8.x

II. INSTALLATION

- Navigate to "**Modules / Modules Manager**" > click on "**Upload a module / Select file**".
- Select the module file "**ets_extraoptions.zip**" from your computer then click on "**Open**" to install.
- Click on "**Configure**" button of the module you just installed to open the module's configuration page.

III. CONFIGURATION

1. General settings

From your installed module list (located at **"Modules/Module Manager"**), find **"Extra options"** then click on "**Configure**" button to open its configuration page.

You will see the options below which is used to manage the display of options on the PrestaShop front office:

Here are a few examples of how the attributes section will be displayed on your PrestaShop online store:

- **Option section title:** This setting allows you to define the title of the option section that appears on the product detail page. This title will serve as a heading for the section where customers can view and select additional options for the product. For example, you might use "Customize Your Product" or "Choose Your Options."
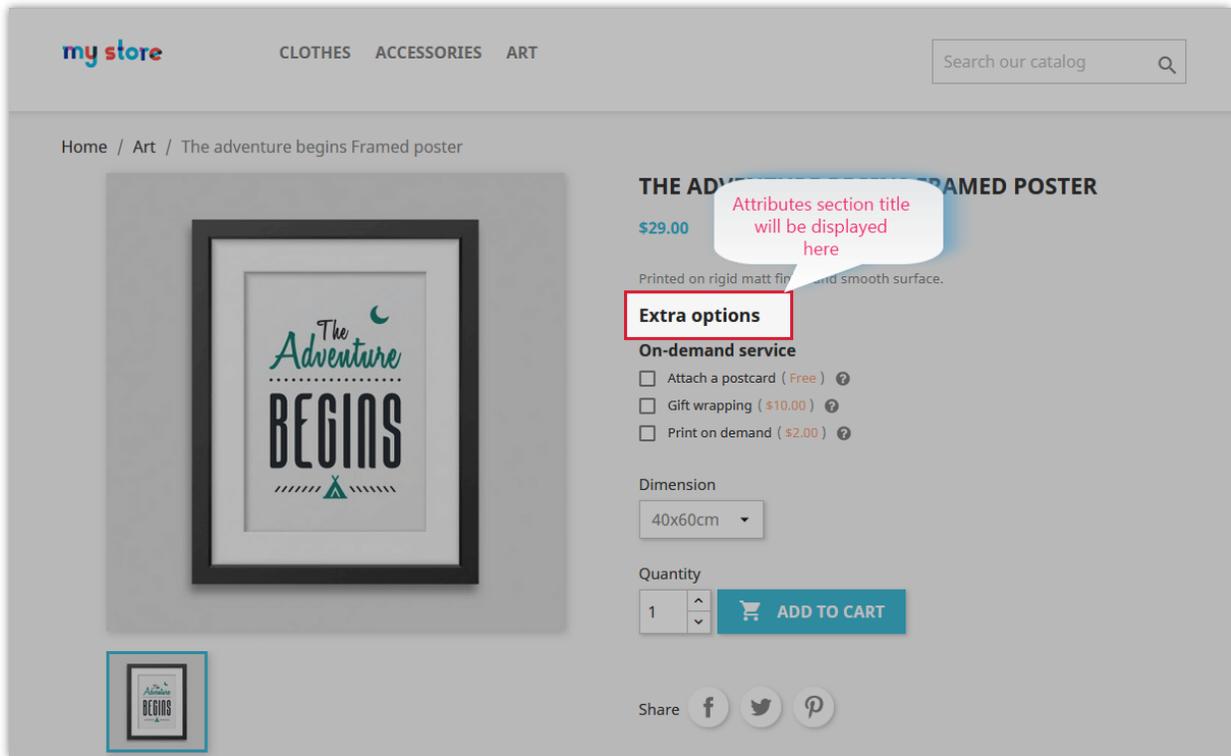

- **"Total options price" label**:

This label is displayed on the product detail page to inform customers about the total price for the options they have selected. It helps customers understand how their selected options affect the final price of the product. For example, you can set this label to "Total price for your selected options."
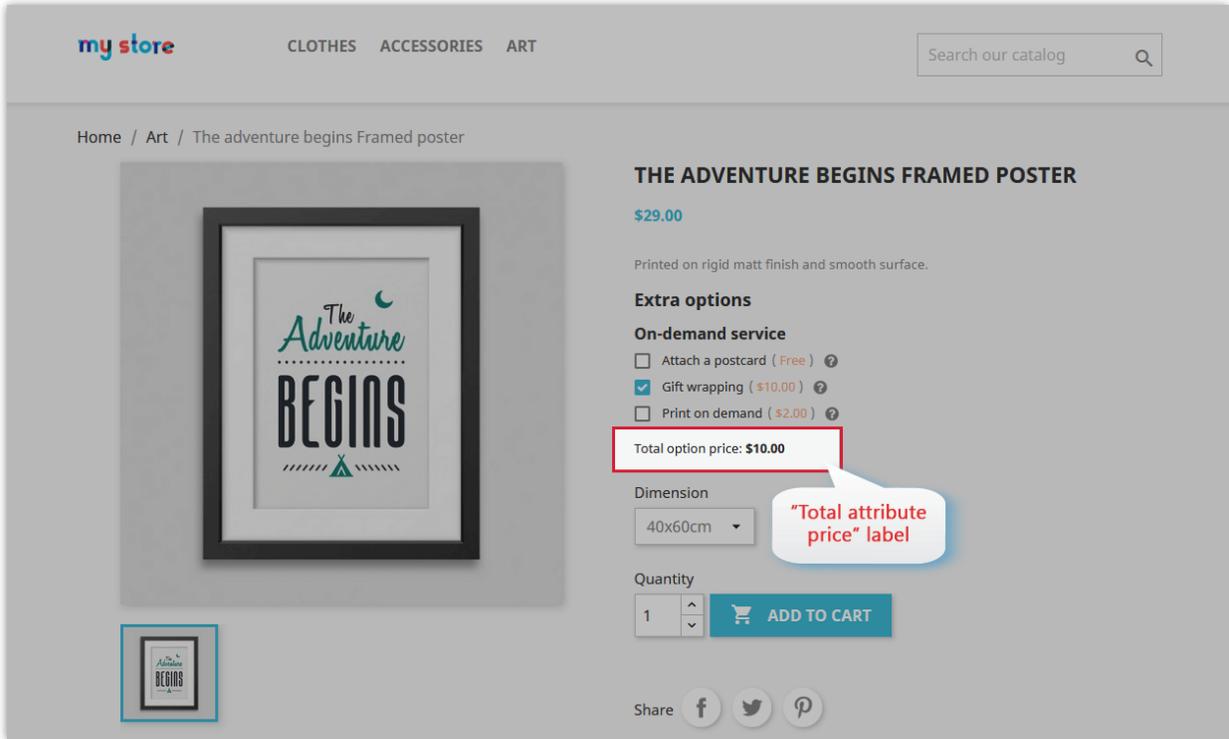

- **Option details:**

This title will be shown on various parts of the website and in customer communications, including the shopping cart page, order confirmation page, order detail page, and in emails sent to customers. It provides a summary of the selected options. A clear and descriptive title, such as "Selected Options," helps customers easily recognize this information.

Here is an example of the display on the shopping cart page:
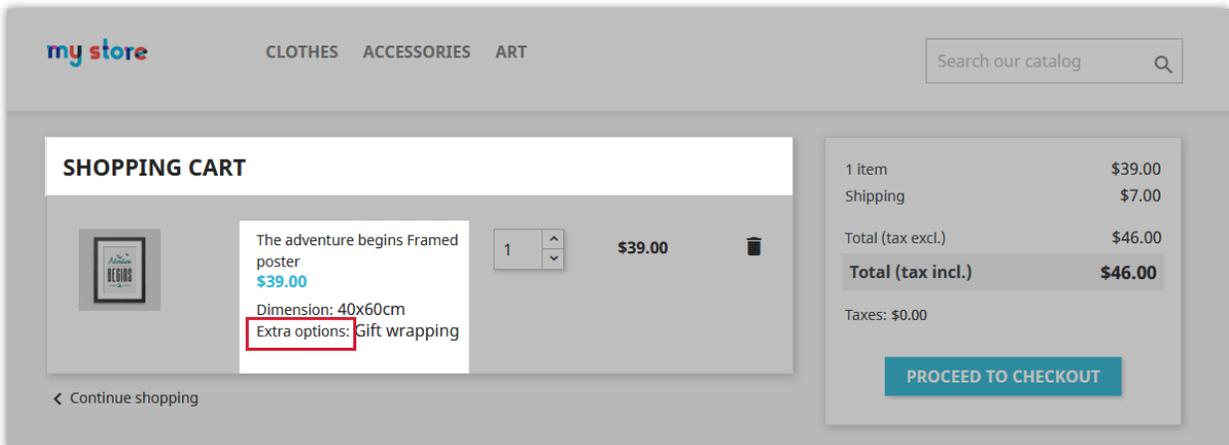

- **"Original product price" label in "Added product" popup**

If you want to show the original product price in the popup that appears after a product is added to the cart, you can specify a label here. If you prefer not to show the original product price, leave this field blank.
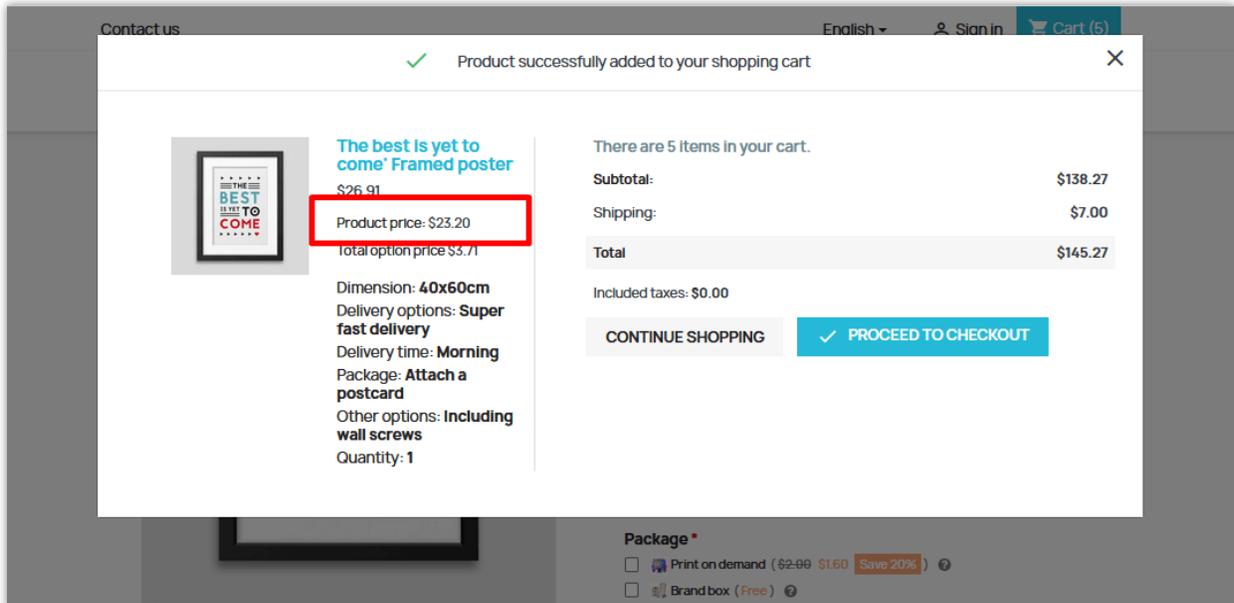

- **Notification**

Use this field to display a custom notification message to customers when they select or deselect options. This can be used for informative or promotional messages. If you do not want to show any notification, leave this field blank.
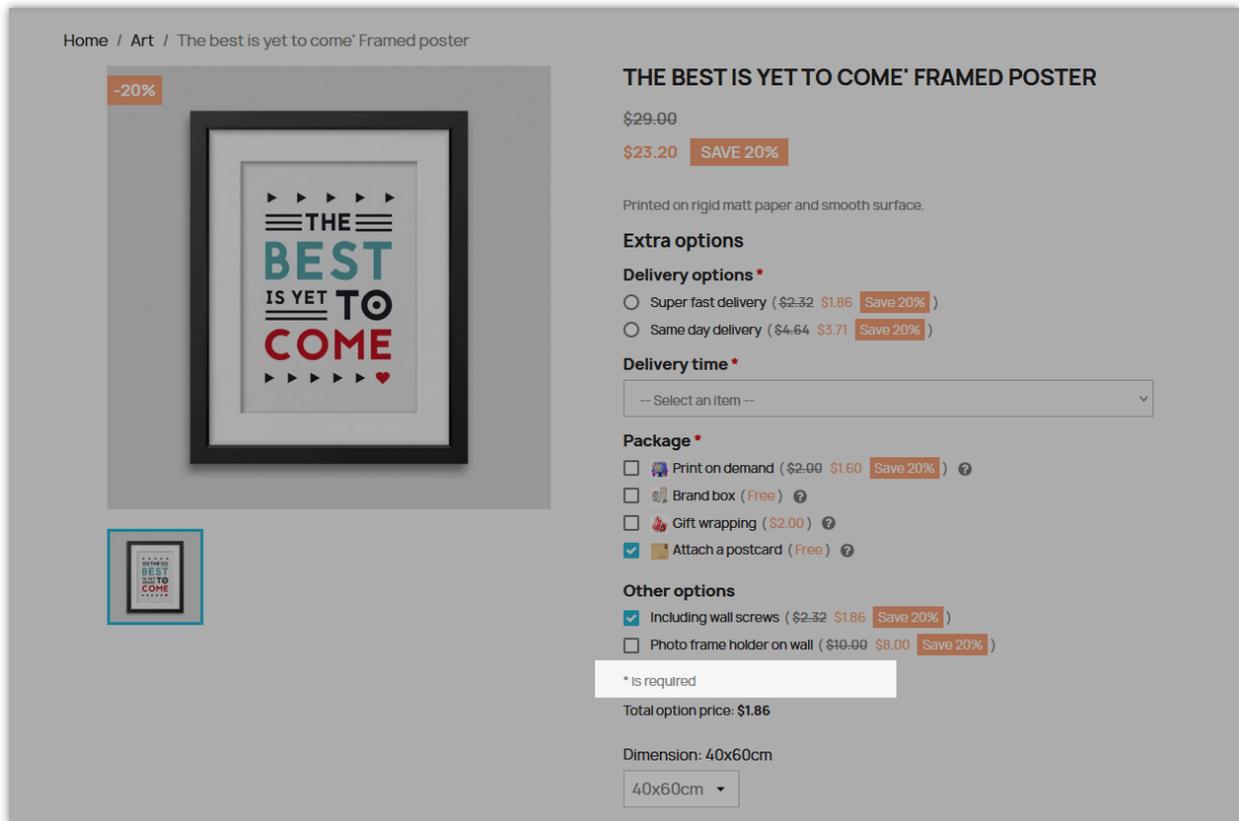

- **Checkbox background color**

This option allows you to customize the background color of checkboxes for the extra options. Choose a color that matches your store's theme or one that makes the options stand out, ensuring customers can easily see and interact with them.

- **How to display extra options**

Choose how you want the extra options to be displayed on the product detail page:

- o Checkbox: Customers can select multiple options by checking the boxes.
- o Radio: Customers can select only one option from a list.
- o Selection menu: Options are displayed in a dropdown menu for a more
- o compact presentation
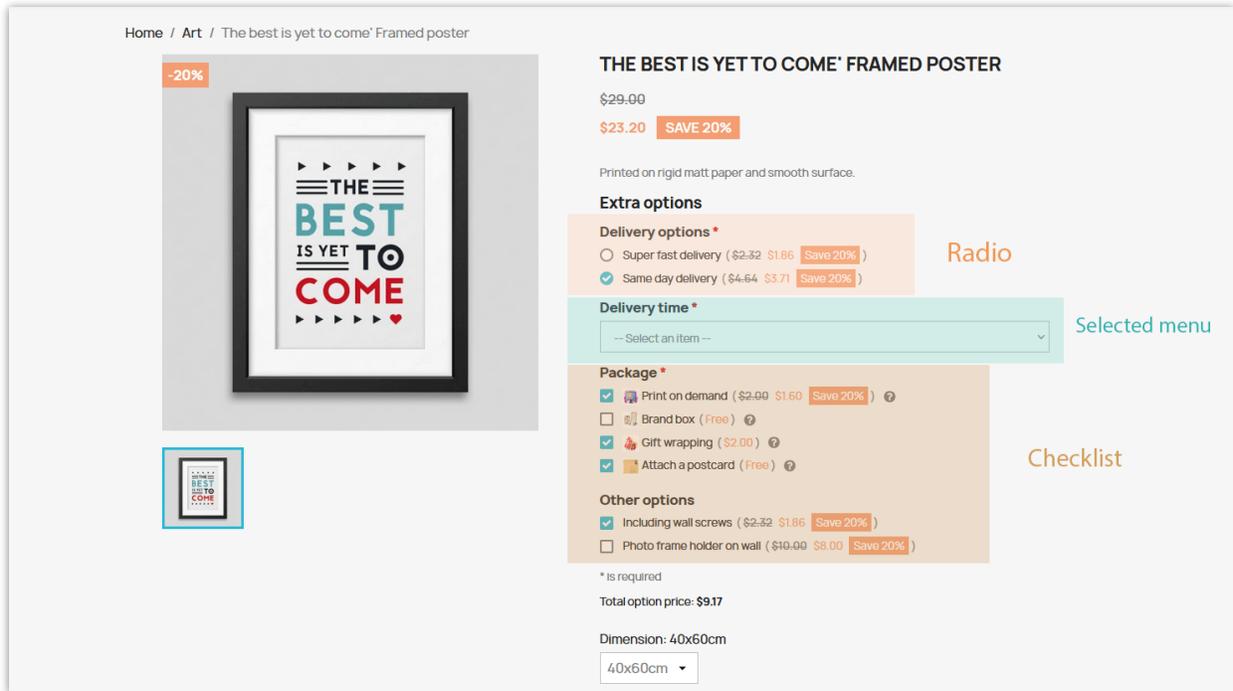

- **Required: On | Off**

This setting determines whether selecting an option is mandatory before adding the product to the cart. If set to "On", customers must select at least one option. If set to "Off," selecting options is optional.

2. Option groups

You can create groups of options and then use them when creating general options or specific options to group options with the same purpose together. So, the options will be displayed on the front office in a neat, more scientific way and also easier for the store admin to manage.

You only need to click on **"Add new option group"**, then fill in the name of the group on the **"Add option group"** popup and select "**How to display extra option**". Finally, click **"Save"** and you're done.

3. Global Options

In the configuration page, scroll down and you will see "**Global Option**". It is the list of options that applies to all existing products in your store.
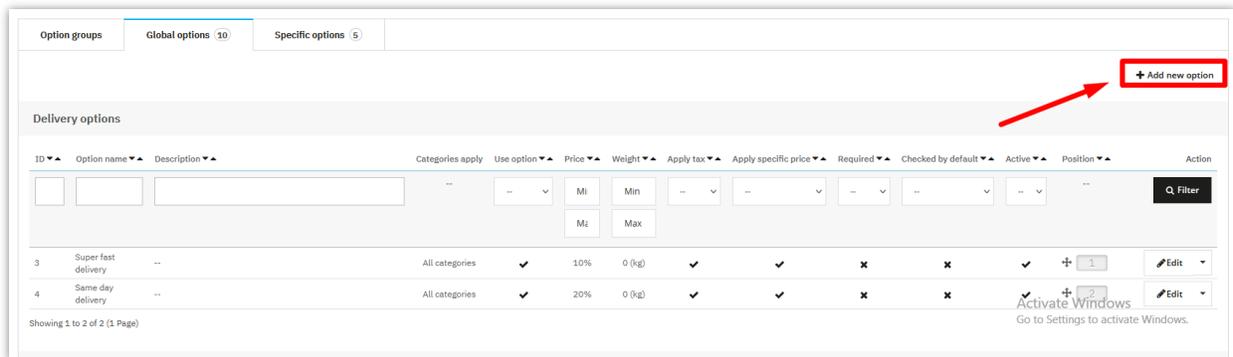

Extra Options module allows you to add an unlimited number of global options. Start adding a new option by clicking the **"Add new option"** button.

- Enter the option name and description. You can enter option name and description for multiple languages.
- Enable "**Use option (Globally)**" option
- Set the price for the global option: You can select to calculate the option price by a fixed amount or percentage of the product price.
- Change the related options if you want
- Enable **"Display by option group"** if you want to display this option in a group, then choose a group for that option.
- Upload an image for the option
- Finally, enable "**Active**" option and save your settings

> **_Note:_** *To use the "**Check by default**" and "**Required (Global)**" options, you must choose to display the option as a "**checkbox**". These 2 options will not apply to the "**radio**" type*

Add option   ✕

* Name   en ▾

Description   en ▾

Use option (Globally)   🟢 On
This option will be applied to all existing products in your store.

How to calculate option price: [Fixed amount   ▾]

Price   [   ] [$]
The price will be added to the product price if customers select this option.

Weight   [   ] [kg]

Apply tax   ⚪ Off
Apply the tax rule defined on "Pricing" tab of the product editing page

Apply specific price   ⚪ Off
Apply the specific price defined on "Pricing" tab of the product editing page

Required (Global)   ⚪ Off

Checked by default   ⚪ Off

Display by option group ⚪ Off

Categories   [⊟ Collapse all] [⊞ Expand all] [☑ Check all] [☐ Uncheck all]

              ☐ 📁 Home

Image   [   ] [📁 Add file]

Accepted formats: jpg, png, jpeg, gif. Limit: 8MB

Active   🟢 On

[Save]   [Cancel]

A new option will be displayed on your back office, and you can quickly edit it directly or click the "**Edit**" button:
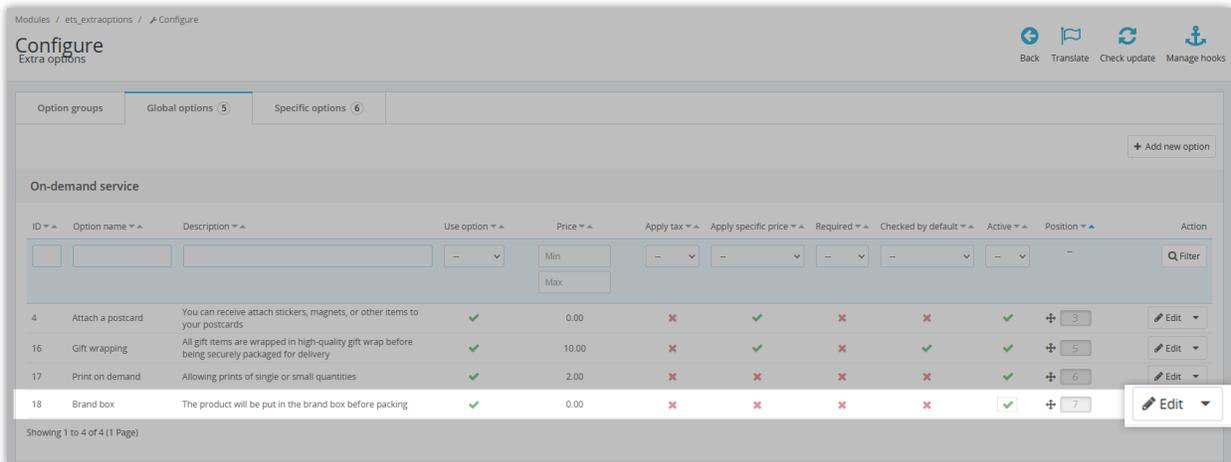

Besides, you can edit the global option on the specific product editing page.
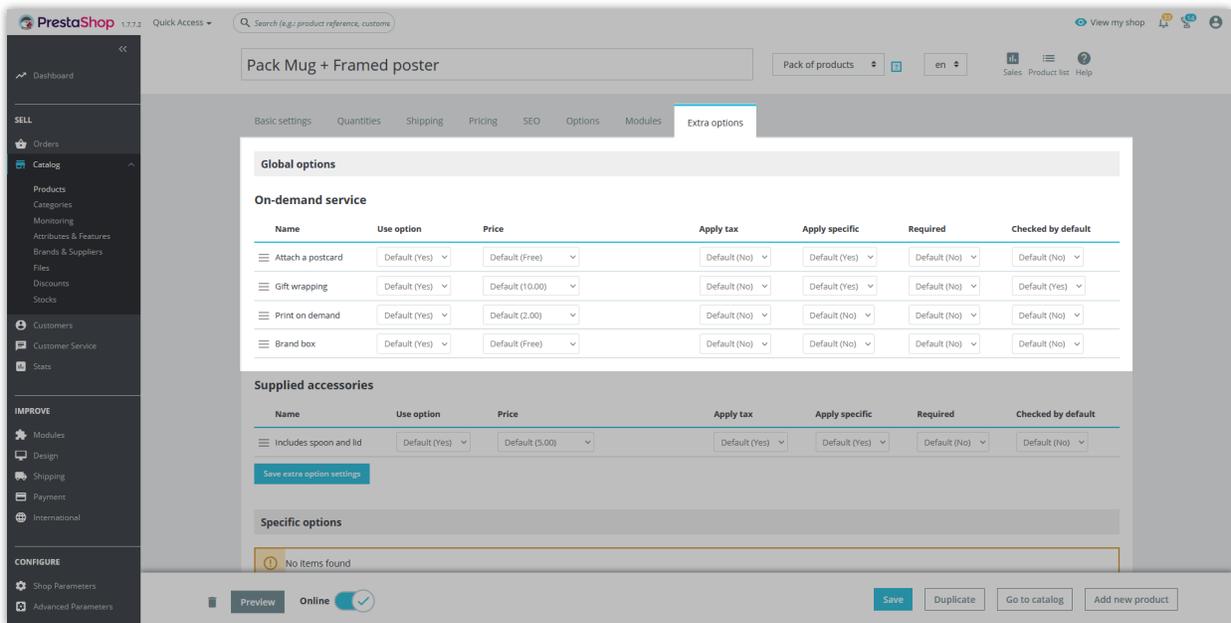

Now, see how it looks in the front office:

4. Specific options

Besides creating new global options for all current products in your store, you also can add new specific options for each product.

On PrestaShop back office, open the product editing page of the item you want to add a specific options. Select "**Extra options**" tab then find and click on "**Add specific option**" button.

- On the "**Add specific option**" popup, fill in the required information fields: option name, description, price, other related options.

- Enable **"Display by option group"** if you want to display this option in a group, then choose a group for that option.

- Enable **"Use option (Globally)"** option if you want to apply this extra option to all existing products in your store.

- Save all your changes.

After successfully adding a new option, you can quickly edit it right on the product editing page.

Now open the product detail page on front office, you will find your newly created specific option.
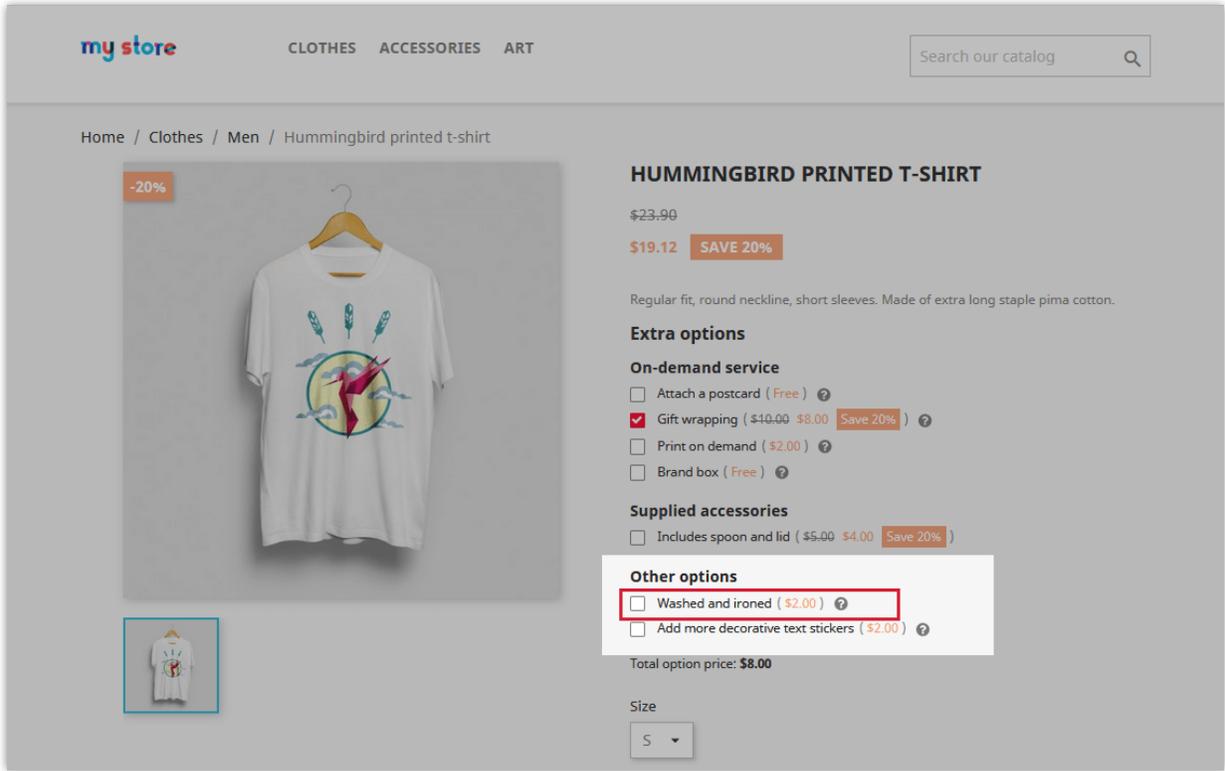

To make specific option editing become more convenient for customers, we have set up **"Other options"** list on module configuration page for you to manage, edit or delete easily.

The list of specific options and their quick-change options
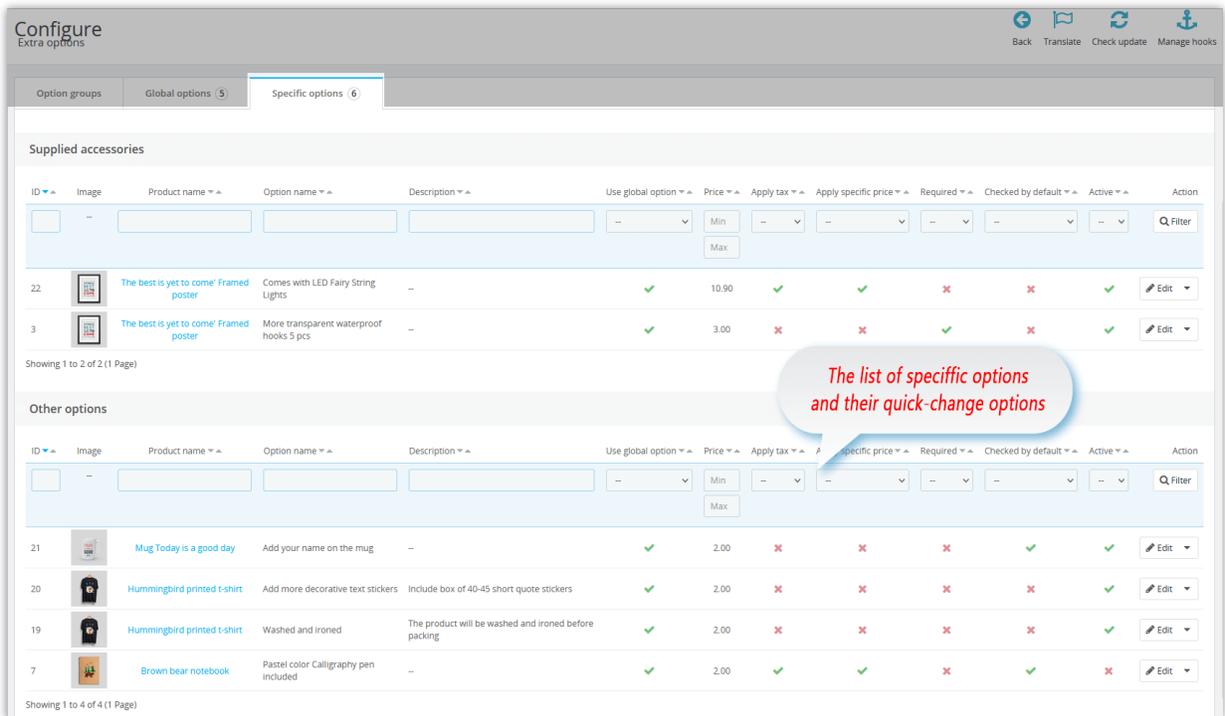

IV.   THANK YOU
