I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. If you have any questions that are beyond the scope of this documentation, please feel free to contact us.

***Note:**

All instruction screenshots are taken from PrestaShop 1.7, but installing and configuring this module on PrestaShop 1.6 is similar.

II. INTRODUCTION

Loyalty, referral and affiliate program (reward points) is an advanced marketing module for PrestaShop that brings a comprehensive solution for your website. This module can help you deploy Loyalty, Referral and Affiliate Marketing programs on your PrestaShop store promptly and easily. You don't need to have much knowledge about marketing to use it, **Loyalty, referral and affiliate program (reward points)** will do the rest for you!

* ***"Loyalty, referral and affiliate program (reward points)"** is compatible with PrestaShop 1.6.x, PrestaShop 1.7.x, PrestaShop 8.x and PrestaShop 9.x*

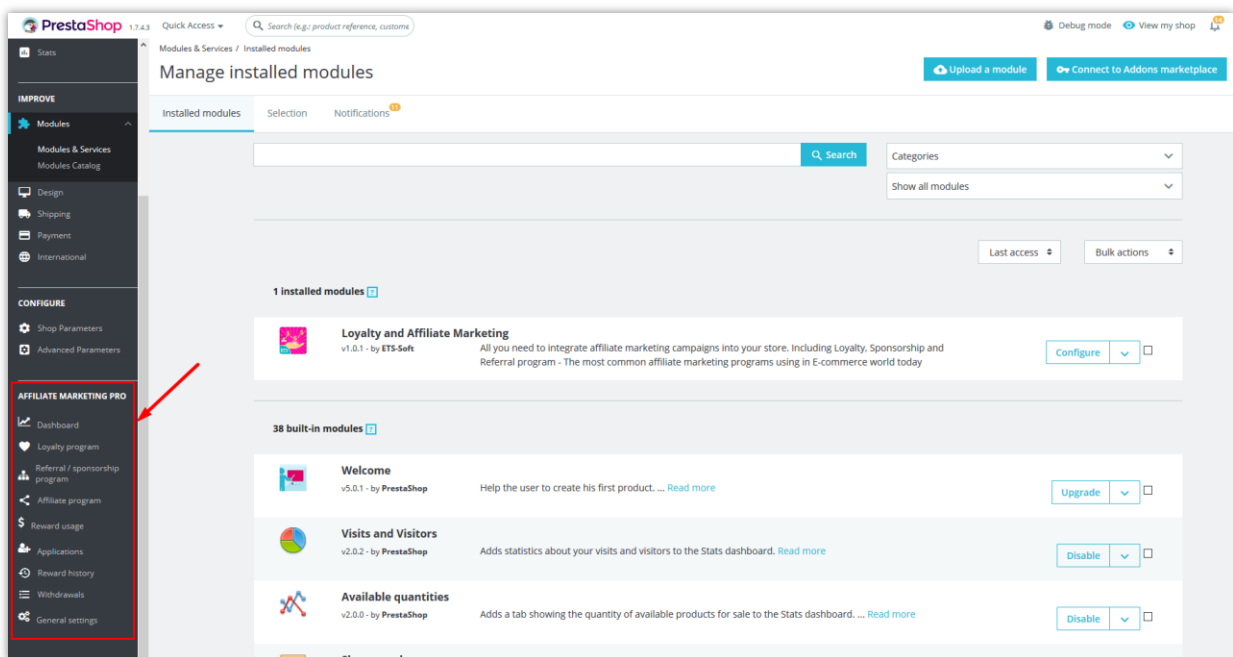

III. INSTALLATION

1. Navigate to **"Modules / Modules & Services"**, click on **"Upload a module / Select file"**

2. Select the module file **“ets_affiliatemarketing.zip”** from your computer then click on **“Open”** to install

❖ Click on **“Configure”** button of the module you just installed to open the module’s configuration page.

You can also navigate to **Loyalty, referral and affiliate program (reward points)** module through the quick access menu:

IV. MARKETING PROGRAMS

1. Loyalty program

1.1. Conditions

Loyalty program allows customers to earn rewards when they purchase products.

- To launch this program, firstly you should turn on the **Enable loyalty program** option.
- Next, select the **Applicable customer group** who can join loyalty program.
- You can select to **require customer to submit an application to join loyalty program** or not.

- Finally, set **availability time** of the loyalty program and **minimum amount customer spent to join loyalty program**. This condition is to make sure customer who has spent a specific amount of money on your website will receive loyalty rewards if they purchase more.

Don't forget to click **Save** when you finish.

1.2. Reward settings

In the Loyalty Program, the module allows customers to earn rewards when they purchase products. Rewards can be calculated in different ways depending on your chosen method. Currently, the module supports four main reward calculation options:

♥ Loyalty program
Allow your customers to earn rewards when they purchase products

Conditions
 Reward settings
 Messages

How to calculate loyalty reward when customer purchase this product?

- Fixed amount per loyalty product
- Percentage of loyalty product price
- Fixed amount per shopping cart (Exclude shipping)
- Percentage of shopping cart value (Exclude shipping)
- No reward

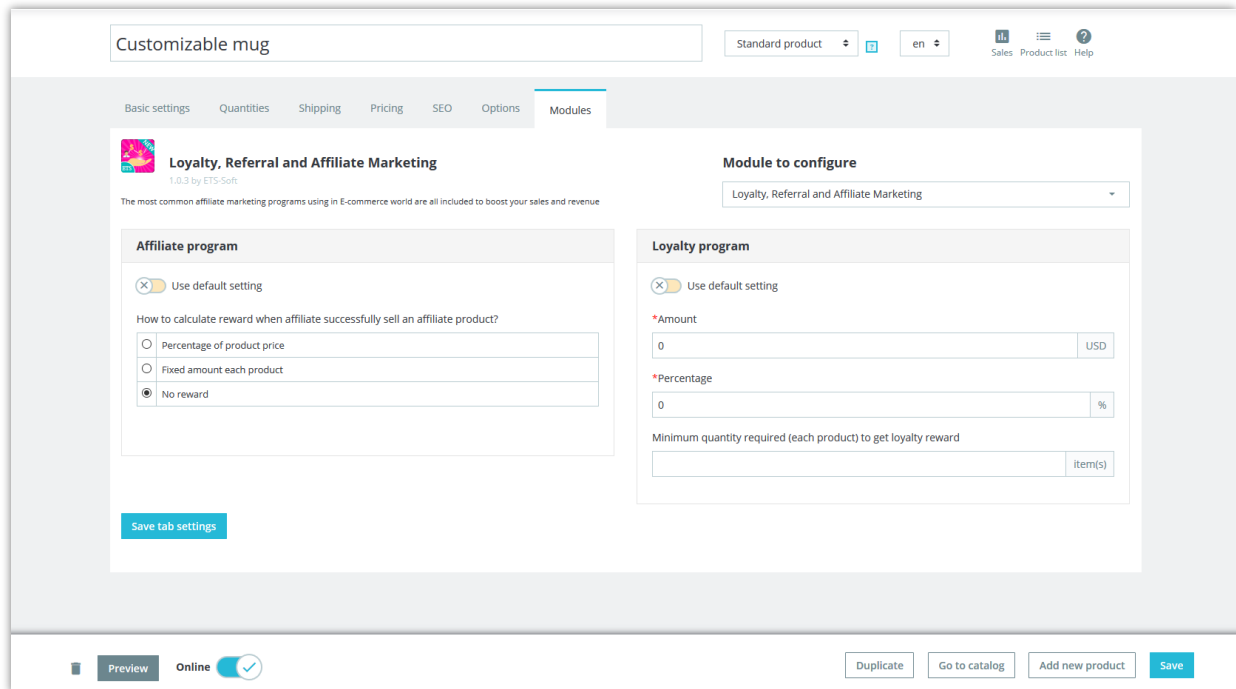

This is default setting. You can select particular setting for each product on product information page. Loyalty products are products available for loyalty program and are selected in "Conditions" tab

* Amount USD

Reward Calculation Method	How It Is Calculated
Fixed amount per loyalty product	A fixed reward amount is granted for each loyalty product purchased.
Percentage of loyalty product price	Reward = percentage × unit price of the loyalty product.
Fixed amount per cart (Exclude shipping)	A fixed reward amount is granted for the entire shopping cart, excluding shipping.
Percentage of cart value (Exclude shipping)	Reward = percentage × total cart value, excluding shipping.

Note:

You can select particular setting for each product on product information page. Loyalty products are products available for loyalty program and were selected in "**Reward settings**" tab.

1.2.1. General Conditions for Reward Calculation (Applicable to All Methods):

Before calculating any reward, the module checks the following conditions to ensure points or cash rewards are applied correctly:

- **Loyalty Program Enabled** – The loyalty program must be active, and the customer must meet all eligibility criteria to participate.
- **Product Is a Loyalty Product (validateLoyaltyProduct)** – Only products designated as “loyalty products” are eligible. The module verifies that the product is in the correct category, is a specific selected product, and is not in the excluded list.

- **Minimum Cart Total (ETS_AM_LOYALTY_MIN)** – The total cart value must reach or exceed the configured minimum threshold to qualify for rewards.
- **Minimum Quantity per Product (ETS_AM_QTY_MIN)** – Each eligible product must meet the minimum quantity configured in the module to earn rewards.
- **Maximum Reward per Cart (ETS_AM_LOYALTY_MAX)** – Rewards per cart are capped at the configured maximum amount to prevent excessive allocation.
- **Multiply by Product Quantity (ETS_AM_LOYALTY_MULTIPLE_BY_PRODUCT)** – Rewards can optionally be multiplied by the number of items purchased for each product, depending on the configuration.
- **Exclude Tax (ETS_AM_LOYALTY_EXCLUDE_TAX)** – Reward calculation can include or exclude tax, according to the module configuration.
- **Discounted Products (ETS_AM_LOYALTY_NOT_FOR_DISCOUNTED)** – Products with discounts can optionally be excluded from earning rewards based on this setting.

These conditions are **applied first**, before any reward calculation method (fixed per product, percentage per product, fixed per cart, or percentage of cart value), ensuring **consistent and fair reward allocation** for eligible customers.

1.2.2. Detailed Reward Methods

Below are the detailed explanations and examples for each reward calculation method.

❖ **Method 1: Fixed Amount per Loyalty Product**

This method gives a fixed reward for each loyalty product purchased.

- **Calculation:** Reward = Fixed amount × Quantity (if “Multiply loyalty reward by product number” is enabled)
- **Example:** (*Fixed reward = 5€, “Multiply loyalty reward by product number” = ON*):

Order	Calculation	Total Reward
1 unit of Product A	5×1	5€
3 units of Product A	5×3	15€
2 products: 2×A, 1×B	$(5 \times 2) + (5 \times 1)$	15€

If "Multiply loyalty reward by product number" = OFF:

Order	Calculation	Total Reward
3 units of Product A	5 (not multiplied)	5€
2 products: 2×A, 1×B	$5 + 5$	10€

❖ **Method 2: Percentage of Loyalty Product Price**

This method calculates rewards as a percentage of the unit price of each loyalty product purchased.

- **Calculation:**

Reward = Unit price × Percentage × Quantity (if "Multiply by product quantity" is enabled)

- **Example:** (Percentage = 10%, "Multiply loyalty reward by product number" = ON):

Order	Calculation	Total Reward
1 unit of Product A (100€)	$100 \times 10\% \times 1$	10€
3 units of Product A (100€ each)	$100 \times 10\% \times 3$	30€
2 products: A×2 (100€), B×1 (50€)	$(100 \times 10\% \times 2) + (50 \times 10\% \times 1)$	25€

If "Multiply loyalty reward by product number" = OFF:

Order	Calculation	Total Reward
3 units of Product A (100€ each)	$100 \times 10\% = 10€$	10€
2 products: A×2 (100€), B×1 (50€)	$10 + 5$	15€

Note: Only products designated as loyalty products earn rewards. Non-loyalty products do not contribute to the total reward

❖ **Method 3: Fixed Amount per Cart**

This method grants a fixed reward for the entire shopping cart, regardless of the number or type of products.

- **Calculation:** Reward = Fixed amount (applied once per cart)

Calculated on the total cart value excluding shipping (tax can be included or excluded depending on settings).

- **Example:** (Fixed reward = 20€, cart total = 150€ excluding shipping):

Order	Total Reward
1 product, 1 unit	20€
1 product, 5 units	20€
3 different products, multiple units	20€

Note: At least one loyalty product must be present in the cart for the reward to apply.

❖ **Method 4: Percentage of Cart Value**

This method calculates rewards as a percentage of the total cart value, regardless of the number or type of products.

- **Calculation:** Reward = Total cart value × Percentage

Shipping costs are excluded. Quantity of products does not affect the calculation.

- **Example:**

Percentage: 5%

Cart:

- Product A (loyalty) = 100€
- Product B (not loyalty) = 50€
- Shipping = 10€

Calculation: Cart total excludes shipping: $100 + 50 = 150€$

Reward = $150 \times 5\% = 7.5€$

- **Situations:**

Situation	Cart Total (excluding shipping)	Reward
Only Product A (loyalty)	100€	$100 \times 5\% = 5\text{€}$
Product A (loyalty) + Product B (not loyalty)	$100 + 50 = 150\text{€}$	$150 \times 5\% = 7.5\text{€}$
Only Product B (not loyalty)	50€	$50 \times 5\% = 2.5\text{€}$

These four methods provide flexible ways to reward customers based on individual products or the total cart value. Store administrators can choose the method that best fits their loyalty strategy and customize the settings to maximize customer engagement.

Note: The module does not recalculate points/rewards and does not interfere further when the admin adds a discount code to the order. The module will only recalculate the points/rewards when changing the product of the order. If the admin manually adds a discount code to the order, they will also need to manually edit the points/rewards for the customer.

How to give reward when new orders generated? (Multi-level marketing - Earn reward on sponsored friends' orders)

This feature allows sponsors to earn reward when their sponsored friends purchase products. It supports multi-level marketing (sponsors can also earn reward when customers from all lower levels purchase products).

HOW TO GIVE REWARD WHEN NEW ORDERS GENERATED? (MULTI-LEVEL MARKETING - EARN REWARD ON SPONSORED FRIENDS' ORDERS)

Give reward to sponsor when their friend purchase products? (Multi level marketing) YES NO
This allows sponsors to earn reward when their sponsored friends purchase products. Support multi-level marketing (sponsors can also earn reward when customers from all lower levels purchase products)

Only give reward on orders of first new friends
This is to limit the number of orders that sponsors will earn reward by limiting the number of direct sponsored friends that sponsors can earn rewards on their orders. When an order is placed by a customer who is out of this limit, all sponsors (any level) will not receive reward. Leave blank if you want to give reward to sponsors when any of friends that they sponsored purchase products from your shop

Only give reward for first orders of each friend
This is to limit the number of orders that sponsors will earn reward by limiting the number of order to give reward to sponsors (all level) of each friend. Leave blank if you want to give reward to sponsor on all their friend's orders

Minimum order total of sponsor friend required to get reward USD
Apply for the order of sponsor friend. This is to make sure you earn money more than the reward you give. Leave blank to give the reward to sponsor for any amount order of their friend

How to calculate reward for sponsor when their friends purchase products?
 Percentage of order total cost (shipping excluded)
 Fixed amount each order

Sponsor cost (by order percentage) % of order total cost
This is maximum total of money that you want to pay for the sponsorship system when an order is generated. calculated by percentage based on order total cost. This is to make sure you will not pay so much marketing cost when an order is generated by sponsorship system. How much in total would you want to pay to sponsors for each order of their friend? Leave this field blank will stop giving reward to all sponsors when a new order is generated.

Exclude taxes before calculating reward YES NO

Level 1 % of initial sponsor cost
This is direct level of a sponsored account. Leave blank to not give reward to direct sponsor when a customer purchased products.

[+ Add level](#)

Lower levels % of remaining sponsor cost after paying for higher levels
Leave blank if you don't want to give reward for lower levels. Leave this field blank will help limit the depth of multi-level marketing tree by not giving rewards to all sponsor levels

Add the rest sponsor cost (if have) to "Level 1" if no more level found YES NO
Enable this if you would want to give the rest money from "Sponsor cost" (if have after calculating reward for all sponsor levels defined above) to "Level 1" (direct sponsor). Otherwise the rest money won't be give to any sponsors, just keep it for you!

Exclude certain categories Collapse All Expand All Check All Uncheck All

- Home

- Accessories
- Art
- Ebook
- KOIMOJI bag

Exclude certain products

Exclude products with discount YES NO

 Save

Sponsor cost is maximum total of money that you want to pay for the sponsorship system when an order is generated. This is to make sure you will not pay so much marketing cost when an order is generated by sponsorship system.

To help you understand better, here is an example about calculating referral reward:

Level 1	<input type="text" value="50"/>	% of initial sponsor cost
<i>This is direct level of a sponsored account. Leave blank to not give reward to direct sponsor when a customer purchase products.</i>		
<input type="button" value="+ Add level"/>		
Lower levels	<input type="text" value="50"/>	% of remaining sponsor cost after paying for higher levels
<i>Leave blank if you don't want to give reward for lower levels. Leave this field blank will help limit the depth of multi-level marketing tree by not giving rewards to all sponsor levels</i>		
Add the rest sponsor cost (if have) to "Level 1" if no more level found	<input type="button" value="YES"/>	<input type="button" value="NO"/>
<i>Enable this if you would want to give the rest money from "Sponsor cost" (if have after calculating reward for all sponsor levels defined above) to "Level 1" (direct sponsor). Otherwise the rest money won't be give to any sponsors, just keep it for you!</i>		

For example, we set the **level 1** customer will receive **50%** of initial sponsor cost and the **lower levels** customers will receive **50%** of remaining sponsor cost after paying for higher levels. The sponsor cost is **10%** of order total cost.

Now, let's pretend that we have John Doe – a sponsor of the website. John is the level 1 customer mentioned above. John invited Mary, one of his friends to register a new account on this website. Mary created an account and purchased a pair of high-heel boots, her order total is 204 USD.

The sponsor cost is **204 USD * 10% = 20.4 USD**.

Because John is the level 1 customer, he will receive **20.4 USD * 50% = 10.2 USD** as a reward.

Next, Mary invited Mark to join this website. Mark ordered 3 printed sweaters and his order total is 84 USD. The sponsor cost is **84 USD * 10% = 8.4 USD**.

Mary is the **level 1** customer of Mark, so she will receive **8.4 USD * 50% = 4.2 USD** reward money. Remember John? Now John is the **level 2** customer of Mark and he will receive **(8.4 - 4.2) USD * 50% = 2.1 USD** reward money.

❖ Voucher

Customer's voucher code / Sponsored friend's voucher code

Giving a voucher code to sponsored friend will help improve the efficiency of the Referral/ Sponsorship program. Sponsored friends will see the voucher code after they finish creating an account.

Our module supports **2 types of vouchers**: fixed voucher code and dynamic voucher code. You can write a **welcome message** attached with the voucher code.

The screenshot shows a configuration page titled "CUSTOMER'S VOUCHER CODE". At the top, there are navigation tabs: "Conditions", "Reward settings", "Voucher" (selected), "Sponsor URL & Banner", and "Messages".

The main content area includes the following settings:

- Offer a voucher code to sponsored friend?**: Radio buttons for "YES" (selected) and "NO". Below this is a descriptive text: "Give a voucher code to sponsored friend will help improve the efficiency of the Referral / sponsorship program. Sponsored friends will see the voucher code after they finish creating account".
- Voucher type**: Radio buttons for "Fixed voucher code" and "Dynamic voucher code" (selected).
- Free shipping**: Radio buttons for "YES" and "NO" (selected).
- Apply a discount**: Radio buttons for "Percentage (%)" (selected), "Amount", and "None".
- Discount percentage**: A text input field with a "%" symbol on the right. A note below reads: "Does not apply to the shipping costs".
- Minimum amount**: A text input field, a currency dropdown menu set to "USD", and two checkboxes: "Tax excluded" (checked) and "Shipping excluded" (checked). A note below reads: "Minimum amount in shopping cart to apply the voucher code".
- Discount prefix**: A text input field containing "REF_".
- Discount name**: A text input field containing "Programma di sponsorizzazione" and a language dropdown menu set to "en".
- Discount availability**: A text input field containing "30" and a unit dropdown menu set to "days".
- Welcome message**: A text input field containing "Congratulazioni! Ottieni un codice voucher di [discount_value] per i tuoi prossimi ordini. Il tempo è limitato !! Sbrigati." and a language dropdown menu set to "en". Below this is a note: "Available tags: [discount_value]".

Sponsor's voucher code

Sponsors can generate their own voucher codes to send to their friends. When their friends use the voucher code, they will get a discount and sponsors will get a commission.

SPONSOR'S VOUCHER CODE

❖ Sponsor URL and banner

Sponsor banner

Sponsor banner is used for advertisement of Referral/Sponsorship program. Sponsors can copy banner's embed code then paste it on their website, blog, forum, etc. When someone clicks on the banner, they will be redirected to the sponsor's URL. If the customer buys products or register new account, sponsor will get a reward.

- You can **upload the default sponsor banner** or **allow sponsors to upload their custom banner**.
- Fill in the **redirect URL** to redirect customer to another URL when they land on a sponsor's URL. Sponsor's ID is saved in cookie before the redirection in order to identify if customer come from reference of a sponsor when they register new account or purchase products.

SPONSOR BANNER

Default sponsor banner 

Sponsor banner is used for advertisement of Referral / sponsorship program. Sponsor can copy banner's embed code then paste it on their website, blog, forum, etc. When someone click on the banner, they will be redirected to the sponsor's URL where the sponsor's ID will be saved in cookie to calculate reward for the sponsor if the customer buy products or register new account

Available image type: jpg, png, gif, jpeg

Resize banner image before uploading

Allow sponsor to upload their custom banner

Enable this option to allow customer to upload their own banner from their sponsor account management area on the front office. If no custom banner is uploaded, the default banner will be used

Redirect URL

Redirect customer to another URL when they land on a sponsor's URL. Sponsor's ID is saved in cookie before the redirection in order to identify if customer come from reference of a sponsor when they register new account or purchase products. Leave this field blank to keep customer stay on the sponsor's URL

Social network appearance: configure how sponsor's URL will be shared on social networks.

SOCIAL NETWORK APPEARANCE

Title

Custom title appears on social networks (Facebook, Twitter, Linked in, etc) when sponsor's URL is shared. Leave blank to use default website title.

Description

Custom description appears on social networks when sponsor's URL is shared. Leave blank to use default website description.

Image 

Custom image appears on social networks when sponsor's URL is shared. Leave blank to use default image (specified by social network when it feeds your website content)

Affiliate program

For each user, you can view their detailed reward amount and **modify their reward balance manually** (deduct or add reward amount). You can also manually add sponsored friends for each user by clicking on “Add friend” button.

VII. BACKUP / RESTORE

You can export all reward data and module's configurations for backup purpose in just one click. If your website is in multi-shop mode, this module will export data from all shops.

You may also import reward data and module's configurations for restoration. Select restoring options, choose backup file and click **Restore** button. And you're done!

The screenshot displays a web interface titled "Backup / Restore" with the subtitle "Create backup or restore module data and configuration". The interface is split into two main sections: "CREATE BACKUP" and "RESTORE BACKUP".

CREATE BACKUP: This section contains the text "Export all reward data and module's configurations for backup purpose. If your website is multishop, it will export data from all shops." Below this text is a button labeled "Create backup".

RESTORE BACKUP: This section contains the text "Import reward data and module's configurations for restoration. If your website is multishop, it will restore data of all shops." Below this text, there is a "Backup file:" label followed by a "Browse..." button and the text "No file selected." Underneath, there is a "Restoring options:" section with three checked checkboxes: "Restore configuration", "Restore reward data", and "Delete reward before restoring". At the bottom of this section is a button labeled "Restore".

VIII. CRONJOB

Cron is used to schedule commands at a specific time. These scheduled commands or tasks are known as "Cronjob". With this module, you can set up cronjob to **send notification emails automatically when loyalty reward of customer is going to be expired or already expired.**

Note: Cronjob does not work for Referral/Sponsorship and Affiliate program.

1. Config

To run cronjob, please make sure that:

- ✓ You've enabled Loyalty program
- ✓ You've set available time for loyalty reward

There are 2 ways to set up and execute cronjob: automatically or manually.

* Setup a cronjob as below on your server to automatically change loyalty reward status to "expired" when it is expired and send emails to customer when their loyalty reward is going to be expired

```
0 * * * php /home/ets/public_html/demo/affiliatemarketing/modules/ets_affiliatemarketing/cronjob.php secure=QeR1ynEdxB
```

* Execute the cronjob manually by clicking on the button below

Cronjob secure token:
Auto save on change

2. Cronjob log

You can see the cronjob history on this tab. You can also clear cronjob log to get more storage space for your website.

Cronjob

Send notification emails automatically via cronjob

IX. GENERAL SETTINGS

1. General

You can choose to display rewards to customer on the front office in "customer's selected currency" unit or "point".

The screenshot shows the 'General' settings page for rewards. It features a navigation bar with 'General' (active) and 'Email'. The main content area is divided into sections for front office and back office settings.

Front Office Settings:

- How to display reward on front office?:** Radio buttons for 'Currency (that customer selected)' and 'Custom unit (Point)'. The 'Custom unit (Point)' option is selected.
- * Reward unit label:** A text input field containing 'Point' and a language dropdown menu set to 'en'.
- * Conversion rate: 1USD =** A text input field containing '10' and a unit dropdown menu set to 'Point'.

Back Office Settings:

- How to display reward on back office?:** Radio buttons for 'Default currency (USD)' and 'Custom unit (Point)'. The 'Default currency (USD)' option is selected.

Helpful text for front office settings: "You can choose to display rewards to customer on the front office in "customer's selected currency" unit or "Point".

Helpful text for conversion rate: "Convert money value to custom unit. This rate is used for default currency (USD), other currencies (if have) will be converted to points based on its exchange rate with default currency (USD)".

Helpful text for back office settings: "You can choose to display rewards in back office in "default currency (USD)" unit or "Point".

You can set the order status whose reward will be created with "Awaiting validation".

* Reward is created with "Awaiting validation" if order status is

<input checked="" type="checkbox"/>	Awaiting bank wire payment
<input checked="" type="checkbox"/>	Awaiting Cash On Delivery validation
<input checked="" type="checkbox"/>	Awaiting check payment
<input checked="" type="checkbox"/>	Delivered
<input checked="" type="checkbox"/>	On backorder (not paid)
<input checked="" type="checkbox"/>	On backorder (paid)
<input checked="" type="checkbox"/>	Payment error
<input checked="" type="checkbox"/>	Processing in progress
<input checked="" type="checkbox"/>	Reward payment accepted

You can also set the order status whose reward will be validated

* Reward is validated and changed to "Approved" status if order status is

<input checked="" type="checkbox"/>	Delivered
<input checked="" type="checkbox"/>	Payment accepted
<input checked="" type="checkbox"/>	Remote payment accepted
<input checked="" type="checkbox"/>	Reward payment accepted
<input checked="" type="checkbox"/>	Shipped

These statuses are also used to consider an order as PAID when calculating total spent for a customer

Other options:

Only validate reward if order has been changed to day(s) statuses above for

Reward status will remain "Pending" until the required days exceeded. Leave blank to validate reward immediately when order status is changed to one of the statuses above. If you set any value for this field, please also set up cronjob so that when this condition is satisfied, cronjob will update status of the reward.

* Cancel reward if order status is

<input checked="" type="checkbox"/>	Canceled
<input checked="" type="checkbox"/>	Payment error
<input checked="" type="checkbox"/>	Refunded

Require customer to accept Terms & conditions when submit application to join marketing program? YES NO

Display customer email on front office YES NO
