Custom fields & tabs on product page

Add unlimited extra product info tabs & custom fields to the product detail page to give additional product information to your customers

A product of PrestaHero

Contents

I. WELCOME

Thank you for purchasing our product. We hope to guide you through all the aspects of the module installation and the module setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

II. INTRODUCTION

PrestaShop only has a general product information tab, which often falls short to display all the information we want to show potential customers, and, often, it is crucial information.

"**Custom fields & tabs on product page**" is a module that extends PrestaShop to allow store owners to add custom extra tabs to products. The extra tabs are displayed on the product detail pages and to the right of the default "Product details" tab. Extra tabs can be easily added, deleted and rearranged.

* "**Custom fields & tabs on product page**" is compatible with PrestaShop 1.6.x, 1.7.x and 8.x

III. INSTALLATION

1. Navigate to **"Modules / Modules & Services",** click on **"Upload a module / Select file"**
2. Select the module file **"ets_extraproducttabs.zip"** from your computer then click on **"Open"** to install
❖ Click on **"Configure"** button of the module you just installed to open the module's configuration page.

IV.   CONFIGURATION

1. Add new tab

From your installed module list (Located at **"Modules/Modules & services/Installed modules")**, find "**Custom fields & tabs on product page**" then click on the **"Configure"** button to open its configuration page.

Click on "**Add new tab**" button to add a new extra tab.
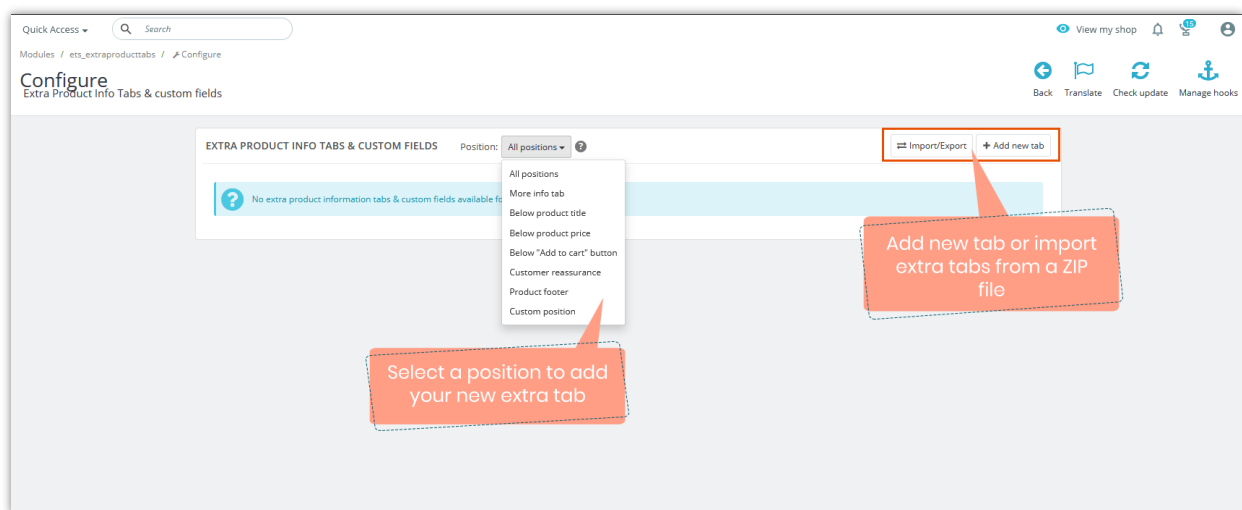

Our module supports the following display positions on the product detail page:

- Default product info tabs,
- Below product title,
- Below product price,
- Below "Add to cart" button,
- On "Customer reassurance" block,
- Product footer,
- Custom position.

On the "**Add new tab**" popup, configure your extra tab as you prefer.

- Enter the tab name. This module allows you to enter tab name for multi-language.

- **Content type**: select a content type for your extra tab. **Custom fields & tabs on product page** module supports these following content types: text (rich text area, text input field, rich text editor), radio, checkbox, select options, field, date, date time, color, HTML code, image, number, etc.

- **Global tab (global content)**: if you enable this option, the default value (default content) of this tab will apply to every product and you will not be able to customize tab content for a specific product.
- **Apply the extra tab for**: you can select which kind of products to apply your newly created extra tab. This module provides 3 options: all products, free products only, and paid products only.
- **Display tab in categories**: you can select categories whose products will be applied to the newly created extra tab or select specific products to apply the extra tab.
- **Who can see this content?:** Select the customer group(s) that can view this additional product information field
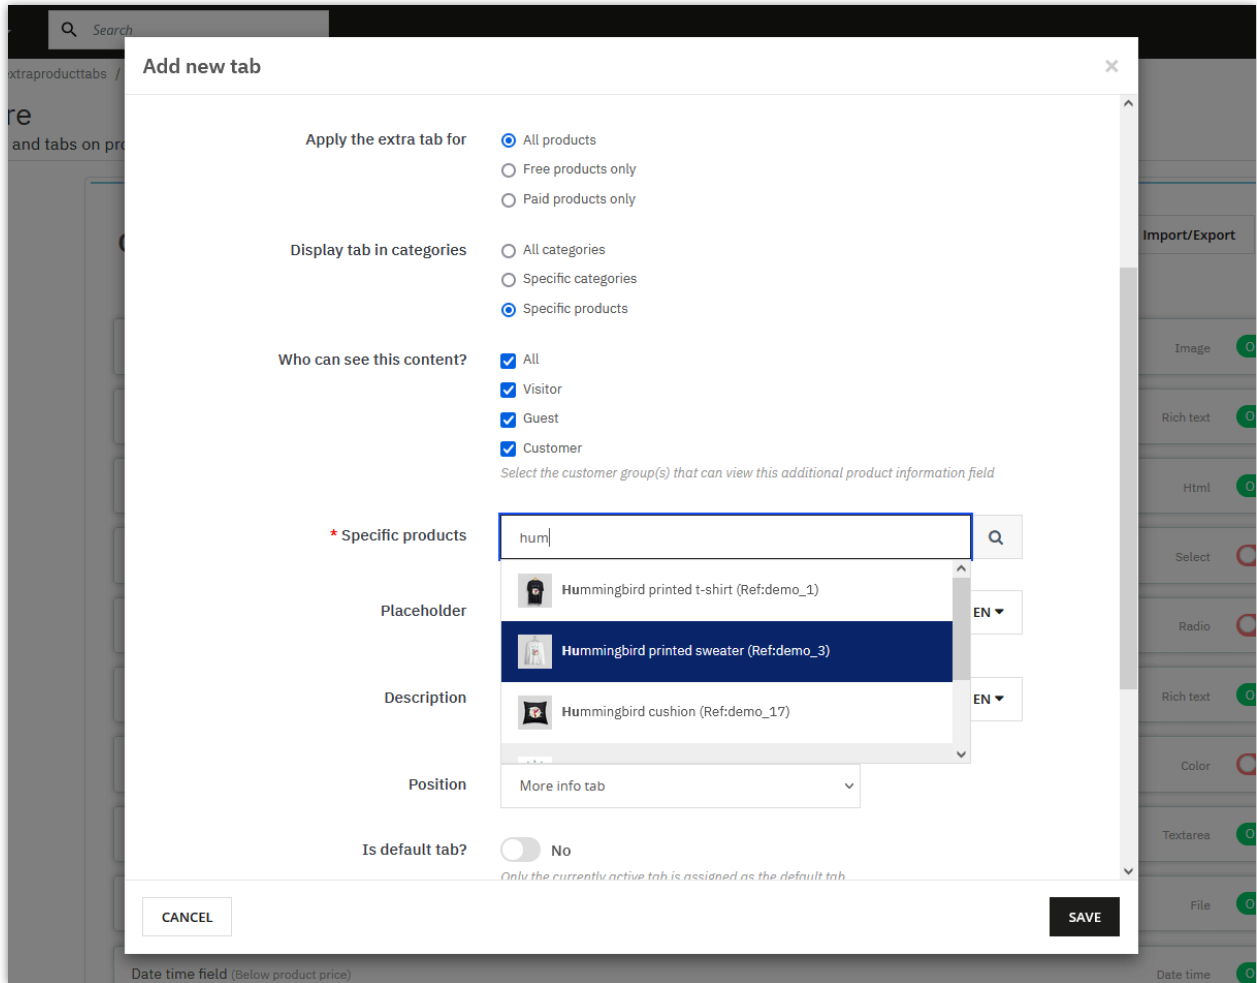

- **Is required**: set your extra tab as a "required" element. When you add a new product, you will need to add content for this extra tab.
- **Enable**: enable/disable this extra tab.

Click on "**Save**" button to finish.

Here is an example of a product detail page with extra product tabs:

After adding extra tabs/custom fields, you can drag and drop to sort the tab's order; edit tab content, or delete a tab.

*To reorder the product tabs, follow these steps:

- **Select a position:** First, choose a position from the dropdown menu located at the center top of the page. This determines the reference point for arranging your tabs.
- **Drag and drop:** Click and hold the tab you want to move, then drag it to your desired position. Release the mouse button to drop the tab into place.
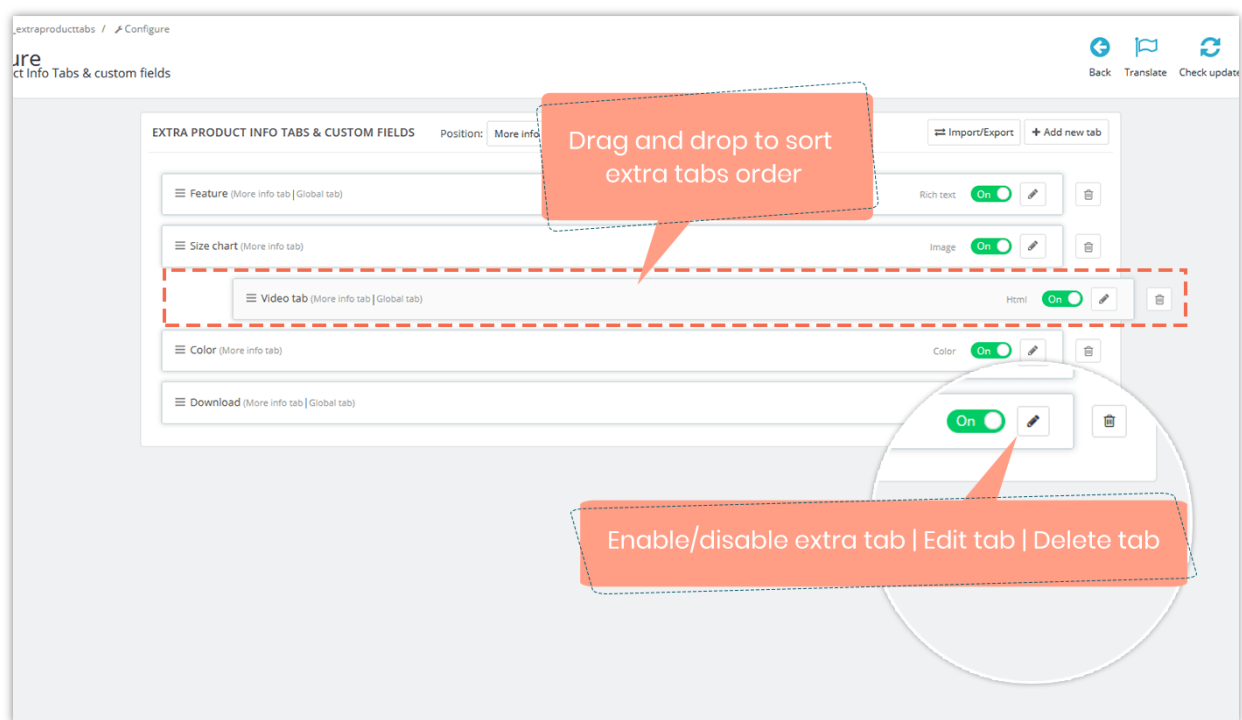

*NOTE:

"**Custom fields & tabs on product page**" module is compatible with "**G-Translate**" module developed by PrestaHero. You can translate the content of extra product tabs to any language easily using "**G-Translate**" module.

❖ *Customize extra tab for a specific product*

Our module allows you to customize extra tab content for each product.

- From **Catalog** > **Products** > open the product you want to customize the extra tab.
- Navigate to "**Extra info**" tab of the product edit page.
- Customize extra tab content as you want.
- For "**Global tab**", if you want to customize tab content, please turn off the "**Use global content**" switch and then enter your custom content.
- Click "**Save**" to finish.

2. Import/Export feature

The Import/Export feature in the "**Custom Fields & Tabs on Product Page**" module is designed to help you back up and restore custom fields and tabs data efficiently.

Click on the "**Import/Export**" button on the top right corner of the configuration page to open the "**Import/Export**" popup.

2.1. Export

The Export functionality allows you to save your current custom fields and tabs data as a backup.
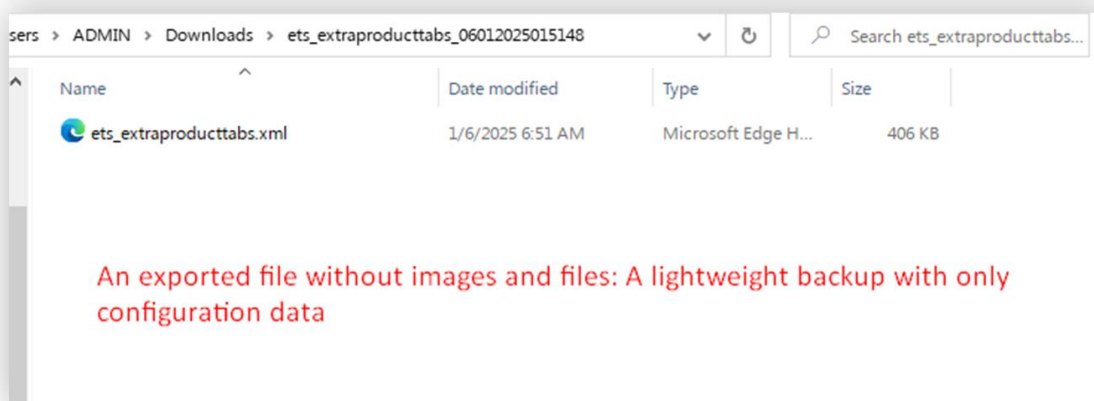

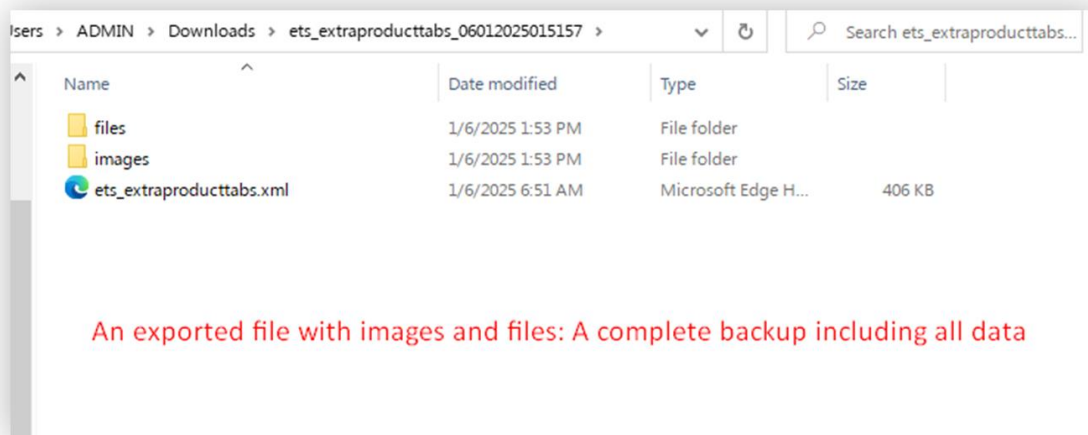

Options in Export:

- Export images: Select this option to include all images used in your custom fields and tabs.
- Export files: Select this option to include all files associated with your custom fields and tabs.

How it works:

- If you tick both "**Export images**" and "**Export files**," the export will include all data, including images and files.
- If you leave both options unticked, the export will generate an XML file containing only the configuration of the custom fields and tabs (excluding images and files).

Choose the appropriate export options based on your backup needs.

Here is an example comparison of the two export packages after extraction:

An exported file with images and files: A complete backup including all data

An exported file without images and files: A lightweight backup with only configuration data

2.2. Import

The Import functionality enables you to restore your custom fields and tabs data from a previously exported file.

***Steps to Import:*

- Select the **.zip** file you exported earlier.
- Tick the "**Clear all existing tabs**" option if you want to delete all current custom fields and tabs data in the module and replace them with the imported data.

This feature ensures that you can easily reset your custom fields and tabs configuration or integrate previously backed-up data.

By using these **Import/Export** options, you can maintain your custom fields and tabs configurations efficiently, ensuring that your product pages remain customized to your requirements.

V.	THANK YOU

Thank you again for downloading our product and going through this documentation. We hope this document is helpful and efficient in the complete setup of this module on your website.

If you do have any questions for which the answer is not available in this document, please feel free to contact us.
