E-BUSINESS

E-Business - All in one package Prestashop theme

A product of ETS-Soft

CONTENTS

I.   WELCOME

Thank you for downloading our theme. We hope to guide you through all the aspects of the theme installation and the theme setup within this document. But if you have any questions that are beyond the scope of this documentation, please feel free to contact us.

*"**E-BUSINESS**" is compatible with PrestaShop 1.7.x

II.   SERVER REQUIREMENTS

PHP configuration:

- "memory_limit" need to be at least "64M"

- "upload_max_filesize" need to be at least "16M"

- "allow_url_fopen" need to be set to "on"

- "register global" should be set to "off"

- "safe_mode" should be set to "off"

Extensions required:

- GD

- cURL

- SimpleXML

- SOAP

**File permissions:**

- All files need to be "664"

- All folders need to be "755"

III.   INSTALLATION

Before installing the theme, you need to install a PrestaShop 1.7.x website on your server. For more information of how to install PrestaShop, you can check [here](#).

NOTE:

- Since the install package is larger than 2MB, therefore you should increase the "**Maximum size for attached files**" value of your site ("**Configure**" > "**Advanced Parameters**" > "**Administration**" page). We recommend the minimum value of 30 MB.
- After successfully uploading the install package, you can change this parameter back to the initial value.
- You can also contact the host manager to increase the "max_upload_filesize" value of your server to be able to upload larger file.

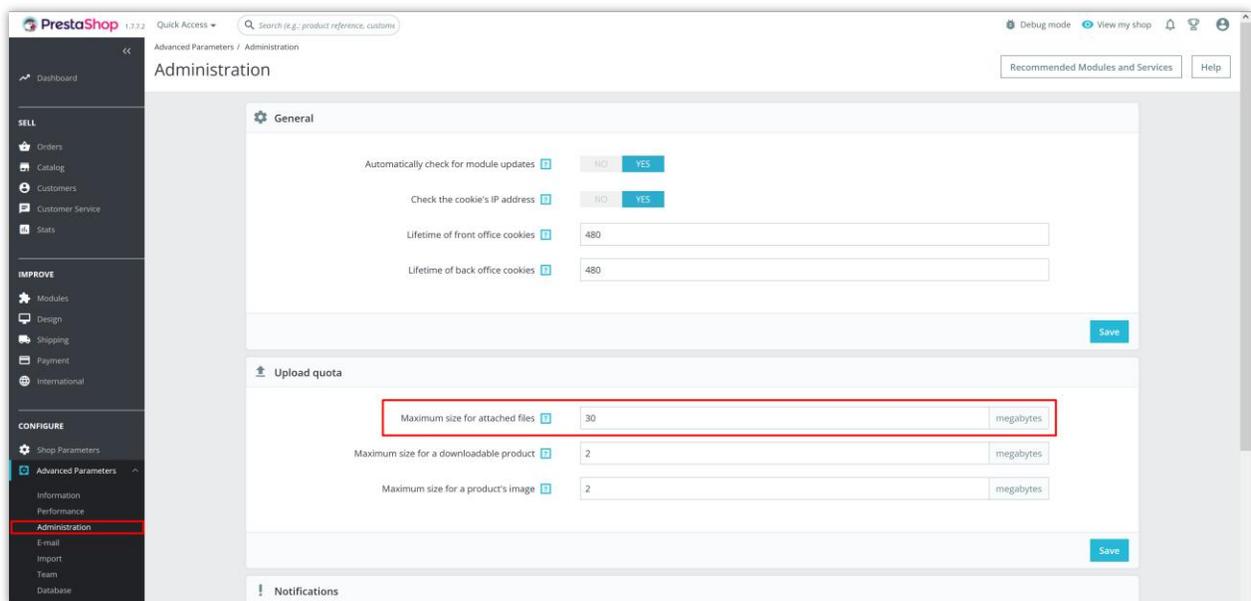

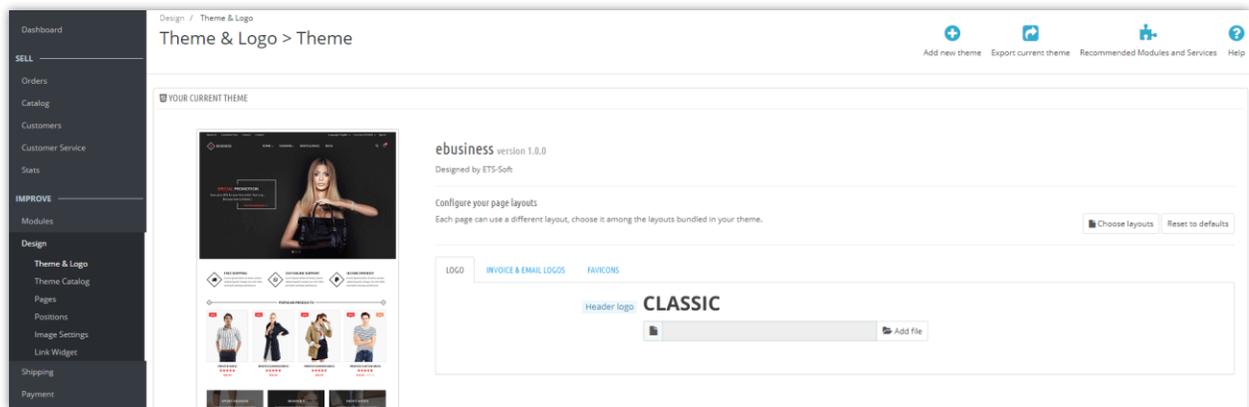

Upload theme

Follow these steps to install our theme manually:

- Login to your backoffice and navigate to **Design > Theme & logo** and click on *"Add new theme"*.

- From "**IMPORT FROM YOUR COMPUTER**" section, choose your theme file (ebusiness.zip) from the *"theme"* folder in the download file and click *"Save"*.

- Choose the theme you uploaded and click *"Use this theme"*

Upload logo

Navigate to "**Design > Themes & Logo**", select and upload your website logo.

Images

Make sure your image sizes are configured as below:

Navigate to **Design/Image Settings**.

Set up image quality that you prefer to use on your website:

Regenerate image thumbnails:

IV.   IMPORT SAMPLE DATA

You can quickly import our sample data to your PrestaShop website to make it the same as our demo websites. Navigate to "**Modules / Modules & Services**", select Installed modules tab, search for "**Theme options**" module and click "**Configure**".
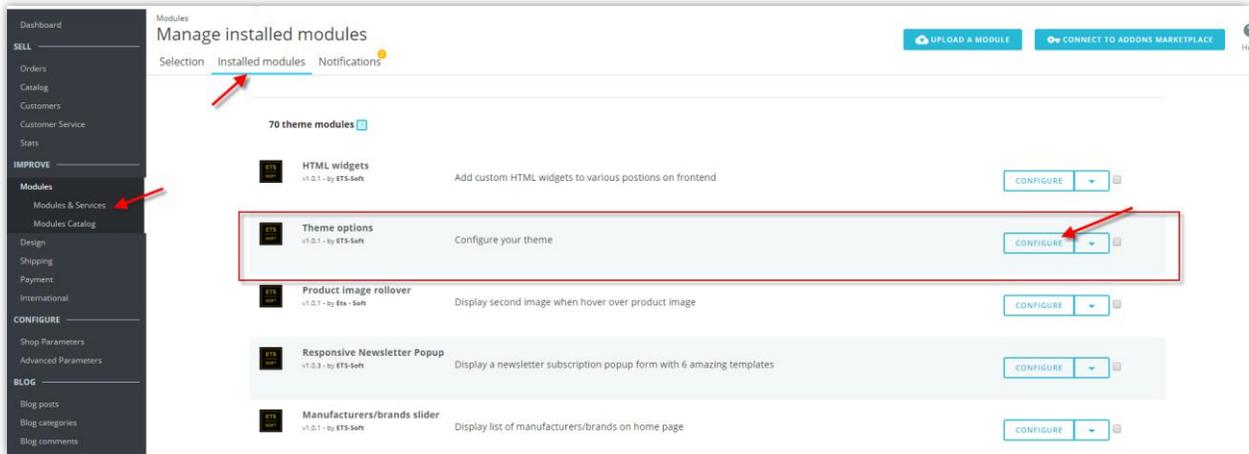

Click "**Import sample data**" then select type of data that you want to import.
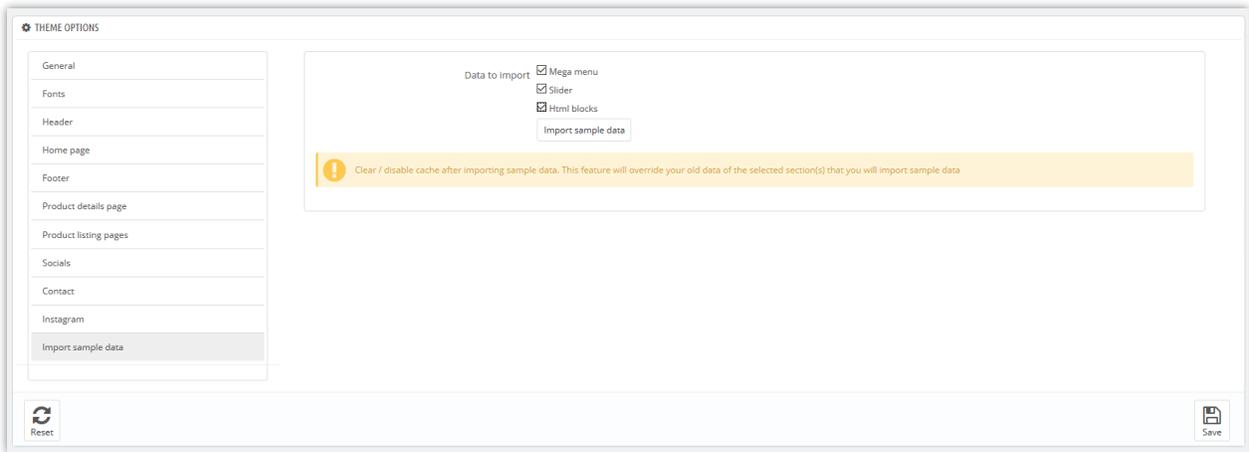

Note: *This option is recommended when you install the theme on a fresh PrestaShop website.*

Clear your website cache (or turn it off) after importing sample data.
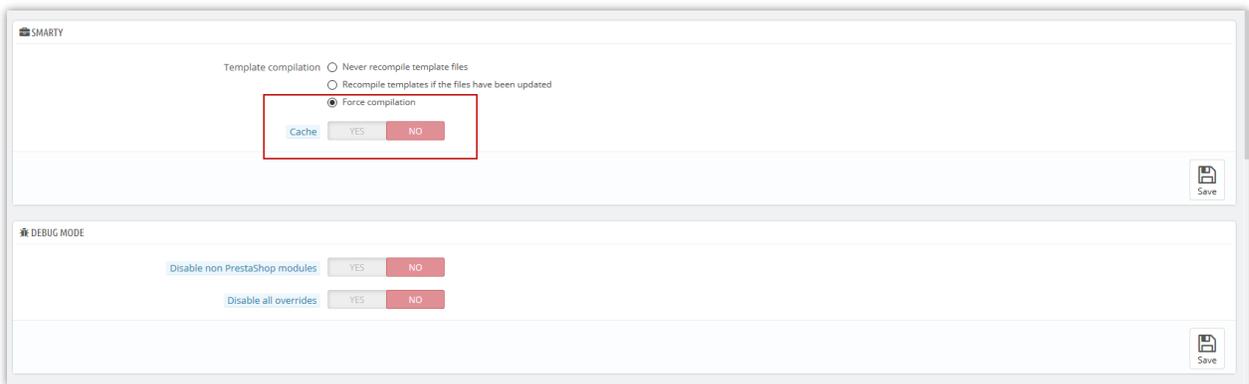

V.   THEME OPTIONS

This is a powerful Prestashop theme, it offers many useful features that help you to manage the theme easily.

Navigate to "***Theme options***":
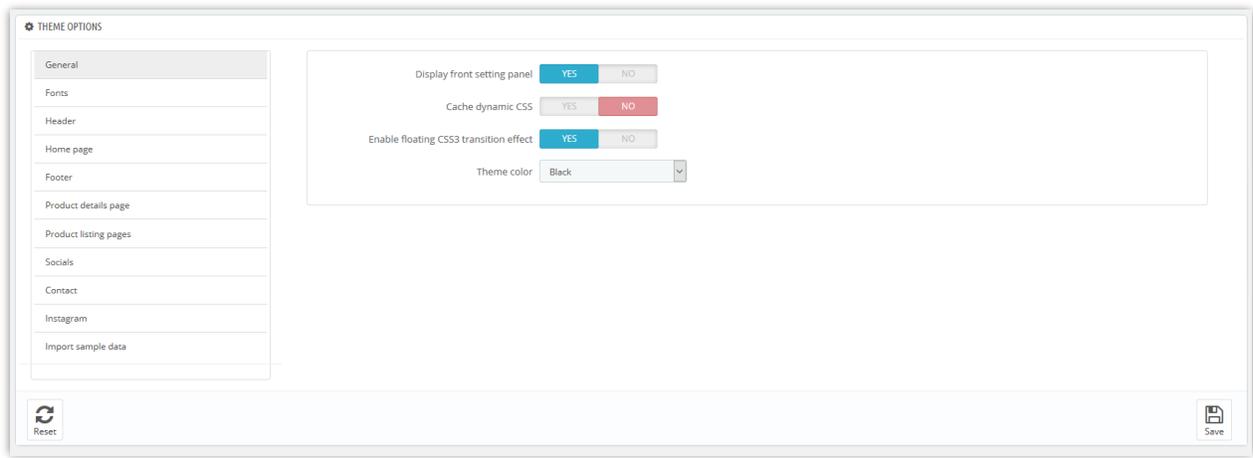

- After selecting a theme layout, you should reimport sample data to make your website like our live demos then start to replace the images/text by your real data (make sure your image sizes are the same as the sizes of our sample images)

- You can define your custom color set by selecting "***Custom color***" from "***Theme color***"

- Cache dynamic CSS should be enabled for live website

- This theme supports Google font, you can setup your custom font as below

VI.   MEGA MENU MODULE

This theme come with 2 forms of mega menu (vertical and horizontal) depending on the home page layout you select in backoffice. Our mega menu is organized by 3 main elements: menus, columns and blocks which will give you easy and flexible ways to create different types of simple or complex structures for your top menu
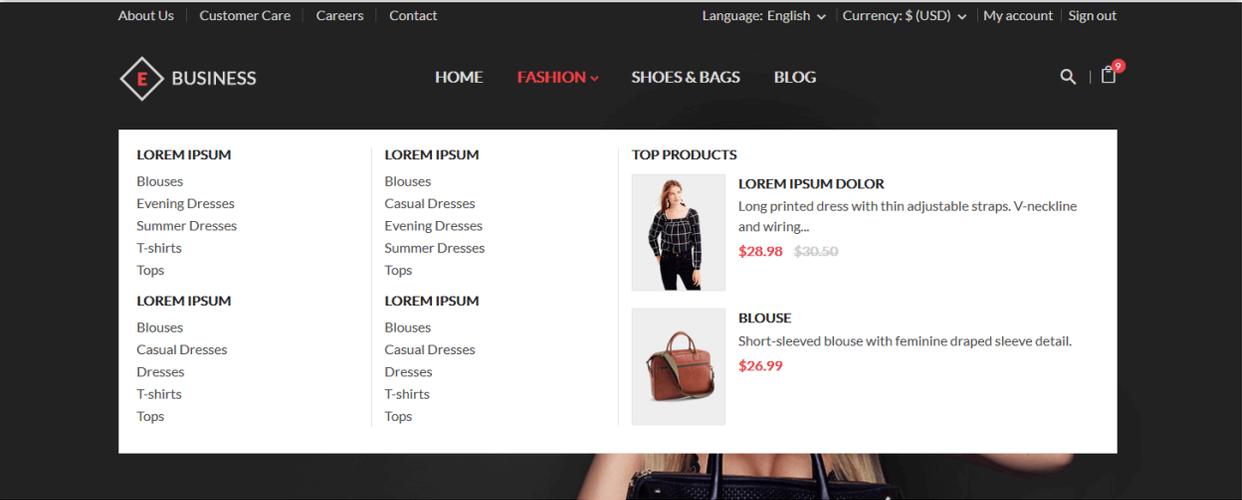

To manage your mega menu, go to *"**Modules / Modules and services**"* and select *"**Mega menu PRO**"* from the module list.
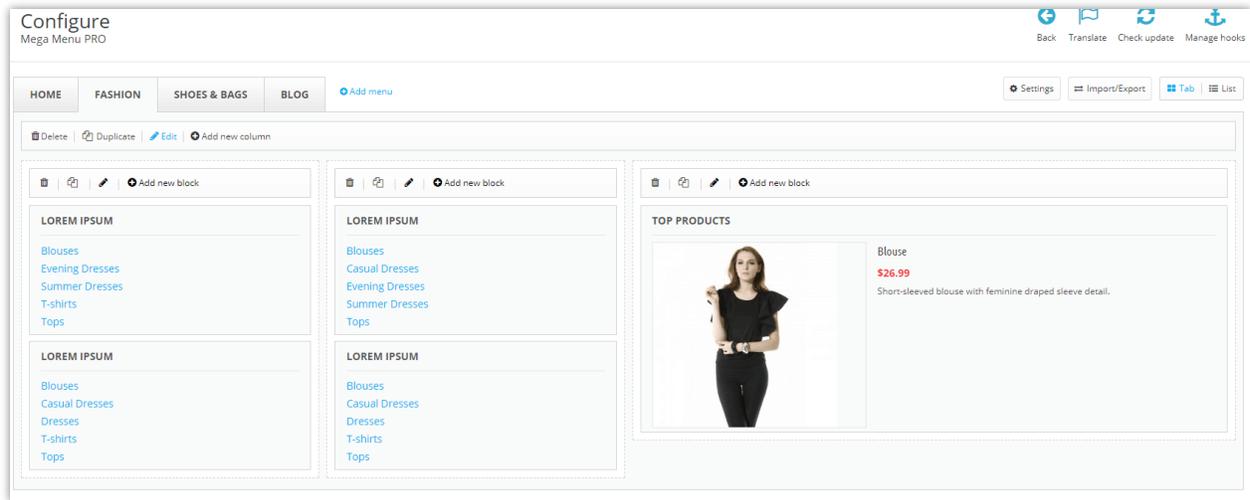

Note: if you are transferring your site to new hosting service or domain, the *"**Enable cache**"* option (in *"**Settings**"* area) should be deactivated by selecting the *"**no**"* option and should be reactivated once the website is transferred, by selecting the *"**yes**"* option. *"**Enable cache**"* helps to load your site faster when you have a complex menu structure.

VII. BLOG MODULE

With this theme you have one of the most powerful Prestashop blog modules in the market place! You have a separated menu to manage your blog in the backoffice. This menu helps you manage your blog posts, categories, comments, slider, gallery and settings.

Note: Set up your *"**notification emails**"* from the settings area in the backoffice to receive notification emails when someone comments on one of your blog posts or reports a comment as abused.

Tip: *To have a link or a menu item to display your blog in the frontend of the website, copy the blog preview link from backoffice and add it to your top mega menu. Settings area gives you many different options for configuring your blog, take some time to check it out.*

VIII. HTML WIDGETS

First of all you need to understand what widgets are. Widgets are combinations of text and images placed on specific positions (hooks) of the website. With this theme you can create unlimited widgets and place them in different positions of your website.

Let's take a look at our frontend after the installation of the theme. These are the widgets that are available by default:

To manage widgets, navigate to *"**Modules / Modules and services / HTML widgets**"*:

Note:

- Uploading images with appropriate size to each widget is necessary because the upload of too large images could break the layout of the theme.

- Import sample data then replace images/text by your real data to make your site like our demo sites.
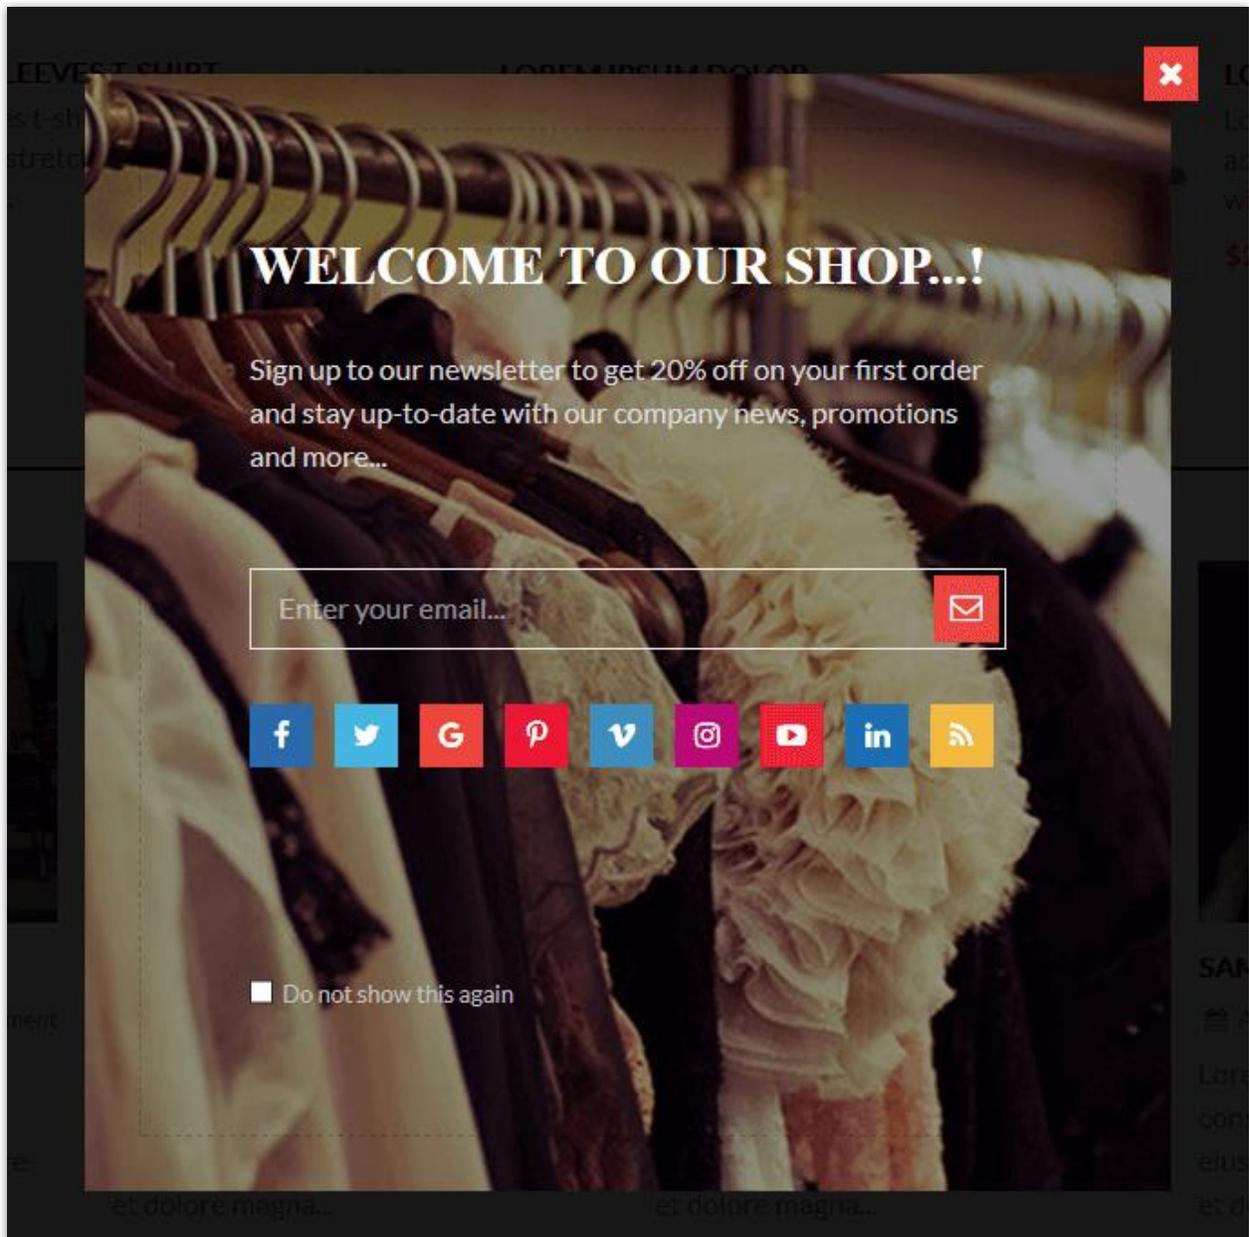

IX.   HOME SLIDER
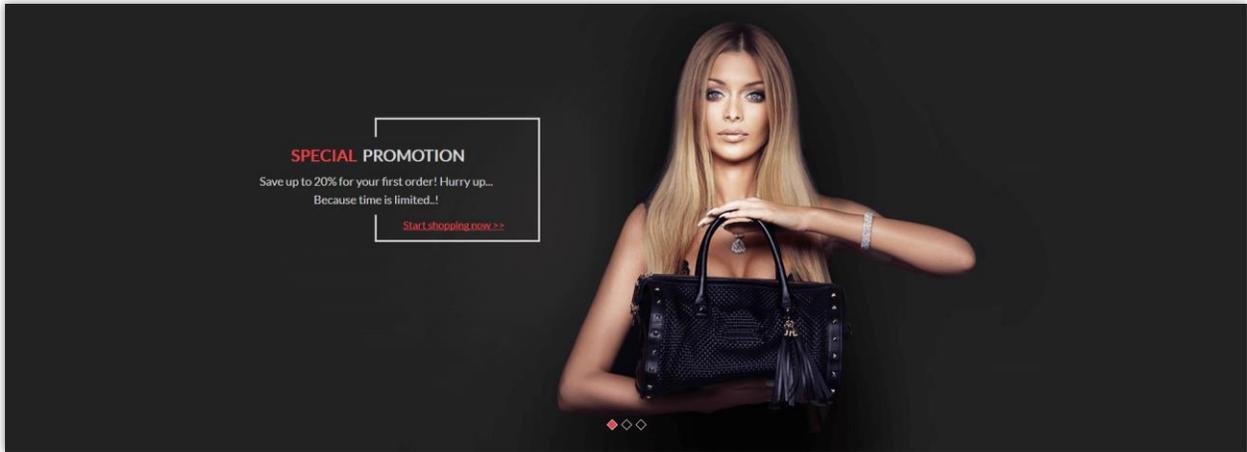

To manage the home slider, navigate to **Modules / Modules and Services / Installed modules** then select *"Multi-layer slider PRO"* from the module list
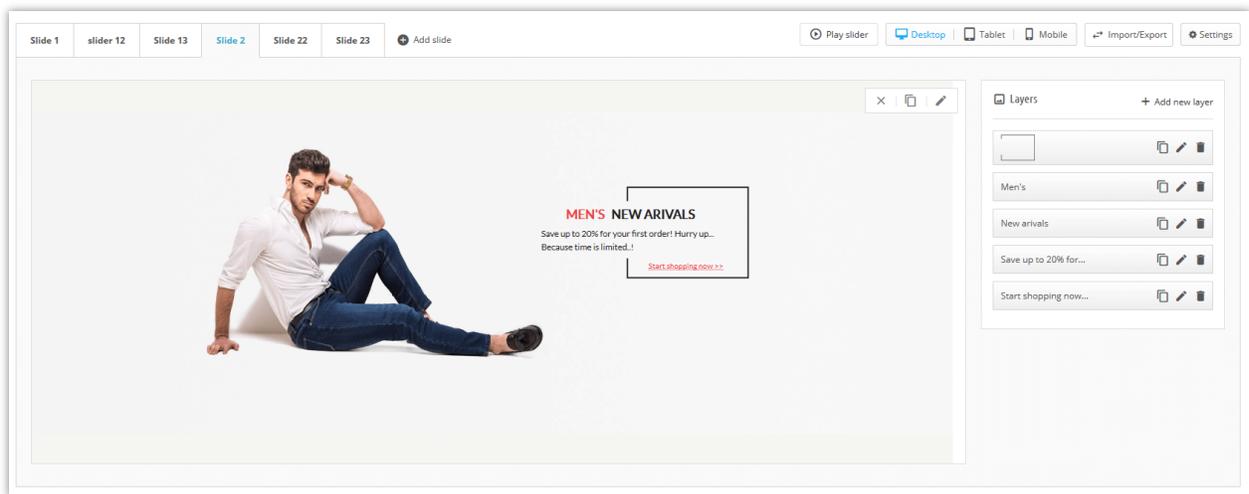

X.   NEWSLETTER POPUP

To manage this module, navigate to "**Modules / Modules and services / Installed module**"

select "**Responsive Newsletter Popup**" from the module list

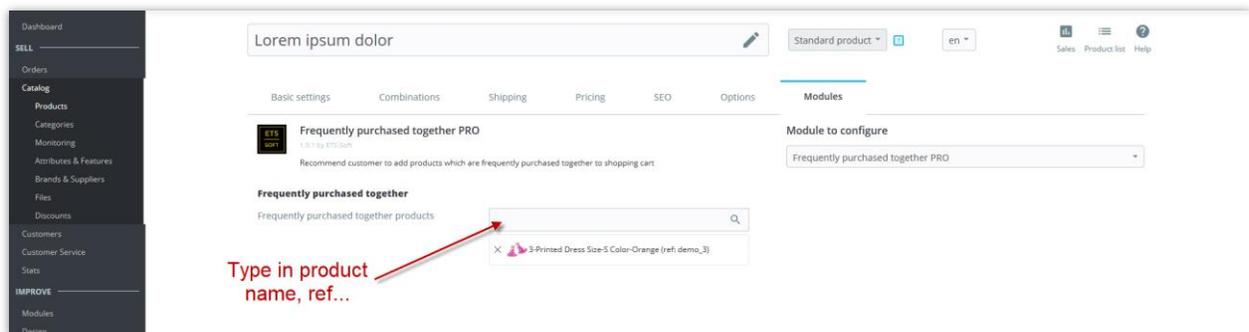

XI.   REVIEW TICKET

To manage this module, navigate to "**Modules / Modules and services / Installed module**" select "**Review Ticker**" from the module list

XII. BULK PURCHASE

To configure this module, navigate to **"Modules / Modules and services / Installed module"** select **"Frequently purchased together PRO"** from the module list
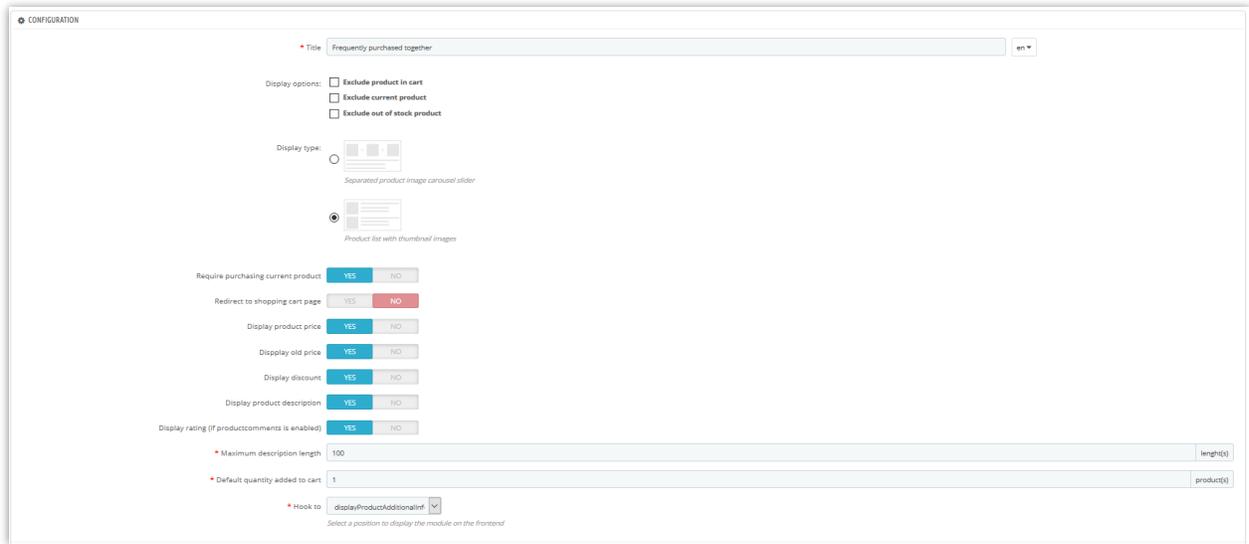

To set products bundle for each single product, open the product from backoffice then select tab "**Modules**" and choose "**Frequently purchased together PRO**"

XIII. MAILCHIMP

This theme is attached with a powerful Mailchimp module which helps you easily integrate your customer database with your Mailchimp account

To manage this module, navigate to *"Modules / Modules and services / Installed module"* select "*Frequently purchased together PRO*" from the module list

XIV. THANK YOU

Thank you again for downloading our product and going through this documentation. We hope this document is helpful and efficient in the installation and usage of **E-BUSINESS** theme. If you do have any questions for which the answer is not available in this document, please feel free to contact us.
